Chiat shifted the account from its New York office to San Francisco after Holland America Cruises decided to merge operations with its Seattle-based Westours subsidiary. Chiat and Livingston (formerly Chiat/Day/Livingston) handled the account since early 1982.

The news surprised both agencies, but Elgin Syferd clearly was not a random choice. The agency resigned its $1.5 million account with Princess Tours, Seattle, on June 1 to tackle the more lucrative Holland America business at the request of Robert Brennan, who

Pet foods see sales gains

By JOHN C. MAXWELL JR.

During 1983, the pet food industry realized a 4.1% gain in dollar sales. Ralston Purina maintained its No. 1 position in terms of market share, with 28.5%. Most of the dollar sales growth came from the cat food area, which showed a year-to-year increase of 9.7%, while dog food sales increased a modest 1.1%.

In units, cat food also showed the best gains. The moist category had a tonnage increase of approximately 6%, while dry cat food was up about 7%. However, the semimoist area experienced a 10% drop in units. It should be noted that although Ralston Purina's Happy Cat is regarded by many in the industry as a "semimoist" cat food, we have included it in the "dry" category at the company's request and because it can be left in the dish like dry products.

The big growth story in dog food in 1984 probably will be in the treats area. Treats were up about 1.5% last year in terms of tonnage. Dry dog food showed a healthy 2% increase. The wet and semimoist categories registered declines of about 1.5% and 6%, respectively.

The trends noted above likely will continue through 1984. The greatest growth potential appears to be in dog-treat specialties and the cat food area over-all. One reason for the continuing growth in dry products for both cats and dogs may be that this type of food is less messy and easier to handle. The strength in cat food may be attributed to an increase in working couples as well as the growth of single-family homes. In this type of environment, cats are more logical pets, as they are practically self-sufficient. On this basis, we believe that cat food will provide the principal real growth in the future.

Pricing should have a definite influence on growth in the future. The industry has not taken a price increase in three years, and we expect that as packaging and ingredient costs escalate there will have to be an increase soon. The timing likely will be determined by industry leaders in the respective categories, but a price increase of approximately 5% may be seen across the board by early fall and perhaps even sooner for certain areas of the business.#

Mr. Maxwell is with A.G. Becker Paribas, New York.

Tropicana puts ad squeeze on foes

By NANCY GIGES

Tropicana Products, already 10 share points ahead of the pack in the $1.2 billion ready-to-serve orange juice market, is pouring 35% more ad dollars into the fight this year to support a new ad campaign.

The new effort, which will help bring ad spending to more than $15 million this year, is the first from Tropicana's new agency, Benton & Bowles, New York. The Beatrice Cos. subsidiary is set to break the multimedia campaign June 18 with an umbrella theme "Squeeze me with a glass of Tropicana," for Pure Premium and Gold 'n Pure varieties.

The company claims Pure Premium is the only major ready-to-serve orange juice not reconstituted with water from concentrate. Gold 'n Pure competes directly with Minute Maid and Citrus Hill brands.

According to Tom Thompson, senior vp at the Bradenton, Fla.-based marketer, the campaign for Pure Premium is designed to illustrate Tropicana's point of difference from competitors: "We come as close as possible to fresh squeezed in a ready-to-serve product."

Unlike the previous "Only one can be the best" campaign created by former agency MCA Advertising, New York, the new one focuses on taste, the "consumer yardstick for evaluating orange juice," Mr. Thompson said.

Tropicana
me
a glass
of
Tropicana

Research shows that the squeezing of the carton in new Tropicana ads has high recall, the company says.

The commercial opens at mealtime with Dad asking, "Somebody squeeze me a glass of Tropicana." Then as music and song begin, a carton of Tropicana is squeezed and poured into a glass. Mr. Thompson said research indicates that this device, seen several times during the spot, has high recall value.

The campaign for Gold 'n Pure will use the same visuals but different audio. The two items—one in a white carton and the other in an orange container—are not advertised in the same markets and often only one of the two is avail-

Marks set for Yankee entrance

By ANGELA CHATBURN

London—Marks & Spencer, one of the most successful clothing manufacturers and retailers in the U.K., will enter the U.S. for the first time next month.

The company plans to launch a trial run of knitwear at Lord & Taylor's New York department store and other Lord & Taylor-owned stores throughout the U.S.

Marks & Spencer—known as "Marks and Sparks" in Britain—said it has no plans now to open stores in the U.S. and will initially be selling only exported goods under its St. Michael label.

But British retail observers say the Lord & Taylor deal might be only the first step in an expansive

Advertisers rapped on Lanham Act use

By NANCY GIGES

New York—In refusing to stop two competitors' advertising, a federal district judge here questioned whether the Lanham Act can be invoked in cases of disputed advertising claims (AA, Jan. 9).

Judge Gerard Goettel refused to grant preliminary injunctions against advertising for Chesebrough-Pond's Vaseline Intensive Care and Procter & Gamble's Wondra lotions. In his opinion, the judge wrote that the Lanham Act, under which this case was brought, was not addressed primarily to advertising and, in fact, was rarely invoked for several decades after its passage.

In recent years, however, that law has been invoked with increasing frequency, the judge pointed out, and this case tries to push the court further by calling on it to evaluate the standards for conducting tests used as a basis for comparative ad claims.

In theory, an argument could be made for creating standards, Judge Goettel said, but in fact, he expressed doubts about whether trial judges could fully comprehend such complicated scientific testimony.

On one hand, the judge played down advertising, calling it "a pervasive part of modern life. . .[that] most of us do not take too

(Continued on Page 43)

Dailey favored by Godfather's

By SCOTT HUME

Godfather's Pizza has ended a methodical, five-month agency search by naming Dailey & Associates, Los Angeles, as its new creative shop.

Dailey, an Interpublic Group of Cos. subsidiary, succeeds Rick Ellis & Associates, Santa Fe, New Mexico, which provided creative since Mr. Ellis resigned his partnership in Ellis & Guy, Omaha, Godfather's former full-service agency (AA, Dec. 5). Cole & Weber, Seattle, will continue to handle media buying for company-owned and some franchised stores.

Total advertising spending this year for Costa Mesa, Cal.-based Godfather's will be about $15 million, although Dailey will work on a creative-fee basis.

The selection of Dailey caps a lengthy, multistage evaluation for the 900-store Godfather's chain, which, under new parent Diversifoods, has been looking at new strategies to catch up with category-leader Pizza Hut (AA, May 7).

"Instead of asking what the agency thinks about the chain and its advertising, we wanted to know what specific people, who would be working on the account, think about Godfather's," vp-marketing Ted Murphy said. They also were asked to provide two reels, one with all work from '83, the other with what they considered their five all-time best creative efforts.

Some special-project creative from Dailey could appear by August, but the first full-scale campaign will not air until September.#

U.S. News staff awaits riches, answers

By DAVID SNYDER

Washington—Staffers, advertisers and competitors have few clues on what's in store once Mortimer Zuckerman, the Boston real estate mogul, locks up his $168.5 million buyout of U.S. News & World Report Inc.

At a crowded news conference this week, where nervous *U.S. News* staffers outnumbered working reporters, Mr. Zuckerman's only comment was that he will continue the publication's "rich and important tradition" and that the magazine's longtime editor, Marvin Stone, will remain at the magazine's helm.

Mr. Zuckerman stressed he wants to keep much of the U.S. News management team intact, but he did not elaborate on who would stay once the deal is approved by the employe-stockholders. Several of them, he noted, would become instant millionaires because of their holdings.

Employes, weighing the significance of Mr. Zuckerman's stated intentions, recalled his similar approach after he acquired the *Atlantic Monthly*—now the *Atlantic*—in 1981 and the subsequent resignations and firings, beginning with editor Robert Manning.

Mr. Zuckerman left his plans for U.S. News sketchy. While he said there are no drastic editorial changes in the works, *U.S. News* under his direction will place a stronger emphasis on graphics and will continue to "keep pace" with its readership.

"There was not a lot of grumbling," one staffer said of the proposal. "It's a pretty nifty multiple." The acquisition price is 57 times earnings.

Under provisions of the package, employe-stockholders will receive $3,000 in cash for each U.S News share owned. In addition, Mr. Zuckerman has agreed to buy out all shares held by company directors in a deferred compensation plan, giving each of the seven directors a $3.6 million bonus.

Aside from Mr. Stone, the fate of other top U.S. News executives re-

To our readers

From time to time, it's entertaining and informative to just look at a portfolio of advertising or to stroll through a gallery of ads—good and bad—from the past to the present. It's even more rewarding if the exhibit is tied together by a theme.

Such a display is currently on exhibit at the Balch Institute for Ethnic Studies in Philadelphia, and the collection is our lead Magazine feature this week. The display is called "Ethnic Images in Advertising," and it contains some 300 advertisements, including posters, magazine and newspaper ads, trade cards and tv storyboards.

The story of the Balch Institute is an interesting one in its own right. It was established out of the proceeds of a trust set up by Emily Swift Balch and her two sons, Edwin Swift Balch and Thomas Willing Balch. Under the trust agreement, when assets grew large enough, which they did in 1957, the trustees would set up an institute for the benefit of the city.

The various courts and public bodies involved decided there was a need for an institute to study ethnicity. The Balch Institute was chartered in 1971 and opened its doors in 1976. It contains archives, a library and a museum.

The Balch Institute

The Balch Institute is in downtown Philadelphia.

Gail Stern, curator of the museum, says response to the ethnic advertising exhibit, which is co-sponsored with the Anti-Defamation League of B'nai Brith, has been overwhelming.

There is enough interest to take the show on the road after it closes at the Balch Institute on Sept. 7. There are already 11 bookings for the exhibit—New York, Long Island, Palm Beach, Boca Raton, Miami, Atlanta, Birmingham, Columbia, S.C., Memphis, Dallas and San Francisco.

Letters

Changing the mix

In your special report on "The Nation's Top 35 Market Research Companies" (May 17), an unfortunate typesetting error has created an impression of National Analysts that I wish to correct.

More than 80% of National Analysts' revenues in 1983 were derived from commercial clients, with the remainder attributable to government agencies and other not-for-profit institutions. There was a period during the 1960s and early 1970s where the majority of our work consisted of survey research for federal agencies. Since that time, our staff's focus on industry and functional specialization has led to steady growth in strategically oriented marketing research for commercial clients, thereby dramatically changing the mix of our business.

Morality not at issue

The article "Without a plan, the carrots just dangle" (Premiums and Promotions, May 10) contains a typo. Frankel & Co. pre-tests premiums with *mall* intercept interviews, not "moral intercept interviews." Researchers are probably about as moral as anyone, but so far we haven't introduced morals into any of our pre-tests!

I also would like to correct the impression that may have been left that it's impossible to measure the motivational value of premiums. As one of the few marketing services agencies with its own research department, Frankel & Co. has often evaluated effectiveness with controlled market tests, payout analyses and opinion surveys with the trade and consumers.

Marji Simon
Director of marketing research
Frankel & Co.
Chicago

Frequent flying

I read with interest Kurt Hoffman's "Airlines Soaring With Frequent Fliers" (Premiums and Promotions, May 10) and found it very informative. However, I was disappointed to read about American's claim of launching the "prototype" frequent flier program. While American, the alleged "founder of the frequent flier frenzy," was still pondering the development of its program, Western Airlines was running a successful frequent flier program in 16 cities.

For the record, the first major airline to launch a frequent flier program was Western Airlines. It was created by Western and McCann-Erickson (Los Angeles) in 1980. Called Western's $50 Travel Pass, it was first introduced on the Los Angeles to San Francisco route in May, 1980. The program proved to be highly successful, and within one year Western had expanded the program to 16 cities and more than 40 flight segments.

It's interesting to note that American began working on a frequent flier program in mid-1980, after Western had successfully launched Travel Pass. The creation of the industry's first frequent flier program was so successful that the American Marketing Assn. awarded Western a 1980 MARSY Award for its pioneering effort.

Thrifty's success

Your feature, "Rental car giveaways a blowout" (Premiums and Promotions, May 10), is a good example of simplistic distortion. The headline would have been much more accurate had it been a little longer: "Rental car giveaways a blowout to most rental companies."

We were pleased that you featured the premium ad of our client, Thrifty Rent-A-Car System, but the article failed to quote a line of the interview made with a Thrifty spokesman when the article was developed.

For the record, Thrifty's phone promotion successfully achieved its purpose, which was twofold. The phone premium attracted a high proportion of new customers who had not heard of or tried Thrifty's service prior to the offer. Just as important is the selection of the phone as the premium; it supported and emphasized our continuing theme of "Call on Thrifty."

Postal rate increases deliver latest skirmish

By Gary M. Levin

The direct-mail business and the newspaper industry are involved in a steamy battle over postal rate increases that each says the other should have to face.

On one side, direct-mail companies say some newspapers take unfair advantage of generally lower second-class rates to mail their shoppers, the common term for advertising vehicles delivered free by newspapers to their nonsubscribers.

Meanwhile, newspaper publishers complain that third-class mail users often are subsidized by other mailers. They argue that direct-mail companies such as Hartford, Conn.-based Advo-System benefit unfairly from rates that make it more profitable to mail several pieces with a single address label.

The dispute likely will intensify through the summer. The Postal Rate Commission must decide in September how to structure its latest round of across-the-board rate increases.

In recent months, the American Newspaper Publishers Assn. has denounced what it considers favoritism in the U.S. Postal Service's third-class mail rates. "The fact is that first and second-class mailers have long recognized that if they're going to mail something that weighs more, they're going to have to pay more for it," says W. Terry Maguire, ANPA's vp-general counsel.

The ANPA takes issue with third-class mail rates that allow companies to mail up to 4 ozs. of preprints for the same price as 1 oz. It also says Advo-System's detached label address card—with paid advertising on the back—should not get a free ride through the mail, and argues instead for a discounted third-class rate.

The direct mailers respond with cries of foul play and say the detached label makes their product easier for the post office to handle.

"They still have the lion's share [of insert business], and now they want all of it," says Robert Huse, executive director, Mail Advertising Service Assn. International, an industry trade group. "They specifically went after Advo on the detached-label issue. The Postal Service approved the technique, and ANPA went to the Postal Rate Commission and said it was unfair. In some shared mail, the ad on the back of the address card makes it break even."

> **"If you start giving permission to anybody putting anything into your mailbox, you would truly be getting a lot of junk."**
>
> *—Robert Huse*

Jack Valentine, president, Advo-System, called ANPA's latest proposal "punitive and self-serving," and said the third-class rate increases sought were aimed at pricing shared mail programs such as Advo's out of existence.

"I don't think they'll succeed because their proposals are too transparent to be adopted," Mr. Valentine says. "And if they were [adopted], the odds are good, based on history, that newspapers would take advantage of higher third-class rates to raise their own rates."

Advo proposed a new subclass of nonaddressed mail in March to skirt the detached label issue, suggesting a separate rate for circulars with no label that could be delivered to the Postal Service's distribution centers. But the rate commission declined to consider that proposal, saying it had no authority to consider such a far-reaching plan in a normal rate hearing.

Some within the direct-mail industry are against such a subclass of mail. "We're absolutely, unequivocally opposed to that," Mr. Huse says. "If you start giving permission to anybody putting anything in your mailbox, you would truly be getting a lot of junk."

The dispute over who should pay how much for what is complicated further by what even a spokesman for the Postal Service called its "enormously convoluted" rate structure.

Basically, the Postal Service says, second-class mail is reserved for timely publications with at least 25% editorial material, while third-class rates apply to advertisers mailing catalogs and circulars. The gray area comes when newspapers use total market coverage vehicles as adjuncts to their regular editions.

To qualify for second-class postal rates, the post office stipulates that at least half the copies go to households that have paid for or requested the

FOODday in The Oregonian and in the mail gives you

THE BEST OF BOTH WORLDS.

In Portland, if total household reach is critical to your sales and merchandising efforts, we have the answer. The Best of Both Worlds — subscriber and non-subscriber households.

IT'S CALLED FOODday.

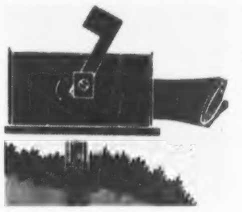
FOODday is a powerful food advertising package with a distribution system that effectively combines the quality paid circulation world with the mailed non-subscriber world.

THE PAID CIRCULATION WORLD.

The inherent receptiveness that comes from paid circulation allows you to get the consistently better demographics that offer you greater sales potential. With FOODday, every Wednesday in the paid circulation of The Oregonian, this is especially true.

THE NON-SUBSCRIBER WORLD.

In the Portland three-county market, food sales account for 37% of the state total. It is in this vital metro area that all non-subscribing households receive the same complete FOODday by mail that subscribing homes receive in their Oregonians.



558,000 CIRCULATION/ DISTRIBUTION.*

The Oregonian
FOODday

FOODday's circulation/distribution of 558,000 enables marketers to maximize their household reach in the most important areas and at the same time reach their primary audience throughout the Portland ADI.

It's the single largest publication in the Pacific Northwest. But even more important, it is also the most efficient.

publication.

Some papers reportedly lump their TMC circulation together with the paid newspaper's to qualify the TMC vehicle for the lower rate.

The newspaper industry's involvement in setting rates puts it on thin ice as far as direct mailers are concerned, especially since a December jury verdict found a Virginia publisher guilty of a "willful attempt to monopolize" the local print advertising business.

That antitrust case involved the *Newport News Daily Press* and *Times Herald*, both owned by Daily Press Inc. A jury ruled the paper had set ad rates for its *Smart Shopper* TMC vehicle artificially low and awarded the plaintiff, Ad-Vantage Publications, $1 in slap-on-the-wrist damages. At issue in the case was how the cost of preparing a TMC should be allocated to its publisher, and whether a company could continue to sustain a new product despite mounting losses.

"Some bad law could emerge from this decision if it is allowed to stand," says Norman L. Freeman, general manager of the Virginia papers. He says the case will be appealed this summer.

"We never felt the relevant product market was clearly defined," Mr. Freeman says. "All print advertising seemed to be included, and I don't think the court ever fully grasped that Advo and other direct mailers are in competition with newspapers."

A 'class' struggle of its own

Total revenues of the post office by class of mail, 1983

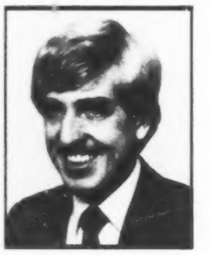
Class of mail	Number of pieces	Weight	Revenue/% of total
First	64.2 billion	2.3 billion lbs.	$14.2 billion/75%
Second	9.2 billion	3.5 billion lbs.	$958 million/5%
Third	40.7 billion	5.0 billion lbs.	$3.67 billion/19%

Sources: Mail Advertising Service Assn., U.S. Postal Service.

Despite what he says were losses of $1,000 a week in its first 15 months of operation, however, Mr. Freeman says he would have lost $250,000 a year in r.o.p. and shopper business from major advertisers had he not provided a TMC package.

"You can't make every product stand on its own," he says. "And we kept them [advertisers] from going to Advo."

Now, however, Daily Press charges advertisers the same-cost-per-thousand rates for the 53,000-circulation shopper as it does for its two daily editions, whose combined circulation its twice that figure.



". . . if they're going to mail something that weighs more, they're going to have to pay more for it."

—W. Terry Maguire

As for cost allocation, the court agreed with Mr. Freeman's contention that existing labor and equipment costs would be paid by the newspaper whether or not it published a TMC shopper.

The Postal Service takes a different view on allocating its costs and pricing structure, and says the labor-intensive nature of its business makes the time spent sorting mail the determining factor of its price.

"It's simply untrue that third-class mail is being subsidized by first-class," a Postal Service spokeswoman says. "Rates are set strictly on a cost basis."

Current rates allow direct mailers using several pieces with a single address label to send 4 ozs. of mail at $74 per thousand, the same rate that applies to a 1-oz. mailing.

While the Postal Service proposes an increase in that figure to $95, the ANPA wants to shift some of the overhead costs now assigned to first-class pieces over to third-class. It also suggests charging Advo and others 5 cents per detached label card, while lowering the per-ounce rate to 6.9 cents.

Mr. Maguire of ANPA says the narrow gap between first and third-class delivery schedules contradicts the ever-widening gap of rates assigned to both classes. He says the low rates now charged by direct mailers ultimately may affect the success of future antitrust actions against newspapers.

"Nothing else in the country, that I'm aware of, even comes close to *This Week*. . . its almost like they are in a league by themselves."

ESPN inks USFL deal: $70 million for 3 years

By SUSAN SPILLMAN

New York—ABC Inc.'s Entertainment & Sports Programming Network has reached a tentative agreement to pay more than $70 million for the three-year exclusive cable rights to U.S. Football League games, more than four times what the cable sports network paid for the games in 1983 and 1984.

The price tag, which shocked some agency execs, is seen both as a desperation ploy by ESPN to hold onto its last high-profile professional sports franchise and as a certain money-loser for the network, which recently was purchased by ABC Video Enterprises for $202 million in cash. ESPN recently lost its National Basketball Assn. cable rights to Ted Turner's WTBS cable superstation, which paid $20 million for the games.

The whopping USFL price tag far exceeds the $9 million a year ABC paid for the network tv rights to the league's games in 1983 and 1984. It is more than four times the $5.5 million ESPN paid for the cable rights in each of those same years. It remains unclear whether ABC-TV Network, which is negotiating a renewal of its current broadcast package with the USFL, will soon reach an agreement with the league, or how the hefty ESPN price will affect those negotiations.

The tentative agreement reportedly was reached last Tuesday, the day before ABC Video Enterprises announced it was ending its experiment in home videotaping and shutting down its TeleFirst venture after six months of testing the service in Chicago *(see story on Page 94)*. The USFL deal, combined with the hefty cash outlay by ABC Video to purchase ESPN, has increased speculation that the ABC unit will press its search for a partner in the cable sports network.

"That's a preposterous sum of money," said Steve Leff, exec vp, Backer & Spielvogel, whose client, Miller Brewing, is a current sponsor of the USFL games. "I honestly wonder if there is enough money in the marketplace to cover it. It's mind-boggling that they could go out and make such a deal without

Cigaret marketers come out smokin' with innovations

By WILLIAM GLOEDE

Marketing activity in the cigaret business is on the upswing, with brand extensions, new brand introductions and a new twist—price stratification—beginning to heat up after nearly 18 months of relative calm.

The cigaret industry was hit at the beginning of 1983 with the doubling of the federal cigaret excise tax from 8¢ to 16¢ per package. Marketers at the major tobacco companies believe it was the tax increase that cost the industry 5% to 6% in total unit sales volume last year.

But today, says William Campbell, exec vp-marketing for Philip Morris USA, the industry "is in a state of change. How revolutionary that state of change is is not sure yet." But, he adds, "It's unlikely that the industry will ever be quite the same."

Among the recent developments:

- Philip Morris last week confirmed it will test a 25-cigaret package of Marlboro Red in Spokane, Wash., and Indianapolis, and a 25-cigaret package of Marlboro Lights in Indianapolis, beginning July 2. Tobacco industry sources said the new Marlboro packaging, both Red and Lights, has also been spotted in the New England area.

The new package will sell for 25% more per package than the 20-unit pack, but cartons will still contain 200 smokes and will be

Grey forms 2nd world agency net

By VALERIE MACKIE

Grey Advertising formed a second international agency network last week that unites offices in 13 countries in Europe, Australia and North and South America.

Grey follows other multinational agencies, including Ogilvy & Mather and Young & Rubicam, in forming dual agency networks worldwide to handle conflicting accounts. This has become important as many advertisers move to global "world brand" assignments, increasing the chance of conflict.

Grey's second network, called

Pizza Hut cues ads

Pizza Hut is using couponed inserts to boost the Bar-B-Q pizza it has rolled to 25% of its 4,000 stores (AA, June 14). The campaign, which includes tv, radio and outdoor, was created by former agency Foote, Cone & Belding, Chicago. A new agency may be named next month.

New dairy group has two choices

Who gets milk fund millions?

By JANET NEIMAN

A new dairy promotion board is expected to choose soon between a federation of industry organizations and a top-10 ad agency to handle a $65 million-to-$190 million ad effort.

The National Dairy Promotion & Research Board, the newly formed organization administering the funds, will hear presentations this week from the federation and agencies vying for the money, which would be used to promote dairy products.

The federation, not officially formed at press time, would comprise the United Dairy Industry Assn., which represents 20 state and local dairy organizations; the California Milk Advisory Board, and the Oregon and Washington dairy products commissions. Sources said establishment of the federation was almost certain.

If the federation wins approval from the NDPRB, it would oversee the funds and use its existing agencies and creative to execute the campaign.

The alternative is for the NDPRB to select its own agency to create a campaign. The agency finalists had not been determined at press time. Louis Calcagno, NDPRB advertising and sales promotion committee chairman and also the chairman of the California Milk Advisory Board, said the nation's 10 highest-billing agencies were invited to compete for the assignment. Of those that expressed interest, three or four will be asked to make presentations in Chicago this week, Mr. Calcagno said.

The funds stem from an assessment on dairy farmers created by the Tobacco & Dairy Readjustment Act of 1983, which also established the NDPRB. The assessment, col-

Ayer stands alone in roll call for Army account

Washington—Incumbent N W Ayer is reportedly the only agency slated to give an oral presentation for the U.S. Army's tantalizing $80 million account. The presentation is slated for July 9. Neither the Army nor Ayer would comment, but if the agency is the only contestant, it would be the first time in the history of the account that Ayer has reached this stage with no competition.

Motorola corporate account stays with Y&R

Schaumburg, Ill.—Motorola has decided to keep its $5 million corporate advertising account at Young & Rubicam Chicago, which has handled it for six years. Dancer Fitzgerald Sample, San Francisco, was the only other agency involved in the review.

Seven-Up tests JuiceUp frozen concentrates

Ventura, Cal.—Seven-Up Co.'s Ventura Coastal/Seven-Up Foods division is testing JuiceUp lemonade and lemon-limeade frozen concentrates in Erie, Pa., and Phoenix, Ariz. Packaging carries the 7UP logo. Tv and print advertising from Workshop West, Beverly Hills, supports the test, stressing that the product contains fresh-squeezed lemon juice. Ventura Coastal has been talking with several Los Angeles agencies about the permanent assignment for JuiceUp and possibly another new product (AA, May 24), sources say.

(Continued on Page 8)

Cookies shift war to East

New York—The latest instalment of "cookie wars" is coming to the eastern U.S., where Cincinnati-based Procter & Gamble is introducing its Duncan Hines chocolate-chip cookie line amid heightened competition from its top rivals.

The Duncan Hines line last week moved into most of New England and parts of New York state, including New York City, along with parts of Texas and Louisiana. That situates the brand in most of the South Central and East, except upper New England and the Southeast.

Advertising for the Duncan Hines line, from Grey Advertising, New York, is expected to start in about six weeks and include the same "crispy, chewy" theme P&G began in test market to convey the outside crispness-inside chewiness formula used in the cookies.

In New York, Duncan Hines will meet its newest soft cookies competitor: A chewy version of Chips Ahoy! Nabisco's popular chocolate-chip line. Nabisco, which has been rolling out its competitive Almost Home soft-cookie line as fast as possible, is introducing the new item in New York now, and will roll it into the rest of the country by yearend.

The move is seen as protection for the country's best-selling chocolate-chip cookie. Heavy advertising is planned via Dancer Fitzgerald Sample, New York, which also handles Nabisco's new Almost Home cookie line.

That line also includes a chocolate-chip cookie, but analysts

Buyers plunge into upfront

By JAMES P. FORKAN

New York—"All hell broke loose" said one agency executive as the first major sales rush of the 1984-85 network tv upfront sales season hit last Thursday and Friday, with movie companies and Coca-Cola among the buyers set.

The late week buying spree materialized despite statements from agency executives that unreasonable network pricing was forcing the market to slow down in the wake of Paul Schulman Co.'s traditional opening buy for Ralston Purina (AA, June 11).

Network executives also were bullishly predicting that network combined upfront prime time sales would top $2.2 billion this year, a $350 million gain over last season, excluding Olympics dollars. However, much of the increase will come from advertiser dollars normally slated for the scatter market, with lesser amounts coming from new brands or brands spending more than a year ago.

If that is the case, it appears the networks expect the scatter market, especially in the first quarter of 1985, will not be strong and it will be more profitable to get the ad dollars upfront than wait for the normally higher-price scatter buys. The network increases in prime time upfront dollar volume, then, may reflect greater available inventory more than increased total spending or prices.

One buyer last week estimated the nets now are about two weeks ahead of a year ago.

ABC still seems bent on finishing upfront by the start of the Los Angeles Olympics. That is forcing CBS to match its aggressive pace, as some agencies see it, while NBC "goes its own way," at its own rate, as one buyer put it.

Jake Keever, ABC vp-sales, said, "Business is very good at all three networks." ABC could wrap up its negotiations by July 17 or 18, about 10 days before the Summer Olympics begin.

Rick Busciglio, exec vp-director of media services, McCann-Erickson, New York, declined to comment on his clients' upfront status. However, sources say McCann, for Coca-Cola USA and Western Media International, Los Angeles, now has finished upfront purchases on two or more networks. Coca-Cola earlier made major commitments in barter syndication's version of an upfront selling season, and last month channeled some additional buys into barter, according to Lexington Broadcast Services and others.

Mr. Busciglio said, "The dam is breaking right now" in the number of agencies closing upfront deals. "It's proven a stronger marketplace than anticipated," so much so that he said the nets could reach $2.3 billion in upfront volume. Some of that will be "new money" and some will "come from moving scatter [availabilities] up."

As for those stalling in hopes of lowering rates, Mr. Busciglio felt they are "only going to pay more, as has happened the last five years, and we don't see any reason for that to change this year."

Aaron Cohen, vp-general manager/broadcast, Grey Advertising, said, "A lot of money" was spent last week and he added the upfront selling could be closed "within two weeks."

Movie advertising was perhaps the busiest

(Continued on Page 94)

Old Style L.A. brews comparative pitch

By SCOTT HUME

Barely six months old, the low-alcohol beer category already has gotten its first comparative advertising.

A tv spot for G. Heileman Brewing's Old Style L.A. that broke June 16 in Chicago places the brand beside a can of Anheuser-Busch's LA. The voiceover explains that LA's 110 calories per can are "50% more" than Old Style L.A.'s 73 calories.

The tv spot, as well as print ads that broke June 15, carry the theme "Half the alcohol. Half the calories." Campbell-Mithun, Chicago, is the agency for Heileman's Old Style line.

Old Style L.A. will be Heileman's primary low-alcohol brand in the Midwest, but the brewer plans to have at least one such brand in every region by the end of July. Heileman also is producing Blatz L.A., Carling Black Label L.A., Rainier L.A. and Lone Star L.A. It has not ruled out using similar comparative advertising to introduce those other brands.

The positioning Heileman has chosen for Old Style L.A. has several benefits, chairman Russell Cleary said in an interview. The name ties the low-alcohol brand to regular Old Style, the dominant brand in the Chicago market (with a better than 30% share, compared with less than 10% for Anheuser-Busch's Budweiser). Heileman can't compete with the more than $20 million A-B said it will spend

(Continued on Page 96)

Nets defend against 'Kickoff Classic'

By JAMES P. FORKAN

New York—The tv networks, fearing mounting affiliate defections Aug. 27 to carry Katz Sports' syndicated "Kickoff Classic" college football game, are making major counterprograming moves for that night.

NBC is planning a rebroadcast of the miniseries "V" to tie in with the show's becoming a regular series in the fall. Since its affiliate convention in May, NBC has told its stations that preempting "V" for the Kickoff Classic would hurt the series' chances in the fall. As a result, NBC has refused to allow affiliates to show the "V" miniseries repeat on a delayed basis.

Nevertheless, Katz Sports reports it has cleared more than 104 stations, including 75 network affiliates, for the game. Thirty NBC and 25 ABC affiliates have signed up. About 20 CBS affiliates also are signed on.

It is the second year in a row that the barter-syndicated special has created havoc with affiliate loyalty. While NBC last year tried to counterprogram with a rebroadcast of "The Godfather Saga," its efforts this year are striking closer to the heart of affiliate interests.

New h&ba items tried by Norman

By RUTH STROUD

Los Angeles—Merle Norman Cosmetics is hoping to double its skincare-products sales—one of the fastest-growing segments in the health & beauty aids business—with four new products aimed at working women.

The 54-year-old company will start a $5.5 million print campaign using a variation on the distinctive before-and-after approach it has used in past advertising for its makeup line (AA, June 7).

Merle Norman's new products are aimed at women in households with more than $25,000 in income who are 25 to 54, a slightly older group than the company has targeted in its long-running makeover campaigns.

The new line includes a soapless facial bar, cleansing lotion, new toner called Refining Lotion and tinted moisturizer, which comes in four shades and two formulations. Suggested retail prices range from $7.50 for the facial bar to $12 for the moisturizer.

All four are dermatologically tested and fragrance-free, new designations for the company's products. Those designations are among the hottest areas in the $2.5

Cable ruling leaves issues unanswered

By STANLEY E. COHEN

WASHINGTON—The Supreme Court ruled this week that states can't keep wine commercials off cable systems, but stopped short of deciding the free speech issues that advertising and media associations hoped to resolve.

The National Assn. of Broadcasters, American Advertising Federation and National Cable Television Assn. were among groups expressing relief that the court struck down Oklahoma's law requiring in-state cable systems to strip wine commercials from imported tv signals.

At the same time they were openly disappointed that the court did not address what they regarded as the overriding question: Their contention that governments can't stop the distribution of truthful advertising for legally available products and services.

The ruling creates an ambiguous situation in which Oklahoma, at least for the present, can continue enforcing laws requiring in-state tv stations to strip wine commercials from network signals, but can't keep in-state cable systems from importing the same network commercials along with signals from out-of-state network affiliates.

Ron Kirby, general manager of KSWO-TV, Lawton, Okla., and president of the Oklahoma Broadcasters

Commission savings eyed for units

RJR print buys move in-house

By WILLIAM GLOEDE

NEW YORK—The in-house media department of the R.J. Reynolds Tobacco Co. has begun buying all print media for three R.J. Reynolds Industries subsidiaries: Heublein Spirits and Wine Co., Kentucky Fried Chicken Corp. and the Del Monte Corp.

The move has made R.J. Reynold's media services department the print agency of record for all RJR, Heublein and Del Monte brands. And it has caused RJR to cut the standard 15% commission it had paid agencies for print advertising for Heublein and Del Monte brands, although RJR executives will not specify how the commission structure has been changed, or at which agencies.

Among the agencies with Del Monte or Heublein assignments are BBDO/West, San Francisco; McCann-Erickson, San Francisco; Marschalk Co., New York; Young & Rubicam, Chicago; Castor Spanish International, New York; Uniworld Group, New York, and Laurence, Charles & Free, New York. Marschalk, which was agency of record for Del Monte and Heublein print, lost buying and billings responsibilities, but retains creative and media planning.

R.J. Reynolds Industries' spent nearly $500 million in 1983, according to an ADVERTISING AGE estimate based on data from Leading National Advertisers, Media Records Inc. and Publishers Information Bureau.

The media services department, based in Winston-Salem, N.C., handled roughly $300 million of the total ad budget.

Dan Pearson, director of the media services department, said bringing Del Monte and Heublein print-media operations in-house has allowed greater efficiency. Copy changes or competitive ad breaks can be made in 72 hours. The media specialists in Winston-Salem are closer to the various brand-management groups, he said.

Del Monte and Heublein have coordinated their broadcast-media operations through Heublein's advertising services group since July. The group supervises spending and placement, handled by Young & Rubicam, Chicago (network), and Marshalk Co. (spot).

Said Robert Ward, director of advertising services for Heublein, "Thus far, it has worked out very well." He explained that when the coordination effort began, the way Heublein compensates its agencies also changed. "When we make a move like this, the standard 15% commission is reduced. We have lowered the commission," he said.

The move brings all of RJR Industries' print-media operations in-house at RJR's Winston-Salem offices. RJR Industries' print ad agencies are now mainly media planners. No further consolidation is in the works, say the execs.#

3 shops vie to serve milk

By JANET NEIMAN

CHICAGO—BBDO, Grey Advertising and Young & Rubicam are finalists for the National Dairy Promotion and Research Board's $65 million-to-$190 million account.

The three agencies will compete for the account with a federation of the United Dairy Industry Assn., California Milk Advisory Board and Oregon and Washington state dairy products commissions.

The federation, which was expected to be established this week, hopes to oversee the NDPRB funds, executing the campaign with its existing agencies and creative work (AA, June 18).

The NDPRB is scheduled to meet here Thursday and Friday to hear presentations from the three agencies and the federation. During the 45-minute presentations, the agencies will tell the 35-member NDPRB how soon they would begin their campaigns and detail the staffing that will handle the account.

Rapid execution is essential for the program, because a referendum asking farmers if they want to continue the funding program is scheduled for September, 1985.

BBDO, Grey and Y&R were chosen from a list of eight top U.S. shops that expressed interest in the assignment. Of the 10 highest-

Hungry FCB nets Long John account

By SCOTT HUME

Moving quickly, Long John Silver's Seafood Shoppes this week named Foote, Cone & Belding, Chicago, to handle its $20 million creative assignment. The account was pulled from Jordan, Case & McGrath, New York, late last month.

The assignment also represents some quick work by FCB, which last month lost the $20 million Pizza Hut account and immediately announced its intention to gain another restaurant-chain client (AA, May 7).

Industry observers had cast FCB as an early favorite for the Long John Silver's account (AA, June 4). They noted its connection with LJS senior vp-marketing Anthony Lavely, who came to the chain this year from Kitchens of Sara Lee, another FCB client. A chain spokesman declined to name the other four finalists for the account.

Time for change at Pulsar

By ROBERT RAISSMAN

Pulsar Time Inc., Mahway, N.J., is seeking to replace Sawdon & Bess, a Ted Bates Worldwide unit, on its $5 million account. Bates units have other watch lines from Pulsar parent K. Hattori & Co., notably Seiko Time Corp., Pulsar president Arthur Cohen said. Bates' AC&R Advertising handles Seiko.

Sources noted Pulsar's growing presence in Seiko's mid-price watch segment.

Compton Advertising; Ogilvy & Mather; Ammirati & Puris, and Doyle Dane Bernbach are believed to be candidates for the Pulsar account. Mr. Cohen declined comment.#

Regional agencies on McCann's list

By STEWART ALTER

McCann-Erickson Worldwide may be close to acquiring an unspecified number of regional U.S. ad agencies.

"There are a couple of acquisition discussions we're involved in that could come to fruition before the summer is over," said Robert James, president-chief operating officer of the agency.

McCann's move to step aggressively onto the acquisition trail dates back to the formulation of its most recent five-year plan about 18 months ago. The agency decided then that McCann's earnings should be "reinvested in McCann," Mr. James said, and no longer would go chiefly to fund parent Interpublic Group of Cos.' acquisitions.

McCann, which had $636.4 million in U.S. billings out of a worldwide total of $1.99 billion in 1983, last acquired a regional agency in March, 1981, when it bought Zimmer-McClasky-Lewis, Louisville.

Mr. James said McCann is most interested in the Southeast and cities such as San Diego, Denver, Minneapolis and Phoenix. He added that the "highest priority" would be to reenter Chicago, although none of the current discussions centers on that city. McCann, which has nine U.S. offices, closed its Chicago branch in late 1982.

Any acquired shop would need to have a multinational client or the potential for handling one. "What characterizes McCann agencies is that each one around the U.S. has at least one or two multinational clients," said Mr. James. McCann's U.S. billings are spread across the country, with New York accounting for a third of the total.#

To our readers

One of the most interesting aspects of the career of British tv commercial director Ridley Scott, as correspondent Sean Milmo points out in today's article, is Mr. Scott's ability to move with ease between the worlds of commercials and motion pictures.

Not only has he directed stunningly creative spots for clients that include Chanel, Pepsi-Cola and Apple's Macintosh (the highly publicized "1984" commercial that ran in January), but he also has directed "Alien" and "Blade Runner" and is about to begin another film, a mythical tale of good and evil called "Legend."

Mr. Scott is hardly unique, of course. For years, commercial makers have been adapting their talents to the big screen, with varied success, among them Stan Dragoti ("Mr. Mom," "Love at First Bite") and Howard Zieff ("Private Benjamin").

The most conspicuous current example of linkage between advertising and film-making is probably BBDO's vice-chairman and executive creative director, Phil Dusenberry, who co-wrote the screenplay for "The Natural" starring Robert Redford and Robert Duvall, one of this summer's blockbuster movies.

In Mr. Dusenberry's case, a longtime love of baseball has helped provide that link. He has used the national pastime effectively in commercials for both General Electric and Pepsi-Cola.

In an Advertising Age Magazine profile of Mr. Dusenberry in 1983, editor-at-large Joseph M. Winski wrote that his nostalgic Pepsi commercial "Homecoming," about a baseball player being welcomed back to his own town after winning a championship, was based loosely upon the central character in Bernard Malamud's baseball novel "The Natural."

Mr. Dusenberry, whose longtime goal was to see "The Natural" made into a film, even then had completed a screenplay—currently the center of considerable controversy among filmgoers—that drastically altered the novel's ending.

And like it or not—I for one did—the conclusion of the movie is substantially the way Phil Dusenberry wrote it.

Cycle fantasy

With reference to Cecelia Reed's story on her Tunturi stationary bicycle and her desire to ride it through the park (Fitness Marketing, May 24), I invite her to prop up our enclosed brochure (below) of bicycling vacations on the handlebars of the Tunturi and dream about cycling in Vermont while she pedals away for 10 minutes each morning!

Better yet, Ms. Reed can continue to use the Tunturi as a clothes hanger and join us for some real cycling on one of our tours in beautiful Vermont! She'll ride through park-like countrysides and return relaxed and refreshed ready to face another deadline at AD AGE with renewed enthusiasm!

More on videotex

I particularly appreciated Rance Crain's column on videotex (Parting Shot, May 10). I get at least one call a month from someone who remembers that I was the founder of the company that began Nexis and Lexis (now sold to the Mead Corp.). The most important lesson I learned in the late 1960s when Lexis first went on line was that it is extremely important to know that you have a customer who not only wants information, but is willing to pay for it. We had a previous abortive try at fielding a medical information system. But I quickly learned that the patient was not overly enthusiastic about paying to educate his doctor.

After that disaster, I looked for a customer who was already trained and willing to pay for research. The legal client fit the bill perfectly, and that's the reason we turned our information technology in the direction of the law.

I feel Mr. Crain's editorial is going to save a lot of people in the industry a great deal of money. I sense that there are too many who are willing to throw money at the information technology market simply because they feel that they should be part of the action.

William F. Gorog
President
Magazine Publishers Assn.
New York

Rance Crain seems to think consumers neither want nor need videotex.

Mr. Crain says videotex won't fly because he wouldn't buy it. His view isn't shared by the participants in a nine-month videotex field trial conducted by Times Mirror in the greater Los Angeles area. At the end of the trial more than half of the participants said they wanted the service and were willing to pay for it.

Mr. Crain states that consumers won't use videotex because they can get news on an all-news radio station, and they won't give up the social interaction of shopping in stores. I submit the consumer will look favorably on the ability to obtain an important news story immediately without listening to an entire program on all news radio. As for shopping, given the option of saving time and money versus a social interaction . . . millions of shoppers are expressing themselves via catalog purchases today.

Mr. Crain says, "I'm not at all convinced that two-way anything will ever be more than an expensive gimmick." It was this kind of thinking that kept Western Union out of the telephone business.

Defending dealer advertising

The road to car sales is littered with tacky and degrading images—examples of advertising at its worst. Or so say ad industry observers.

Some dealers, however, insist that a sale is a sale—that gimmicks are the only way to cut through the clutter of dealership advertising, which amounted to more than $1.2 billion in 1982.

Other dealers question the reputation dealer ads have acquired, pointing to sophisticated, innovative commercials as evidence of a trend to better-quality marketing. And still others blame ad agencies themselves for bad dealer ads; they say experienced agencies are unwilling to share that experience with auto dealers.

Are auto dealers' reputations for bad advertising justified? How sophisticated can—or should—dealer advertising become? What impact have syndicated advertising programs had on the quality of dealer advertising?

Finally, what's ahead for dealership advertising, now that recessionary days are at least temporarily over and happy days are here again? Advertising Age Magazine polled a cross section of experts in auto dealer advertising for their opinions and outlooks.

COMMENTARY CORNER

Doug Ekman heads Dawson & Dawson, the advertising arm of Hanley Dawson Toyota-Saab, Chicago.

His agency's ad-lib commercials featuring offbeat Chicago disc jockey Steve Dahl took the top award in this year's Radio Advertising Bureau/National Assn. of Auto Dealers competition.

"For ad people to call auto dealer advertising unsophisticated is a misunderstanding, in part, because they really don't understand it.

"They know little about dealership advertising. There is just a holier-than-thou attitude pervading too much of advertising circles.

"It is as inappropriate to use some kinds of 'sophisticated' advertising for auto dealers as it is to wear black tie to a hayride.

> **"It is as inappropriate to use some kinds of 'sophisticated' advertising for auto dealers as it is to wear black tie to a hayride."**
>
> *—Doug Ekman*

Auto dealer advertising is an art form unto itself; it's controlled schlock, almost.

"And you have to remember that it's the public that makes it popular—a lot of dealerships run schlocky advertising that really works.

"Auto dealers are not more difficult clients, except that they demand a faster turnaround time—they fight constantly with their agencies over that. Because the market changes so fast, they have to be on the air in 24 or 48 hours sometimes. There's no time for storyboards or testing. Car dealers can't wait. Speed is at a premium.

> **". . . there's still a large body of dealers who can't resist peddling junk advertising . . . ."**
>
> *—Don Roy*

"Dealers also like dealing directly with the people at the top. And they want it done *now.*

"But the good thing is that you always know where you're at with car dealers. They certainly don't mince words.

"There will always be a need for syndicated dealership advertising, just like there's a need for McDonald's.

"But today many dealers are demanding more than just a suit off the rack. Since the car business has become more and more

Dealer

(Continued from Page 26)

regional in nature—consumer tastes vary drastically from, say, California to Texas—syndicated ads often are not very effective."

Allen Gaines owns Fireside Chrysler-Plymouth, Schaumburg, Ill.

Fireside, the fourth largest Chrysler dealership in the U.S., spent about $350,000—of its $50 million in sales—on advertising in 1983.

"What I have found is that auto dealers, like many small businessmen, have no place to go for good advertising. What a dilemma!

"We are not supposed to know how to advertise our products, but professional ad agencies turn us down—either because our account is too small or just because we're auto dealers.

"But agencies seem to have a special prejudice against auto dealers.

"Most manufacturers have their own agencies handle dealer association accounts, too—so it would seem logical for those agencies also to open a branch for individual dealer advertising.

"But dealers aren't blameless, either. They tend to view advertising as a necessary evil. And both dealers and factories already seem to have returned to the arrogance of the past, which got them in trouble in the first place.

"You won't find much good dealer advertising until more dealers realize they must spend money and time to make it effective."

Chuck Simo is president and founder of 4D's Enterprises, an advertising agency that exclusively handles large Chicago-area dealerships, including Fireside Chrysler-Plymouth.

His agency produced an award-winning series of radio commercials for Weil Oldsmobile, Libertyville, Ill., using Dick Orkin and Bert Berdis as talent.

"The whole universe of auto dealers is looked upon as a stepchild by agencies.

"It's true, though, that dealers are often egos—they're true entrepreneurs—and somewhat hard to deal with.

"The same dealer who prides himself on getting the best accountant and the best lawyer will insist on doing his own advertising."

Don Roy is president of Nashville-based Admark Inc. and its Dealer Advertising Development subsidiary. DAD produces syndicated advertising and marketing campaigns for about 150 auto dealerships; the agency says it is adding 18 to 20 new clients each month.

"Syndicated advertising gives an auto dealer the ability to make long-term marketing decisions.

"It helps him respond to the emergence of a new marketplace. The competition has changed on the dealer side, and buying motivations on the consumer side have changed, too.

"We don't see the present boom in auto sales continuing forever. We want to anticipate the next wave of buyer resistance—by educating our dealer clients so that they will realize that an umbrella marketing concept can exist, in a modified sense, despite economic conditions.

"Some dealers already are getting more sophisticated. However, there's still a large body of dealers who can't resist peddling junk advertising that's offensive and demeaning to their clientele.

"But sometimes it's too easy to criticize them and the things they do in the media.

"Automobile dealerships are one of the last bastions of free enterprise.

"Most often dealers are guys who are willing to invest large amounts of time and money—and risk a lot—to start their own business.

"They run the wildest range—from third-grade educations to Harvard MBAs. And they too often get very little credit for their contribution to the economic well-being of the community—in terms of employment and community involvement.

"And actually, dealers around the country show amazing ingenuity in advertising—albeit tacky sometimes. We have lost that adventurous spirit in so many areas of small business."

Dick O'Donnell is vp-Detroit sales for the Television Bureau of Advertising.

"Prior to 1979, when U.S. dealers had virtually no foreign competition, dealer advertising could afford to be personality-oriented.

"The subsequent changes in dealer ads reflect changes in the market.

"In the early 1980s, when customers turned to foreign cars for fuel economy and performance, dealers began to realize that brand loyalty no longer existed. The customer was fickle.

"And it dawned on them that if they did not advertise, their top of mind position would be lost forever.

"They started advertising product, service, reliability.

"With the cost of autos so high nowadays, many customers experience 'sticker shock.' They need quality advertising to reassure them.

"In addition, the profile of the average car buyer has changed. He's in the $30,000-plus income bracket.

"He's much more upscale and very differently motivated than the customer of yesterday.

"He demands a different kind of advertising approach.

"Above all else, there is a growing perception of the auto dealer as retailer. Dealers used to believe they were competing only with other dealers.

"Now, many are aware they're competing with all the other local retailers in their area. And they're using more advertising to keep on consumers' 'buy lists.'"

C.L. Strickland is a partner in Strickland Chevrolet, a Bloomington, Ill., dealership selling about 1,300 cars and trucks a year. He uses the services of a syndicated advertising company.

"Unless you're a particularly old dealership—and can advertise your age—syndicated ads are the way to build your reputation.

"My agency is just about as familiar with my business as I am. A normal ad agency can produce dealer advertising—if you tell them exactly how to sell cars. That's the difference between using a guy who specializes in autos and a regular agency. And to me that's a big plus.

"If I need a program to sell some excess 'people movers' [minivans and utility vehicles], a syndicated advertiser can respond to me much more quickly than a normal agency—because maybe some other dealer called them last week with the same problem.

"I would have to admit I would prefer that there were no other 'good people' campaigns in the country, but as long as those dealers are not close to me, I guess it's okay.

"I'd bet that 50% of all auto dealerships still don't have an agency.

"And I don't think you have quality ads without a professional agency.

"Then you end up with Ford dealers pulling their pants off on tv.

"That's nonsense.

"We dealers need to tell consumers that we are quality and our products are quality.

"We're competing with all those import cars—and consumers still think import dealers put their pants on differently." ■

States finding lotteries are good gambles

An Advertising Age roundup

"To win it, you've got to be in it," say ads for New York state's weekly lottery. More than $60 million will be spent on advertising this year by states coast to coast as they use the lottery craze to generate funds for everything from education to low-cost prescription drugs for senior citizens.

The **New York** State Lottery has a $12.3 million ad budget—double last year's spending. Rumrill-Hoyt, its agency, handles twice-a-week Lotto, daily numbers and instant games.

Lotto advertising is primarily in tv; the budget was increased three

Regional report

weeks ago to $2.2 million for media and production. Media for "New York numbers" include radio ($1.2 million) and transit ($600,000).

A $3.5 million tv campaign revived the Instant Games contest, according to Sherry Harrington, ad director. The theme changes every 12 weeks when a new $1 million jackpot winner is drawn; "Someone's going to win, why not you?" is the latest.

New York's lottery, which began in 1967, provides funds for education.

The **Pennsylvania** lottery recorded more than $1 billion in sales and $471 million in profit for fiscal 1983. That's roughly 20% of the $5.2 billion wagered in lotteries in 17 states and in D.C. during the year. The Pennsylvania State Department of Revenue says losers gave 4.7% to the state's $10 billion annual budget.

Lewis, Gilman & Kynett, Philadelphia, handles; the budget was put at $7.5 million. Pennsylvania began its lottery in 1972. Revenues go to senior-citizen programs.

A yearlong ad campaign will include 30-second tv spots with newspaper print ads and outdoor boards as secondary media.

Last week, the **New Jersey** Lottery Commission voted to toughen the odds of winning its weekly Pick-6 Lotto; larger jackpots also will be offered. Other changes also were made to make New Jersey competitive "with neighboring states," a New Jersey official said. Venet Advertising, New York, handles; the budget is $2.5 million. New Jersey began its lottery in 1970.

Arizona is playing "baseball" with the pitch "It's America's favorite pastime—getting rich." The Arizona lottery will be three years old next month; last year, the ad-promotion budget was $3.3 million, or 4% of the lottery's total gross, as set by state law. Taylor Advertising, Tucson, handles.

Revenues go to the state transportation fund, the general fund and to cities for local transportation.

The State Department of Revenue runs the **Colorado** lottery, an instant-ticket game. The game is marketed under the slogan "For a more beautiful Colorado"; 35¢ of each $1 ticket goes to a conservation trust fund for parks and recreation.

The budget is $3.8 million and is heavily in tv, with some radio, newspaper and outdoor board advertising to provide information on variations in the game, according to Brad Fornaciari, account supervisor, Karsh & Hagen, Englewood, Colo. The game began in 1983.

"Bonanza" is the name of the current instant lottery game sold under the slogan "How the West was won" in **Washington** state. There also is a Triple Choice numbers game. The over-all slogan for lottery games in Washington is "Follow the fun."

Stimpson Associates, Seattle, handles, but the Washington State Lottery Commission is reviewing the account and has asked for proposals.

A new Lotto game kicks off July 15. Tv, radio, print and outdoor support. The lottery spends about 2% of revenues for advertising. The budget was undisclosed.

The **Illinois** State Lottery has four games. Tv spots promote the new PayDay game as "the way to win $1 million or an instant $100,000." Animated spots run for nine weeks in Chicago and suburbs.

A tv, radio, print and outdoor campaign promotes the state's on-line games. Tv spots airing through October feature multi-million-dollar winners sitting at a banquet and being served by waiters dressed as ping-pong balls; another is a takeoff on the movie "Casablanca" (using the song "As Time Goes By").

The 1984 ad budget was $7 million. An $8.4 million budget is in the legislature. Gross sales for 1984-85 were more than $900 million, according to Michael Jones, ad director. Bozell & Jacobs, Chicago, handles.

The **Ohio** State Lottery campaign centers on the lottery's 10th anniversary and is themed "Come celebrate with us." Both 30-second tv spots and 60-second radio spots air statewide through July, supported by newspapers, outdoor boards, posters and bulletins. Marcus Advertising, Cleveland, is the agency.

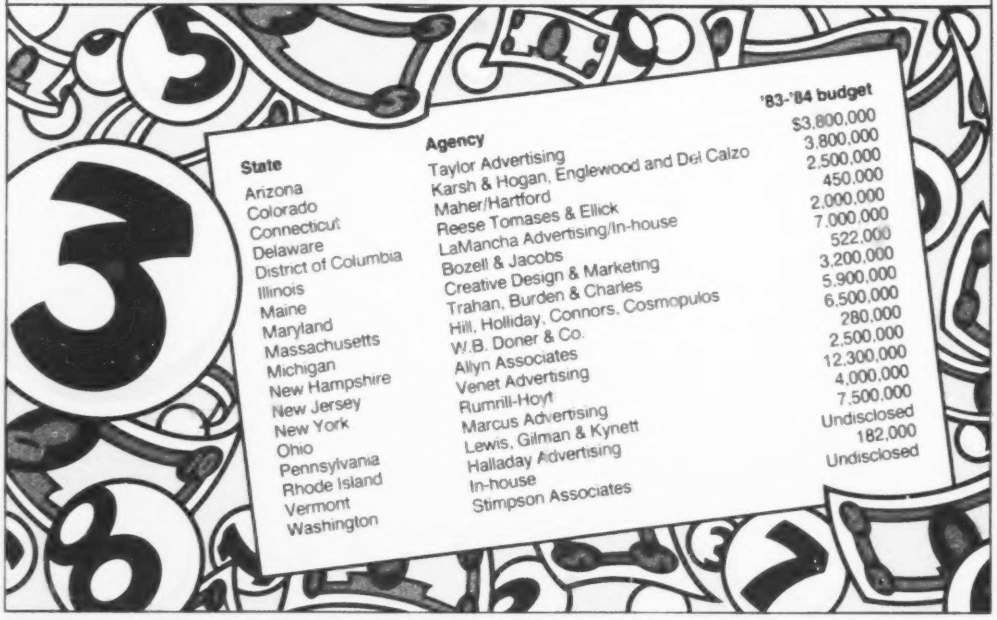
This fiscal year's advertising budget is $5 million—a 20% increase over last year—for the anniversary campaign. The budget is expected to drop back to about $4 million next year. Forty per cent of revenue goes to public elementary and secondary schools.

In **California**, three bills are pending that would amend the state constitution to permit a lottery. In **Florida**, a constitutional amendment to create lotteries goes to the voters in November; proceeds would help public education. The **Iowa** legislature approved lottery-enabling legislation, which was vetoed by the governor.

In **Missouri**, lotteries become legal Aug. 13. The **Tennessee** legislature passed lottery bills, which now must pass the next general assembly session in January.#

States' spending on lotteries

Lottery budgets are big business for ad agencies as states across the USA have gotten into the act. ***Source: Advertising Age.*** **Illustration by Steve Musgrave.**



State	Agency	'83-'84 budget
Arizona	Taylor Advertising	$3,800,000
Colorado	Karsh & Hogan, Englewood and Del Calzo	3,800,000
Connecticut	Maher/Hartford	2,500,000
Delaware	Reese Tomases & Ellick	450,000

Rhode Island	Halladay Advertising	Undisclosed
Vermont	In-house	182,000
Washington	Stimpson Associates	Undisclosed

Relax lottery ad rules: 4A's

WASHINGTON—The American Assn. of Advertising Agencies and other groups are getting a sympathetic congressional response to their plea to eliminate restrictions on advertising legalized lotteries.

The Senate judiciary committee approved legislation by Sen. Paul Laxalt (R., Nev.) that would remove all existing restrictions on advertising of legalized gambling. A similar bill sponsored by Rep. Harry Reid (D., Nev.) cleared House judiciary subcommittee hearings last week and moved toward the full committee.

Existing law restricts gambling ads to states that operate games.

During the judiciary subcommittee hearings, Charles F. Adams, exec vp for the Four A's in Washington, stressed that the Supreme Court no longer allows restrictions on truthful advertising for legal products.

The Justice Department, the National Newspaper Assn. and the New Jersey Broadcasters Assn. also support the legislation.

Some conservative senators have expressed informal opposition to the Laxalt bill, but the bill is expected to pass.#

panded internationally up to now because of their interest in the *IHT*.

About 25% of the *IHT's* advertising volume comes from U.S. advertisers and "we feel there is potential" for more, said Mr. Huebner.

As part of its strategy, the *IHT* plans to:

- Open a sales office on the West Coast this year, and has just opened one in Chicago. For many years its only U.S. sales office had been in New York.
- Meet with Mauro Salles, director-president of the Brazilian ad agency Salles/Interamericana de Publicidade, about possible links with the Latin American *Daily Post* newspaper. The *Daily Post*, which Mr. Salles owns, has been trying to become the *IHT* of Latin America, but is bedeviled by distribution problems. Adding Latin America is expected to enhance the *IHT*'s appeal to U.S. advertisers.
- Consider printing in the U.S. to increase its visibility among U.S. advertisers. But executives at the *Times*, which supplies much of *IHT's* copy, are resisting the move.

The *IHT's* circulation grew 6% last year and ad revenue was up 20%.#

McDonald's drive not on D.C. menu

By SCOTT HUME

McDonald's operators in Washington, D.C., and Baltimore still have a taste for Needham, Harper & Steers USA's "test campaign."

The rest of the nation last week got to see the long-awaited new McDonald's campaign created by Leo Burnett USA, Chicago (AA, Feb. 20). Themed "It's a good time for the great taste of McDonald's," the successor to the year-old "McDonald's & you" campaign aims to give the fast-food chain's advertising what Burnett's chief creative officer called a "more contemporary and upbeat" feel.

But in those two East Coast ADIs, consumers haven't seen Burnett's "Great taste" campaign. Instead, they are seeing a new cycle of McDonald's spots themed "I've got a taste for McDonald's," created by NH&S' Washington office. NH&S in Chicago formerly handled the national account.

Since January, the D.C. and Baltimore co-ops have been blocking network feeds of Burnett's McDonald's advertising and cutting in the Needham work, which agency and client have been calling a "test campaign" (AA, Oct. 3, Jan. 23, *et seq.*). Indications are it has passed its test.

It isn't clear how long the special Needham campaign will continue to run (neither agency nor client will discuss the test). But the continual appearance of new spots suggests McDonald's and the co-ops believe the campaign still has some life left.

One of the new spots that has broken in the past two weeks promotes McDonald's double cheeseburger, a sandwich that, although available on request at some stores, was removed from menu boards several years ago. The item has not received advertising sup-

Litton microwave unit to double ad spending

MINNEAPOLIS—Litton Industries' Microwave Cooking Products division will double to $20 million its advertising and promotion budget during the fiscal year beginning in July. A campaign themed "Nobody knows more about microwave cooking than Litton" breaks this fall on network tv and in 17 consumer magazines. Advertising is created in-house.

Backer & Spielvogel wins Celeste pizza account

CHICAGO—Quaker Oats Co. has moved its estimated $5 million Celeste frozen pizza account to Backer & Spielvogel, New York, from company-owned AdCom. The account could grow as a result of Quaker's pending acquisition of another, unidentified pizza company. Celeste is B&S' first product assignment from Quaker, though the agency has been working on other projects for the company.

U.S. tv spots are golden at Cannes festival

CANNES—U.S.-produced tv spots are expected to capture the top honors at the 31st Cannes International Advertising Film Festival this year. Observers are heralding the festival as "an American renaissance in advertising creativity." At press time, winners of the festival's major gold awards were expected to include Apple Computer's "1984" spot for its Macintosh personal computer, via Chiat/Day, and a series of Pepsi-Cola spots via BBDO.

Japan autos hike ads amid German strikes

By DAGMAR MUSSEY

DUESSELDORF—National strikes by printers and sheet-metalworkers are wreaking havoc on the German advertising and marketing industries.

And in the midst of the chaos, Japanese auto makers are increasing their advertising here, trying to capitalize on the effects the strikes have had on German auto makers.

The sheet-metalworkers' strike is in its sixth week and has so far cost German auto makers about $2.2 billion in lost production, according to estimates by the German Federal Bank.

By mid-June, Daimler-Benz had lost $900 million in sales; BMW about $400 million, Opel/GM about $450 million; Volkswagen $300 million, and Audi another $200 million.

To take advantage of the strike, Japanese auto companies are running ads that encourage German consumers to buy a Japanese car instead of waiting until the strike is over.

A recent Toyota ad said, "No matter whether mini-car or full-blooded sports car, there is no range in which we can't offer an ideal model. Don't wait, switch."

"We know that the Japanese have quietly increased their car export to Germany by 50%," said a Volkswagen spokesman.

Also, several agencies here say they are expecting Japanese companies, notably Toyota, Mazda and Nissan, to boost their ad budgets.

Most of the Japanese ads are appearing in magazines because the 11-week-old printers' strike has left the German newspaper industry virtually paralyzed (AA, June 18).

The sheet-metalworkers' strike also is causing difficulties for foreign-car makers. The Belgian Ford plant at Gent cannot produce Sierras because parts are lacking. In Turin, Italy, 8,000 Fiat workers are idle for want of German parts.

Ford of Cologne has been least affected by the strike because it has been able to draw missing parts from elsewhere in Europe.

Both the printers and the sheet-metalworkers are seeking a 35-hour work week at full pay.

Because of the printers' strike,

Republic picks DFS; C-M irked

By M. HOWARD GELFAND and SCOTT HUME

Republic Airlines ended its six-week agency review by naming Dancer Fitzgerald Sample, New York, to handle its $30 million account. But former agency Campbell-Mithun, Minneapolis, said it did not have a fair chance to retain the assignment.

C-M, which has handled Republic for the past 2½ years, was one of four finalists in the review that also included Kenyon & Eckhardt and SSC&B, both New York. But the agency's chairman, William Dunlap, saying he was "disappointed, but not surprised, by Republic's decision," charged Republic's financial losses had made the naming of a new agency a certainty.

He called the account shift by the airline, which has reported losses of $225 million over the past four years, a "change for the sake of change."

"My only regret is that [the agency review] was settled before the contest even started," Mr. Dunlap said. "They're in a desperate struggle to stay in business. They've just hired a new president and a new senior marketing vp and those sorts of changes usually result in a change of advertising agencies."

Stephen W. Wolf, who joined Republic as exec vp in February, was named the airline's president two months later. A.B. (Sky) Magary joined the carrier's marketing department as senior vp last week following two years as vp-sales and marketing for Hyatt International (AA, June 14). Both attended the four agencies' presentations, held June 14 and 15.

John Temple, Republic's director of advertising, denied that Campbell-Mithun received unfair treatment, saying the presence of the new executives "on paper favored Campbell-Mithun" since it had an experienced team in place.

"Our minds definitely were not made up," Mr. Temple said. "Mr. Wolfe and Mr. Magary obviously had no preconceived notions about Campbell-Mithun because they are so new to Republic. Campbell-

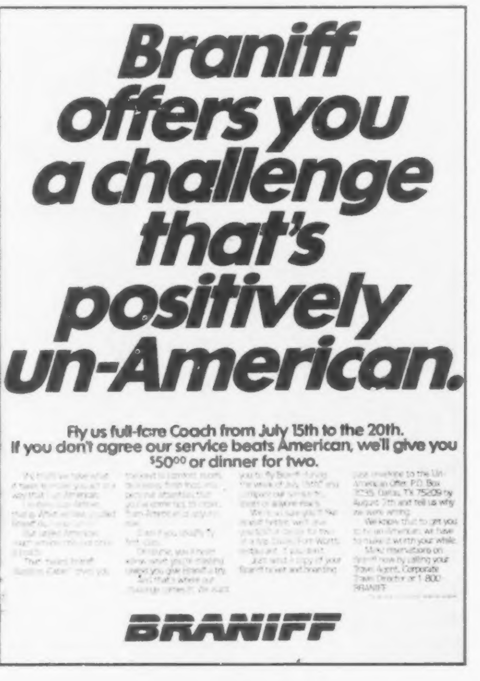
Anti-American

Braniff is taking on American Airlines in a weeklong challenge to entice American travelers to try Braniff's Business Cabin service. The Dallas newspaper ad, via N W Ayer, New York, says passengers who don't think Braniff's service is better than comparably priced American service will get $50 or a free dinner for two.



Braniff offers you a challenge that's positively un-American.

Fly us full-fare Coach from July 15th to the 20th.
If you don't agree our service beats American, we'll give you $50⁰⁰ or dinner for two.

BRANIFF

For AT&T, computer woes grow

By BRIAN MORAN

NEW YORK—AT&T's latest product offering in the computer field, drawing criticism from dealers even before its release, faces another obstacle—a lawsuit in federal district court here.

A stockholder of Docutel/Olivetti Corp., the U.S. subsidiary of Olivetti in Italy, has sued to block AT&T from marketing its new Olivetti-made personal computer in the U.S.

AT&T is expected to announce details of its IBM-compatible machine, including pricing, distribution and marketing plans, at a press conference at Ogilvy & Mather's office here June 27.

The suit charges that the Italian

Louis Porterfield, soon-to-be publisher of *Good Housekeeping*, claims that "If we do not clean up our act, all the magazines will not need sales staffs. People will work from computers, and the lowest rate will get the buy."

New 'GH' publisher rips rate-breaking

By STUART J. ELLIOTT

New York—Louis Porterfield has a message for the publishers he's about to join in the women's service field. Rate-breaking will be "the ruination of the magazine business" if it continues.

"This is the biggest fear I have," said Mr. Porterfield, 56, who moves next month from publisher of *Cosmopolitan* to publisher of *Good Housekeeping* (AA, June 4). "I know competition is tough and it's not the easiest time to sell ad space. But if we're going to be sticking knives into each other's backs by going off the rate card to get business, we'll regret it.

"If we do not clean up our act," he continued, "all the magazines will not need sales staffs. People will work from computers, and the lowest rate will get the buy." Rate-breaking is "saying to advertisers, 'This is what we're really worth,'" he said. "We all have fine editorial products—we ought to sell our editorial products."

Mr. Porterfield will make it known when he arrives at *Good Housekeeping* July 5 that "from that day on, if anything is dealt off the rate card, that man is through with the company." He is quick to add he doesn't believe rate-breaking has happened at *GH*—which,

Cookie makers deny swiping P&G secrets

By JANET NEIMAN

Three marketers sued last week by Procter & Gamble are expected to put up a tough fight to stop P&G from taking a bigger bite out of their cookie business.

Cincinnati-based P&G sued Keebler Co., Nabisco Brands and PepsiCo's Frito-Lay unit in individual complaints alleging that they violated P&G's patent for its Duncan Hines chocolate-chip cookies.

P&G also claimed each engaged in "unfair competitive practices"—industrial espionage—to obtain technological information about the P&G process.

Frito-Lay and Nabisco both denied P&G's charges and issued statements claiming the P&G patent is invalid and that they will oppose the suit. Keebler would not comment on the matter.

P&G is asking for unspecified amounts in punitive and compensatory damages and damages for unfair competitive practices, and for court injunctions against both patent infringement and unfair competitive practices.

If successful, the suit could prevent P&G's competitors from further participation in the burgeoning soft-cookie market, pioneered by P&G with its test-market introduction last year.

Since then, Frito-Lay has entered the soft-cookie market with the GrandMa's Rich'n Chewy line, Keebler has begun national rollout of Soft Batch and Nabisco has brought out Almost Home and is now introducing Chewy Chips Ahoy!

The Duncan Hines line now is in about 40% of the country.

The suits were filed "immediately upon receipt" of the patent on June 19, P&G said.

In response to the suit, Parsippany, N.J.-based Nabisco "categorically" denied it infringed on "any valid patent or infringed upon any trade secrets of Procter & Gamble." It intends to bring a counterclaim as soon as possible "to establish that Procter & Gamble's patent is invalid and improperly obtained, based on information available to Nabisco."

"Nabisco is the leading manufacturer of cookies worldwide and has followed a practice of developing and promoting its own products based upon Nabisco's extensive research efforts," the company said

(Continued on Page 114)

Milk takes consultant route

By JANET NEIMAN

Chicago—The National Dairy Promotion & Research Board voted last week to hire a consultant to help it evaluate ad proposals from three agencies and an industry federation for its multi-million-dollar account.

The consultant will be selected by board chairman Ivan Strickler and a chief executive officer yet to be selected, but it is expected to work with the board's advertising and sales promotion committee.

The vote, held in a session closed to the press, came after the 35-member NDPRB heard pitches June 21 and 22 from BBDO, Grey Advertising, Young & Rubicam and the new Dairy Promotion Federation Assn. (AA, June 21).

The federation, established last week, is made up of the United Dairy Industry Assn., the California Milk Advisory Board and the Oregon and Washington state dairy products commissions.

After hearing the presentations for the $65 million-to-$190 million account (AA, June 14), board members could reach no clear majority on a winner, leading to the decision to hire the consultant.

Louis Calcagno, chairman of the ad committee, said he expects "further negotiations between the advertising committee and the advertising presenters." The board allocated $10,000 to a search committee to find the consultant.

Mr. Strickler indicated the board is looking for a campaign with a budget split this way: Approximately 80% to 85% spent on fluid milk and cheese and the remainder on solid dairy products, including butter and yogurt.

All board members participated in the vote despite questions of conflict related to those directors who are also board members of the federation's component organizations. Mr. Strickler said that because none of those organizations would be getting funds directly, there was no conflict.

The NDPRB, which is administering the ad funds, had asked the three agencies and the federation to base their presentations on an $80 million account. There was no indication of how the NDPRB would split the funds between advertising and promotion. The funds are becoming available through an assessment on dairy farmers under the Tobacco &

Upfront tv sales near $2.3 billion

By JAMES P. FORKAN

New York—Following a blistering sales pace throughout last week, the tv networks appeared ready to shut down their 1984-85 upfront prime time sales efforts within striking distance of a $2.3 billion sales total.

Perhaps the biggest marketer to have closed its upfront package buys late last week was General Foods Corp., with Procter & Gamble wrapping up some loose ends and expected to finish its upfront by Friday night.

Robert Blackmore, NBC's senior vp-sales, said at press time that upfront is "basically over" at NBC, which he put at the $800 million mark, and that the three-net total should be about $2.2 billion.

That gibes with the unofficial word from the networks and many agencies that the Big 3's upfront coffers probably would hold $2.2 billion to $2.3 billion, up sharply from $1.85 billion a year ago (excluding $450 million or so in Olympics business).

Jerome Dominus, CBS' vp-sales, said, "There's a ton of money out there and it's coming in." NBC, which estimated its upfront business through June 15 at almost

corporate closeUp

Van Munching style takes importer to top

By GAY JERVEY

New York—Marvin Kimmel recalls the moments well.

Mr. Kimmel, a Florida beer distributor, would be relaxing or finishing a day's work when the phone would ring.

It would be Leo Van Munching Jr. on the line, with a simple question: "What happened to my shelf space at the Winn-Dixie on Southeast Eighth Street?"

Such hands-on involvement by a corporate head is the exception, not the rule. But Mr. Van Munching's style keeps distributors and others on their toes, and there is a method to his fervor. His approach, invariably described as intense, smart, thorough—and enormously successful—has propelled the privately held Van Munching & Co. into what is, as one competitor sighed, "one of the most profitable beer operations around."

As president, Mr. Van Munching controls a company with operating profits estimated at $65 million to $70 million in 1983. The money flows in from a product line that includes the runaway best-selling imported beer in the U.S., Heineken, as well as the new, fast-growing brands of Amstel Light and Grizzly beers.

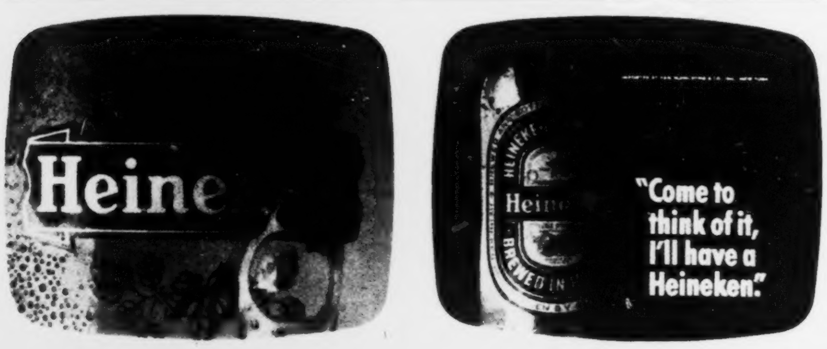
Without question, Van Munching is one beer company that has successfully negotiated changing U.S. drinking patterns. Though imported beers account for only 3.2% of the market, their sales growth has outpaced the rest of the industry, led in no small way by the Van Munching brands.

But brands are just part of the Van Munching formula. Industry sources say the heart and soul of the Van Munching company's success comes straight from the Van Munchings themselves—their competitive philosophy, work ethic and unusually intimate involvement with the ins and outs of their business.

"The personality of Van Munching [& Co.] reflects its ownership more than any other company I deal with," Mr. Kimmel said. "Leo is a hands-on manager who knows every facet of the industry."

"Leo Van Munching really defines the company," agreed Ron Braynas, vp of Forbee Bros. Corp., a Brooklyn distributor. "His personality is pervasive, and he's one of the best-informed men in the industry."

It helps that Mr. Van Munching, who succeeded his father as company president in 1980, learned his lessons early, right at home. On Dec. 6, 1933—the day after Prohibition ended—Leo Van Munching Sr. arrived from Amsterdam as a representative of Heineken Breweries. He brought with him his wife, two children and 25 cases of Heineken. His job was clear: To bring to America the beer Dutchmen loved most.



"Imports fit into their own category. They add mystique, romance and have been instrumental in upgrading beers, in helping to move them out of the undershirt-and-suspender-type image."

—Leo Van Munching Jr.,
president, Van Munching & Co.

In 1946, Van Munching & Co. was incorporated as exclusive U.S. importer for Amsterdam-based Heineken. Sales of those green bottles and their contents have climbed consistently ever since, reaching 32.2 million case shipments last year, according to *Impact*, an industry newsletter published by M. Shanken Communications, New York. Heineken commands 37% of imported beer sales, outdistancing its nearest competitor, Molson, by more than 18 million cases.

Heineken's success has come hand in hand with—and to a large degree has stirred—the imported-beer phenomenon on these shores. Until the early 1970s, when Heineken

BK ads trigger awareness gain

By SCOTT HUME

It's said that nothing in life is certain but death, taxes and eventual loss of advertising accounts. Consider a fourth entry to that list.

A new certainty seems to be a solid jump in advertising awareness for Burger King every time it launches a new set of comparative commercials.

Asked last month to name the first fast-food advertising that came to mind, 229 respondents, or 18.3% of the 1,250 adults polled in the Advertising Age monthly adWatch survey, said "Burger King." That represented a gain of 6.9 percentage points over the April survey, when 11.4% said Burger King's advertising first came to mind.

Burger King launched its latest assault on archrivals McDonald's and Wendy's April 30, a $40 million flight of new spots resurrecting the "broiling vs. frying" issue (AA, April 30). One of those spots, which featured a parody of children's-show host Mr. Rogers, gained added attention when it was dropped at Mr. Rogers' gentlemanly request (AA, May 10).

This latest comparative campaign is Burger King's fourth since September, 1982, when its advertising first began extolling the chain's flame-broiled burgers while asking consumers to turn up their noses at other chains' "fried" burgers. Also for the fourth time, Burger King's advertising awareness has risen significantly as the new campaign began.

That's the good news for Burger King.

The bad news is that the increase in awareness has gotten progressively smaller. When the first advertising salvo broke in late 1982, catching competitors and consumers off-guard with its sharp-edged message coupled with disarming—if mock—politeness, Burger King's advertising awareness jumped 15.7 points (still the adWatch record). New spots broke in March, 1983, and the chain's awareness score jumped 10.6 points.

Burger King had lost most of those gains by October, 1983. But

(Continued on Page 113)

May winners and losers

Question: Of all the advertising for (product category) you have seen, heard or read in the past 30 days, which ad first comes to mind? Note: A change of plus or minus 2.8 points is considered statistically significant. *Source: SRI Research Center Inc., Lincoln, Neb.*

	Change in % of responses since April
Apple	**+9.1**
Burger King	**+6.9**
American	**+3.2**
Budweiser	**-3.0**
McDonald's	**-3.3**
Chevrolet	**-3.5**
Wendy's	**-5.9**

Ad ban drive hits beer, wine

Washington—Riding the coattails of President Reagan's campaign against drunk driving, a coalition of consumer, religious and educational groups is asking the federal government to do to beer and wine advertising what it did to cigaret ads—take them off tv and radio.

Led by the Center for Science in the Public Interest, the coalition plans a press conference here today to announce a petition drive urging Congress to ban electronic advertising of beer and wine or require that time be made available for counteradvertising. The goal, organizers said, is one million signatures.

The President and key congressmen have made drunk driving a high-visibility political issue this spring, and CSPI and its 25 allied groups sense an opening to broaden the debate to include advertising's alleged role in the problem. Thus far, CSPI executive director Michael Jacobson, a longtime critic of alcoholic-beverage advertising, has been unable to get the ear of key lawmakers and regulators working on the issue.

One pressure group that has demonstrated clout in Congress, Mothers Against Drunk Driving, Dallas, is not part of the CSPI coalition and has instead lobbied for legislation to make 21 the minimum drinking age in states around the country. Candy Lightner, founder of MADD, said the organization's board has taken "no position on the [advertising] issue and probably won't for a long time because of other priorities."

The CSPI coalition, which includes the National Congress of Parents and Teachers and the United Methodist Church, contends that only the federal government can protect consumers from industry ads that unfairly target young persons and heavy drinkers.

The federal ban on tv and radio advertising of cigarets sets a precedent for action against beer and wine ads in electronic media. Liquor ads already are off-limits on tv and radio, but by self-regulatory agreements and not government fiat.

Counteradvertising, CSPI's alternative to an outright ban, has not been a serious regulatory threat since the Federal Communications Commission in 1974 stopped applying its Fairness Doctrine to product commercials. The FCC at one time had said product spots could represent one side of a controversial public issue that would require "balancing" countermessages.

Representatives of the beer and wine industries categorically rejected the ban proposal and the underlying premise that advertising encourages consumption.

Douglas Metz, exec vp and general counsel of the Wine and Spirits Wholesalers of America, said his industry opposed any attempt to restrict its freedom of speech.

Among the 25 groups supporting CSPI's Operation SMART (Stop Marketing Alcohol on Radio and Television) are Consumer Federation of America, Public Citizen, Action for Children's Television and the American Council on Alcohol Problems.#

ACT raps kid's show profit sharing

Washington—Action for Children's Television, rebuffed in its earlier efforts to sell the Federal Communications Commission on tighter control over children's programs, has found a new platform in the profit-sharing formula for Telepictures Corp's. proposed "Thunder Cats" animated strip.

Under a proposed barter deal, stations accepting the syndicated program and providing three to three and a half minutes for barter advertising will participate in profits from "Thunder Cats" toys sold in their coverage area. In a petition to FCC today, ACT argued that this is a "perversion of programing incentives" which "places broadcasters in a position where self-interest in profit sharing from product sales works against the programing interest of the audience."

ACT reminded FCC that it frequently has stressed the role of market forces—the broadcaster's need to attract viewers in order to generate advertising revenue. "The proposed profit sharing and similar schemes would negate the self-regulating capacity of viewer control and so-called viewer-pattern voting," ACT argued.

ACT's proposed rule aims at situations where stations air programs in exchange for a share of profits from sale of products bearing the name of the program, program characters and/or program devices. "If this practice is allowed," ACT contended, "tv stations will inevitably begin to consider the commercial potential of the products related to children's programs, rather than the quality or public-interest benefits of the programs themselves."

ACT president Peggy Charren claims the profit-sharing proposal is a consequence of past FCC refusal to respond to ACT's petitions against "program-length commercials." "Last October, ACT asked the FCC to put an end to program-length commercials on children's tv—programs based on toys and other products, that are nothing more than one long advertisement disguised as children's shows," she said. "Since the FCC has done nothing, that practice is proliferating."

ACT also has circulated its document to key members of Congress.

"Thunder Cats" would be produced by Rankin-Bass, a Telepictures subsidiary, for the 1985-86 season. Under the barter arrangement, stations signing now would share in profits from "Thunder Cats" toys in perpetuity, even though they drop the show.#

New nurses' uniforms sporting 'Foxy' fashion

Los Angeles—Nurses uniforms finally may cast off their drab image with a little help from 20th Century Fox.

The motion picture and tv studio's licensing and merchandising arm has linked with career-apparel marketer Crest Uniform Co., New York, to manufacture and distribute a line of designer nurse clothing under the logo of the Fox tv series, "Trapper John, M.D." Crest will introduce the new line, which aims to introduce fashion into a field that up until now has been solely concerned with function, in nurses' clothing outlets in the U.S. this fall. The line's introduction will coincide with the show's season debut.

Actress Christopher Norris, who portrays nurse Gloria Brancusi on "Trapper John," will be the spokesperson for the line. Her likeness will be shown on the garments' hangtags, on point-of-purchase materials and in print ads, which will use the theme line "The look says fashion, the image says professional."

The "Trapper John" licensing deal is the latest in a string of associations the Los Angeles studio recently has signed around some of its more successful tv shows, including "Dynasty" (AA, Jan. 23).#

JVC pulls together ad image

By ROBERT RAISSMAN

Looking for continuity and increased awareness for its product lines, JVC Co. of America will break the tv portion of a $10 million campaign this week. The effort marks the beginning of a five-year plan JVC executives hope will make the company a major advertising factor in the consumer-electronics marketplace.

For the past seven years JVC, which pioneered the VHS concept in videocassette recorders, has been known as a leader in technology. Its advertising budgets continuously have grown. In 1983, Leading National Advertisers put JVC spending at more than $4 million. However, the company has had little awareness beyond electronics buffs.

"We have been aware of the unawareness for some time," said George Meyer, JVC advertising manager. He explained that parent Victor Co. of Japan began remedying the situation when it put all its exports under the JVC name eight years ago.

The second step will be the new campaign. Bill Crandall, senior vp-management supervisor at JVC's agency, SSC&B, New York, explained that although each JVC unit has a separate ad budget, all future advertising will have a unified look, highlighted with a gray bar and the red JVC logo across the bottom.

The agency also is working on a unified tag line that will show up in JVC ads later this year.

"Outside of the major names in consumer electronics, most of the advertising is just a hodgepodge," Mr. Crandall said. "What we have done is created a uniform look although all the products are actually advertised separately."

Spencer Plavoukos, vice-chairman-chief operating officer at SSC&B, said applying a unified format across the board wasn't easy. "We had to pull things together without sacrificing specific brand objectives," he said. "The objective for the company's new videocamera is different than a hi-fi."

The focal point of JVC's tv effort is its new videocamera, the VideoMovie. The lightweight camera has its own VHS video deck in a self-contained unit and is hand held, unlike the "straphanger" models.

The tv spot features the camera zooming in on a family going up in a hot-air balloon. As the balloon takes off, a voiceover says: "In low-light or daylight the picture is incredible." The man in the balloon passes the camera to his son. "And VideoMovie is so lightweight," the voiceover says, "you're free to be more creative. Get your hands on the videocamera and recorder in one. . .and hold everything."

Print ads for the camera, along with a number of other JVC products, will appear in a number of trade and consumer magazines, including *Esquire*, *Life*, *People* and *Playboy*.#

Convention spawns its own news media

Washington—Unfazed by large price or small audience, advertisers have bought out almost all the available space in an experimental daily party convention publication targeting the assembled national policymakers.

The *National Journal* is publishing the 32 and 40-page tabloids at both conventions, and already reports selling more than 90% of the available ad space. Sales outstripped last fall's projections by publisher John Fox Sullivan, who originally planned 16 and 24-page papers (AA, Sept. 5). A b&w page in the tabloid costs $7,500, and *National Journal* promises that about 15,000 free copies will be distributed each day.

If the print experiment is soaring, a five-day cable tv program planned only for the Democratic convention in July flies slightly lower. With barely two weeks left to book ads, the Kamber Group's CTV (convention tv), a late starter which allowed itself only three months from announcement to gavel time, reports it still has 30% to 35% of the time available on its predominantly entertainment and information program that will be piped to about 15,000 convention hotel rooms in San Francisco.

Total production cost for the five six-hour programs that will air twice every covention day is $250,000, said Kamber, with sales so far totaling about $170,000.

Whereas the *National Journal's* tabloid will focus on convention events, Kamber's cable program will offer more entertainment and "a relief from commentary." Programing will include political satirist Mark Russell, columnist Jack Germond with dining recommendations and actress Jane Fonda leading exercises. Ad rates are $3,500 for 30 seconds and $7,000 for a minute, with discounts up to 15% for appearing all five days. Kamber said it was still "flexible" on rates and willing to discount.

Mr. Sullivan said he plans 176 pages at each convention, with about 30% to 35% for ads. Among those already set are General Motors, which last fall purchased all 10 back pages for op-ed style ads, and LTV Corp. Mr. Sullivan said LTV was planning a particularly innovative series of ads disclosing results of convention delegate surveys on major issues. The surveys are being conducted before the conventions. "That's an example of advertising that is particularly useful to the readers, who themselves will be the ones who were polled," Mr. Sullivan said.#

corrections & clarifications

- Rick Busciglio's correct title at McCann-Erickson is senior vp-director of broadcast (AA, June 18, P. 2).
- Ally & Gargano's revenues were $4,257,000 for the first three months of '84, a 4.4% decrease from the $4,451,000 reported for the same period a year ago (AA, May 28, P. 59).
- An item on *PC Retailing* (AA, May 21, P. 73) should have said it named ESCO Media Group, Flushing, N.Y., as its international ad sales rep.
- Wieden & Kennedy, Portland, Ore., handles Nike's national shoe advertising for all sports, as well as all of its national co-op advertising, both print and tv (AA, June 18, P. 4). Estimated 1984 spending for W&K's portion is about $2 million. That agency handled the total Nike account until the company appointed Chiat/Day, Los Angeles, to launch its national brand advertising last year.#

INTERNATIONAL AGENCY/CLIENT REPORT

How to read the charts

The charts in this special section were supplied by agencies based on the following criteria:

- Clients must be in three or more countries by the end of 1983.
- Client business must add up to an aggregate of $3 million.
- An asterisk (*) notes that an agency included affiliated (no-equity) shops because of their importance to the agency's business.

The country list is not a rundown of each agency's shops worldwide.

Some agencies did not cooperate. In such cases, Advertising Age collected the data independently from its correspondents and gave those agencies the opportunity to comment.#

N W Ayer

N W Ayer, New York, had non-U.S. gross income of $14.2 million, or 14.6% of total gross income of $97.4 million in 1983. It had non-U.S. billings of $92 million on total billings of $650 million. The N W Ayer network has 12 partner agencies and 26 associate agencies. It owns majority or maximum-allowable stock in four.

The Ayer network was nonexistent 10 years ago when total gross income was $26.2 million out of $175 million in billings. By 1978, the company had non-U.S. gross income of $2.2 million, or 4.5% of total gross income of $48.7 million. Non-U.S. billings that year were $14.6 million, or 4.5% of total billings of $325.1 million. Ayer gathered equity in shops in Milan, Wierden (Holland), London and Paris in 1983.

Top execs include Louis T. Hagopian, chairman; Jerry Siano, vice-chairman, John Roedig, senior vp-finance; Jerry N. Jordan, president-intl; Thomas C. Sweitzer, senior vp-intl; Bruce A. Macdonald senior vp-Europe, Mideast, Africa; David Dodd, senior vp-Latin America; James P. Foley, senior vp-Asia, Pacific; Robert Young, vp-financial director.

BBDO International

BBDO International, New York, had non-U.S. gross income of $90 million, 31.1% of total gross income of $289 million in 1983. The agency had non-U.S. billings of $600 million, or 30.8% of total billings of $1.949 billion. The BBDO network covers 31 countries and 57 agencies outside the U.S. Equity is held in 31 of the agencies.

BBDO's non-U.S. business climbed from an estimated $13.4 million in gross income, or 21% of total gross income in 1973, to $52.3 million, or 39.5% of total gross income in 1978. During that period, non-U.S. billings grew from $89.5 million, or 20.9% of the total, to $348.5 million, or 47.5% of total billings.

The agency's percentage drop in non-U.S. activity in 1983 is a sign of BBDO's active acquisition policy stateside and the building up of its U.S. client base. Since 1978 some of the bigger U.S. shops purchased by BBDO include Tracy-Locke/BBDO, Waring & LaRosa, Lavey/Wolff/Swift and Arthur Meyerhoff.

In 1983, BBDO International acquired one major world client—Apple Computer.

Top execs: Bruce Crawford, president-ceo, BBDO Intl; Allen Rosenshine, exec vp, BBDO Intl, and chairman-ceo, BBDO; Willi Schalk, exec vp, BBDO Intl, and president-intl group; William Wilson, exec vp-intl group.

(Continued from Page 54)

The Bates network covers 35 countries and 52 agencies.

Bates' non-U.S. gross income as a percentage of the total has risen from 47.6%, or an estimated $36.5 million in 1973, to 58.1%, or $76 million gross income in 1978. Non-U.S. billings were $243 million, or 50.2% of the total in 1973, and $465.2 million, or 52.3% of the total in 1978.

The drop in non-U.S. billings percentage the past five years is credited largely to Bates' acquisition of Sawdon & Bess, McDonald & Little and William Esty Co., agencies with nominal international volume. Their collective gross incomes and billings in 1983 were $95 million and $633 million, respectively.

Cadbury Schweppes was added to its world list in 1983.

Top international personnel: Robert E. Jacoby, chairman, president-ceo, Ted Bates Worldwide, and chairman Ted Bates Advertising/New York; John R. Hoyne, exec vp, president-international group; William H. Maynard Jr., vice-chairman, director-worldwide creative services; Keith H. Cousins, chairman, Australia-New Zealand, Southeast Asia Group; Michael English, chairman, United Kingdom Group, and Armand de Malherbe, president, Europe Group.

Benton & Bowles

Benton & Bowles, New York, had non-U.S. gross income of $46.1 million, or 32% of total gross income of $144.3 million in 1983. Non-U.S. billings were $354.5 million, or 35.3% of total billings of $1.01 billion. The network includes 14 countries. Majority or maximum-allowable equity is held in 14 agencies.

In 1973, B&B's non-U.S. activity was $16 million in gross income, or 38.9% of the $41.1 million total; its non-U.S. billings for the year were $91.3 million, or 34.6% of the total. In 1978, non-U.S. gross income rose to $23.9 million, or 32.2% of the total; its non-U.S. billings were $151.8 million, or 29.1% of total billings.

During 1983, B&B bought 15% of Leveille/B&B, Montreal, and 100% of B&B, Bologna.

The network gained one $3 million-plus client, Fiat & Crippa & Berger, Italy.

Top international execs include John S. Bowen, chairman-ceo; John Ferries, senior vp-director, Europe; and Bernard Kanner, senior vp-group exec, director-intl operations.

Leo Burnett

Leo Burnett Co., Chicago, had non-U.S. gross income of $82.7 million, or 38% of total gross income of $215.3 million in 1983. Its non-U.S. billings were $551.5 million, or 38% of total billings of $1.47 billion. The agency network encompasses 37 countries, with majority or maximum-allowable equity held in 30 agencies.

Burnett's network generated gross income of $28.9 million, or 37% of the total in 1973; its non-U.S. billings were $194.3 million, or 37% of the total. In 1978, non-U.S. gross income was $39.2 million, or 30% of total gross; its non-U.S. billings were $261.8 million, or 30% of the total.

During 1983, Burnett bought 30% ownership in Hemisphere-Leo Burnett in Manila. Burnett added $33.7 million in business from new international clients, including Saudia and Apple Computer.

Top international execs include W.A. Wiggins, chairman-ceo; R.L. Barocci, president; J. Novas, vice-chairman; J.C. Kraft, exec vp; D.S. Reid, senior vp; N.A. Saffouri, assistant to chairman. World regional responsibilities are handled by J. Novas (Europe/Middle East); F. Grace (Australia/New Zealand); K. Rubie (Far East); S. Suarez (Latin America); D. Dunlap (Canada).

Dancer Fitzgerald Sample

Dancer Fitzgerald Sample, New York, had non-U.S. gross income of $19.1 million, or 16.9% of total gross income of $113.1 million in 1983. The agency had non-U.S. billings of $99.1 million, or 15.8% of $627 million in total billings.

DFS has equity ownership in four agencies (Australia, U.S. and two in Japan) in the network that now covers 18 countries. DFS in March, 1984, agreed to sell its entire European operation to Dorland Advertising, part of the Saatchi & Saatchi Group. That included a network of 15 agencies accounting for $29.7 million in gross income and $213.1 million in billings. DFS ownership had broken down to 33% of its Austrian shop, 100% Belgium, 50% France, 100% Germany, 100% Holland, 36% Dorland in Italy, 41% Delvico DFS in Spain, 64% Sweden and 100% U.K. It did not have equity in Denmark, Finland, Italy's B Communications, Norway, Tapsa in Spain and Switzerland.

In the accompanying chart, the four multinational accounts listed would have been the same had DFS listed its European offices. However, a fifth account—General Mills Toys Group—as a result of the sale to Dorland Advertising, was dropped from the chart because it is now carried only stateside.

D'Arcy MacManus Masius

D'Arcy MacManus Masius, New York, had non-U.S. gross income of $89.6 million, or 49.5% of total gross income of $181.1 million in 1983. Its non-U.S. billings were $600.2 million, or 49.5% of total billings of $1.21 billion. The network covers 25 countries, and it owns majority or maximum-allowable stock in 23 agencies.

In the past 10 years, D'Arcy's non-U.S. activity has kept pace with its domestic growth. In 1973, the agency's non-U.S. gross income was $20.7 million, or 41.9% of total gross income of $49.3 million. Its non-U.S. billings were $137.7 million, or 41.9% of total billings of $328.9 million. In 1978, the agency's non-U.S. gross income had grown to $35.2 million, or 40.9% of total gross income of $86.1 million. Its non-U.S. billings for the year were $234.9 million, or 40.9% of $574.1 million in total billings.

During 1983, the network added Lee Cooper and DFDS Seaways, both billing more than $3 million. Major accounts not listed on the accompanying chart, because they do not bill an aggregate of $3 million in more than three countries, include Alfa Romeo (carried in 11 countries), Citroen (four countries), Abecor (four), Cullinet Software (four) and Brooke Bond Oxo (three).

Top international execs based in New York and Bloomfield Hills (Detroit) include H.G. Bay Jr., chairman-ceo; P.T. Redsell, president-ceo-intl; A. Hampel, S. Arbeit, A. Pilkington and C.D. Brown, exec vps. Europe regional directors based in Europe include L. Bohlin (Scandinavia), R. Harm (Central Europe), I. Kerr (Southern Europe), A. Waedemon (Northern Europe). R. Noonan is regional director-West Pacific, and M. Johnson, appointed regional director-Africa (South Africa) in 1983, is being reassigned to a position in New York.

Doyle Dane Bernbach International

Doyle Dane Bernbach International, New York, had non-U.S. gross income of $53 million in 1983, or 26.6% of total worldwide gross income of $199 million. Non-U.S. billings were $351 million, or 26.6% of total worldwide billings of $1.32 billion. The agency network covers 17 countries

(Continued from Page 57)

in which DDB owns either majority or maximum-allowable stock in 16 agencies.

DDB's non-U.S. gross income and billings have shown a tendency to double on a five-year basis. In 1978, for example, non-U.S. gross income was $27.2 million, or 30.6% of total gross income of $88.9 million; and in 1973, non-U.S. gross income was $13.4 million, or 25% of total gross income of $53.4 million. In billings, non-U.S. billings in 1978 were $181.5 million, or 30.6% of total billings of $592.7 million; and non-U.S. billings in 1973 were $83.6 million, or 25% of total billings of $334.6 million.

DDB went on an acquisition spree in 1983. Its direct-marketing unit, Rapp & Collins, bought 100% of Drescher & Heine in Germany, Intermail in France, MSW in the U.K. and RZA in Switzerland. Venema de Groot ad agency in Amsterdam was purchased and merged into DDB/Netherlands, and DDB/Singapore was founded in December, 1983, with 100% DDB participation.

Major international business won in 1983 included Atari Worldwide ($10 million in billings), Seagram ($4 million), Shulton ($3 million) and International Harvester ($3 million).

Top international corporate officers: Neil R. Austrian, president-ceo, DDB Intl.; Nicolai von Dellingshausen, president, DDB Europe; Clay S. Timon, senior vp-intl. (Canada, Latin America, Asia-Pacific).

Eurocom Group

Eurocom Group, Paris, had gross income of $28.5 million from sources outside France in 1983, or 22.8% of total gross income of $125.2 million. Its non-French billings were $210.3 million, or 24.6% of total billings of $852.3 million. The network encompasses 12 countries and owns majority or maximum-allowable stock in eight of its foreign agencies.

Eurocom's gross income and billings include only financial results from those agencies that are part of Eurocom and not the affiliates of the Univas Network, of which Eurocom is a part. Eurocom foreign shops include ATA Univas and INTHA Univas, both in Italy, Dechy Univas in Belgium, Unitros in Spain, NPO Univas in the Netherlands, MPW Univas in West Germany, and CSWH and UNICOM, both in Switzerland. Under the larger Univas Network banner, five other countries are also represented, but the Univas Network holds only a minor interest in those affiliate shops.

If total (as opposed to percentage ownership) gross income and billings of those Univas foreign holdings were included in the Univas totals, the Univas Network (including Eurocom) would have gross income from sources outside France of $78.2 million, or 44.7% of total gross income of $175 million, and non-French billings of $486.2 million, or 43.1% of total billings of $1.13 billion.

During 1983, the network added the following accounts worth more than $3 million: Chanel in France, Germany, Italy and Belgium; I.W.S. (Woolmark) in Germany and Switzerland; Lattoflex in Belgium and France; Philip Morris in Switzerland, and Toshiba in Germany.

Top international exec is Bernard Brochand, general manager-exec vp, Eurocom Group.

Foote, Cone & Belding

Foote, Cone & Belding, Chicago, had non-U.S. gross income of $50 million, or 24% of total gross income of $208.3 million in 1983. The agency had non-U.S. billings of $333.8 million, or 24% of total billings of $1.39 billion. The FCB network covers 30

countries. It owns the majority or maximum-allowable stock in 19 of its agencies.

FCB's non-U.S. business as a percentage of its total activity has fluctuated the past 10 years from 29%, or $14.3 million gross income out of total gross income of $49.5 million in 1973, to 33%, or $37.1 million gross income out of a total of $111.7 million in 1978 before dropping back to 24% in 1983. Non-U.S. billings were $95.4 million out of a total of $329.8 million in 1973 and were $247.3 million out of a total of $745 million in 1978.

In 1983, FCB purchased majority ownership in Lewis & Gilman of Philadelphia, majority ownership in Norman, Craig & Kummel (the percentage ownership in NCK's 17-country network varies), substantial minority of Quantum:FCB (Indonesia, Malaysia and Singapore) and 100% ownership of FCB/Japan and North-Castle Partners of Greenwich, Conn.

Major clients won in 1983 included Colgate-Palmolive ($38 million in billings); Kimberly-Clark ($15 million); Data General ($10 million); Kraft Foods and Shulton (both $9 million); National Semiconductor ($6 million); Gillette, Hewlett-Packard and South African Transport (all $3 million).

Top international personnel: Norman W. Brown, president-ceo, FCB Communications; John O'Toole, chairman, FCB Communications; Bill Kiely, chairman, FCB/Europe; Emine Messiqua, president, FCB/Europe; Antonio Beja, president, Latin America/Pacific/South Africa; Ed Roncarelli, president, multinational business group. Messrs. Messiqua and Roncarelli were added from NCK, as was Michael Woodward, exec vp-FCB Europe.

Grey Advertising

Grey Advertising, New York, had non-U.S. gross income of $88.8 million, or 41% of total gross income of $213.9 million in 1983. Its non-U.S. billings were $584 million, or 41% of total billings of $1.42 billion The Grey network covers 26 countries, and part or full ownership is maintained in all but 14 affiliated agencies.

International business has accounted for more than 40% of Grey's total business activity for more than five years. In 1978, non-U.S. gross income was $55 million, or 46% of total gross income of $120.2 million. Its non-U.S. billings were $367 million, or 46% of total billings of $802 million. In 1973, non-U.S. gross income was $24 million, or 37% of total gross income of $65.7 million, and non-U.S. billings were $160 million, or 37% of total billings of $438 million.

During 1983, the new agencies added to the network included: Grey Ronalds Smith-Toronto and Montreal; NP/Grey-Aarhus, Denmark; Greco-Paris (pr); PUSH-Gorinchem, the Netherlands; Grey Direct-Johannesburg; Grey Direct-London; Centrepoint-London (sales promotion); Market Horizons-Duesseldorf.

Hakuhodo Inc.

Hakuhodo Inc., Tokyo, had non-Japanese gross income of $6.4 million in 1983, or 3.5% of total gross income of $183.5 million. Non-Japanese billings were $42.4 million, or 3.1% of total billings of $1.38 billion in 1983. The agency network covers nine countries in which Hakuhodo owns the majority or maximum-allowable stock of seven agencies in the network.

Hakuhodo is emerging rapidly in the international advertising market. In 1973, the agency had only domestic (Japan) gross income of $37.1 million on billings of $246 million. By 1978, the agency had gained non-Japanese gross income of $1.4 million, or 1.2% of total gross income of $114.2 mil-

*Non-equity affiliation. *Source:* Advertising Age

This World Brand/International Agency/Client Report was put together by Dennis Chase, international editor; Ilse Cermak, international copy editor; Ellen Mardock, graphic designer; Craig Endicott, free-lance writer/researcher; Val Mackie, international reporter, and the Advertising Age international network.

(Continued from Page 60)

lion, as non-Japanese billings increased to $9.2 million, or 1.2% of total billings of $740.3 million.

Agencies in the Hakuhodo network basically service Hakuhodo's Japanese clients.

J. Walter Thompson Co.

J. Walter Thompson Co., New York, had non-U.S. gross income of $188.5 million, or 49.8% of total gross income of $378.4 million in 1983. It had non-U.S. billings of $1.26 billion, or 50% of total billings of $2.52 billion in 1983. The JWT network includes 118 shops, 61 of which are in the U.S. It owns majority interest in most of its shops except in the Third World, where most countries restrict ownership to less than a majority.

JWT foreign operations have generally contributed 50% of the network's total business in recent years. In 1973 non-U.S. gross income was an estimated $56.1 million, or 48.8% of total gross income estimated at $115.1 million. Non-U.S. billings that year were $374 million, or 48.8% of total billings of $767 million. Five years later, non-U.S. gross income had risen to $114.9 million, or 51.9% of total gross income of $221.5 million. Its non-U.S. billings were $776.1 million, or 52.4% of total billings of $1.48 billion in 1978.

J. Walter Thompson Co. is the largest subsidiary of JWT Group Inc. In 1983 the subsidiary included figures for Brouillard Communications, J. Walter Thompson USA and Thompson Recruitment Advertising.

The JWT worldwide coverage of clients shown in the accompanying chart was collected by Advertising Age correspondents. The agency requested that it not be included in the special report because of a corporate policy requiring clearance from clients when material to be published "includes detailed public statements regarding our clients' business," said Thomas N. Robbins, vp-director of communications, in a letter to this publication.

"I'm sure you can also appreciate that, even if such a policy were not in effect, in order for us to contribute information on the international scale that Advertising Age requires for this report, it would be necessary for us to solicit the approval of each of our international clients. Given the fact that to do so would involve a massive clearance procedure involving many hundreds of people worldwide, it would not be feasible for us to participate," he continued.

"The necessity of our declining to participate in your report reflects in no way on the value that we think it has for our industry," Mr. Robbins concluded.

JWT was asked to verify the chart but declined.

Kenyon & Eckhardt

Kenyon & Eckhardt, New York, had non-U.S. gross income of $15.5 million in 1983, or 25.6% of total gross income of $60.5 million, or 26.3%. It had non-U.S. billings of $103 million out of total billings of $392.2 million in 1983. The K&E network encompasses 38 countries and includes eight agencies in which K&E owns the majority or maximum-allowable stock.

K&E, which holds equity but not majority interest in 16 other agencies, has affiliates in 24 countries. Equity purchase of five of these agencies—located in Turin, Sydney, Tokyo, Wellington (N.Z.) and Madrid—will be finalized in 1984.

K&E's non-U.S. gross income increased as a percentage of total gross income through the 1970s, before slipping to 25.6% in the '80s. In 1973, non-U.S. gross income of an estimated $8.5 million and billings of $34.6 million were 34.6% of the re-

spective totals. In 1978, non-U.S. gross income of $15 million and billings of $100 million represented 36% of the respective totals.

Top international officials: Murray Smith, exec vp; Peter Handley, senior vp-area director, Europe; Michael Anderson, senior vp-area director, Asia/Pacific; Andre de Louckx, vp-area director, Latin America, Caribbean; Shawki Safieddine, vp-area director, Middle East.

Ketchum International

Ketchum International, Pittsburgh, had non-U.S. gross income of $8.4 million, or 15.3% of total gross income of $55.2 million in 1983. Its non-U.S. billings were $56.2 million, or 15.3% of total billings of $368.3 million. The network spans five countries, and majority or maximum-allowable stock is held in three agencies.

The network's international business in the 1970s steadily increased, although it is now decreasing as a percentage of total activity. In 1973 its non-U.S. gross income was $3.9 million, or 19.6% of total gross income. In 1978, its non-U.S. gross income had increased to $6.6 million, or 21.3% of the total.

Marschalk Campbell-Ewald Worldwide

Marschalk Campbell-Ewald Worldwide, New York, had non-U.S. gross income of $33.4 million in 1983, or 25.1% of total gross income of $133 million. It had non-U.S. billings of $223 million, or 25.1% of total billings of $886.8 million. The network encompasses 24 countries and holds a majority or maximum-allowable interest in 12 agencies.

The network, comprised of Marschalk Co., Campbell-Ewald and Clinton E. Frank, all wholly-owned companies of Interpublic Group of Cos., did not become a network until 1980.

During 1983, the network founded Campbell-Ewald Spain, taking a 51% interest; it took a 45% interest in Lowe Howard-Spink Campbell-Ewald U.K. and added R&D Campbell-Ewald France, taking a 25% share.

Marsteller Inc.

Marsteller Inc., New York, had non-U.S. gross income of $26.5 million, or 26.6% of total gross income of $99.6 million in 1983. Its non-U.S. billings were $176.7 million, or 26.6% of total billings of $664.1 million. Marsteller's international network consists of six wholly-owned European agencies.

In 1973, the network showed $3.7 million in gross income and $24.6 million in billings, both 20.7% of respective worldwide totals. That percentage rose to 28.3% in 1978.

Top execs: Reginald C. Bird, president, Marsteller International; Gary E. Burandt, exec vp-marketing director, Europe; Philippe Bodson, vp-chief financial officer, Europe.

McCann-Erickson Worldwide

McCann-Erickson Worldwide, New York, had non-U.S. gross income of $203 million, or 68% of total gross income of $299 million in 1983. Its non-U.S. billings were $1.36 billion, or 68% of total billings of $1.99 billion. The network covers 64 countries, and the agency owns majority or maximum-allowable stock in 45 agencies.

McCann-Erickson has long concentrated on international business. For example, the network's non-U.S. gross income in 1973 was $72 million, or 70% of total gross income of $102 million. The agency's non-U.S. billings for that year were $478 million, or 70% of total billings of $683 million. In 1978, non-U.S. gross income had increased to $151 million, or 72% of

total gross income of $210 million. Its non-U.S. billings that year were $1.008 billion, or 72% of total billings of $1.41 billion.

McCann-Erickson, one of the few agencies with equity in more countries than listed on the chart accompanying the profile, filed an addendum indicating the total number of countries in which its clients are handled by McCann-Erickson agencies.

Clients represented in 20 or more countries include: American Home Products (23 countries), Bayer/Miles Labs (23), Coca-Cola (50), Exxon/-Esso (33), General Motors (38), Gillette (30), Goodyear (23), Johnson & Johnson (24), Kodak (26), L'Oreal (39), Martini-Rossi (23), Nestle (33), Texas Instruments (25), Unilever (24) and R.J. Reynolds (25).

Top international execs: Bill Mackey, ceo, worldwide; Bob James, ceo, worldwide; John Bergin and Barry Day, vice-chairmen-worldwide. Exec vps-worldwide—Greg Bathon (Canada, English-speaking Caribbean), Gianni Cottardo and Michael Ferrier (Europe), Jerry Shively (Europe/Africa), Max Cusnir (Asia/Pacific), Jens Olesen (Central and Latin America) and Charles Hamm, Bohdan Kurylko, Marcio Moreira and William Thompson.

Needham, Harper & Steers

Needham, Harper & Steers, Chicago, had non-U.S. gross income of $16.8 million in 1983, or 17.9% of total gross income of $93.8 million. Non-U.S. billings were $112 million, or 17.9% of total billings of $625 million. The NH&S network covers 19 countries in which NH&S owns majority or maximum-allowable stock in five agencies.

NH&S' international activity has grown more than 600% in the past 10 years. In 1973, non-U.S. gross income was $2.3 million, or 8.2% of total gross income of $27.3 million. Non-U.S. billings for 1973 were $15 million, or 8.2% of a billings total of $182 million. In 1978, non-U.S. gross income had risen to $5.4 million, or 12.4% of $43.7 million total gross income, and non-U.S. billings had increased to a similar 12.4%, or $36 million of $291 million in total billings.

During 1983, NH&S enlarged its network by three, adding Carvis Needham in Spain, Dassas Jaglin Walhain Needham in France and Needham Standard International (Taiwan), in all of which NH&S bought minority shares.

Top international personnel include B. Blair Vedder, chairman; Norval B. Stephens Jr., exec vp, and Robert Rowley, senior vp-finance.

Ogilvy & Mather

Ogilvy & Mather International, New York, had non-U.S. gross income of $141.7 million, or 41% of total gross income of $345.8 million in 1983. Its non-U.S. billings were $999 million, or 42.3% of total billings of $2.36 billion. The O&M network covers 29 countries, and O&M owns majority or maximum-allowable stock in 26 agencies.

O&M's international business has been dropping as a percentage of its over-all business the past 10 years, a factor largely related to its acquisition of U.S. agencies that have limited international exposure. In 1973, its non-U.S. gross income was $45.2 million, or 59.7% of total gross income of $75.7 million. Non-U.S. billings for the year were $272.6 million, or 57.2% of total billings of $476.3 million. In 1978, non-U.S. gross income was $83.2 million, or 47.9% of total gross income of $173.4 million. Its non-U.S. billings for that year were $535.6 million, or 47.2% of total billings of $1.14 billion.

During 1983, the O&M network gained 100% interest in Dudley-Anderson-Yutzy Public Relations in the

(Continued from Page 65)

U.S., 100% interest in Aiders & Marchant Ltd. of Britain and 70% interest in Comecan S.A., Belgium.

The network added eight clients with dollar volumes of more than $3 million: Beecham, with $10 million; Royal Trust, $5 million; British Gas Corp., $4.6 million; Dulux Group, $4.5 million; Shell Australia, $4 million; Rothmans of Pall Mall, $4 million; Seagrams & Sons, $4 million-plus, and Citech Quartz, $3 million.

O&M added Michael Baulk, managing director O&M London; Jules Fine, exec vp, O&M U.S., and J. Renny Cunnack, chairman O&M Australia, as directors to O&M International, governed by a 16-member board of directors.

O&M restricted its chart list to clients served in five or more countries.

Publicis-Intermarco-Farner

Publicis-Intermarco-Farner, Paris, estimates its gross income from sources outside France was $27.1 million, or 33% of total gross income of $82.1 million in 1983. Its non-French billings were an estimated $182.8 million, or 33% of total billings of $553.8 million. The network covers 14 countries, and majority or maximum-allowable stock is owned in 12 agencies. Intermarco Advertising in New York is the only non-European shop in the network.

In the past five years the Paris arm of the network, including Publicis Conseil, which has 11 other agencies under its banner, and Intermarco-Conseil, have whittled away at the percentage of international to total business in the network. In 1978, for example, non-French gross income was an estimated $22.4 million, or 39.8% of total gross income of $56.1 million, and non-French billings were $154.7 million, or 39.9% of total billings of $387.4 million.

Only total billings of $226.5 million could be monitored for the network in 1973, which is the year Publicis-Intermarco purchased Swiss-based Dr. Rudolf Farner Advertising. Publicis merged with Amsterdam-based Intermarco the previous year. During 1983, the network added the European Parliament, billing $4.84 million.

The network is run by a corporate management board (CMB) in which members have special and/or regional responsibilities. They include Maurice Levy, chairman, Publicis Conseil; Claude Marcus, CMB chairman; Gerard Pedraglio, CMB vice-chairman; Bernard de Brouwer, communications; Michael Conroy, the Netherlands; Karl-Heinz Langhans, Germany, Sweden, Finland; Dr. Gunther Ludemann, finance and administration; John McCormick, and Nicholas L. Turkevich, specialized companies.

Roux, Seguela, Cayzac & Goudard

Roux, Seguela, Cayzac & Goudard, Paris, had gross income from sources outside France of $12.5 million, or 35.1% of total gross income of $35.6 million in 1983. Its non-French billings were $83.3 million, or 35.1% of total billings of $237.3 million. The network covers 11 countries and owns 51% of its foreign agencies, except Germany (56%) and the U.K. (52%).

RSCG did not begin to form a network outside France until the '80s. Its French and international business has grown considerably since 1978 when RSCG had gross income of $12.1 million on billings of $65.6 million.

During 1983, RSCG founded and took 51% of RSCG/van Diggele, Janzen, Schoenmaker, Amsterdam; bought a 51% interest in Publicis, an agency in Abidjan, Ivory Coast, and came out with a 51% interest in Garbarski RSCG, a product of a merger of RSCG Brussels with Gar-

barski/Partners.

Top international execs include Jean-Michel Goudard, president RSCG International, and Philippe Leguay, international director.

Saatchi & Saatchi Compton Worldwide

Saatchi & Saatchi Compton Worldwide, London, had non-English gross income of $142.4 million, or 56.2% of total gross income of $253.3 million in 1983. Its billings outside the U.K. of $938.8 million were 54.9% of total billings of $1.71 billion. The network encompasses 17 countries and, while most permit full ownership, Saatchi & Saatchi's extent of ownership in each affiliated agency is not known.

One of the fastest-growing shops in the industry, Saatchi gained its international presence largely through the acquisition of Compton Advertising, New York. In 1973, Compton had non-U.S. gross income of an estimated $14.6 million, or 48.5% of total gross income of $30 million. The same percentage held for non-U.S. billings of $97 million. In 1978, Compton had non-U.S. gross income of $46.2 million, or 56.5% of total gross income, and non-U.S. billings of $311.2 million, or 55.8% of total billings.

By 1983, Compton, along with other U.S. agencies McCaffery & McCall, Rumrill-Hoyt, Klemtner Advertising, Fairfax Advertising and Hoffman, York & Compton, was contributing $119 million in gross income and $962.4 million in billings from U.S. business to U.K.-based Saatchi.

Saatchi & Saatchi Compton Worldwide accounts listed in the accompanying chart were obtained by ADVERTISING AGE correspondents, and the chart was shown to Saatchi & Saatchi before publication.

Scali, McCabe, Sloves

Scali, McCabe, Sloves, New York, a subsidiary of Ogilvy & Mather Intl., had non-U.S. gross income of $11.5 million in 1983, or 32.8% of total gross income of $35.2 million. Its non-U.S. billings were $70.4 million, or 30.7% of total billings of $229.2 million. The network covers six countries, and Scali, McCabe, Sloves owns majority or maximum-allowable stock in six agencies.

The network, founded May 1, 1967, had an estimated $200,000 in non-U.S. gross income in 1973, or 5.9% of total estimated gross income of $3.4 million. Its non-U.S. billings were $1.4 million, or 5.9% of total billings of $22.5 million. By 1978, its non-U.S. gross income had risen to $558,300, or 4.8% of total gross income of $11.6 million. Its non-U.S. billings that year were $3.1 million, or 5.1% of total billings of $60.4 million.

In 1983 the network added three accounts worth more than $3 million, including Apple Computer (Canada), Nikon (West Germany) and Beecham (U.K.).

SSC&B:Lintas

SSC&B:Lintas, New York, had non-U.S. gross income in 1983 of $124.8 million, or 71.1% of total gross income of $175.6 million. Non-U.S. billings were $839.3 million, or 71.3% of total billings of $1.178 billion. The SSC&B:Lintas network covers 39 countries, and the agency owns majority or maximum-allowable stock in 36 of those agencies.

SSC&B:Lintas, well connected to the international market through Lintas in London and Lintas' founding parent and client contributor, Unilever, had non-U.S. gross income in 1973 of an estimated $52.1 million, or 68.9% of total gross income of $75.5 million. Non-U.S. billings of $347.1 million were 71.8% of total billings of

(Continued from Page 70)

$483.5 million. In 1978, the agency's non-U.S. gross income was $100.9 million, or 78.9% of total gross income of $127.9 million, as non-U.S. billings rose to $664.6 million, or 79.1% of the total.

SSC&B:Lintas, part of the Interpublic Group of Cos. since April, 1982, when Unilever sold its 51% interest in the agency, won major international business in 1983 worth more than $3 million each from Coca-Cola Co., (Hi-C), Canon office equipment, Bahlsen Biscuits, Birds Eye frozen foods, Menumasters, Johnson & Johnson's Affinity, Carnation (Europe and Southeast Asia), Datapoint and Molnlycke.

Major international execs include: William V. Weithas, London, chairman-ceo; David Croisdale-Appleby, London, operations director and regional director-Scandinavia and Southern Africa; Philippe Charmet, Paris, chairman of the European coordination group and regional director for France, Italy, Spain, Portugal and Greece.

TBWA Advertising

TBWA Advertising, New York, had non-U.S. gross income of $27.4 million, or 78% of total gross income of $35 million in 1983. Its non-U.S. billings were $186.2 million, or 78% of total billings of $237.2 million. The network covers nine countries and holds majority or maximum-allowable stock in nine agencies.

TBWA's U.S. arm has been influencing a drop in the percentage of international business the past few years. The network, largely unformed in 1973, had gross income of $5 million on billings of $33 million, all non-U.S. By 1978, non-U.S. gross income had risen to $14 million out of a total $15 million, a decline in percentage to 92%, reflecting new business attracted to the New York TBWA shop.

TBWA added Henkel, spending $10 million, and Mohawk Data Sciences, AEG Telefunken and Volvo corporate, each spending $5 million.

Young & Rubicam

Young & Rubicam, New York, had non-U.S. gross income in 1983 of $139.6 million, or 33.7% of total gross income of $414 million. Non-U.S. billings were $933.5 million, or 33.8% of total billings of $2.761 billion. The agency network covers 23 countries and 32 agencies worldwide.

Like most large U.S.-based international agencies, Y&R has seen its percentage of non-U.S. gross income rise through the 1970s before falling back in the 1980s as a result of stepped-up U.S. advertising activity and acquisition of U.S. shops. In 1973, the agency had non-U.S. gross income of $39 million, or 40.1% of total gross income of $97.5 million.

In 1978, non-U.S. gross income increased to $85.7 million, or 42.1% of the total. Non-U.S. billings of $260 million and $571.9 million for the two comparative years held the same percentage as non-U.S. gross income to the total, even though by 1978 Y&R was reporting the activities of six acquisitions compared to two in 1974.

By 1983, when Y&R's percentage of non-U.S. billings to the total had dropped back to 33.7%, the agency was including 15 U.S. acquisitions under its corporate umbrella.

During 1983, Y&R gained major international business from Kodak, Colgate-Palmolive and Richardson-Vicks, but lost Atari and resigned Procter & Gamble.

Top execs involved directly with international business: Edward N. Ney, chairman-ceo; Alexander Kroll, president-chief operating officer; Peter Georgescu, president, Y&R International; Harold Burson, exec vp-chairman and ceo, Burson Marsteller Inc., and Joseph E. De Deo exec vp-president, Y&R Europe.

GM covers both ends of scale

Crain News Service

DETROIT—A General Motors reorganized into big and small-car groups more accurately could be called the "Upscale Group" and the "Downscale Group," according to Alexander Cunningham, exec vp of North American Passenger Car operations.

The GM reorganization plan (AA, Dec. 19) divides the five car divisions and Canadian operations into two supergroups. Buick, Oldsmobile and Cadillac (BOC) make up one, while Chevrolet, Pontiac and GM of Canada (CPC) compose the other.

The problem has been that these two groups have been referred to as the big-car and small-car groups, which Mr. Cunningham said is wrong.

Both groups will sell all sizes, unless the marketplace decides differently, he said. The difference will be in market appeal. The BOC Group will appeal to the upscale buyer and the CPC Group will appeal to the downscale group. But there will be some overlap.

In the future, GM could name these groups, Mr. Cunningham said, since "it is a kind of hard to get allegiance, to get enthusiasm about an initial group." But so far no one has a good idea of what to call them.

The divisional marketing staffs will be made up not only of marketing specialists, but will be increased to include engineers, finance people, designers and long-range economists. That will mean that the type of individual who would be appointed a divisional marketing manager will change, he said.

"One of the things that happens when you [make such changes] is you start to identify people who have broader-gauged talent, and that is good for the organization because you start to identify the people who have general over-all talent and are not specialists," Mr. Cunningham said.

But all these things will be done so the customers and dealers notice few, if any, changes, except a difference in products offered by the five car divisions, Mr. Cunningham said.

"If you are running a hotel and have a coffee shop, a businessman's restaurant for reasonably priced good meals and a gourmet restaurant and each has its own kitchen, you would be more effective perhaps to have a single kitchen that retains the menus of the various restaurants," he said.

"We're not changing the value relationship to the customer, but we are able to answer his order whether it is upscale or downscale in the marketplace, but we do it in a more effective way."#

BK ads trigger awareness gains

(Continued from Page 4)

then Burger King introduced the MacDonald family of Norwalk, Conn., wearing disguises to hide their embarrassment over having switched to Burger King despite their name. The chain's awareness level jumped again, this time by 8.6 percentage points.

Now Mr. Rodney, child star Emmanuel Lewis, the cavemen cooking their burgers over a fire and the other characters in Burger King's latest pool of ads have caused the chain's awareness to jump once more, as expected, but a little less than the last time.

The other bit of bad news for Burger King is that even with this latest shot in the advertising arm, it still finds itself in the No. 3 spot among fast-food advertisers. McDonald's, which this week broke the "It's a good time for the good taste of McDonald's" campaign, held on to its accustomed No. 1 spot, although its share of first mentions dropped 3.3 percentage points from April, leaving it with a 29.2% share (its lowest since adWatch began in April, 1982).

Wendy's, which has been giving Clara Peller a rest, was the month's biggest loser, dropping 5.9 points to 22.8% of first mentions. Still, it remained No. 2, more than four points ahead of Burger King.

Even without Clara, Wendy's remained the most-often-cited advertising when the 1,250 respondents were asked what first came to mind without regard to product category. Last month 118 people, or 9.4% of the sample, named Wendy's, down from 19.3% in April. The other best-recalled advertisements getting at least 1% of responses were for, in descending order: Pepsi-Cola, Coca-Cola, Burger King, McDonald's, Miller/Miller Lite, Budweiser/Bud Light, Ford and Toyota.

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a nationally projectable sample of adults to name the advertising that first comes to mind in a variety of product and service categories from all they have seen, heard or read in the previous 30 days.

Last month, 1,250 consumers were questioned by phone. Under adWatch methodology, an increase or decrease of 2.8 percentage points between monthly samplings is considered statistically significant and attributable to more than sampling variations.

The largest gain in last month's survey belonged to Apple, which registered a 9.1 percentage-point gain in the computer category. With tv support for its Macintosh personal computer and a heavy schedule of print ads for its full (and recently expanded) product line, Apple's share of first mentions rose to 32.1% from 23% in April.

No. 2 IBM held on to the nearly 3-point gain it registered in April with a 14.6% share. Commodore remained in the No. 3 spot with 6.2% of first mentions.

In other significant changes last month:

- American Airlines, which has been advertising its expanded routes and flight schedules, took the No. 1 spot in the **airline** category for the first time. Its awareness share rose 3.2 percentage points to 13%, nosing out No. 2 Eastern, which fell to 12.4% from 15% in April.

United found itself in the No. 3 spot for the first time, with an 11.8% share of first mentions. Perhaps, as the airline itself predicted, no one noticed that the voice on its tv spots belongs to actor Robert Duvall.

- Chevrolet's efforts to catch awareness-leader Ford in the **cars & trucks** category suffered a setback last month. Chevy's awareness level dipped 3.5 points to 10.8% of first mentions. No. 1 Ford registered a 23.1% share. Toyota was a close third with 8.1%, threatening for the first time to take over the No. 2 spot.

- Another consistently strong advertiser that saw its ad awareness level dip last month was Budweiser in the **beer** category. Its share declined three points to 12.8% in May. Benefiting once again from a strong advertising-awareness level in its new southern markets, Coors passed Miller Lite to tie Miller High Life for the No. 2 position. Both claimed 9% of first mentions last month.

Bud's greatest strength continues to come from respondents in the West, where it came to mind first for 19% of the sample, compared with 13% for No. 2 (regionally) Coors. Miller High Life is the winner in the Northeast (13%), with Bud second.#

For more information, contact Gary Gabelhouse, SRI Research Center, 301 S. 68th St., Lincoln, Neb. 68506. Phone: (402) 489-0351.

Fahlgren, Swink link

(Continued from Page 3)

tion of the estimated $1 million Domino's account, a Fahlgren spokesman said.

The merger gives the new agency widespread coverage of Ohio markets, the spokesman said, with Fahlgren's offices in Cincinnati, Columbus, Toledo and Swink's offices in Marion, Columbus and Cleveland. Additionally, Fahlgren has an office in Parkersburg, W. Va., and Swink has an office in Greensboro, N.C. The agency is likely to look south from Ohio for future growth, the spokesman said.

No determination has been made about where the agency will be headquartered.

Fahlgren's Columbus office, which handles McDonald's restaurants' Central and Northwest Ohio accounts, will be combined with Swink's Columbus office, but all of the other offices are expected to continue handling their existing clients, according to the spokesman.

Among Fahlgren's 50 clients are Blue Cross-Blue Shield of Central West Virginia, Blue Cross of Northwest Ohio, Borg-Warner Chemicals, Inco Alloys International, McDonald's restaurants in Central Kentucky, Central and Northwest Ohio and western and southwestern West Virginia, National Automotive Parts Assn., Totes and Valvoline Oil Co.

Swink has 45 clients, including Banc One Corp., Blue Cross-Blue Shield of Central Ohio, Ebco Mfg.'s Oasis Water Coolers, Glass Packaging Institute, Landmark Inc., Owens-Illinois, Parker Hannifin Corp., T. Marzetti Co. and Volvo White Truck Corp. It handles Domino's in Ohio, Kentucky, West Virginia and parts of Tennessee.

Fahlgren's experience in the automotive aftermarket and network media buying, along with its growing direct-mail and public relations divisions, will complement Swink's experience with industrial and technical accounts and its typography service, the spokesman said.#

Lee & Young to Toronto

TORONTO—Lee & Young Communications, New York, a corporate identification and marketing communications company, has formed a new corporation headquartered here. Campbell, Lee & Young is a joint venture with W.R. Campbell Partners, a Toronto management communications consulting corporation. W. Rodger Campbell, chairman-president of W.R. Campbell, is president of the new company, at 150 Bloor St. W., M5S 2X9.

for the record

U.S. OLYMPIC COMMITTEE'S right to keep the five-ring Olympic symbol from being marketed in the U.S. without its approval was upheld last week in court. The decision of the U.S. court of appeals for the second circuit, New York, upheld an earlier ruling. In other developments concerning the summer games in Los Angeles, spot sales for ABC-TV stations seem to be advancing at less than an athletic pace. With barely a month to go before the games start, ABC said that most of its owned and affiliated stations appeared to have sold only about half of their local Olympics commercial availabilities. ABC also said last week that it is cutting five hours of Olympics coverage. That will bring its total broadcasting of the games to 180 hours. To make the cut, the network will delay by 30 minutes its Monday-through-Friday starting time for coverage. ABC felt the 7:30 a.m. (PT) startup was too early, a network spokesman said. American Express Foundation, New York, plans to fund closed-captioning for 78½ hours of ABC's Olympics coverage. *(ABC, LAOOC talks, Page 115).*

D'ARCY MACMANUS MASIUS WORLDWIDE has announced that it will acquire a 9.9% equity stake in Man-Nen-Sha, Japan's 13th-largest ad agency, with 1983 billings of $225 million. In an exchange of stock between the two shops, MNS also will take a reciprocal investment in DMM. This agreement fits in with DMM's ongoing program to expand its presence in the Western Pacific region.

E&J GALLO WINERY, Modesto, Cal., last week became the latest major wine marketer to offer discount coupons in California. Gallo, the largest winery in the U.S., earlier opposed couponing in the state. It has begun a series of newspaper ads in major markets in the state, featuring $1-off mail-in refunds. Distillers and wineries have taken to couponing since a California state court authorized their use (AA, May 14). Ogilvy & Mather, San Francisco, handles Gallo.

LACTO MILK PRODUCTS, a subsidiary of Johanna Farms, Flemington, N.J., is introducing La Chocolat chocolate yogurt into New York. Print ads and tv will support. Annual spending is $2 million. Sawdon & Bess, New York, handles.

THE TOP 25 NATIONAL ADVERTISERS on independent tv stations spent nearly $152 million on the indies in the first quarter of 1984, says the Assn. of Independent Television Stations, New York. That represented 59% of the advertisers' spot tv volume. Topping that list of advertisers in the first quarter were Procter & Gamble, spending $34.7 million; General Mills, $12.8 million, and Warner-Lambert Co. and General Foods, each with about $8.8 million

ALL OF METROMEDIA GROUP now subscribes to Arbitron Ratings Co.'s overnight tv meter service. KRIV, Houston; KRLD, Dallas; WCVB-TV, Boston, and WTTG, Washington, are the latest to sign up.

CABLE NETWORKS, New York, has been named the ad sales rep for the Connecticut Cable Interconnect, which consists of seven cable systems reaching a total of 300,000 subscribers.

NATIONAL LAMPOON, New York, has hired Pattis Group, Chicago, to handle its advertising sales in the Northeast and West. The monthly's four-person New York sales staff, which handled Northeast sales, has been dismissed. Pattis has hired one of those staffers. Other reps that *National Lampoon* has used in the Southeast and Midwest will continue their duties. Len Mogul, chairman of the executive committee at parent National Lampoon Inc., will function as advertising director.

WARNER AMEX Satellite Entertainment Co., New York, has filed a prospectus for the long-awaited public offering of its MTV: Music Television and Nickelodeon cable networks (AA, March 19). WASEC, a joint venture of Warner Communications and American Express, plans to sell about 5 million shares of common stock in a new spinoff company, MTV Networks, at between $16 and $18 a share.

WARNER AMEX Cable Communications and Dallas apparently are close to resolving their differences over renegotiating the city's cable tv franchise. A city council committee has recommended a series of tradeoffs with Warner Amex. Officials at the cable company termed the agreement "tough" but said that the company would work with the city. Some observers earlier thought that Warner Amex might be shown the door and the franchise reopened to competitive bids because of ongoing service problems.

BEATRICE COS., Chicago, says that about 91% of outstanding Esmark common stock and about 73% of Esmark preferred stock have been tendered in response to its offer. The offer expired on June 20. Beatrice expects to complete the acquisition of Esmark by early August, paying $60 a share for common shares and $42.60 for preferred stock.

GERALD KERN, who has already helped start two marketers of skincare products, is working on a third venture. Mr. Kern is joining with tennis pro Chris Evert Lloyd and others to form a company that will sell a new line of cosmetics and skincare products. Although the company is still unnamed, the product line is likely to be called Chrissy, and plans are to introduce it next spring at mass retailers. Ms. Lloyd will be a product consultant and spokesperson in a $3 million tv and print campaign. Kornhauser & Calene, New York, handles. Mr. Kern helped start, and is chief executive officer of, Mas Industries and Skin Controls Systems, both Beverly Hills, Cal.

WORTH NOTING: M. Rubin & Son, licensee for Englishtown Sportswear Ltd., will use cable tv and national fashion magazines for a $1 million campaign promoting Sergio Valente men's active wear, casual pants, woven shirts, and mens and boys jackets. Trahan, Burden & Charles, Baltimore, handles the account and reports that ads are due to run within 30 days. . . **The trial date** for McDonald's Corp.'s suit against Los Angeles franchisee Charles Griffis and for Mr. Griffis' countersuits (AA, Feb. 13, *et seq.*) has been rescheduled for Dec. 11. Originally, it was to have been June 26. . . **Edward Finkelstein**, chairman-ceo, R.H. Macy & Co., has been elected to the board of Time Inc. . . **James Stuart**, a founding partner of Stuart Brothers, an investment banking company, has been elected to the board of **Warner Computer Systems**, New York-based marketer of financial software and databases. . . **Chrysler Corp.** has underscored its interest in expensive luxury coupes by purchasing a 5% interest in specialty auto maker Officine Alfieri Maserati, Modena, Italy. It will cooperate with Maserati on designing and making "special-production models" that Chrysler will sell in the U.S. and Canada.

O&M gets Hallmark greetings

By DIANE STAFFORD

KANSAS CITY—Hallmark Cards, its marriage with Young & Rubicam a sudden and unexpected bust, said yes to Ogilvy & Mather, New York, last week amid rosy predictions that a "long term" relationship for the two lies ahead.

O&M, which beat Leo Burnett USA for the $40 million account, had been among shops that participated in Hallmark's highly publicized agency search two years ago.

Hallmark officials said this week that in the latest go-around O&M was selected over Chicago-based Burnett after an intensive and "very difficult" review.

The two agencies vied for the greeting card account after Hallmark terminated its relationship with Young & Rubicam (AA, May 10, *et seq.*). The decision to release Y&R was made in early May when Hallmark decided the agency could not serve it and AT&T Communications, both of which deal in "emotional, heartfelt advertising."

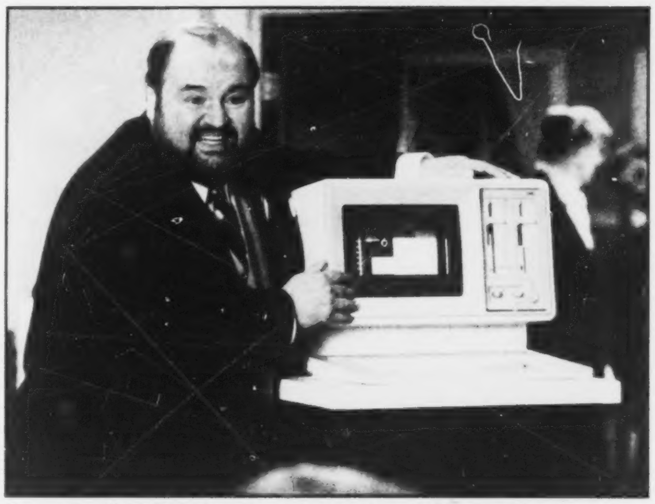
O&M also is an AT&T agency, for AT&T Information Systems.

The three agencies, plus Foote, Cone & Belding, had competed for the account two years ago. Only O&M and Burnett were invited to bid on the account again after Y&R was released.

Y&R's work for Hallmark will continue to appear through 1984, although the O&M contract is effective Aug. 1.

Christopher E. Clouser, corporate vp-public affairs and communications, said Hallmark believes it has a "very clear understanding with [O&M] in regard to the talent and abilities they'll bring to this account."

Mr. Clouser said no theme has been selected for O&M campaign work.#



Comedian Dom DeLuise plays a computer retailer who loves surprises in tv spots that accompany NCR's first IBM-compatible computer. Backer & Spielvogel, New York, is the agency.

NCR to ring up new computer

By BRIAN MORAN

NCR Corp. will introduce its first IBM-compatible personal computer this fall with a $10 million-to-$15 million advertising campaign featuring comedian Dom DeLuise.

The effort, created by Backer & Spielvogel, New York, breaks Sept. 1 on network tv supported by inserts in major-market newspapers, general-business magazines, computer books and trade publications. The campaign will center on the theme: "A better computer. It's exactly what you'd expect from NCR."

In the tv spots, Mr. DeLuise plays a computer retailer who loves surprises. He's excited about unveiling the NCR machine to his customers, but is disappointed when the computer's performance fails to surprise anyone. A test flight of commercials with Mr. DeLuise aired in San Francisco and Los Angeles between March 15 and June 10.

A series of six new 30 and 60-second tv spots will be produced next month, according to Steve Bowen, vp-communications division. The campaign is scheduled to run through the end of the year. *(For related AT&T story, see Page 85.)*

Dayton, O.-based NCR plans to ship its 16-bit computer, the PC 4, to dealers July 15. Retail price has not been set, but it is expected to match or slightly undercut that of the IBM PC, Mr. Bowen said.

With the PC 4, NCR joins other major communications giants such as AT&T and ITT as late arrivals to

Coke spots aim to 'rally' teen market

By NANCY GIGES

Coca-Cola, following the lead of archrival Pepsi-Cola, is unveiling new commercials today designed for greater appeal to teens.

The Atlanta-based company is previewing the new spots at a corporate meeting of 3,000 bottlers and suppliers. Calling the get-together a "high-tech celebration of the system's success of the past five years," the company is showing spots for Coke, Diet Coke, Diet Sprite, Sprite and Tab. The commercials will begin airing in late July during the Olympics.

The Coca-Cola spots focus on a younger consumer, said Sergio Zyman, senior vp-marketing, Coca-Cola USA. "We must rally the new users who are coming into the soft-drink category for us," Mr. Zyman said.

He described the commercials as aiming to capture "the romance of the common experience" and "moments which mean the most."

Pepsi-Cola first acknowledged the importance of the younger consumer with the signing of superstar Michael Jackson. *(Coke is it at first stop of Jacksons' tour. See Page 3.)*

The "Coke is it" theme is about the only element remaining from that product's current, 2-year-old campaign. The company has opted for more upbeat music and new

P&G's High Point drops Lauren Bacall

By GAY JERVEY

Procter & Gamble has retired Lauren Bacall as spokeswoman for High Point decaffeinated coffee in favor of a slice-of-life campaign that stresses its reformulated taste and aroma.

Now breaking nationally, the new effort is part of an umbrella brand strategy promoting High Point as "the smooth, nonbitter coffee product that it is," a P&G spokesperson said.

She added, "We believe the new ads better convey the benefits of this product than a single spokesperson can. It has nothing to do with the effectiveness of Ms. Bacall."

The latest High Point effort features an all-American family starting their day.

"Come away to High Point," the copy says. "Come away from the stress to a new High Point and relax. . .By taking special steps, HP gently washes away not only caffeine, but also bitterness that can interrupt your coffee pleasure," the copy concludes.#

Brits tweak Pa. town

By WILLIAM GLOEDE

WILKES-BARRE, PA.—Back in 1778 the British, aided by Indians, burned this city, then a small settlement on the banks of the Susquehanna River.

In 1984, they're doing it again, only this time they're doing it in advertising and they insist it's all in the spirit of good-natured British humor.

British American Tobacco (BAT) is running full-page ads in the northern and Southern California editions of *Playboy* for its State Express Three Fives (555) International cigarets. The copy reads, "Worthy of Wimbledon not Wilkes Barre. Three Fives International: England's luxury cigaret."

Officials in this city of almost 60,000 had not seen the ad when contacted by ADVERTISING AGE, but a spokesman for the mayor said

Lutz may make personnel, agency moves

Ford ready to shake up Europe

By ANGELA CHATBURN

LONDON—The return of Robert Lutz to head Ford Motor Co.'s European operations could lead to a major personnel shakeup and a review of the auto maker's $28 million advertising account here, observers say.

Mr. Lutz, Swiss-born but with U.S. citizenship, served as Ford of Europe chairman from 1979 to 1982, when he returned to Michigan to run the company's international division and serve on Ford's board.

Sources here say Mr. Lutz is expected to "shake things up a bit," following losses of more than $150 million in the U.K. last year. The losses marked the first time Ford sank into the red here in 10 years.

Ford, though, points out that it has increased its market share recently and doubts any auto maker is showing a profit with oversupply all around Europe.

Mr. Lutz' return as chairman also will herald a period of "streamlining" within Ford itself, the sources said.

Life has been unsettling recently at Ford's European headquarters in Brentwood, Middlesex. Several U.S. executives have taken "early retirement."

Among them were former chairman Edward Blanch and vp-marketing Bob Currier, who was replaced by Jack Brinkly from Ford's European truck operation.

Also, after weeks of rumors, European president James Catalongo resigned in May.

Ford has cut back on its mainstream advertising to concentrate on discounting and dealer incentives, and this is likely to accelerate under Mr. Lutz, whose direct Ford responsibility also will allow him to push through new designs more quickly.

Ford's Sierra has been dogged with problems. At the same time the company has had to watch companies like General Motors' Vauxhall suddenly start to produce sparkling new designs.

A review of advertising also seems likely, observers say, as Ford takes closer central control.

This could mean trouble for Ford's British agency, Ogilvy & Mather, since J. Walter Thompson Co. handles the account in most of Europe.

O&M also has had to contend with an attack from Young & Rubicam, which recently pitched for the $28 million U.K. business. Y&R's new managing director, John Banks, was previously head of the Ford business at O&M and had a very strong grip on it.

Y&R handles Lincoln-Mercury in the U.S.#

100 LEADING MEDIA COMPANIES

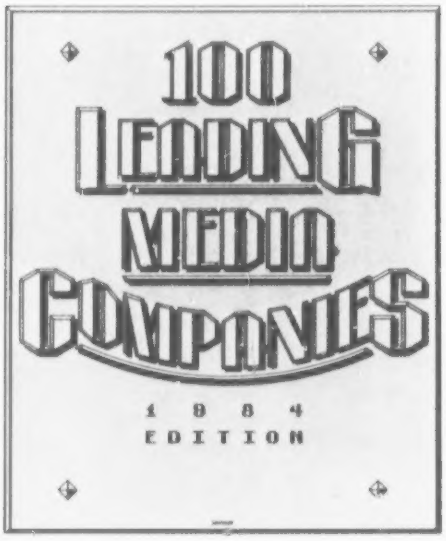
1984 EDITION

Advertising Age

June 28, 1984

100 Leading Media Companies

The leading U.S. media companies are profiled and ranked by 1983 revenues. Company profiles include recent personnel changes and complete media property listings. Also included are charts featuring the leaders' revenue breakdowns by medium, listings of cable properties and numbers of subscribers, magazine and newspaper circulation, broadcast properties and acquisitions and divestitures by the media companies. Indexes to the profiles and the charts also appear on Page 16.



Profile issues coordinator: Craig Endicott

To our readers

Becky Petersen, who worked hard and long proofreading on this 100 leading media companies issue, does not remember her dreams unless they are about the 100 media companies. The evening after she prepared the acquisitions chart on Page 48 of this issue, she awoke with a start, beads of sweat rolling down her face and a message on her lips. "Cake Media Co., I forgot Cake!" she exclaimed in a panic.

Cake, in that early-morning context, came alphabetically on the acquisitions chart between Cahners Publishing Co. and Capital Cities Communications Corp. And Becky had forgotten it! She did not remember what media property Cake had bought, or the price paid, she only knew it left a bad taste in her mouth.

Becky's shattered slumber is something most of us have experienced in putting together this issue. It becomes a burglar prying his way into your midnight reverie, forcing you to answer imponderable questions at various stages of the issue's production:

"Hey, SONny," the intruder says, "you DID remember to work from the net operating rather than the gross revenues of *Peanut PianterWorld*?

"You DID remember to subtract contract printing from the total newspaper operating revenues segmented by the company in its annual report? And don't forget that Media General sweetens its broadcast segment by lumping ad sales from its ad rep into the advertising generated by its seven o&o tv stations.

"Surely you didn't forget to add this acquisition and that. The media property lineups from year to year are like apples and oranges.

"Was Nielsen or Arbitron checked to determine a tv property's standing in the local market? And did you figure in the over-all market growth in broadcasting since the FCC stopped doing that in 1980, and check the station's ranking for 1980 before estimating its revenues in 1983? Come on now?

"Has the price per issue of the daily newspaper gone up in Newspaperville, and did you work in a discount on circulation revenues because independent carriers carry the delivery burdens in that market?

"If you know the gross and the advertising increase given by the company, how are you going to arrive at net operating revenues? Try asking the company?

"How many cable subs were there at the first of the year and how many at the end, and what was the paid subscriber figure, and how much of the paid goes into company coffers?

"Finally, what is media anyway? Is media that new Call-It service in which a 'subscriber' pays a per-call fee for each sports score, Bible quote or daily joke he or she gets by calling the service updated hourly by Lee Enterprises?"

It's enough to lose sleep over.

Craig Endicott

Letters

Tribute to Shaw

I thoroughly enjoyed James Brady's column "The old lion" (June 7), the tribute to Irwin Shaw.

As a young veteran of World War II, I enrolled in college in 1946. Two years later, I played the chief protagonist in Irwin Shaw's "Bury the Dead." Since that time I think I've read just about everything that he had published.

Mr. Brady's tribute was one of the best that I have read, and I thank him.

Edwin J. Lasko
Executive vp/general manager
Cedar Rapids Television Co.
KCRG TV 9
Cedar Rapids, Ia.

Brady on D-Day

I rarely write letters of this kind. There never seems to be enough time. However, James Brady's column, "Forty years after" (May 24), is one of the finest I've read. I have always admired his command of the language and his ability to use words economically without sacrificing proper explanation.

I missed the war, barely, but wound up in Korea shortly thereafter. World War II, however, has been a focus of mine for 20 years. I read all that I can about it, and my memories of it are vivid, because I was an impressionable young teen ager when it all took place. I wrote V-Mail to my next door neighbor for five years, for instance, as he fought through North Africa, Sicily, etc.

Boston

The British did not flee

As an ex-RAF pilot who "flew the beaches" on D-Day, I compliment James Brady on his sensitive review of the events of June 6, 1944, and thereafter. His column is good reporting.

It contains, however, one major error that should not pass without correction. Mr. Brady notes that subsequent to the fall of France, "the British fled." Every historical review of that period testifies to the fact that the British forces most assuredly did not flee.

As a direct result of the perfidious capitulation of Belgium and France, the British forces were placed in a battlefield situation from which only a retreat and later regrouping would avert defeat and the loss of thousands of lives.

Far from fleeing, or "running away," the retreat to the French coast was handled in a masterly fashion and the exodus by sea is one of military history's great accomplishments.

The thousands of lives that were saved then returned to France on D-Day, and many still lie there. The British did not run away, and a thousand years of military history gives validity to the fact that fleeing from an enemy plays no part in the British code of military conduct.

Snack food or junk food?

The article, "'Snack food' or 'junk food'" (Olympics coverage, May 17), contains misinformation the Chocolate Manufacturers Assn. wants to correct.

The article quotes a "disgruntled" Olympic observer who suggests that peanut chocolate confections, the official snack food of the Olympics, should be labeled the "official Olympic junk food."

Definitions of "junk food" are at best tenuous and designed more to inflame than inform. A snack with substantive nutritional value would not be judged as "junk food" by those trained in nutritional science. For example, the U.S. Dept. of Agriculture's "competitive foods" rule for schools states that foods containing 5% or more of the recommended daily allowance (RDA) of any one of eight selected nutrients (protein, vitamins A and C, thiamin, riboflavin, niacin, calcium and iron) are not considered food of "minimum nutritional value."

Milk chocolate and milk chocolate with peanuts surpass the 5% level for three different nutrients—protein, riboflavin and calcium. Following the standards set by the USDA for competitive foods, milk chocolate products cannot be considered of "minimal nutritional value."

Leaders busy buying and selling in 1983

Product realignment marked 1983 for the top 100 media companies in the U.S. ranked by ADVERTISING AGE as media units jumped from one to the other like a game of musical chairs.

Fifty of the 100 largest media companies were buyers and 35 were sellers in this reshuffling of properties that propelled some to greater heights on the charts and pushed others beneath the cutoff point of $77.5 million in revenues, up from 1982's $67 million for No. 100.

In the fourth annual ranking of media companies, No. 1 ABC, No. 2 CBS, No. 3 Time Inc. and No. 4 RCA Corp. (NBC) retained their rankings from the previous year. Advance Publications (S.I. Newhouse) jumped from No. 7 to No. 5, pushing Gannett Co. down a notch to No. 6 and Times Mirror Co. from No. 6 to No. 7. Knight-Ridder Newspapers held firm at No. 8. Tribune Co., in grabbing the No. 9 spot, exchanged places with Hearst Corp., No. 10.

The causes of 1983's acquisition-divestiture mania were many. For one, a substantial growth in media revenues for the 100—$41.75 billion, up 14% from 1982—meant more cash on hand to play the market.

Traders in broadcast units are in a frenzy to hook the most desirable properties, betting that the Federal Communications Commission soon may lift its regulations limiting the number of properties in group ownership. When and if that occurs, the market will turn into more of a seller's market than it already is.

VANITY FAIR
BLONDE AMBITION
She's Just Wild About Oscars
Superegos of Architecture
Vreeland Remembers
Keith Richards Doesn't

Troubled times in 1983 beset* Vanity Fair, *which had sparse ad revenues and its third editor by January, 1984.

Wall Street's latest fad—the leveraged buyout—had media companies writing about their own sale. Leveraged buyouts, defined as the purchase of a company by a group of investors and financed mainly by borrowing against the assets of the company with company returns used to retire the debt—made bedfellows of investment bankers and media top management who thought their properties were undervalued on Wall Street and thus vulnerable to hostile takeovers.

Broadcast companies were particularly vulnerable to this new ownership craze. Wometco Enterprises (No. 55), Golden West Television (No. 68) and Metromedia (No. 24) were buyout victims, while Multimedia is rumored as a "possible" for 1984. Newspaper giant Harte-Hanks Communications (No. 28) is reverting back to the Harte and Hanks families of Texas in a leveraged buyout, but the buyout remains a point of confusion in San Antonio: "Why, we're still wondering what that's [leveraged buyout] all about down here," a company contact says.

A number of properties exchanged involved whole media segments, countering the trend toward diversification shared by most of the 100 (24 of the companies, however, remain single media companies). General Electric (No. 78) and Dun & Bradstreet Corp. (No. 18) sold their broadcast units, and H&C Communications divested its sole newspaper property, the *Houston Post.*

The ADVERTISING AGE survey divided media company contributions into four main media segments: Newspapers, magazines, cable and broadcast.

For the most part, media revenues were defined as revenues generated largely by advertising and regular circulation or subscription fees. By definition, this eliminated book publishing and directory generation, ad rep activity, job printing, computer databanks, software production, and program syndication and production. The definition included the new teletext and videotex ventures and electronic newsletters among the battery of rapidly emerging nontraditional media offerings.

Newspaper revenues continued to dominate the 100 media company activity in 1983, contributing 39%, or $16.39 billion, of the total media revenue take. Newspaper revenues represented the smallest year-to-year revenue increase of the four media segments—11.6% over 1982.

Besides the dramatic shifts among newspaper properties affecting Maclean Hunter Communications (from No. 95 to No. 80), now part owner of the *Houston Post*, and News America Publishing (No. 30) through its acquisition of the *Chicago Sun-Times*, newspaper companies continued their evolutionary tendency of either closing evening papers, merging them with their morning sister papers, or shifting to morning distribution entirely. The most attractive acquisitions, and certainly the most available, were the small dailies or weeklies. Twenty-one small dailies were purchased by the 100 leading media companies.

100 LEADING MEDIA COMPANIES
1984 EDITION

Scripps-Howard (No. 17) folded the *Memphis Press Scimitar*, leaving its *Commercial Appeal* the only paper in town. The *Press Scimitar* in 10 years had dropped from 127,000 circulation to 80,000, almost the numbers experienced the past 20 years by the *Oklahoma City Times*, which owner Oklahoma Publishing Co. (No. 27) folded into the morning *Daily Oklahoman.*

Initial circulation losses of 10% were recorded by both the merged products, a figure not considered excessive in such a move. A 12% slide in circulation was recorded when the Post-Intelligencer was merged into the *Seattle Times* under a joint operating agreement.

However, when Pulitzer Publishing Co. (No. 42) moved its St. Louis Post-Dispatch from evening to morning largely to attract readers from the morning *Globe-Democrat*, its daily circulation increased 9% the first month. Credit for this increase rests largely with publishing problems at the *Globe*, which was sold by Advance Publications (No. 5) to Jeffrey Gluck early in 1983. A move to a morning property by the Post-Dispatch also was seen as an effort to pull in more of the St. Louis County market where much of the wealth is, but that is dominated by weeklies such as the Suburban Newspapers of Greater St. Louis, purchased for $80 million by Ingersoll Publications Co. (No. 74).

The persistent presence of Gannett Co.'s (No. 6) *USA Today* continues to push local competition to new graphic heights. Houston Chronicle Publishing Co. (No. 51) and Dispatch Printing Co. (No. 67) papers have gone through makeup changes admittedly influenced by the Gannett paper. The first ABC audit of *USA Today* was released in this week. It set circulation at 1,179,834 for the last quarter of 1983. Gannett claims that figure has risen to an unaudited 1,332,974 for the first quarter of 1984.

Braves
COSMOS
PIRATES
Phillies
HarlemGlobetrotters Inc.
CUBS

Media street battles carry over to the ballpark where Tribune Co.'s Cubs take on Ted Turner's Braves, Taft's Phillies (47.5%), and Cap Cities' Pirates (49%). Warner has the Globetrotters, Ice Capades and Cosmos.

Courtesy Tri-Star Pictures

Robert Redford, with his Wonderboy slammer, got "base knocks" for media companies Time Inc. (through HBO) and CBS in the film "The Natural," produced by Tri-Star Pictures, a joint venture of the two and Columbia Pictures.

Broadcast revenues followed newspapers as a revenue generator among the 100 leading media companies, contributing 28.8%, or $12.08 billion, of total media revenues. Broadcast revenues represented a 13.7% increase over 1982.

The comment, "We want our complement [of broadcast properties], whatever it may be," by Scripps-Howard (No. 17) broadcast unit president Donald L. Perris, sums up the rush to acquire tv and radio stations. That statement was delivered after Scripps-Howard purchased KNXV-TV, Phoenix, for a group mix of seven tv, three am and four fm stations, putting it closer to the 7-7-7 mix permitted under federal law. It was echoed by Joe M. Dealey, chairman of A.H. Belo Corp. (No. 41), soon after his Dallas-based company bought four tv stations from Dun & Bradstreet.

Speculation on the lifting of the 7-7-7 rule has led to a flow of broadcast properties between the 100 leading media companies, 22 of which were buyers and 22 sellers during the year. Media companies acted as though they were "strangled" by the FCC restrictions as they bought properties in working toward the 7-7-7 ceiling and spun off properties as they exceeded the limit in a frenzy of product upgrading.

Belo, which exceeded the FCC limit for tv with the D&B acquisitions, picked over the litter before spinning off two longtime Belo tv stations to Freedom

(Continued on Page 10)

Leaders

(Continued from Page 8)

Newspapers (No. 45) and two others from the D&B package to LIN Broadcasting (No. 86).

Cash-rich H&C Communications last week bought for $182.5 million the two tv stations offered for sale by Cowles Communications and ditched its Meridian, Miss., tv property. Evening News Assn. (No. 18) and Capital Cities (No. 16) continue to beat the tv acquisition trail.

Magazine revenues among the 100 media companies contributed 17.4%, or $7.26 billion, of total media revenues. Magazine revenues represented an increase of 12.2% over 1982.

***Computer side ventures include Instant Software Stores at IDG (above); Computer Patch stores at Stauffer and Computer Emporium at* Courier-Journal & Louisville Times.**

Finer tuning of their respective markets occupied the thoughts of magazine publishers, especially at the more general newsweeklies and men's entertainment publications.

U.S. News & World Report, whose continued decline in circulation and advertising led to speculation that a sale would be imminent, found a buyer in *Atlantic Monthly's* Mortimer Zuckerman. Mr. Zuckerman bought the company of the same name (No. 72) for $168.5 million this June, and plans to camp out at the politically conservative publication for a year before considering directional changes.

Newsweek, experiencing a down year in advertising, is seeking to correct that by increasing the rate base. The magazine is backing its circulation drive with a multi-million-dollar ad campaign addressing the "baby boom generation readers," who comprise a large segment of the magazine's readership, says a spokesperson for the magazine parent, Washington Post Co. (No. 13).

Clear product positioning is in store for Playboy Enterprises (No. 59) and Penthouse International (No. 61), whose men's entertainment magazines continued to lose advertising and circulation, the latter forcing rate base cuts in both magazines in 1983.

Playboy now is positioning itself in advertising as a contemporary life style and service magazine to build advertising and newsstand sales. *Penthouse* resuscitation plans include an incredible editorial-to-ad ratio shift from 2½-to-1 to 5-to-1, the editorial largesse to come from pictorials, articles and fiction.

The escalating computer market and its attendant publications has provided a harvest at Ziff-Davis Publishing (No. 31) and a newcomer to the list, International Data Group (No. 97).

Time Inc. (No. 3), however, found its cable-specific *TV-Cable Week* venture a bust and closed it after losing $47 million.

Cable was the most active segment among the 100 media companies, contributing 11.3%, or $4.71 billion, of total media revenues. Cable revenues represented the largest year-to-year revenue increase of the four media segments—27% over 1982.

As in 1982, the big cable companies focused more on squeezing some kind of profit, if any, out of what they had on-line. They now are building up existing markets rather than bidding for new franchises.

The entertainment function of media is pressed to new limits through "coverage" via OPUBCO's Opryland USA music revue (above), Taft's Wonderland park in Toronto and Wometco's Miami Seaquarium.

jr
PREMIER ISSUE

Educational Programs: Selecting the Right Ones For Your Children
Information On Demand: Putting Your Junior "On Line"
How Much Programming Do You Really Need?

Computer magazines mean big bucks at Ziff-Davis, big "bytes" at McGraw-Hill, strong gains at ABC and pure survival at IDG—its* jr, *a contender among the flurry of PCjr-specifics.

Acquisitions played a major role in cable growth as American Broadcasting Co. (No. 1) picked up Entertainment & Sports Programming Network from Texaco Inc. for $202 million, and Continental Cablevision (No. 60) bought Ar[illegible] Communications, the Jacksonville, Fla., franchise for $106.5 million.

New advertiser-supported satellite networks with subscriber counts high enough to qualify the networks for national audience rating came under the purview of the 100 leading media companies through acquisition and joint venture. Oklahoma Publishing Co.'s purchase of Opryland included one of the those networks—with 15 million subscribers—Nashville Network.

Viacom International's (No. 35) Cable Health Network and Hearst (No. 10)/ABC Video Entertainment Services' Daytime programing service formed the Lifetime network with 16 million subscribers.

Landmark Communications' (No. 37) Weather Channel has converted about 85% of its customer base from free to paid since August, 1983, and with 12 million subscribers is just short of qualifying for metering by A.C. Nielsen Co.

The remaining media revenues came from a mix of business information services, outdoor advertising, videotex and other ventures.

Newcomers to the 100 leading media list include Golden West Television (No. 68), Chris-Craft Industries (No. 76), International Data Group (No. 97) and Stauffer Communications (No. 100), the latter returning to the list after a hiatus of one year. New acquisitions greatly influenced entry or reentry of these companies to the list.

Dropped from the list were: Field Enterprises (No. 23 in 1982) as the Field brothers split up their company and divested their media properties; Cosmo Broadcasting Corp. (No. 98 in 1982), which had revenues of $72.6 million, an increase of 9.7%; Rodale Press (No. 100 in 1982), with media revenues of $72 million, a 7.5% increase over 1982, and Worrell Newspapers (No. 99 in 1982), which is rebuilding revenues lost from the sale of eight dailies to New York Times Co. in 1982.

Ten 100 leading media companies in 1982 are missing in name only from 1983's media list: Advance corporate persistence that S.I. Newhouse & Sons is really Advance Publications finally won out, although newspaper buffs among our readers are sure to object.

During the year, the two Scripps entities were merged under the Scripps-Howard trade name in a pr move by the company to demonstrate the diversity of E.W. Scripps (newspapers) and Scripps-Howard Broadcasting (tv, radio, cable). We bought the idea.

Parent corporations Deseret Management Corp., Ziff Corp. and General Tire & Rubber became Bonneville Corp., Ziff-Davis Publishing Co. and RKO General Inc., respectively, because those in the media business more readily identify with the latter (which are subsidiaries) than the former.

Army Times Publishing Co. changed its name to Times Journal Co. to reflect the growing business of its newly acquired *Journal* publications in the Washington area.

International Thomson Holdings became the catchall for Toronto-based Thomson Newspapers for the purpose of this issue, as Ad Age editors married Thomson's newspaper unit, carried in last year's issue, with Thomson's trade magazine division, absent from the 1982 issue. The manufactured title justifiably could be assigned because of the controlling interest held in both units by the Thomson family.

Bergen, a print and broadcast holding company named for the *Bergen Evening Record*, opted for the Macromedia moniker to give its Gateway Communications (broadcasting) more recognition than it got under a corporate umbrella so closely identified with a newspaper.

The groundwork already has been laid for major shifts in the 1984 list. And, of course, it is the result of acquisitions.

A.H. Belo Corp. (No. 41), which rose from 47th position in 1982, will take another leap in 1984 from the revenues now flowing into the Dallas-based company following its acquisition in January of Dun & Bradstreet's Corinthian Broadcast division, which had $107 million in revenues in 1983.

Our lakeland paradise awaits you

Forbes Lake of the Ozarks

Forbes' Lake of the Ozarks paradise awaits you, as does its Sangre de Cristo Ranch, Copley's Casa del Zorro and Pittway's Saddlebrook.

Maclean Hunter Communications (No. 80), ranked on the basis of its U.S. properties, will get a year's worth of revenues from the Toronto Sun Co. acquisition of the *Houston Post*.

News America Publishing (No. 30) could climb as many as 10 rungs on the 1984 chart with the inclusion of revenues from the *Sun-Times*, acquired in January. The *Sun-Times'* revenues are estimated at more than $250 million.

And the music goes on.

Advertising Age
100 LEADING MEDIA COMPANIES

A.S. Abell Co.

Revenues	1983	1982
Media	$170,000,000	$151,800,000*
Other	—	—
Total	$170,000,000	$151,800,000

*Restated

A.S. Abell Co., Baltimore, is the country's 54th largest media company, with 1983 revenues of $170 million, all in media, a 12% increase over 1982, according to the privately held company.

The company has two operating divisions—A.S. Abell Publishing, with 1983 revenues of $120 million, and A.S. Abell Communications, with 1983 revenues of $50 million.

Abell Publishing's principal property, the Baltimore Sunpapers, in 1983 began an aggressive three-year campaign to improve its already dominant market share by combining Saturday editions of the *Baltimore Sun* and *Baltimore Evening Sun*, increasing suburban zoning, initiating a shared-mail advertising program and boosting its percentages of national and color advertising.

According to September 1983, Audit Bureau of Circulations figures, Sunday circulation increased 4.5%, to 394,127 from the previous year, while daily circulation dropped slightly to 346,251 from 350,909. Combined Saturday circulation also declined slightly to 297,276, from 300,144.

The two Saturday editions were combined March 24 into the *Saturday Sun*, a morning publication that includes expanded entertainment and home and garden sections.

"I think it's reasonable to say that it has been successful," says Jerry Smolinski, public affairs manager of the *Sun*. "It provides more than the individual papers could, and early indications are that circulation could go to 325,000."

The *Saturday Sun* also is sharing in the company's heavy emphasis on color advertising as part of a management strategy to boost the group by the end of 1984 into the top 25 color advertisers among newspapers. The effort to increase national advertising led the Sunpapers to drop Cresmer, Woodward, O'Mara & Ormsbee and take on Million Market Newspapers as national representatives.

The Sunday Sun added a third zoned edition, for suburban Harford County last October and soon will add a fourth, for Carroll County. The zoned editions include tabloid sections that feature local news and advertising. Mr. Smolinski says the company is studying the possibility of adding additional zoned editions later this year.

The Sun-plus shared advertising program was initiated this year. It offers to insert advertisers total market coverage to nonsubscribers by Zip code.

Country, a regional monthly magazine purchased by Abell in 1982, doubled its circulation to 70,000, said Walter Micklin, its publisher and editor. He said the magazine, which circulates primarily in Maryland, Virginia and Washington, had 196 advertising pages during the first five months of 1984, compared with 128 during the like period in 1983.

In March, 1983, Abell purchased *Ski Racing* magazine, which publishes 22 times a year and has a circulation of 30,000. The magazine also publishes *Ski Show Daily* on six consecutive days during the industry's annual convention.

A.S. Abell Communications in 1983 expanded its in-hotel video advertising service, Welcome U.S.A. Stephen Seymour, ceo, Abell Communications, said the service now reaches 20,000 hotel rooms in Baltimore, Washington and Miami. He said Abell will add two cities to the service later this year and hopes to reach 50,000 rooms by yearend.

The company will enter the cellular radio market later this year in Norfolk, Va., as part of a consortium of 12 companies.

Abell's syndicated tv feature, "Jack Anderson Confidential," folded in April, 1983.

Mr. Seymour says the show did not provide enough of a return for Abell, despite receiving a 5 rating in about 70% of the country. Currently, Abell is not involved in any other production ventures.

Mr. Seymour said the company is "still actively trying to increase its broadcast portfolio," but it did not add any broadcast properties in 1983 or 1984 to date.

Total	$1.940 bil.	$1.800 bil.

*Restated

Advance Publications, New York, the corporate umbrella for what was known in the trade as S.I. Newhouse & Sons, is the country's fifth largest media company, with media revenues estimated by ADVERTISING AGE of $1.74 billion in 1983, 89% of estimated total revenues $1.94 billion.

Advance, a media giant tightly held and operated by the Newhouse family, had estimated media revenues in 1982 of a restated $1.616 billion out of total revenues of an estimated $1.8 billion.

Media revenues, which come from newspaper holdings, Conde Nast magazines and cable operations, were 89.7% of the estimated total for the company.

Advance's nonmedia contribution comes primarily from book publishing.

As one of the three largest privately held companies, Advance's sales and earnings are not disclosed by Samuel I. Newhouse Jr. and Donald E. Newhouse, who run the media empire.

However, in a $900 million federal tax case instituted against the empire last fall, papers filed by the company put its worth at about $1.5 billion as of August, 1980.

Having sold its radio stations in 1982, the publisher and cable video operator moved ahead in these areas of business. In the fall of 1983, Conde Nast acquired *Gourmet* magazine from the estate of Earle R. MacAusland, whose widow, Jean, had acted as publisher since 1980.

At the time of the acquisition, the magazine's rate base was 650,000 and ad revenues were $10.5 million. Conde Nast reportedly paid $24 million for *Gourmet*, beating out New York Times Co.

In early 1984, Conde Nast was reported to be one of the bidders for Whitney Communication's magazine group, once again bidding against New York Times Co. as well as Hearst Corp. and ABC Publications. Since then, two of the Whitney publications have been sold, but Conde Nast was not among the takers. Still, *50 Plus* remains on the block.

Conde Nast continues its effort to put things in order at *Vanity Fair* magazine, but as of Jan. 5, 1984, it had its third editor in less than a year. The first editor-in-chief, Richard Locke, was replaced by Leo Lerman after the first two issues of the revived *Vanity Fair* met with biting criticism.

In January, Mr. Lerman, reputed to be an interim editor, was succeeded by Tina Brown, whom Conde Nast holds responsible for the turnaround of its English magazine *Tatler*. At about the same time, David O'Brasky was named publisher, succeeding Joseph Corr Jr. who left that post in November, 1983.

The company was believed to have invested more than $11 million by this January into the revival of the magazine, but it was said to still face problems meeting its rate base claim of 250,000.

However, Mr. O'Brasky says circulation is more than 275,000. In any event, advertisers are not convinced the book is tightly enough defined to make an attractive buy.

Figures supplied by the Publishers Information Bureau put *Vanity Fair's* ad pages at 515.11 for 1983 and ad revenues at $6.3 million. The data put Conde's *Gourmet* page total at more than 932, up 10.7% from 1982, and showed a 14.8% increase in ad revenues, to $12.1 million. *House & Garden*, a year after its repositioning toward a more affluent market, suffered in terms of pages and dollars as a result of the revamp. *House & Garden's* pages were down 14.5%, to 826, while revenues declined 43.6%, to $12.8 million. But the full-year page drop was less steep than that for the first six months of 1983, when pages were off 29%, to 382.

Women's fashion and service magazines all showed solid growth, however. *Vogue* ad pages increased 11.4%, to 3,112, and revenues jumped 24.5%, to $56.2 million. At the end of the year, the magazine's editors also announced they are fashioning a new look that will incorporate more nonfashion editorial.

Self pages increased 11.4%, to 928, while revenues grew 25.6%, to $17.1 million. *Glamour* revenues rose 24.9%, to $58.6 million, while pages went up 7.5%, to 2,026. *Mademoiselle's* pages increased 3.1%, to 1,573, while ad revenues moved ahead 22.8%, to $29.2 million.

In its newspaper group, Advance sold the *St. Louis Globe-Democrat* to Jeffrey Gluck, who publishes *Saturday Review* and *Missouri Life*, for what was reported to be less than $1 million. The sale came despite earlier speculation that Advance was intent on closing the paper in lieu of finding a buyer. Such speculation was fueled by an antitrust investigation initiated by the Justice Department on Nov. 7, 1983. At the time, the Justice Department ordered Advance to find a buyer and later closed the investigation when Mr. Gluck expressed his interest.

Saved from one investigation, however, Advance is facing another. In late January, the Justice Department began investigating the 1982 closing of the *Cleveland Press*, following a story in the *Akron Beacon Journal* that Samuel Newhouse had agreed to pay *Press*-owner Joseph Cole $14.5 million "in part to close the *Press*," which competed against Mr. Newhouse's *Cleveland Plain Dealer*.

The Newhouse newspapers also joined United Press International in a $9 million agreement where UPI will supply news features to 17 Newhouse newspapers. Later in 1983, the newspaper group signed a pact with Knight-Ridder Newspapers where the latter will share findings from Knight-Ridder and American Telephone & Telegraph's Viewtron home information test and service in South Florida. The deal could lead to further Advance/Knight-Ridder joint Viewtron ventures in other southern and western cities.

Affiliated Publications

Revenues	1983	1982
Media	$293,000,000	$259,000,000
Other	800,000	— —
Total	$293,800,000	$259,400,000

Affiliated Publications, Boston, is the 33rd largest media company with media revenues of $293 million for fiscal 1983, ended Dec. 25, up 13% from 1982. Media revenues were 99.7% of total revenues of $293.8 million in 1983.

The *Boston Globe* newspaper accounted for $278.5 million in revenues, up 14% from 1982, while broadcast operations in 1983 contributed $14.5 million, down 2% from the previous year. Affiliated has sizable cash holdings through McCaw Communications Cos., but does not consolidate those returns because it holds only a 45% share.

The *Globe* is distributed throughout New England, though its major market is the five-county area of metropolitan Boston. Audit Bureau of Circulations figures show that paper's 1983 weekday circulation averaged 509,390. The Sunday edition averaged 764,872. That represents a slight loss of circulation on weekdays, down from 510,978, and a Sunday gain in circulation, up from 750,308.

Ad linage was 71,143,091 for 1983, up 7% from 1982. Ad revenue was $212.6 million. The latest increase in ad rates, which have been adjusted at least annually since 1946, went into effect Sept. 1, 1983.

Affiliated's broadcast division recorded a slight drop in revenues and income—the latter dipping to $2.50 million from $2.52 million in 1982—but seemed to be on the rebound as the year closed with fourth-quarter results showing gains in both revenue and income. The division has combination am/fm stations in five markets.

McCaw Communications Cos., a multiple system operator based in Bellevue, Wash., added its 31st cable system—Juneau, Alaska—bringing total subscribers to 116,800, up from 102,000 in 1982.

McCaw, which operates cable tv systems in Washington, Alaska and Oregon and is involved in radio common carrier systems and cellular radio technology, reported 1983 revenues of $18.8 million, up 40% from 1982, and operating income of $2.8 million, up 22% from 1982.

A joint venture in which Affiliated and McCaw participate in southern Oregon—McCaw Communications of Southern Oregon—had revenues of $10.99 million, up 80% from 1982, and operating income of $470,000, compared with an operating loss of $789,000 in 1982.

McCaw has laid groundwork for the building of additional systems in Hawaii, Mississippi, Missouri, New Mexico and Texas, as well as in states where the company already operates. The purchases of the new systems are expected to dilute earnings. McCaw projects a subscriber level of 230,000 by the end of 1984.

McCaw's radio common carrier division sells and services telephones and pagers. McCaw has a 13.5% participation in the operation that received the licenses for Seattle (awarded by the FCC on Sept. 20) and Portland, Ore. (awarded Jan. 26). The company is one of a three-company partnership with licenses in San Francisco and San Jose. McCaw is also the majority partner in Kansas City and the minority partner in Denver, where it shares licenses with MCI.

A McCaw spokesman says the company is involved with several partnerships to gain shares of the licenses for secondary markets, which will be determined by FCC lottery this summer. McCaw also plans to file for licenses in 20 markets by July.

During 1983, an agreement was reached with Knight-Ridder Newspapers to involve the *Globe* in the expansion of Knight-Ridder's Viewtron system into New England.

Allbritton Communications

Revenues	1983	1982
Media	$124,500,000	$93,000,000
Other	— —	— —
Total	$124,500,000	$93,000,000

Allbritton Communications Co., Washington, is the country's 75th largest media company, with 1983 revenues estimated by ADVERTISING AGE at $124.5 million, all in media.

Allbritton, which is privately owned, broke into the top media company listing a year ago after experiencing a revenue growth spurt following the purchase of the *Trenton Times*. The company currently holds five newspapers and five vhf tv stations.

During the past year, Allbritton added KATV, Little Rock, Ark., and KTUL, Tulsa, Okla., to its media holdings. The stations, both ABC network affiliates, were purchased for $80 million from Leake TV Inc. of Muskogee, Okla.

While adding the tv stations, Allbritton last October sold its only radio properties, KRKR (am) and KFKF (fm), Kansas City, Kan., to Sconnix Group Broadcasting of Laconia, N.H.

The company also sold one newspaper, the *Amherst Morning Record*, in Amherst, Mass., to David Schannberg of Florence, Ky.

The *Trenton Times*, Trenton, N.J., purchased from the Washington Post Co. in 1981, remains the company's newspaper circulation leader.

However, in June, 1983, Ralph Ingersoll II, president of Ingersoll Publications, parent company of the *Trentonian*, charged Allbritton with illegally misrepresenting its circulation figures and that the ABC aided that fraud.

In October, 1983, the *Times* filed a countersuit in Trenton, N.J., federal court, contending that the *Trentonian's* management was using a variety of illegal tactics to run the *Times* out of business.

Following ABC's attempt to have the suit filed against it dismissed, a federal judge in Newark, N.J., ruled that the *Trentonian* could go ahead with its suit against the *Times* and the ABC. The case still is pending in federal court in New Jersey.

According to the most recently available figures, based on a March 31, 1982, audit, the *Times* circulation is 65,990 daily and 77,979 Sundays. It operates in the black, reportedly bringing in annual revenues of $39 million.

In Washington circles, company owner Joe L. Allbritton is perhaps best known as the former owner of the now-defunct *Washington Star*, which he sold to Time Inc. in 1978, and as the current owner of WJLA, the ABC affiliate in the hotly competitive Washington market.

The company's newspaper properties include the *News*, a Paterson, N.J., daily with a circulation of 49,352; the *Dispatch*, Union City, N.J.; with daily circulation of 35,780; the *Westfield Evening News*, Westfield, Mass., with a 5,500 circulation, and the *Standard Observer*, Irwin, Pa., with circulation of 14,500.

Michael H. Mooreas was named president of the newspaper division in December.

Allbritton Communications is part of the Allbritton-owned holding company, Perpetual Corp., which has interests in insurance and mortuaries.

As an example, your one-week, $25,000 local affiliate spot TV buy reaches 64% of men 25-54 in $35,000+ households. Now take that same $25,000, put half into The Chronicle, half into television.

You've just increased your reach to these affluent men to 77%. You've also increased your frequency by 15%. You've gained 65 GRPs—an increase of almost 40%. And you haven't spent one penny more.

If you'd like a detailed media comparison, call Ralph Harrington, Research Manager, collect at 713/220-7401. And find out how The Chronicle can deliver for you in Houston.

the U.S. Its 1983 media revenues are estimated at $2.82 billion, up 10.7% from 1982. Media accounted for the lion's share of the over-all record $2.95 billion in revenues, up 11% from 1982.

ABC Inc.'s media interests include tv and radio networks, 11 owned am or fm radio stations and five owned tv outlets, plus consumer and business publications, several cable co-ventures and Entertainment & Sports Programming Network (ESPN). In early May, ABC, which had a 15% interest in ESPN, an all-sports cable network, paid $202 million to buy out the interest Texaco assumed in ESPN with its acquisition of Getty Oil.

ABC, which in January sold its San Francisco outlet, KGO-FM, and moved to acquire another in Dallas/Fort Worth KIXK-FM, says its seven targeted radio networks (up three since 1982) reach 1,744 affiliates. ABC also produces radio programing through its ABC/Watermark subsidiary based in Los Angeles.

ABC's commercial broadcasting operations had revenues of $2.6 billion, up 13% from 1982. Publishing reported revenues of $279.9 million in 1983, up 9.6% from 1982. Of those sums, $188 million last year and $170 million in 1982 were estimated to be in media, rather than in books, manuals or records.

In the 1984 first quarter, ABC notched peak sales and profits, with the former climbing 26%, to $836.7 million, and the latter soaring 72%, to $23.9 million.

ABC's January-through-March results for publishing—net income up 31%, thanks to strong gains by business press operations, Compute! and Word Inc.—were in sharp contrast to CBS Inc.'s, whose publishing group posted an $11.7 million loss during the same period.

Broadcast operations boosted profits 31% in the first quarter of 1984, a credit to the Winter Olympics in Sarajevo, Yugoslavia (nearly $200 million in sponsor sales), and the "expanding advertising marketplace" in network tv, ABC said. The Olympics also bolstered the owned tv outlets' sales and earnings in the quarter, when ABC Radio division posted a "modest operating loss."

Leonard Goldenson, ABC chairman, and Frederick Pierce, ABC president, say that the opening quarter results also were assisted by the containment of operating and development expenses. Within ABC Video Enterprises, for instance, losses were cut by selling Satellite News Channels to Turner Broadcasting System last fall and by consolidating cable services into Lifetime (formed last fall by joining Daytime and Cable Health Network) and ARTS & Entertainment Network (formed by ARTS and the Entertainment Channel). TeleFirst, an in-home, consumer-supported video entertainment recording service now being tested in Chicago, contributed to the losses.

ABC Inc.'s No. 1 revenue source in 1983 once again was ABC-TV Network. The three tv networks combined generated $7 billion in ad sales during 1983, with ABC accounting for the most—36.7%. The three-network volume gained 13% from 1982, with ABC's growth in line with the industry trend.

When the 1983-84 prime time tv season ended in mid-April, CBS won for the fifth consecutive year. CBS' margin of victory over ABC in A.C. Nielsen Co. ratings was nine-tenths of a point, a gain from a year earlier when CBS edged ABC by five-tenths of a rating point.

After the Winter Olympics in February, ABC had whittled CBS' lead to eight-tenths of a rating point, versus a 1.1-point gap before the games began. Still, the 1984 Winter Olympics, which largely were taped because of the time difference between the U.S. and Yugoslavia, did not prove as popular as the 1980 Lake Placid games, which were primarily live.

Sarajevo averaged a 15.2 rating and 27 share in all dayparts combined, down 29% from 1980 and also down considerably from the 1976 Innsbruck games, the last nonlive Winter Olympics. Still, the games benefited the ABC affiliates from 10 p.m. to 11 p.m., the time deemed crucial to the stations' local late-night newscasts' performance.

ABC also was disappointed by another sports package, "Monday Night Football," whose fall ratings were down 17% from 1981 (the last nonstrike season)—and proved to be that package's lowest ratings since its 1970 premiere.

ABC again finished the latest prime-time season battle leading in the key categories deemed most attractive to major advertisers. Among adults 18 to 34 from Sept. 26 through April 1, ABC's 10.9 rating beat NBC's 10.0 and CBS' 9.9, while ABC's 11.6 among adults 18 to 49 outpointed CBS and NBC, tied at 10.4. Among adult viewers 25 to 54, ABC had 12.4, ahead of CBS' 11.4 and NBC's 11.1. Subdivided into male and female groups in these three age breakouts, the data showed ABC leading CBS among the women and topping NBC among the men, said Marvin Mord, ABC-TV's vp-marketing and research services.

ABC top executives were confident of another strong upfront or advance package selling period this summer. Last year, the nearly $2 billion in three-network upfront volume included much more than $600 million going into ABC's Olympics.

ABC scored hefty ratings with sensitive made-for-tv dramas such as "The Day After" (about nuclear holocaust in the U.S.) and "Something About Amelia" (about incest), but resistance in the advertising community forced it to cut ad rates. ABC executives since have gone public, urging ad executives to support such touchy but worthwhile programing.

ABC finished the 1983-84 prime time season with three new series hits, "Hotel," "Hardcastle & McCormick" and "Webster." For fall 1984, ABC Entertainment president Lewis Erlicht said the plan was to implement "aggressive" changes on weak nights or time slots—chiefly on its once unbeatable Tuesdays and on Thursdays. Thus, ABC decided to replace seven hours of current prime time fare, more than expected by many agency media experts.

In evening news, the 29 weeks through April 15 found ABC third, narrowly behind NBC (11.1 to 11.2), as CBS led with a 13.8 rating.

ABC committed $309 million to the 1988 Calgary Winter Olympics, and although it will have a third weekend of coverage, many rival network and agency executives doubted that ABC could turn a profit on that event. Many of those executives had said the same about ABC's coverage of the 1984 Los Angeles games, which was expected to turn a profit until May, when the Soviet bloc boycott raised a number of unanswered questions for ABC and its sponsors.

ABC Sports' other big event will be its first Super Bowl in January. Months ago the network booked its first two major sponsors for that event, Anheuser-Busch and Nissan Motor, each buying three minutes at $500,000 a unit, or a combined $6 million. Since then, ABC has boosted the price to $525,000 a 30-second spot. Also, ABC's "Wide World of Sports" remained the top-rated weekend sports anthology series.

ABC did not break out separate figures for its owned & operated (o&o) stations or their spot tv sales representative but did indicate that the five o&o outlets' ad sales gained 13% in 1933, while ABC-TV spot sales' revenues have climbed 40% since 1979.

ABC Publishing, whose 10 operating units publish more than 100 monthly magazines, as well as 100 new books and 25 records yearly, acquired Compute! Publications last year—including *Compute!* and *Compute!'s PC & PCjr* (aimed at owners of IBM's personal computers).

As of June, however, ABC trimmed the number of operating units to nine by merging its two farm publishers, Farm Progress Cos. and Miller Publishing, into a new agricultural group.

ABC lessened its interest in nonmedia properties this spring when it sold Scenic Attractions (nature parks) to a group of that division's executives. Mr. Pierce explained to ABC's affiliates gathering in May that this sale was in keeping with ABC's plan to divest itself of "businesses that are not complementary to ABC's goals." Similarly, he said, its buy of ESPN reflects ABC's intent to focus lines of business "that fit the framework of ABC's general expertise."

Mr. Pierce promised that ABC planned to expand its own tv production as a way of being self-reliant and controlling costs. Its biggest such commitment is to the production of the 20-hour "War & Remembrance," the sequel to "The Winds of War," the popular 1983 miniseries. The new project, not expected to air until 1986, could cost $60 million.

Last year, ABC Inc. spent $127 million in capital improvements, chiefly for tv and radio technology and facilities (up $11 million from 1982), and the company expects capital spending for 1984 to be between $150 million and $200 million. Total tv program commitments for fiscal 1983, the company added, approached $2.07 billion, compared with $1.83 billion for fiscal 1982, those sums encompassing series, made-for-tv and theatrical movies and sports rights. The sports commitments include the multiyear pacts with major league baseball (with ABC's share an estimated $575 million spread across the next six years) and National Football League (whose three-network five-year contract will total $2 billion).

American Express Co.

Revenues	1983	1982
Media	$252,700,000	$183,700,000*
Other	9.517 bil.	7.909 bil.
Total	$9.770 bil.	$8.093 bil.

*Restated

American Express, New York, is the 39th largest U.S. media company with 1983 media revenues estimated at $252.7 million, or 2.6% of total revenues.

Media contributions at American Express come from its 50% ownership in Warner Amex Cable Communications—$219 million in 1983—and from two magazines, *Travel & Leisure* and *Food & Wine.*

Warner Amex, which reported total revenues of $438 million, a pretax loss of $150 million and net loss of $99 million (American Express shares in half the losses and gains), altered its strategy in 1983 when chairman-ceo Drew Lewis came aboard in February, 1983. The former U.S. Secretary of Transportation under President Reagan began trimming New York staff. He also ordered a major decentralization of several functions now handled at the corporate level, including engineering, marketing, programing and finance.

Mr. Lewis says decentralization was essential for growth and would strengthen field operations, particularly in the company's large metropolitan cable systems.

Warner Amex Cable Communications is the fifth largest U.S. cable system with a 1983 subscriber base of 1.36 million households, a 14% gain over 1982. Pay subscriptions rose to 1.3 million in 1983, a 21% increase over 1982. Warner Amex operates 119 systems in 25 states.

The company expects continued losses in 1984. However, executives believe that the decentralization, a financing plan to complete current franchising commitments and concentration on developing clusters of systems in geographic areas through sales, trades and acquisitions will continue to be high priorities for the company.

In publishing, American Express Publishing Corp. set up a three-member executive committee to run its magazines after president-publisher John Connors, 58, died of a heart attack April 5, 1984.

The committee, which will oversee *Travel & Leisure* and *Food & Wine,* reports to Jonathan Linen, vice-chairman, American Express Travel Related Services Co., who assumed the long-vacant post of chairman of the publishing corporation.

In 1983, American Express Publishing's *Food & Wine* magazine had ad revenues of $4.9 million, up 81% from 1982. The publication had 469 ad pages in 1983, up 14% from 1982.

Travel & Leisure had ad revenues of $21.8 million in 1983, up 5% from 1982. Ad pages were down 2%, to 1,091 in 1983.

Food & Wine's rate base increased from 500,000 in April, 1983, to 550,000 in July, 1984.

In May, 1984, American Express introduced *Departures,* an international magazine sent free to 150,000 of its highest spending cardholders in more than a dozen European and Mideast countries. The magazine will be published six times a year beginning in October. Advertising rates are $10,000 for a color page and $7,000 for b&w.

MEDIA PROPERTIES

Cable tv/video

As part of 50-50 partnership in Warner Amex Cable Communications, American Express has interests in 119 cable systems in 25 states with more than 1.36 basic cable subscribers and 1.3 million pay cable customers (see Warner Communications profile). It also is involved in Warner Amex Satellite Entertainment Co., which supplies and distributes two advertiser-supported services, Nickelodeon and MTV: Music Television, and one pay service, the Movie Channel (a joint venture with Showtime).

A.H. Belo Corp.

Revenues	1983	1982
Media	$242,151,000	$203,200,000
Other	405,000	200,000
Total	$242,556,000	$203,400,000

A.H. Belo Corp., Dallas, is the nation's 41st largest media company in 1983 with total media revenues of $242.2 million, up 19.2% from 1982. Media revenues were 99.8% of the company's total revenues of $242.6 million.

Of the media revenues, $163.4 million, or 67.5%, were derived from newspaper publishing, and $78.8 million, or 32.5%, came from tv and radio broadcasting during the fiscal year ended Dec. 31.

Net earnings from media operations totaled $60.2 million, of which 48.4% represented newspaper publishing, and the remaining 51.6% was tv and radio broadcasting.

Belo waited for 1984 to turn the corner before it made its biggest move—completing the $606 million purchase Jan. 30, of the six tv station Corinthian Broadcast Group from Dun & Bradstreet. Included in the total was $342 million for KHOU in Houston, the largest sum to date paid for any tv station.

To comply with the FCC's ownership rules, Belo, which had three stations at the time of the deal, sold two of the Corinthian stations to LIN Broadcasting Corp. for $104.9 million and two of its own stations to Freedom Newspapers for $49 million.

Corinthian stations retained by Belo include KHOU in Houston; KXTV in Sacramento-Stockton, Cal.; WVEC in Hampton-Norfolk, Va., and KOTV in Tulsa. All are CBS affiliates except for the Hampton-Norfolk tv station, an ABC affiliate. The Corinthian tv stations sold to LIN were WISH in Indianapolis and WANE in Fort Wayne, Ind. The two Belo tv stations sold to Freedom were WTVC in Chattanooga and KFDM in Beaumont, Tex.

Belo also acquired two radio stations in 1983, KOA (am) and KOAQ (fm) in Denver from General Electric for $22 million in cash.

Tragedy struck KOA this month with the death of the station's outspoken and popular late night talk show host, Alan Berg, who was apparently gunned down by an irate listener.

Joe M. Dealey, chairman of Belo until this year when he retired, said in the company's 1983 annual report that Belo bid aggressively for the much-sought Corinthian group because of the company's conviction that the FCC's rules restricting ownership to seven tv stations, seven fm and seven am radio staions will be liberalized, spurring broadcast group owners to pursue desirable properties, and thereby increase the selling multiples for those properties.

"The purchase of Corinthian enables Belo to accomplish in one step what otherwise might have taken years to achieve," he wrote.

Belo's *Dallas Morning News* and its arch rival, Times Mirror-owned *Dallas Times Herald,* continued their tug of war for domination of the market, with both newspapers turning in healthy advertising and circulation figures regardless of how the newspapers interpreted the figures.

During 1983, for the first time in its history, the *News* ran more than 100 million lines of full-run advertising, achieving a 55% share of market, according to Media Records, which also reported the *News* with the dominant market share in each of three major advertising categories measured—retail, 53%; general, 55%; classified, 57%.

The 1983 Scarborough National Newspaper Audience Ratings Study also reported the *News* with the dominant share of the coveted upscale market represented by adults with large individual and household incomes, college education, and professional and managerial occupations, calculated on the basis of average day readership.

In circulation, both newspapers chalked up gains over the year to March 31, 1984, with increases by the *News* out-pacing those by the *Times Herald*.

During the first half of the circulation year, the *News* achieved a lead in the Dallas County city zone, while the *Times Herald* lost circulation in all of its zones. The *Times Herald's* losing trend was reversed in the second half of the year, with an annual January-March discount subscription promotion. The *Times Herald* resumed the city zone lead by March 31.

According to the ABC Fas-Fax report of March 31, the *Dallas Morning News* total circulation was 340,502 daily and 437,067 Sunday, an increase of 12,170 daily and 30,174 Sunday, for a 57,569 daily lead over the *Times Herald* and a 55,749 Sunday lead.

When *USA Today* made its debut in Dallas-Fort Worth last October, the *News* already had begun a series of graphic and editorial changes, including introduction of a colorful weather page. Improvements in the *News* and in its competition have continued.

The *News* began construction of its $57 million satellite printing plant in suburban Plano where, starting in early 1985, new offset presses will enable the *News* to expand its production and distribution capabilities in the heart of the northern region.

Blade Co.

Revenues	1983	1982*
Media	$143,300,000	$135,400,000
Other	——	——
Total	$143,300,000	$135,400,000

*Restated

Blade Co., Toledo, O., is the nation's 64th largest media company with 1983 revenues estimated by ADVERTISING AGE at $143.3 million, all from media operations.

The privately owned company, controlled by the Block family, had revenues of $135.4 million (revised) from newspaper, broadcast and cable in 1982. Figuring in the revised figure was the sale of the *Daily Register* in Red Bank-Middletown-Shrewsbury, N.J., to Capital Cities in early 1982.

There were no corporate changes in 1983, but in early 1984 the company sold for $4.65 million its radio holdings, WTKN (am) and WWSW (fm) in Pittsburgh to Shamrock Broadcasting Co., Hollywood, Cal., which now owns eight radio and two tv properties.

At the same time, the Cowles Media Co. independent tv station WDRB, Louisville, Ky., was bought by Blade for an estimated $10 million.

"The sale of the radio stations and the purchase of the Louisville television station were moves in line with our long-term corporate objectives," says John Harms, president, Blade Co. "We simply came to the conclusion that we were not interested in radio holdings in only one market, and particularly in such a competitive one. We felt that we could better use our resources with television.

"We are in the market for an additional property if one presents itself," he says. However, there are no immediate acquisitions planned.

Daily circulation losses sustained by the *Toledo Blade* during 1982 and early 1983 have been reversed. ABC figures in March, 1984, show the paper has a daily circulation of 162,780, up 1.1% over the previous year. The Sunday circulation has climbed to an all-time high of 215,654, up 3.1% for the latest ABC audit period.

The *Pittsburgh Post-Gazette*, which conducts business under a joint operating agreement with Scripps-Howard's *Pittsburgh Press*, also has suffered some circulation declines. Its Saturday edition has dropped 1.6% to 165,561. *Post-Gazette* weekday editions' circulation grew less than 1% to 178,284, according to ABC.

The *Monterey Peninsula Herald* in California has been slower in recovering from the effects of the economic downturn, company officials say. However, it has shown some circulation gains. ABC figures for March, 1984, showed daily circulation of 32,224, up 1.2%, and Sunday circulation of 33,580, down 1%.

Both the *Toledo Blade* and *Post-Gazette* are converting their ad format from nine to six columns to conform to industry standards. The *Blade* has remained with letterpress, but is completing a web width change to the 55-in. standard.

Growth has been solid for Blade Co.'s cable tv systems. Its Buckeye Cablevision, which serves the Toledo area, has added nearly 14,000 homes in 1983, for a total of about 95,000. The system passes 150,000 homes, and according to John Karl, president at Buckeye, "We've also experienced considerable growth in pay tv services, up from 33,000 to 38,200."

Erie County Cablevision is completing its 54 addressable channel system upgrade.

The system serves 14,626 of the 22,000 homes passed. The Monroe, Mich., cable operation added 512 new subscribers in 1983, for a total of 5,512 out of 8,500 homes passed.

Bonneville International Corp.

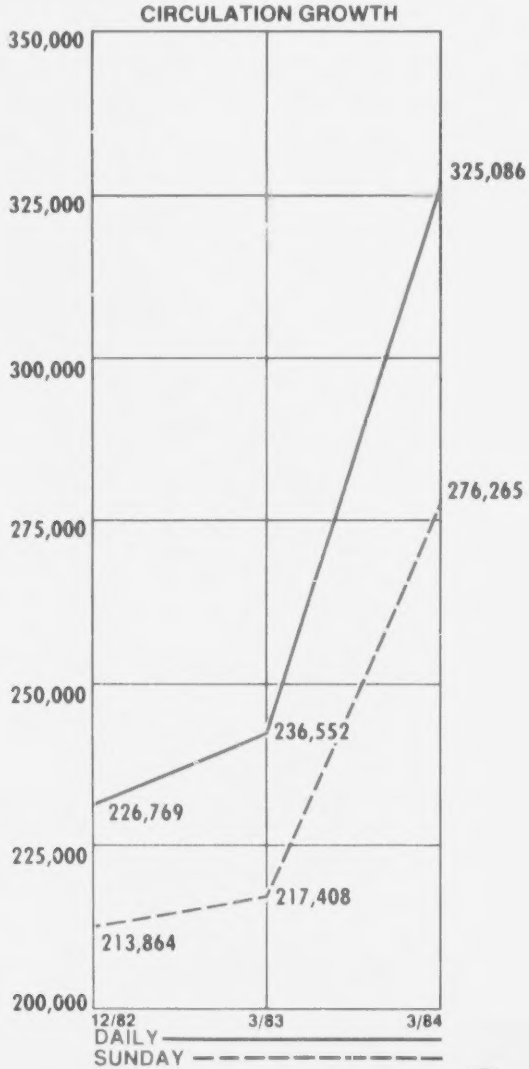
Revenues	1983	1982
Media	$107,000,000	$89,000,000
Other	27,000,000	23,000,000
Total	$134,000,000	$112,000,000

Bonneville International Corp., Salt Lake City, is the nation's 84th largest media company, with 1983 revenues of $107 million, 80% of total revenues of $134 million.

Broadcast provides Bonneville's total media contribution, which in 1983 was up 20.2% over 1982. Satellite and data systems provided much of the remaining $27 million in company revenues.

Broadcast revenues were split almost evenly between tv and radio.

Bonneville was reported as Deseret Management Corp. in last year's 100 Leading Media issue. Deseret requested the change this year to reflect the corporate name for which its media operations are known. Bonneville is a wholly owned subsidiary of



A tough act to follow.

When a 39.2% * circulation increase catapulted The Boston Herald into 22nd place among the nation's 100 largest newspapers last September, we knew it was going to be a tough act to follow.

Now, more than six months later, we find ourselves still gaining. The latest FAS-FAX study confirms the consistent growth of The Boston Herald for the period 3/31/83 - 3/31/84. Circulation figures showed a 37.4% ** increase daily plus a 27.2% ** gain on Sunday.

As if that weren't enough, our advertising linage figures have also followed suit. They show a 18.7% increase in the first four months of 1984 compared to the same period in 1983, setting the stage for another unprecedented year of advertising growth.

With a performance like this, perhaps you should join the hundreds of new clients who have discovered a vast new audience when they advertise in The Boston Herald.

The Boston Herald

*ABC FAS-FAX, September 30, 1983
**ABC FAS-FAX, March 31, 1984

Deseret, a closed corporation of the Corporation of the President of the Church of Jesus Christ of Latter-Day Saints.

Besides owning and operating two tv stations, and seven fm and five am radio stations, the company is involved in satellite and data communications, areas that are earmarked for extensive expansion. To meet this stepped-up activity, Bonneville this past year formed a new division, Bonneville Telecommunications. The move consolidated the satellite company with Bonneville's radio data service and management information systems.

To head Bonneville Telecommunications, Bonneville lured three former International Business Machines executives. Among them was Kenneth Bentley, a 22-year IBM veteran, who became the division's president.

Active in satellites for more than 20 years, Bonneville operates four transponder channels, which it holds under contract from companies such as Western Union Industries and Southern Pacific Transportation Co. Its intentions are to broaden this market. The company has uplinks operating in Southern California, Utah and Washington, D.C., and is making arrangements for an additional uplink in New York.

As the satellite division grew, it became apparent that a lot of synergism existed between it and the radio data systems division, which transmits commodity, stock and electronic mail-type information via satellite to local fm stations for retransmission on side bands, says Arch L. Madsen, president, Bonneville International.

Among other services, Bonneville's four satellite channels are used to broadcast major sports events. Contracts with stations around the country allow Bonneville to supply professional sports broadcasts. The third element of the new division—management information systems—develops software for use by broadcast stations in their day-to-day operation. Besides developing and selling software, Bonneville also sells IBM hardware.

On the broadcast side, the company acquired an am radio station, KYA of San Francisco, for $3.5 million from King Broadcasting Co. of Seattle. It now carries the call letters KOIT (am), since it joined its sister station, Bonneville's KOIT (fm) in San Francisco.

At the same time, Bonneville put the finishing touches on ridding itself of cable. The company sold its half ownership in its Logan, Utah, cable tv system to its half-partner, the Bullen family. Although the company had been one of cable's pioneers, it sold its interest in the Pacific Northwest some time ago, and this most recent sale finalized the decision to part company with cable.

Last October, after four years of ownership, Bonneville sold its radio representative company, Torbet Radio Inc., for $10 million to Selkirk Communications Ltd., the public Canadian company that operates a number of tv and radio stations. "We foresee the radio representative field undergoing consolidation, so we prefer to sell out to those who hold plans to become large in this area," Mr. Madsen says.

During the past year, Bonneville completed an upgrading of its five am stations to stereo.

The company continues its experiment with teletext, an ongoing effort since June 15, 1978, when Bonneville received the first license to transmit teletext in the U.S. Bonneville's tv stations in Seattle and Salt Lake City, both of which are CBS affiliates, now carry fulltime teletext programing as part of CBS's Extravision service. The stations currently provide a 24-hour complete news service, which is updated eight times a day. Tvs equipped with decoders and telephones outfitted with special circuits pick up the teletext transmissions, which total 20 pages a day.

During the year, Bonneville settled into its new corporate headquarters at the Triad Center in Salt Lake City. "We'd been operating out of a converted garage for 36 years. But we don't have to apologize anymore," Mr. Madsen says. The Triad Center is home not only to Bonneville's corporate management, but also to KSL-TV and KSL (am) of Salt Lake City, and KSL's production center, Video-West.

Besides anticipating substantial growth in the newly formed telecommunications division during the coming year, Mr. Madsen expects Bonneville to be at industry average or a little above in growth in its broadcast operations.

Cahners Publishing Co.

Revenues	1983	1982
Media	$160,000,000	$140,000,000*
Other	40,000,000	40,000,000
Total	$200,000,000	$180,000,000

*Restated

Cahners Publishing Co., Boston, the country's 58th largest media company, had revenues from media operations of an estimated $160 million for the fiscal year ended March 31, 1983, an increase of 14% over restated media revenues of $140 million the previous year.

Media at Cahners encompass controlled circulation business publications and newsletters, and represent 80% of the company's total estimated revenues of $200 million.

The Cahners Exposition Group, which organizes and produces both trade and public attendance shows, is the company's second major profit center. Its results are not included in ADVERTISING AGE's media estimate.

For consistency, the figures used to rank Cahners in this issue are for fiscal 1983, even though the company concluded its 1984 fiscal year March 31.

However, magazine division president J. Allan Sheehan says fiscal 1984 media revenues will come very close to $250 million. He attributes the anticipated 56% media revenue increase to Cahners' increased activity in acquiring and launching new magazines.

Mr. Sheehan is quick to point out that growth within the division does not hinge solely on new properties, however. Predictably, he reports the division's strongest growth has occurred in the electronics and computers group, one of the company's five segmented publishing groups. Mr. Sheehan cites powerful performances by *EDN*, *Electronic Business*, *Electronic Packaging & Production* and *Mini-Micro Systems* as the reasons behind the group's strength this past year.

Revenues in the building and construction and manufacturing industries groups, the two hardest hit by the recent economic downturn, are resurging, Mr. Sheehan says. The building and construction group was bolstered substantially in April, 1984, when Cahners purchased *Interior Design* and *Corporate Design* from Whitney Communications Corp., New York.

Mr. Sheehan describes *Corporate Design's* inclusion in the group as "perfectly logical. It fit in very well with Building Design & Construction," he says, reporting that the company acquires magazines that lead their field and fit into the company's business plans.

"*Interior Design* stands alone more than the other publication, although the readers of many of our magazines, such as *Restaurants & Institutions*, have been more and more concerned with interior design as an element of doing business," Mr. Sheehan says. The May issue of *Interior Design* hit a hefty 458 advertising pages, he says. "It was like receiving the phone book across your desk."

In another move that should help shore up the building and construction group, the company sold the ailing *Modern Railroads* last summer. "We made a commitment and tried to help the railroad industry," he says. "However, the marketplace must be dynamic and have growth potential. In addition to serving an industry, we are interested in making a profit."

The company envisioned enough growth in the computer and chemical industries to launch publications related to these fields. *CPI Purchasing* was added to the manufacturing industries publishing group in September, 1983. Mr. Sheehan says the magazine, which is targeted to chemical purchasing professionals, has been a very strong performer, helping the manufacturing group rebound from economic setbacks.

PC Products made its debut this month, carrying 70 pages of advertising in its premiere issue. Mr. Sheehan dismisses the notion that the company is capitalizing on the popularity of personal computer publications and says Cahners is not viewing the industry as a fad business. "Unlike most pc books, we're not on the newsstand," he says. "We're sticking with a controlled distribution to a qualified and tested circulation list."

Mr. Sheehan says the company is working on two possible launches in the electronics area, and one each in the foodservice and manufacturing groups.

Although the company may be interested in diversifying its properties, it is consolidating its work force. (Cahners now has 1,500 employes in 16 cities.) The Boston corporate headquarters will relocate to Newton Corners, Mass., combining personnel currently operating out of four separate Boston-area locations. In New York, four offices also will be merged into one Park Ave. S. address. "We just realized we had too many people in too many places," Mr. Sheehan says.

He says the company is working harder than ever to best use those people. T. Harvey Wigder, who was named to the new position of vp-human resources, is charged with the task of recognizing, training, motivating and rewarding Cahners' employes who seem likely candidates to fill the company's executive ranks, according to Mr. Sheehan.

In major personnel moves, David Wexler was named group vp-medical health care group, in addition to his role as group vp-foodservice, and Terrence McDermott was selected as group vp-electronics and computers. Daniel Comiskey was moved to publisher of *Building Design & Construction* from *Security World* and *Security Distributing & Marketing*, where he was replaced by Thomas Atkins. Ron Bondlow of *CPI Purchasing*, Steward Haberman of *Specifying Engineer*, J.C. Kelly of *Electronic Packaging & Production*, Charles Messina of *Emergency Medicine* and Howard Sipe of *Appliance Manufacturer* also were named publishers. Mr. Sheehan says all of the executives were transferred from within the company, highlighting what he identifies as Cahners' commitment to promoting from within.

Cahners plans to take *Restaurants & Institutions* to once-a-week frequency, according to a reliable source.

The company also changed its own promotional campaign this past year. The effort, centered around four-color ads bearing the tag line "Cahners Means Business," is an extension of what Mr. Sheehan calls a seven-year media commitment to help the market understand the company. He says the campaign underscores Cahners' commitment to quality business-to-business communications and its desire to perform an essential service to the companies in the industries its publications address.

One of the company's complementary market services—its Profit Impact of Market Strategy program—entered its third phase June 13 at the Business Press Assn. convention in San Diego. Mr. Sheehan says the program provides guidelines and worksheets that help marketers determine the ad budget they need to reach their goals.

U.S. Industrial Directory in addition to

No, we're not selling correspondence courses. Or matchbooks. We're selling advertising. And the "big money in advertising" we're talking about has to do with getting the most out of your advertising dollar. That means, in large part, choosing the right market and, of course, the right medium in that market.

Which brings us to us. The Pennysaver. Southern California's Direct Advertising System. Of course Southern California is one of the nation's premier "big money" markets. And The Pennysaver Direct Advertising System is one of the smartest ways to penetrate that market.

THERE'S BIG MONEY IN ADVERTISING

At the center of our system is The Pennysaver weekly shopping publication, which reaches almost two million households in Los Angeles, Orange, Ventura, Riverside and San Bernardino Counties with guaranteed direct mail delivery and 98% saturation in its covered market areas. Add the versatility and cost-efficiency of zone buying for geographic and demographic targeting as well as a complete set of direct marketing services—including research, mailing lists, and inserts—and you have a product that will both **make** and **save** you big money.

Call us today for a complete Pennysaver Direct Advertising System media kit.

Capital Cities Communications

Revenues	1983	1982
Media	$762,300,000	$663,600,000
Other	—	—
Total	$762,300,000	$663,600,000

Capital Cities Communications, New York, is the 16th largest media company in the U.S. with 1983 revenues of $762.3 million, all from media operations. Revenues, up 14.8% from 1982, helped generate net income of $114.7 million, a 19% increase over 1982.

Capital Cities' revenue breakdown is publishing 60.3%, broadcast 30.9%, and cable 8.8%; its breakdown of income from operations is publishing 45.5%, broadcast 53.6%, and cable 0.9%.

Capital Cities' publishing division had a banner year in 1983, besting its 1982 performance by 18% in revenues and 31.6% in operating profit and increasing its contribution to the company's total operating income from 40% in 1982 to 45% in 1983. The division contributed $459.5 million in revenues and $104 million in operating income.

The company completed several acquisitions in 1983, including the *Ocean County Reporter* in Toms River, N.J., from Hackensack, N.J.-based Macromedia Inc., (until 1984 known as Bergen Evening Record Corp.); the *Little Nickel Want Ads* publications in Lynnwood, Wash., and Securities Data Co., an on-line database providing financial information to the financial banking community.

The company continued its acquisitions into 1984, picking up Abrahamsen & Co., another financial database, which was merged into Securities Data; Wilson Publishing, Narragansett, R.I., publisher of the *Narragansett Times* and the *Standard Times*, both weekly newspapers with a combined circulation of 19,000 in North Kingstown, R.I., and Sutton Industries, Mission Viejo, Cal., which publishes the *Pennysaver*, a free distribution weekly with 117 zoned editions that are distributed to more than a million households in Orange, Riverside, and San Diego counties in Southern California and to roughly 300,000 households in the Sacramento and Stockton areas of northern California.

Total ad revenue among newspapers was up 11% over 1982 and average paid circulation climbed 2%. The company's flagship newspapers, the *Kansas City Star* and *Times*, posted a 3% gain in ad linage, and introduced three new sections, "Sports Special" on Mondays, "Business Special" on Tuesdays and "Star Style Plus" on Fridays. The *Fort Worth Star-Telegram*, which soon will receive up to $70 million in capital infusion for new production facilities, set new records for operating margin, linage, ad count, inserts and paid circulation.

The resurgence of the auto industry helped the *Oakland Press* in Pontiac, Mich., best its 1982 performance, and the company's other newspapers—the *News-Democrat* in Belleville, Ill.; the *Times-Leader* in Wilkes-Barre, Pa.; the *Daily Register* in Red Bank, N.J.; the *Democrat-Herald* in Albany, Ore., and the *Daily Tidings* in Ashland, Ore.—all posted revenue gains.

In the Specialized Publications Group segment of the publishing operations, revenues reached record levels, although two dark spots marred its performance, including the folding of *Men's Wear* magazine in August and the ill-fated introduction of a consumer version of *SportStyle*, which ceased publication in September after just nine issues. The introduction ate up most of the $3.8 million the division spent on investment in 1983.

Achieving record revenues and profits were *W, Women's Wear Daily, HFD, Daily News Record, Footwear News, Supermarket News, Electronic News* and the International Medical News Group. The metals publishing group—*American Metal Market, Metalworking News, Metal Center News* and *Heat Treating*—suffered from depressed market conditions and turned in profitable results that were below 1982's.

Also achieving positive revenues and profits were *Travel Agent, Energy User News, SportStyle* (business edition), *Home Fashions, Textiles, Electronics Retailing, MIS Week* and *Multichannel News. Entree* and *Aches & Pains* were unprofitable.

A bright spot in Capital Cities' Fairchild Publications group was the introduction of *M*, an upscale, life-style magazine aimed at affluent male readers. Launched in October, the magazine has attracted advertising and the company claims its circulation and sales are encouraging.

The cable tv division posted a 26% gain in revenues, to $67 million, with operating income rising 24%, to $2.1 million. Subscriber increases, together with rate adjustments and acquisitions, resulted in a 22% increase in basic service revenue and a 35% increase in premium and tier revenues.

During 1983, Capital Cities paid $3.1 million for four cable tv systems with 6,000 subscribers in Diboll, Burke, Corrigan and Livingston, Tex., and Vinita and Nowata, Okla. Also, eight new systems that were begun in 1980 and 1981 became operational.

The broadcasting division increased revenues only 7%, to $235.8 million, due in part to a decline in national spot revenue. Four of Capital Cities' six tv stations maintained their market leading positions—WPVI, Philadelphia (ABC); WKBW, Buffalo (ABC); KTRK, Houston (ABC), and KFSN, Fresno (CBS)—with WTNH, Hartford (ABC) and WTVD, Durham-Raleigh (CBS), holding on to second place in their markets.

The company's radio stations produced record revenues and operating income in 1983, with most maintaining strong market positions in spite of continued audience fragmentation. On Dec. 2, Capital Cities sold WROW (am, fm) in Albany, N.Y., the first radio station owned by the communications company. Left with six fm and six am stations, Capital Cities was on the acquisition trail at year's end.

A creative director discusses with clients newspapers in general and one newspaper in particular.

Newspaper readers tend to be information-hungry, and welcome good ads as part of their daily information intake. By taking advantage of the unique qualities of the medium, you can satisfy the readers' need to know while satisfying your sales forecasts at the same time.

If your product or service is sold in the Metro New York area, you can't do better than The Record for reaching an audience that's receptive, affluent and ready to buy. The reason, in part, is that The Record has "conditioned" its readers to expect the best. That's how it became New Jersey's largest evening newspaper.

The other reason is that The Record gives readers and advertisers unparalleled presentation — eye-catching graphics, lots of full color coverage and superb reproduction that guarantees your ad will look its best and sell its hardest.

Ask your agency about The Record. Or contact Jonathan Theophilakos directly at 201-646-4257. You'll discover how good a newspaper can be. And how good it can make your product — and you — look.

CBS Inc.

Revenues	1983	1982
Media	$2.683 bil.	$2.435 bil.
Other	1.857 bil.	1.688 bil.
Total	$4.540 bil.	$4.123 bil.

CBS Inc., New York, is the nation's second largest media company, with revenues from media operations estimated by ADVERTISING AGE at $2.68 billion in 1983, up 10.2% from 1982.

Tv and radio broadcasting contributed $2.39 billion to 1983's performance, up 10% from 1983; magazine publishing added an estimated $293.5 million in revenues, up about 9%.

Total operating revenues of $4.5 billion represented an increase of 9.8% over 1982. Net income was up 68% to $187.2 million in 1983.

The company's performance in 1983 was boosted by cost-control measures implemented at the beginning of the year.

The broadcast group, for example, allowed 400 jobs to evaporate through attrition and was aiming at a total savings of $100 million. Early in 1984, there were major personnel moves in the broadcast group, leading to speculation concerning a successor to chairman-ceo Thomas Wyman in the president's office he vacated when he took over from William Paley.

In the broadcast group, CBS Television Network posted both sales and profit gains, but they were dampened by soft upfront sales in the first two quarters of the year and soft scatter market sales in the latter half of the year.

CBS television network backed off its stance to refuse to guarantee audience demographics during the summer and began offering guarantees on female audiences.

In 1983, CBS continued its battle with the FCC over rights to syndication, a battle that carried over into 1984.

Among new ventures, Extravision, a CBS entry into the teletext market, was introduced in 1983, withdrawn, then reintroduced. It ended the year with few viewers, mainly because of the lack of inexpensive, readily available converters.

Venture One, CBS's joint videotex experiment with American Telephone & Telegraph, ended testing in 1983. In February, 1984, CBS announced a joint venture to begin development of a commercial videotex system with IBM and Sears, Roebuck & Co. It is not expected to begin operation for several years.

CBS ended the year in exploratory talks with Communications Satellite, concerning a possible joint venture in direct broadcast satellite.

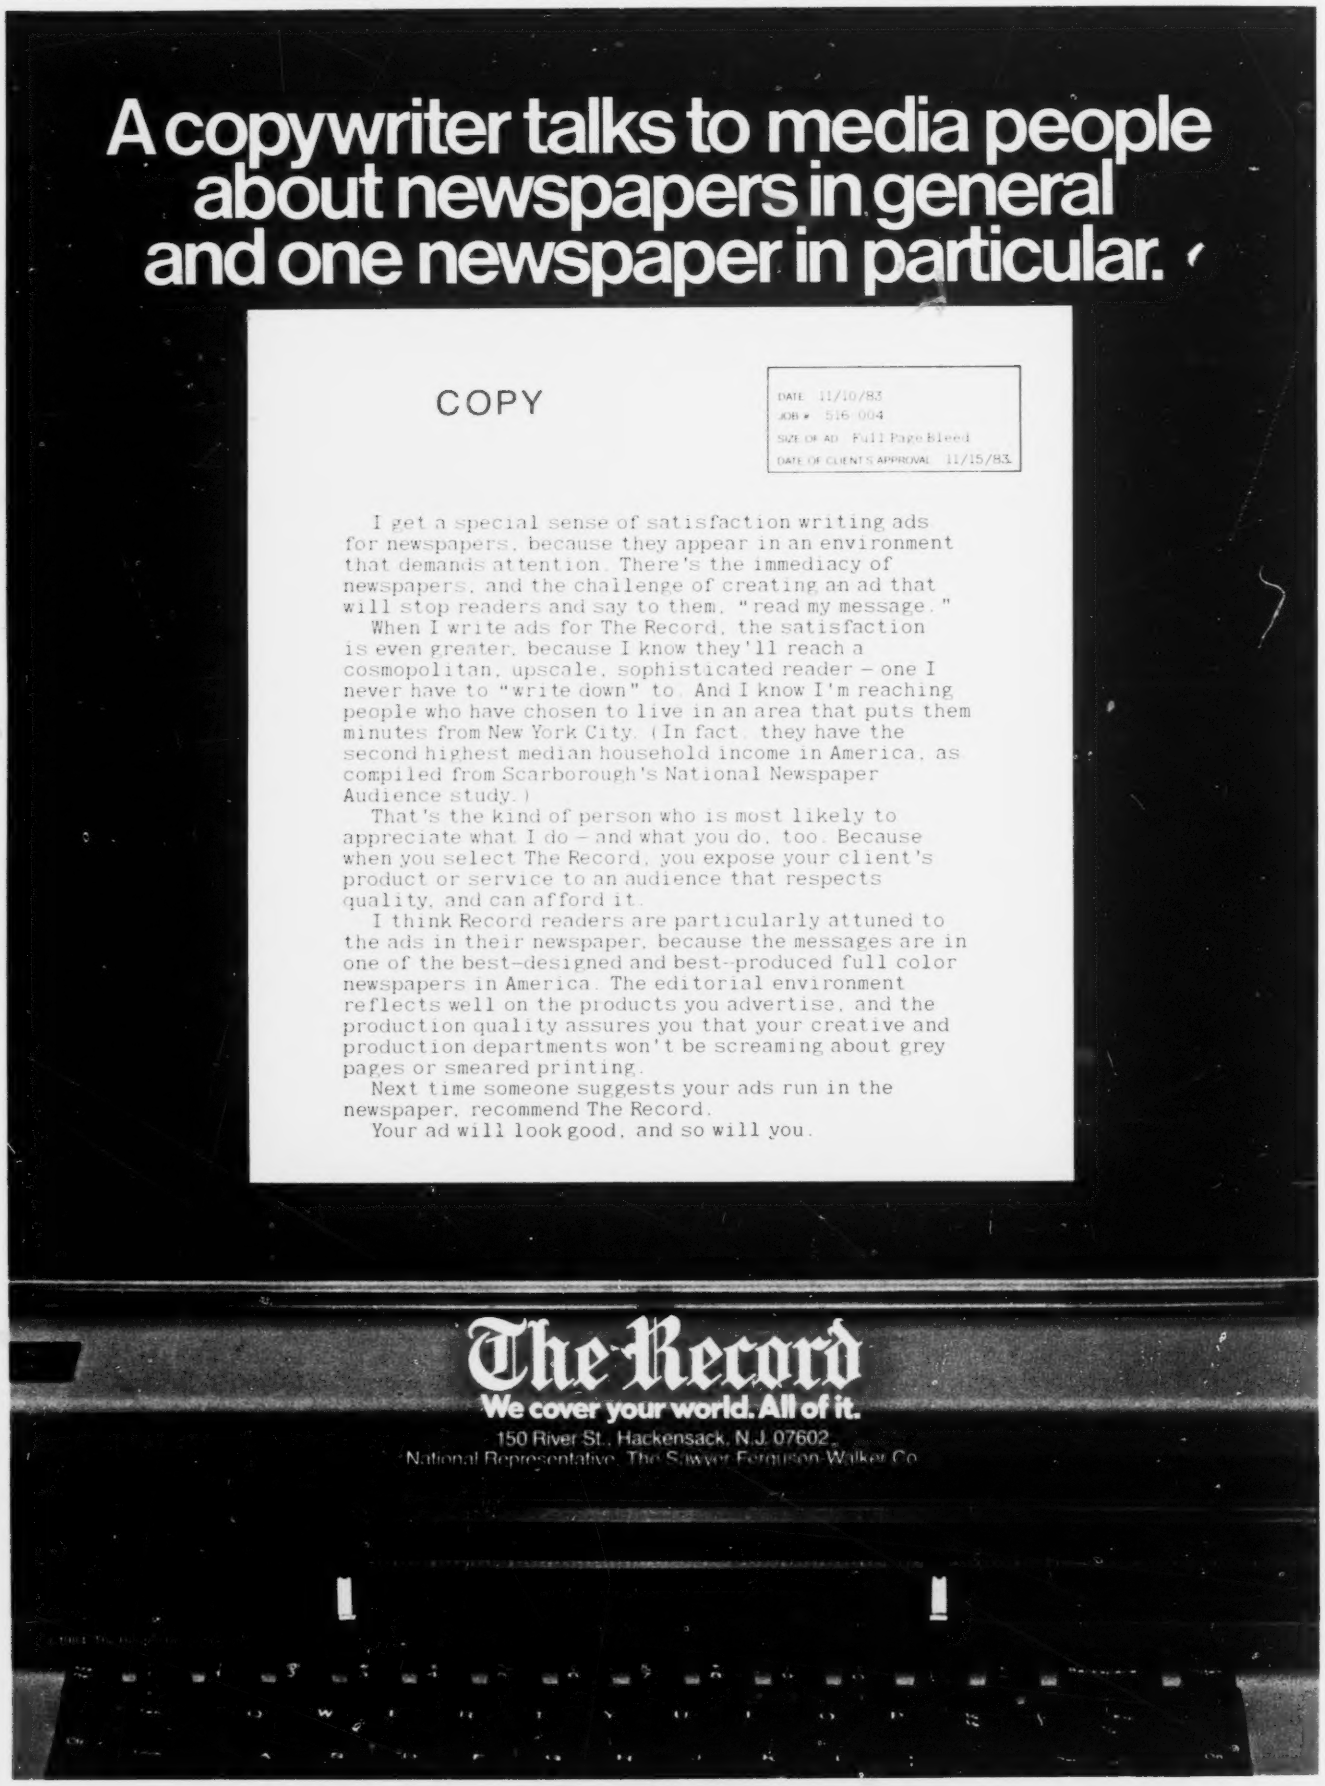
CBS won the ratings war in both the 1982-83 season and the 1983-84 season. The former season saw six CBS offerings in the top 10 and 12 in the top 20 shows, including three of the four new shows that made the top 20. A highlight was the move of "Simon & Simon," which ranked 70th in the 1981-82 season, to seventh in the 1982-83 season. Another was the final episode of "M*A*S*H," which set records with a 60% share of the tv audience.

Notable also was CBS' gain in daytime tv, where it ran neck and neck with the traditional leader, ABC, in the last two quarters.

Reflecting strong confidence in its 1983-84 program schedule, CBS announced only 3½ hours of new programing in 1984, the smallest offering in its history.

The healthiest percentage revenue gains were posted by news and sports, with prime-time revenues growing at a more modest pace and late-night revenues remaining flat.

CBS Sports won the battle with NBC for rights to National Collegiate Athletic Assn. basketball games. Its broad-



A copywriter talks to media people about newspapers in general and one newspaper in particular.

DATE OF CLIENTS APPROVAL 11/15/83

I get a special sense of satisfaction writing ads for newspapers, because they appear in an environment that demands attention. There's the immediacy of newspapers, and the challenge of creating an ad that will stop readers and say to them, "read my message."

When I write ads for The Record, the satisfaction is even greater, because I know they'll reach a cosmopolitan, upscale, sophisticated reader – one I never have to "write down" to. And I know I'm reaching people who have chosen to live in an area that puts them minutes from New York City. (In fact, they have the second highest median household income in America, as compiled from Scarborough's National Newspaper Audience study.)

That's the kind of person who is most likely to appreciate what I do – and what you do, too. Because when you select The Record, you expose your client's product or service to an audience that respects quality, and can afford it.

I think Record readers are particularly attuned to the ads in their newspaper, because the messages are in one of the best-designed and best-produced full color newspapers in America. The editorial environment reflects well on the products you advertise, and the production quality assures you that your creative and production departments won't be screaming about grey pages or smeared printing.

Next time someone suggests your ads run in the newspaper, recommend The Record.

Your ad will look good, and so will you.

The Record
We cover your world. All of it.

National Representative, The Sawyer Ferguson Walker Co.

cast of the 1983 championship game drew a larger audience than any previous basketball game. The CBS football audience was the second largest ever for the network's football broadcast season, but CBS Sports coverage of the Super Bowl in January, 1984, was less than well-received. Agreements with the National Basketball Assn. and the Professional Golfers' Assn. were renewed in 1983.

"The CBS Evening News with Dan Rather" continued to lead the network news ratings in 1983 with an average audience advantage of 20%, and format changes in "The CBS Morning News" that expanded viewing time and helped the program score a 21% ratings gain. Each of the network's five owned and operated (o&o) tv stations achieved record revenues and profits in 1983.

The radio division posted sharp gains compared with 1982, with the CBS network leading in the top 20 network sponsored programs for the 19th consecutive ratings period. The network also concluded extension agreements with Major League Baseball for the All-Star game, league championships and the World Series through 1989; with the National Football League for a 37-game schedule, including the Super Bowl, through the 1984 season, and with the NCAA for tournament basketball through the 1984 season. The network also converted from land line to all-satellite delivery in 1983.

RADIORADIO, the division's young adult radio network, increased its affiliates to 133 and planned to introduce a second music series this year. The network also introduced "Top 30 USA," a popular music program aired on 212 affiliated stations by yearend.

Among the o&o radio stations, KNX-FM in Los Angeles changed its call letters to KKHR and switched to the Contemporary Hit Radio format, the fifth CBS fm station to do so. CBS credits the format with solidifying audience gains among listeners 12 years and older, now at 6.2 million.

CBS sold WEEI-AM in Boston, the 14th and only non-50,000-watt station in the company's stable, to Helen Broadcasting of Framingham, Mass., whose president, John E. Baker, has been vp-general manager of WEEI the past two years. The sale was to make way for the purchase for $27 million of KRLD (am, fm) in Dallas and four Texas satellite-delivered radio networks, all owned by Metromedia. However, Metromedia decided to hold on to these properties, leaving CBS presumably still looking for a 50,000-watt station.

The CBS/Publishing Group, which includes education and trade texts through Holt Rinehart Winston, software publishing and general interest magazines, turned in record performances in both revenues and profits, with revenues up 8.9%, to $587 million, and operating profits up 45%, to $55.2 million. ADVERTISING AGE estimates the magazines—the only subgroup to qualify as media in its terminology—accounted for half of the division's revenues.

The magazines division, created from the old consumer publishing division, increased revenues substantially and more than doubled profits over 1982. The division underwent a sweeping reorganization designed to make each magazine its own profit center.

Woman's Day, sporting a new editorial design and a hefty promotion budget, had a record year, as did *Field & Stream*, *Audio* magazine and *Cuisine* posted advertising gains; *American Photographer* increased both advertising pages and circulation, the latter through the acquisition of the assets of *Camera Arts* magazine.

Family Weekly, the division's Sunday newspaper magazine, increased distribution to 366 newspapers for a total circulation of 12.8 million, but suffered declines in both ad revenues and pages at the hands of freestanding newspaper inserts.

Nonmedia contributing divisions include:

- CBS/Records Group reported strong earnings aided by Michael Jackson's "Thriller," the group's all-time best-selling album, and by exorcising the poorly performing home video business from the division.
- CBS/Columbia Group, which had increased revenues but an operating loss attributed to poor sales in CBS Toy's videogame software line, a decline that has continued into the first two quarters of the new year.
- CBS/FOX, a home video-oriented joint venture between CBS and 20th Century-Fox Film Corp. (video titles include "The Verdict," "Porky's" and "Sophie's Choice"), had solid financial and operating results, according to the company.
- Tri-Star Pictures, a joint venture formed in 1983 among CBS, Columbia Pictures and Home Box Office, issued "The Natural," starring Robert Redford as its first release in May, 1984. Other films slated for 1984 release include "The Muppets Take Manhattan," "The Evil that Men Do" with Charles Bronson and "Songwriter" with Willie Nelson.

Central Newspapers

Revenues	1983	1982
Media	$346,000,000	$315,000,000
Other	—	—
Total	$346,000,000	$315,000,000

Central Newspapers, Indianapolis, is the nation's 26th largest media company with 1983 revenues estimated by ADVERTISING AGE at $346 million, compared with an estimated $315 million in 1982, all from media properties.

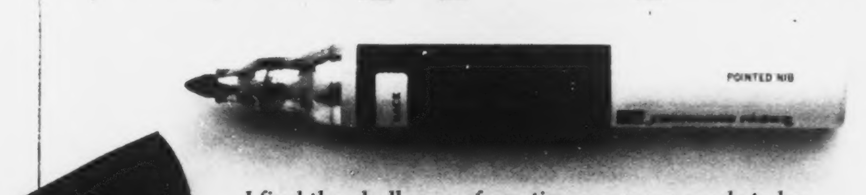
Privately owned Central Newspapers continues to put most of its efforts into newspapers in the Phoenix and Indianapolis markets.

Next September, Central is entering a new media market in Phoenix, in which its R/G Cable subsidiary will introduce Tele-Guide Metro Phoenix, a public access video terminal service.

The service, consisting of 75 terminals in 30 locations, will provide restaurant, hotel and shopping information and will be free to the user.

R/G Cable also leases three channels from a Storer Broadcasting System cable system. It runs 24-hour text news on one channel, text classified ads on a second and audio-video housing ads

An art director explains to account executives about newspapers in general and one newspaper in particular.



I find the challenge of creating newspaper ads to be exciting and rewarding. Exciting, because newspapers give me a large space in which to work, and rewarding because the success of a newspaper ad can be evident the same day it runs.

When I design ads for The Record, it gets even better. Because The Record reaches a high-income, high-education, sophisticated audience that responds to good advertising. And The Record's color reproduction, which I understand is surprisingly affordable, is superb — without doubt the best full color newspaper in the New York market, if not the entire country!

Art directors like me look forward to the chance to create ads for newspapers like The Record. (And if that's not enough incentive for you to specify The Record, check out their demographics — particularly the buying power of their readers — and see how they shine next to other papers in the New York/New Jersey region.)

Next time you're looking for impact and results, put your ads in The Record. Your client will look good, and so will you.

on a third. The channels now reach 75,000 subscribers, up from 45,000 the year earlier.

"The real estate channel is doing only fair," says Joe Cole, R/G manager. "The real estate market here is strong, and I'm not sure that's helping us, but we are getting some response."

R/G is involved with Times Mirror Co. in videotex experiments and will begin testing a videotex service in Los Angeles this summer.

Central's seven newspapers dominate the Arizona and Indiana markets they serve. The largest of the papers is the morning *Arizona Republic*. That property and its sister paper, the evening *Phoenix Gazette*, continue to enjoy a steady growth of about 5% circulation a year, Central president Frank Russell says.

Mr. Russell says Central's satellite plant in Mesa, Ariz., completed in 1983, "has helped us to give better service to our subscribers."

Combined morning and evening circulation of the Arizona papers, from the ABC for the six months ended March 31, 1984, was 435 518, up 3.4% from earlier previous period. For Sunday, the *Republic* posted 469,179, up 4.5%.

Indianapolis is the second largest market for Central. The combined circulation of the company's morning *Indianapolis Star* and evening *Indianapolis News* rose to 361,863, up 0.3%. Sunday circulation of the *Indianapolis Star* also gained, climbing to 388,123, up 3.8%.

Central's *Muncie Star* and *Press* posted a combined daily circulation of 46,404, a slight drop, and the morning *Star* had a Sunday circulation of 34,933, a slight increase.

In Vincennes, Ind., the *Vincennes Sun-Commercial* (evening and Sunday) has a daily circulation (Monday through Friday) of 14,871, up 0.7%, and Sunday circulation of 15,927, up 0.3%.

Chris-Craft Industries

Revenues	1983	1982
Media	$122,000,000	$53,500,000
Other	18,500,000	23,000,000
Total	$140,500,000	$76,500,000

Chris-Craft Industries, New York, entered the list this year as the 76th largest media company, with 1983 media revenues of $122 million, or 86.8% of $140.5 million in total revenues. ADVERTISING AGE media figures were determined by consolidating United Television's media revenues of $56.2 million with Chris-Craft's media revenues of $65.8 million for the year.

Media revenues increased 228% from 1982 media figures of $53.5 million, primarily due to Chris-Craft's increasing share of ownership in United Television, Minneapolis, from 19% in 1981 to 50.1% in 1983, and record earnings from its tv stations. The growth further demonstrates the company's redirection in business emphasis from manufacturing to broadcasting over the past six years, which has grown from 18% to 81% of company assets. Total revenues for Chris-Craft in 1982 were $76.5 million.

Chris-Craft first received 19% of UTV common stock as a dividend on its shares of 20th Century-Fox Film Corp. Afterward, Chris-Craft received $140.8 million in cash when it sold its 23% share in Fox. That cash went toward purchasing additional shares of UTV. As a result of purchases by UTV of its own shares on Nov. 16, 1983, Chris-Craft's ownership equaled 50.1% of UTV outstanding shares.

During this year of media company takeovers, Chris-Craft was quick to protect itself. In an attempt to thwart a takeover by Rupert Murdoch's News America Corp. Chris-Craft Industries chairman, Herbert Jay Siegel, arranged an asset swap with Warner Communications chairman, Steven J. Ross, in early 1984. To block Mr. Murdoch's efforts, Warner acquired a 42.5% equity position in BHC Inc., which comprises Chris-Craft's Television Division. Chris-Craft in turn received 19% of Warner. This made Warner a tv operator blunting the takeover attempt by Australian-born Mr. Murdoch because of limitations on foreign nationals owning tv stations.

The battle ended in March after 15 weeks when Mr. Murdoch sold back his shares of Warner and made profits of $41 million. Chris-Craft, however, came out a winner as well. Warner's vast film library provides a logical extension of their development in broadcasting and entertainment.

Chris-Craft's Television Division, the company's primary business, completed another year of record operating revenues and income. The six independent tv stations controlled by Chris-Craft rank as the fourth largest independent tv group in the country, based on households served. Company officials are reticent, however, to speak about their growth.

Chris-Craft attributes its success in broadcasting to meeting an increasing demand for tv advertising, larger viewing audiences, innovating their scheduling and programing, and providing quality news and public affairs presentations to gain viewer respect.

In July, Arbitron Ratings Co. named the Los Angeles tv station, KCOP, a vhf station, the highest rated independent station in that market. The Los Angeles market is considered the most competitive tv market and includes seven competing vhf stations.

The station's news coverage improved during the past year when it switched to electronic videotape equipment from film camera equipment.

KCOP also installed a satellite receiving dish, which enables the station to cover worldwide news.

In July, United Television purchased its first uhf station, KBHK, San Francisco. Company officials look for great growth potential in the nation's fifth largest tv market.

Chris-Craft remains involved with Operation Prime Time, which provides first-run programing to local stations. OPT, created in 1976, produced such shows as "Smiley's People," "Blood Feud" and the miniseries "Sadat" in 1983.

In March, the company filed an application with the FCC for a license to provide cellular radio service in seven markets, located primarily in the Sunbelt.

Chris-Craft's other line of business is a collection of small manufacturers of plastic flexible films and foams, latex foams and non-woven fiber products.

Chronicle Publishing Co., San Francisco, is the nation's 29th largest media company with 1983 revenues estimated by ADVERTISING AGE at $325 million, all from media operations.

The company is wholly owned by the family trust of the M.H. de Young estate, and has published the *San Francisco Chronicle*, the city's leading newspaper, since 1865.

The *Chronicle* is the major source of the company's revenues. Daily circulation as of the ABC March, 1984, statements was 539,450, up 0.4%, and the Sunday *San Francisco Sunday Exam-*

A client speaks to his agency about newspapers in general and one newspaper in particular.

For our advertising investment, we expect ads to work hard by using each medium in the most creative, compelling way. And we want our agency to make an informed judgment on the ways that the editorial environment of the medium enhances our message.

When the medium is newspaper, that judgment should be based on reporting excellence and graphic presentation, as well as quality demographics.

In Metro New York, one newspaper is an outstanding example of the "environmental enhancement" I'm referring to: The Record. Its readers across affluent Bergen and Passaic counties in New Jersey have the second highest median household income in America, according to Scarborough. And it gives them award-winning reporting in full color, using more color than almost every other newspaper in the country. I'm particularly impressed by the way four-color ads look in The Record.

Simply stated, The Record combines my kind of audience with my kind of impact.

That's the kind of added value—"environmental enhancement"—I want in my media plan. Let's contact The Record's National Advertising Manager, Jonathan Theophilakos, at (201) 646-4257. And let's put The Record's added value to work. It will make us both look good.

iner & Chronicle, jointly published with the Hearst Corp., was 706,150, up 1.5%.

The *Chronicle* has become a livelier, more readable paper in the last three years, a credit to such recent additions as the Wednesday Briefing section of international news and *This World*, a Sunday tabloid feature section.

The company also owns the *Bloomington* (Ill.) *Daily Pantagraph*, whose daily circulation as of March, 1984, is 52,786, up 0.6% from the previous year, and Sunday circulation 55,180, up 2.8%.

Chronicle Broadcasting Co. still owns its leading tv station, the San Francisco NBC affiliate KRON, after yearlong negotiations to sell it to Gannett Co. broke down last December.

"The station is no longer for sale," says Francis Martin, president, Chronicle Broadcasting, adding that the company's strategy is to "maintain a presence in television broadcasting."

"We're beating KGO [the second ranked ABC affiliate] in the 5 p.m. slot," Mr. Martin says. "The spread between the three stations in San Francisco [KPIX, the CBS affiliate, leads] is not nearly what it was." KRON won a Peabody award this year for its documentary on El Salvador and a series on Vietnam veterans won a Du Pont award. The station was nominated for 47 Emmy awards and received 11 in 1984.

The company is determined to maintain its dominance in Wichita, Kan., where it owns the No. 1 rated station, KAKE-TV, and in Omaha, where it owns the leading station, WOWT-TV.

Western Communications, the company's cable tv subsidiary, has completed rebuilding five of its systems. Currently, four can transmit 35 channels and one sends 27 channels. A pay-per-view experiment is under way on the South San Francisco system. "We're finding that rock concerts and sporting events pull better than movies," says Ed Allen, president, Western Communications.

Western Communications has 148,000 subscribers and "we're in an acquisition mode this year for other systems," Mr. Allen says. Locally produced commercial spots inserted in satellite programs will be tested during the second half of 1984 in the Monterey system, which has 60,000 subscribers. The company also is experimenting with retail sales outlets for its cable services.

Last December, Chronicle Videotex rolled out "the first public access videotex in the U.S.," says Peter Thieriot, president of the system and brother of the newspaper's publisher-ceo. The computer information system has 33 terminals installed in heavy tourist traffic areas. During the Democratic National Convention in July, Chronicle Videotex will provide more than 300 terminals at the convention center.

Chronicle Videotex provides information such as location and times of tourist attractions, restaurants (which can include menus or specials that can be updated within 90 seconds of a change), weather, sporting events and shopping services. The system is registering 45,000 pages of information called up a day with more than 75,000 people using it each month, according to Mr. Thieriot. The Chronicle plans to extend the service to three other cities, one of them Phoenix, later this year.

Continental Cablevision

Revenues	1983	1982
Media	$156,000,000	$108,700,000
Other	—	—
Total	$156,000,000	$108,700,000

Continental Cablevision, Boston, is the country's 60th largest media company, with revenues of $156 million in 1983, an increase of 43.5% from 1982 revenues of $108.7 million. All revenues are from media.

The company will likely maintain its revenue growth in 1984 with the purchase in January of the Jacksonville, Fla., franchise from Area Communications.

The purchase for an estimated $106.5 million moved Continental from tenth to eighth place among the country's cable operators, according to Paul Kagan & Associates, a California consulting company that follows the industry. It also increased the company's assets from $270 million in 1982 to $480 million.

The Jacksonville franchise, which has between 86,000 and 93,000 subscribers, boosted Continental's total claimed subscriber rolls 11% to 12%, to 859,000.

Although the acquisition took the company into a new geographical area, it fit into the basic expansion strategy at Continental, which is nearly 25% owned by Dow Jones & Co.

"The available pool of attractive [new] franchises is virtually depleted. If you're interested, you have to go into the acquisition market," says Robert Stengel, director-corporate services.

Continental, like others in the industry, has concentrated its holdings within certain geographic areas for better control and economies of scale.

Mr. Stengel says its traditional areas are the Northeast, Midwest and Virginia. The management style of the company, which was formed in 1963 by Harvard Business School classmates Amos Hostetter, president-ceo, and H.I Grousveck, chairman, is to decentralize its operations and allow regional officers to handle the operating decisions.

Continental has grown through aggressive pursuit of franchises and acquisitions, primarily in suburban areas, which Mr. Stengel says clearly don't present the same restrictions as do the larger urban areas.

With more than 2 million homes within its franchise network, Continental plans to concentrate on building its subscriber rolls this year, while not ignoring a strong acquisition if it presents itself.

Kagan & Associates says Continental is a "tightly managed, aggressive, financially well connected company . . . that would be an attractive takeover," but Mr. Stengel says the operation has no intention to sell out.

He notes the company's relationship with Dow Jones is strictly financial, and part of the terms of the deal reached two years ago was that Dow Jones would not move toward a takeover for at least 10 years.

Copley Newspapers

Revenues	1983	1982
Media	$236,700,000	$209,300,000
Other	4,200,000	700,000
Total	$240,900,000	$210,000,000

Copley Newspapers, La Jolla, Cal., the 43rd largest media company in the country, had 1983 media revenues of $236.7 million, or about 98% of total revenues of $240.9 million. In 1982, Copley reported media revenues of $209.3 million.

The family-owned business still primarily is involved in newspapers in California and Illinois, but has expanded its involvement in cable tv and electronic publishing.

The Copley Press and its cable partner, Colony Communications (owned by Providence Journal Co., Providence, R.I.), have been awarded cable tv franchises in the contiguous areas of Lomita, the San Pedro-Wilmington-Harbor City area of Los Angeles and an unincorporated portion of Los Angeles County. System construction is under way, and the first group of subscribers has been connected.

The Copley-Colony team recently has been successful in gaining three new franchises in California's Orange County in the cities of Costa Mesa, Cypress and an unincorporated area of the county.

In electronic publishing, the Copley Videotex unit was disbanded early this year, at least temporarily, following Time Inc.'s termination of its teletext activities and the withdrawal of the Cox INDAX program for further development. The videotex group ran concurrent experiments in cable-delivered teletext and videotex for about 18 months.

On May 1, 1983, Copley launched an electronic classified ad service called CLEO (Computer Listing of Employment Opportunities) in California. The service lists jobs in professional and technical areas, such as engineering and computer programing. The "help wanted" ads are purchased by businesses and accessed by personal and business computer users via telephone. The system has been expanded from its Los Angeles base to all major metropolitan areas in California. The service is still in its infancy and so far poses little threat to newspaper classified ads. Further expansion of the CLEO system is under study.

Newspapers remain Copley's principal source of income. The company's San Diego properties grew despite the recent recession, while its six Illinois papers felt the impact of hard times more strongly, according to marketing director Stuart Neffeler. Daily circulation for all Copley newspapers in 1983 was 687,366, up 6.3% from 1982 (not including the recently purchased *Waukegan News-Sun*).

The *San Diego Union* has accounted recently for more of the growth in the San Diego market than the *Tribune*, the company's evening paper. The *Union*, aside from having greater drawing power as the city's morning paper, is edited to appeal to the growing outlying areas of San Diego County. Total circulation for both papers, as reported by the ABC's March 31, 1984, figures, is 344,106 daily, and 355,960 for the *Union* on Sunday.

With the purchase Jan. 3, 1984, of the *News-Sun*, Copley has five dailies covering all suburban counties in the Chicago metropolitan area. This allows the Copley-area newspapers to offer advertisers a more efficient vehicle for reaching the prosperous and growing Chicago suburban market.

Due to a soft economy in the Chicago area, the Copley dailies (not including Waukegan) together had lost about 2,500 in daily circulation. With the improved economy, circulation is again on the upswing with the total daily circulation at 127,937, according to ABC's latest figures, and 125,310 on Sunday. This represents an increase of more than 1,000 copies, both daily and Sunday, compared with the same period of 1983. Counting Waukegan, the current daily circulation for all five Copley Chicago area papers is 169,432. In its other Illinois property, year-to-year circulation for the Springfield, Ill., *State Journal Register* stayed about the same. Current figures are 69,492 daily and 71,409 Sunday.

Copley solidified its market position in the Los Angeles south bay and harbor area with the purchase of the *Santa Monica Outlook* in March, 1983. Combined with the Torrance *Daily Breeze* and the *San Pedro News Pilot*, the new property gives Copley a growing and upscale market running along the coastline from Malibu to Long Beach. These three dailies currently have a combined circulation of 130,264 in this important segment of the Los Angeles market. Circulation on Sunday is 123,328.

Courier-Journal & Louisville Times Co.

Revenues	1983	1982
Media	$107,000,000	$98,000,000
Other	59,000,000	62,000,000
Total	$166,000,000	$160,000,000

Courier-Journal & Louisville Times Co. and WHAS Inc., a separate company also owned by the Bingham family, combined to be the 83rd largest U.S. media company in 1983. Net operating revenues from media operations last year totaled $107 million, a 9.2% increase from 1982. Revenues from newspaper operations edged slightly upward from $90 million to $92 million. Broadcast revenues were estimated at $15 million in 1983.

Total company revenues were $166 million in 1983, a 3.8% increase from 1982. The Bingham's Standard Gravure and Standard Colorprint operations are not included in media figures; neither are revenues from another operation, the four-year-old Computer Emporium. The operation runs personal computer retail stores, and it generated an additional $4 million in sales last year.

The newspaper company's morning *Courier-Journal* and evening Louisville Times, supplemented by five zoned weekly papers, fared exceptionally well in a market that did not prosper last year, the company reports. The total market coverage capability, coupled with tight expense controls and favorable newsprint pricing, produced profits that were 65% above 1982, a year in which profits were relatively flat.

At the end of 1983, the morning *Courier-Journal had a daily circulation of about 178,000, the evening Times'* circulation was about 139,000 and the *Courier-Journal* Sunday circulation was estimated at 333,000. The widely acclaimed papers long have put considerable money into editorial, and the company takes pride in its extensive statewide delivery. According to senior vp John L. Richards, it is "darned expensive" to maintain daily home delivery "225 miles east and 225 miles west" of home base. But it seems to be a "sacrifice" the company is determined to make.

In the broadcast end of the company's business, high ratings helped boost profits 22% at WHAS Inc. last year. WHAS-TV ranks No. 1 in a four-station tv market. Radio stations WHAS (am), a contemporary adult format, and WAMZ (fm), country, are among the top three in a 17-signal radio market.

WHAS has moved into the teleconferencing and video training program market, combining its own satellite uplink and commercial production company to offer full-service video conferencing capabilities. Mr. Richards says several major locally based corporations are looking into the service.

The Courier-Journal Co. also is pursuing various options in electronic publishing. It operates a 24-hour-a-day text news and classified advertising service—the C-J&T Channel—on leased cable channels. The C-J&T Channel has a potential audience of 128,000.

In 1983, the newspapers' classified phone operation and cable advertising staff combined to sell 147,600 cable classifieds, primarily as add-ons. For a small additional fee, newspaper classified ads are beamed over the cable channel. A directory informs viewers of the times that particular types of classified ads will appear.

In July, 1983, the company concluded its nine-month test of C-J&T Teletext among 111 households. The company characterizes the experiment as well-received and says it found that the most popular information offered was local news, weather, sports, movie guides and classified ads. The company is evaluating results and plans to test other approaches in the teletext area later this year.

Ways of distributing information via personal computer also are being explored, Mr. Richards says. A wholly owned subsidiary of the company operates two Computer Emporium retail stores in Louisville, selling Apple Computer and IBM products. Mr. Richards says expansion into several additional markets is expected this year.

The executive cites the training programs offered by the outlets, as well as the parent company's "software expertise" as factors that point to future strengths for the operation. He suggests that "maybe a big bang" would be to enable personal computer owners to hook up with the Courier-Journal Co.'s database.

OTHER OPERATIONS

C-J&T Teletext; C-J&T Channel, cable news and advertising service.

Cowles Media Co.

Revenues	1983	1982
Media	$227,800,000	$238,000,000
Other	—	—
Total	$227,800,000	$238,000,000

Cowles Media Co., Minneapolis, is the nation's 44th largest media company with revenues, all from media, of $227.8 million for fiscal 1983, ended April 2, 1983, a decline of 4.3% from revenues in 1982.

Net income dropped to $531,000, in fiscal 1983 from $747,000 in fiscal 1982, a sign that the company still had not recovered financially from the March, 1982, merger of the *Minneapolis Star* and *Tribune* and a disastrous diversification spree in the 1970s.

Although Cowles' fiscal 1984 has already ended, the company is ranked by its 1983 revenues to be consistent with the rest of the 100 Leading Media Companies issue.

Figures just released for 1984, however, show Cowles on the rebound, particularly via its mainstay, the *Minneapolis Star & Tribune*.

Company earnings more than doubled to $19.5 million compared with $8.3 million in fiscal 1983 (a figure including operating losses of $4.2 million for the *Buffalo Courier-Express* which was closed after the second quarter of fiscal 1983).

Earnings were aided by the sale of CableScope Inc., the cable tv station in Buffalo, N.Y., to Denver-based Tele-Communications Inc. for $41 million, and the sale in March, 1984, of uhf station WDRB in Louisville, Ky., to WWSW Radio Inc., a subsidiary of Toledo Blade Co., for $10 million. Also buoying profits were increases in ad linage and circulation figures for the *Minneapolis Star & Tribune*.

Daily circulation figures for the paper exceeded 372,000 for the six months ended March 31, 1984, up 2.76% from the year earlier, and Sunday circulation was slightly more than 586,000, up 1% from a year earlier. R.o.p. advertising linage for the daily newspaper increased more than 6% in calendar 1983 over 1982.

Finally bereft of ill-fated acquisitions in radio, tv and cable, the company's holdings are pared down to print operations. David Kruidenier, who took over as president 15 months ago, says no acquisitions or further divestitures are planned now.

In the past year, management has stabilized and, in turn, improved morale at the Minneapolis Star & Tribune.

"A year ago, we didn't have an editor, an advertising director or a circulation director," Mr. Kruidenier says. "All those positions were filled as of a few months ago, and I'm optimistic that morale has improved."

The ouster of John Cowles Jr. as president early last year ushered in the reign of Mr. Kruidenier, also chairman of Des Moines Register & Tribune Co., which owns 14% of the Cowles stock.

Although observers expressed doubts at Mr. Kruidenier's ability to lead Cowles out of trouble, fiscal 1984 results and a stable slate of managers at the Minneapolis paper indicate that his straightforward management style may be just what the embattled company needs.

Under the leadership of executive editor Joel Kramer, who occupied the same position at the Cowles-owned *Buffalo Courier-Express* before its collapse in 1982, the *Minneapolis Star & Tribune* has expanded its business and local coverage, focused more energy on investigative reporting, improved graphics and made plans to enhance and enlarge its Sunday magazine.

More staff reporters have been hired, and a bigger news hole has been provided for the expanded sections—quite a contrast to more recent times when editors, instructed to enhance sections, were provided a shrunken news hole.

Improving circulation figures seem to indicate that the strategy is working. Company projections for the *Minneapolis Star & Tribune* circulation called for increases of between 7,000 and 8,000 daily and Sunday in the past year, but numbers released March 31, 1984, put circulation 10,000 ahead of a year earlier, a trend Mr. Kruidenier predicts will continue in fiscal 1985.

As for threats from competition, Mr. Kruidenier says he is not as worried about the *St. Paul Pioneer-Press*, just 20 minutes away and noted for its coverage of state government, as he is about two advertising shoppers, one of which recently made its debut and another that just changed hands.

Mr. Kruidenier says the company is looking at its press and mailroom needs, and it plans to buy new presses sometime this year. Until those needs are filled, diversification through acquisitions won't be considered.

Mr. Kruidenier also disregards the never-ending rumors of a merger with

Des Moines Register & Tribune Co., seemingly made more feasible by his elevation to chairman, or the sale of the company by the Cowles family, said to be tired of the 149-year-old company's slow growth in recent years.

Although Mr. Kruidenier wouldn't make projections for earnings in fiscal 1985, he indicates they should continue to climb. With the shedding of poor performers complete, a sound management team in place and an end to the shuffling and sidestepping tactics of the past, chances are he's got a good chance of being right.

Cox Communications

Revenues	1983	1982*
Media	$537,600,000	$443,000,000
Other	77,023,000	71,746,000
Total	$614,623,000	$514,746,000

*Restated

Cox Communications, Atlanta, is the country's 21st largest media company with 1983 media revenues of $537.6 million, or 87.5% of the company's total revenues of $614.6 million.

The media contribution increased 21% on a year-to-year basis, based on restated media revenues of $443 million in 1982, or 86.1% of the company's total revenues.

Total operating revenues from media operations were $132.6 million, up 17% from 1982. Similarly, net income for the company's total operations rose to $77.9 million, up 19% from 1982.

Cox is a diversified media company with interests in broadcasting and cable tv, as well as several new media, including satellite master antenna tv. The nonmedia portion of Cox's earnings comes from its organizing of automobile auctions and from programing and nonaffiliate media sales from its TeleRep subsidiary.

Cox Communications and Cox Enterprise both profiled on this page, are essentially flip sides to the same coin. Although Cox Communications is a public company, it is 40.81% owned by the Cox family, and its board of directors includes Barbara Cox Anthony and Anne Cox Chambers.

Both Mmes. Anthony and Chambers are daughters of the late James M. Cox, founder of the media conglomerate and former governor of the State of Ohio.

The two companies were one until 1964 when Cox Communications, then called Cox Broadcasting Corp., was spun off for the purpose of obtaining equity from the sale of stock to use for broadcast acquisitions.

Cox' broadcasting division had total revenues of $231.5 million in 1983, up 10.3% from 1982. Gains in operating income were more dramatic: $87.1 million, 15% higher than the previous year. The division was segmented into tv $161.8 million, radio $38.4 million, and ad sales to non-Cox affiliates $31.3 million.

The company says that after adjusting for the closing of its subscription tv operations in St. Louis and the deconsolidation of Christal, a radio representation company, 1983 broadcasting revenues were up 11%.

Cox's flagship station, WSB-TV, Atlanta, continues to enjoy first place in the ratings in its market. In 1983, it earned a commendation from President Reagan for its "WSB on the Job" campaign to help Atlanta find jobs. It also won an Iris Award from the National Assn. of Television Programing Executives for a special on "The Making of Nightline."

It was a year of acquisition and format changes for Cox's radio group. Cox acquired WXFM in Chicago, but to do so it had to sell its Baltimore station, WLIF. Cox got $5.75 million for the station.

Cox also completed an agreement to purchase WKBD-TV, Detroit, one of the nation's largest independent tv stations, for $70 million. The transaction was completed in May, 1984.

Significantly, Cox already has become a part of the am stereo wave, having installed the technology in its transmitters in Atlanta, Charlotte and Los Angeles.

In a year in which many cable companies and franchises were floundering, Cox's cable unit scored substantial gains. Paid subscriptions surpassed basic subscriptions, achieving a 1.06 to 1 pay-to-basic ratio; the national average is 0.84 to 1.

At the end of 1983, total basic subscribers were 1.445 million, compared with 1.527 million pay subscribers. In addition, mini-tiers (ad-supported satellite services) grew to 121,598 subscribers.

The cable unit had revenues of $337.4 million in 1983, up 29% over 1982, while operating income rose to $45.4 million, up 20% over 1982.

The company successfully negotiated franchise renewals for the city and county areas of Gainesville, Fla., The Dalles, Ore., North Adams, Mass., Eureka, Cal., and Columbus, Ind. However, it sold franchises in St. Clair Shores, Mich., and Marquette, Mich.

In the race for the New York boroughs, Cox received half the Staten Island franchise (50,000 homes) and signed an agreement with Queens Inner City Cable System (QUICS) under which Cox will design, engineer, construct and operate QUICS' 180,000-home franchise in Queens.

When many cable companies are attempting to modify the terms of their franchise agreements, Cox successfully altered its contracts in four of its systems—Omaha, Tucson, Vancouver, Wash., and New Orleans. The renegotiation has helped the company offer certain sevices, such as its interactive Indax, that it was finding difficult to offer under the terms of the old franchise agreements. However, the renegotiation hasn't come easy. In return, Cox has had to promise a greater number of hours for local and public access programing and to continue providing WOR without charge.

Cox Cable has launched a vigorous campaign to counter theft of service, which is estimated to cost the industry losses in excess of $700 million. In San Diego, for example, Cox was successful in converting 9,000 illegal users to a paid status for an expected gain of $1.8 million in annual revenue. It also gained a landmark ruling when a U.S. district court judge ruled that the Communications Act of 1934, which protects radio communications from unauthorized reception, also applies to cable tv communications.

Cox Cable has participated in a study that examined churn—the rate of cable disconnects. In its Oklahoma City franchise, it initiated a nonpay disconnect program that was effective in reducing disconnects by half the average rate in only four months, thus adding 2,800 subscribers.

Cox Cable has been exploring activities complementary to its cable franchising. In May, it purchased the remaining 80% of *On Cable* magazine. As a result of the purchase, Cox plans to offer *On Cable* in all of its systems and market it to other systems as well. Currently, Cox has *On Cable* in 29 of its systems, accounting for 500,000 of the magazine's current 1.3 million circulation.

Cox is approaching the two-way interactive market with a great deal of enthusiasm and aggressiveness. It has signed an agreement with the Jerrold Division of General Instrument Corp. under which Jerrold will develop, manufacture and market equipment.

Also, Cox and Chase Manhattan Bank announced an agreement to develop electronic home banking systems that can be delivered over the Cox Cable systems.

Ironically, Cox's pay-per-view (ppv) baseball packages in San Diego are not attracting the large number of subscribers the company had anticipated. According to Robert McRann, vp-general manager, Cox Cable in San Diego, the company began to offer San Diego Padres home games on a ppv basis in packages of 40, 20 and individual games.

However, only 20,000 subscribers are ordering game packages even though as many as 7,000 have been watching individual games.

In terms of business applications for cable, Cox continues to pursue and develop COMMLINE, its business communications network that has been active in Omaha since 1982.

In the New York boroughs, Cox Cable plans to go into satellite master antenna tv (smatv) operations in the area's multi-unit dwellings before it begins to turn on its cable operations. While the smatv operations are not seen as a permanent venture, they are seen as a move to preempt other operators from taking over subscribers in Cox's franchise areas.

The company's national tv sales rep company, TeleRep, the third largest in the U.S., billed $451 million in 1983. TeleRep contributed $31.3 million to broadcast revenues in sales to nonaffiliate stations (its list of client stations has grown to 43) and in programing through its Television Programing Enterprises. TPE has developed "Solid Gold," which is carried on 220 stations, and "Star Search," a weekly talent competition hosted by Ed McMahon, seen on more than 170 stations. Only TeleRep sales to Cox stations are included in media revenues calculated by ADVERTISING AGE.

Cox Enterprises

Revenues	1983	1982
Media......	$467,000,000	$425,000,000
Other.......	—	—
Total.....	$467,000,000	$425,000,000

Cox Enterprises, Atlanta, is the nation's 22nd largest media company with 1983 revenues estimated by ADVERTISING AGE at more than $467 million.

In 1982, the company had estimated revenues of $425 million.

With the *Atlanta Journal* and *Constitution* as its flagships, the family-owned chain operates dailies in 14 cities and several weeklies in suburban New Orleans and in Texas. It also has shoppers in Arizona, Colorado, Florida, Ohio, and Texas, and its *Palm Beach Life* claims the title of America's oldest society journal.

In February, 1984, Cox Enterprises purchased a 50% interest in the *Yuma* (Ariz.) *Daily Sun* from the Soldwedel family, thereby becoming a partner in the venture with Donrey Media, which owned the other half. Cox has since bought out Donrey.

"The paper [*Daily Sun*] has shown steady growth over the past few years," says Charles E. Glover, president, Cox Enterprises. "Besides, it's in a good market in a growing state. It's very appealing." The potential for growth, however, may be more than its actual growth. ABC Fas-Fax circulation figures ended March 31, 1984, show a slight decline in daily circulation from 25,000 the previous year to 24,803. Sunday figures went from 25,226 to 25,556. The company also completed the purchase of the *Chandler Arizonan* during the year.

Cox Enterprises now operates 20 daily newspapers with a total circulation exceeding 1.4 million. Its Sunday editions reach another 1.4 million readers.

The impact of *USA Today*, which chose Atlanta as one of its target markets, has had little impact on the circulation of the *Atlanta Journal* and *Constitution*, according to Mr. Glover. Both the morning and afternoon papers have shown healthy increases during the past year.

While Cox Enterprises continues to emphasize the print aspect in its operations, it has been looking to the electronic media as well.

The company leases cable channels in Longview, Tex., and Mesa, Ariz., to provide a mix of news and advertising.

In Miami, it is exploring the possibility of cablecasting on a few channels together with Knight-Ridder Newspapers. "The educational channels may help us develop an effective interconnect with other systems in the area," Mr. Glover says. Cox is not stopping here. It plans to explore leased channel opportunities in other cities as well.

Much of this diversification comes when some of the Cox newspapers are experiencing problems. The *Miami News'* circulation had sunk to 62,200 at the end of 1983. A number of analysts believe Cox might sell the *Miami News* if an overture were made.

Quite apart from looking at other media, Cox also has entered the personal computer industry. Last year, it purchased a minority interest in the Sunnyvale, Cal.-based Creative Software, which designs an array of software, including those for the self-improvement market.

The company believes that most of its future growth will continue to come from newspapers.

"We're always interested in acquiring newspapers," Mr. Glover says. "We still believe that's the area where we have expertise and we can continue to show growth."

Des Moines Register & Tribune Co.

Revenues	1983	1982
Media......	$88,500,000	$90,700,000
Other.......	—	—
Total.....	$88,500,000	$90,700,000

*Restated

Des Moines Register & Tribune Co., Des Moines, Ia., is the nation's 94th largest media company with 1983 operating revenues of $88.5 million, all in media, down from 1982's $90.7 million.

Total earnings for the privately held company were $5.3 million, compared with a loss of $816,000 the year earlier. The 1983 earnings figure includes $3 million in capital gains from selling media properties.

The earnings improvement is attributed to the company's move two years ago to put its efforts behind the statewide morning and Sunday *Register* by closing the evening *Tribune*, which concentrated on the Des Moines area.

At the same time, the company laid off 200 people. Meanwhile, 15 staff members took early retirement this year as the company reduced fulltime employment to fewer than 800, down from 1,130 three years earlier.

Circulation of the daily *Register* is down slightly from last year. March, 1984, circulation was 238,609, compared with 240,060 in March, 1983, but Sunday circulation is up to 382,745 in March, compared with 378,294 a year earlier.

Register & Tribune Co. this year appointed John Miksich, formerly display ad manager, to be the new circulation director.

In May, the company broke with a new statewide ad campaign featuring testimonials by native Iowans. Such notables as Simon Estes, Ann Landers, University of Iowa and Olympic wrestling coach Dan Gable and George Gallup talk about the newspaper and how it played an important role in their lives.

The ads end with the tag line, "Iowa's best read newspaper." The campaign is part of the company's avowed commitment to statewide sales and distribution. In the fall, it will begin an aggressive sales push that will concentrate on the central Iowa region.

Company execs. are reviewing a two to three-year-old cable co-op venture with Des Moines-based Heritage Communications that involves broadcasting one-minute summaries from the *Register*'s newsroom. The broadcasts, called "Iowa Update," run on Cable News Network during prime time.

Dispatch Printing Co.

Revenues	1983	1982
Media	$140,000,000	$127,200,000
Other	—	—
Total	$140,000,000	$127,200,000

Dispatch Printing Co., a family-owned newspaper and broadcast enterprise in Columbus, O., is the 67th largest media company with 1983 revenues estimated by ADVERTISING AGE at $140 million.

In 1983, the company saw significant growth in Sunday circulation of its major property, the *Columbus Dispatch*, an evening and Sunday product. The company completed some internal reorganization begun in the past several years, and it began to focus attention on thwarting competition for ad revenues in its circulation area, says Richard Franks, vp-operations.

The company's major broadcast operation, WBNS-TV in Columbus, came through the A.C. Nielsen Co. ratings battle in first place in the top 50 markets for its weekday 6 p.m. news program which claimed 48% of the viewing audience.

Dispatch, controlled by the Wolfe family of Columbus, computerized WBNS-TV's news operations this past year.

The station also opened the first of three planned regional "mini-station" bureaus that provide live coverage capabilities, vp-news operations Larry Maisel says.

The past year also brought the *Dispatch* newspaper's editorial product to full speed with a major redesign and enhanced staffing initiated during the previous 2½ years, *Dispatch* managing editor Dick Otte says.

The paper now has an editorial staff of 168, reflecting an increase of about 15 editors and 15 writers in sports, features and news from 1982.

To improve editorial and graphics production capabilities, the newspaper is chucking its 10-year-old, front-end computer system for a more sophisticated one expected to be in place within the next six months, Mr. Otte says.

The massive design update, which features prominent section indexes, front-page promotional leads for inside stories, increased use of color and a no-jump policy on stories, was necessary to remain competitive with the morning newspaper and *USA Today*, Mr. Otte says.

The pervasive presence of *USA Today*, Gannett's national general circulation daily, appears to have been a significant factor in the erosion in daily circulation of the evening *Dispatch*.

ABC figures for March 31, 1984, indicate slight declines for the daily *Dispatch* and its competition on a year-to-year basis. The newspaper's daily circulation dropped by 305, to 206,548, but the Sunday increased 8,086, to 358,289. The morning competition, the *Columbus Citizen-Journal* owned by Scripps-Howard, dropped 592 subscribers, to 121,232. Dispatch Co. handles advertising, circulation and other noneditorial functions for the *Citizen-Journal*.

Despite the erosion of daily circulation, the Sunday *Dispatch* circulation gave the *Dispatch* one of the highest market penetrations in the country.

Mr. Franks attributes the growth to the newspaper's "strong editorial and advertising content." The Sunday paper is "a bulky, powerful product, and we're certainly glad to have it," he says.

In an effort to thwart competition for its advertisers by independent advertising-distribution operations, the *Dispatch* plans to offer advertisers new programs for preprint promotional materials.

The options will include a preprint distribution service in which advertising is mailed out, using a second or third class permit.

"We have competition from companies providing that [shared mail] service and to meet the demand in the marketplace we need to provide as many options as possible for our advertisers," Mr. Franks says.

Dispatch, founded in 1871, was purchased in 1905 by two Wolfe brothers, the grandfather and the great-uncle of current board chairman John Walton Wolfe.

Daily operations are supervised by the elder Wolfe's younger cousin, John F. Wolfe, publisher-president.

The company made no acquisitions in 1983, but sold the non-local portion of its Ads promotional plastic bag company to Scripps-Howard Corp. The company makes the plastic bags used to hang advertising material from door knobs.

Donrey Media Group

Revenues	1983	1982
Media	$169,000,000	$147,400,000
Other	—	—
Total	$169,000,000	$147,400,000

Donrey Media Group, Fort Smith, Ark., is the nation's 56th largest media company with media revenues estimated by ADVERTISING AGE at $169 million in 1983.

Donrey is a privately held company with all of its interests in media operations. An estimated 80% of the revenues come from newspapers—49 dailies and 51 nondailies—serving an aggregate 8 million people.

The company also has 11 outdoor advertising plants, six radio, one tv and five cable companies. The group owns companies in 18 states.

Fred Smith, Donrey's exec vp, characterized 1983 as "a good year for acquisitions and plant improvement projects."

In 1984, the company continues to be acquisition-minded, buying in April the Daily Democrat in Woodland, Cal., with an evening-only circulation of 12,776.

In July, 1983, the company acquired two other dailies—*Columbia Tennessee Herald* with a circulation of 12,953, and the *Alamogordo* (N.M.) Daily News with an evening circulation of 9,083 and a Sunday circulation of 9,937.

Mr. Smith says the company continues to be interested in media acquisitions, particularly in newspapers in the 15,000 to 105,000 circulation range.

At the end of April, 1984, Donrey added a Sunday edition to its *West Hawaii Today*, which had gone from thrice weekly to daily publication in 1982 as an over-all facelift that included a new printing facility. The expanded daily now has a circulation of 8,000, and Mr. Smith expects that number to increase considerably with the Sunday edition.

Donrey continues to be "bullish on cable. We see it as a major force in our operations, and we intend to continue upgrading our plants," Mr. Smith says.

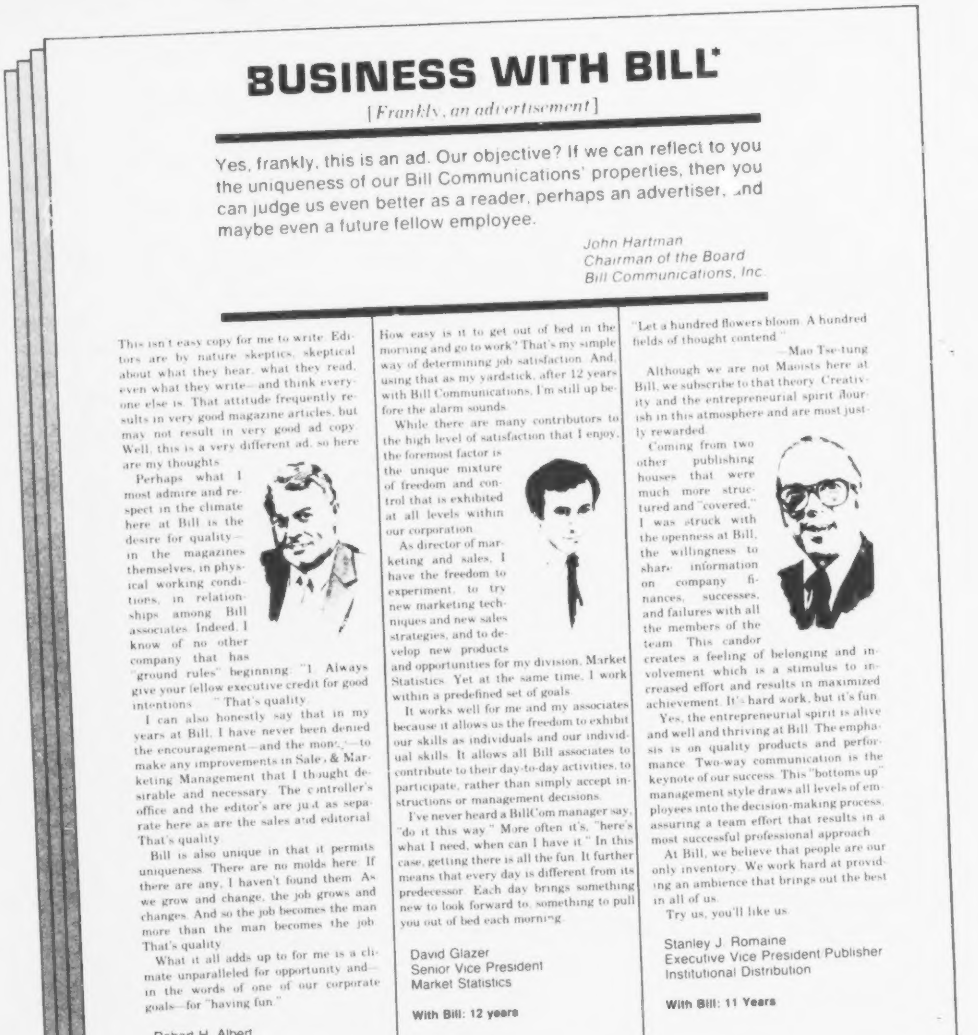
The company used 1983 to advance its cable segment, consolidating its four-cable system operation under Donrey Cablevision, and adding two other systems: Blackwell and Guymon, Okla.

The company owns 100% in all but two systems; they have a 50% share in the Kilgore, Tex., operation and 80% ownership in the Los Angeles based Falcon Communications by the Howard and Donrey Media Group.

At the Bartlesville system, the company continues to experiment with teletext channels that combine alphanumeric information with live and videotape programing.

The company also remains committed to continued growth and to pioneering technology, according to its founder and president, Donald W. Reynolds. The group continues to research a laser platemaker that is now in operation at Donrey's largest news-

'BUSINESS WITH BILL...'
Our usual way of promoting ourselves is like this-



BUSINESS WITH BILL*

[*Frankly, an advertisement*]

Yes, frankly, this is an ad. Our objective? If we can reflect to you the uniqueness of our Bill Communications' properties, then you can judge us even better as a reader, perhaps an advertiser, and maybe even a future fellow employee.

John Hartman
Chairman of the Board
Bill Communications, Inc.

This isn't easy copy for me to write. Editors are by nature skeptics, skeptical about what they hear, what they read, even what they write—and think everyone else is. That attitude frequently results in very good magazine articles, but may not result in very good ad copy. Well, this is a very different ad, so here are my thoughts.

Perhaps what I most admire and respect in the climate here at Bill is the desire for quality—in the magazines themselves, in physical working conditions, in relationships among Bill associates. Indeed, I know of no other company that has "ground rules" beginning: "1. Always give your fellow executive credit for good intentions ..." That's quality.

I can also honestly say that in my years at Bill, I have never been denied the encouragement—and the money—to make any improvements in Sales & Marketing Management that I thought desirable and necessary. The controller's office and the editor's are just as separate here as are the sales and editorial. That's quality.

Bill is also unique in that it permits uniqueness. There are no molds here. If there are any, I haven't found them. As we grow and change, the job grows and changes. And so the job becomes the man more than the man becomes the job. That's quality.

What it all adds up to for me is a climate unparalleled for opportunity and—in the words of one of our corporate goals—for "having fun."

Robert H. Albert
Editor
Sales & Marketing Management

With Bill: 20 Years

How easy is it to get out of bed in the morning and go to work? That's my simple way of determining job satisfaction. And, using that as my yardstick, after 12 years with Bill Communications, I'm still up before the alarm sounds.

While there are many contributors to the high level of satisfaction that I enjoy, the foremost factor is the unique mixture of freedom and control that is exhibited at all levels within our corporation.

As director of marketing and sales, I have the freedom to experiment, to try new marketing techniques and new sales strategies, and to develop new products and opportunities for my division, Market Statistics. Yet at the same time, I work within a predefined set of goals.

It works well for me and my associates because it allows us the freedom to exhibit our skills as individuals and our individual skills. It allows all Bill associates to contribute to their day-to-day activities, to participate, rather than simply accept instructions or management decisions.

I've never heard a BillCom manager say, "do it this way." More often it's, "here's what I need, when can I have it." In this case, getting there is all the fun. It further means that every day is different from its predecessor. Each day brings something new to look forward to, something to pull you out of bed each morning.

David Glazer
Senior Vice President
Market Statistics

With Bill: 12 years

"Let a hundred flowers bloom. A hundred fields of thought contend."

—Mao Tse-tung

Although we are not Maoists here at Bill, we subscribe to that theory. Creativity and the entrepreneurial spirit flourish in this atmosphere and are most justly rewarded.

Coming from two other publishing houses that were much more structured and "covered," I was struck with the openness at Bill, the willingness to share information on company finances, successes, and failures with all the members of the team. This candor creates a feeling of belonging and involvement which is a stimulus to increased effort and results in maximized achievement. It's hard work, but it's fun.

Yes, the entrepreneurial spirit is alive and well and thriving at Bill. The emphasis is on quality products and performance. Two-way communication is the keynote of our success. This "bottoms up" management style draws all levels of employees into the decision-making process, assuring a team effort that results in a most successful professional approach.

At Bill, we believe that people are our only inventory. We work hard at providing an ambience that brings out the best in all of us.

Try us, you'll like us.

Dow Jones & Co.

Revenues	1983	1982
Media	$816,651,000	$682,082,000
Other	49,786,000	48,591,000
Total	$866,437,000	$730,673,000

Dow Jones & Co., New York, is the country's 14th largest media company, with media revenues of $816.7 million in 1983, a 19.7% increase over 1982 media revenues.

Percentage of media revenues out of total revenues of $866.4 million was 94%, the same as the year before.

National publications and news and information services accounted for 79% of total revenues; community newspapers added another 16%, while [illegible] accounted for most of [illegible]. Dow Jones' book publishing [illegible] is not included in ADVERTISING AGE figures.

Net income rose 30%, to $114.2 million, from 1982. This marked the first time in the company's history that earnings passed $100 million.

The *Wall Street Journal*, the company's principal publication, showed a circulation increase of 3.3%, to 2.1 million, larger than the circulation of any other U.S. daily newspaper. Circulation of the *Journal's* overseas editions passed 50,000.

The *Asian Wall Street Journal* showed a profit for the second consecutive year while the *Wall Street Journal/Europe* was gaining steadily.

Ottaway Newspapers, a wholly owned subsidiary publishing 21 community newspapers, showed an operating earnings increase of 18.4% on revenues of $138.5 million, following a 15.3% gain in 1982 on revenues that year of $123.6 million. Circulation of *Barron's*, the company's financial weekly, was up 4%, to 299,500, at the end of 1983, while advertising linage increased 17.3% for the year.

In 1983, the *Journal's* advertising linage increased 8.2%. At yearend, the maximum page capacity was increased to 62 pages from 60 to provide for more news and advertising. Another move affecting editorial was the expansion of the *Journal's* coverage of cultural and leisure activities with a new daily leisure and arts page.

The "Wall Street Journal Report," the company's half-hour, business-news tv program, is aired by 90 stations covering 78% of the nation's tv households.

Ad linage for Ottaway Newspapers Inc. rose slightly after three successive years of declines. Display advertising was down; classified linage was up, and total advertising revenues rose 12.3%. Circulation also showed a slight increase during the year, to an average of 535,100 in the fourth quarter on a weekday basis and to 384,200, up 2.1%, for Sunday newspapers.

Barron's in 1983 streamlined its editorial operation and now offers a carefully packaged mix of corporate profiles, interviews and industry stories. A major increase in newsstand sales contributed to record-breaking circulation in 1983, the sixth consecutive year of gains. Since 1977, *Barron's* circulation has increased 38.5%.

On the international front, the company's newest entry, Journal/Europe, ended 1983 with circulation of 23,000. The *Asian Wall Street Journal* recorded its second straight year of profitable operations, with ad linage up 0.5% and circulation up 9%.

**Leveraged buyout
†Buyer of a 100 Media company

company's increasing profit performance was driven by publishing, which represented $170.2 million, or 64.6% of D&B's total operating income for 1983. Corinthian contributed $49.2 million in operating income, equivalent to 18% of the total.

Corinthian, which had shown a 6% to 7% yearly increase in revenues since 1981, was sold to A.H. Belo Corp. for $606 million, resulting in a $350 million net after-tax gain at D&B in the first quarter of 1984 when the sale was completed.

The sale of the broadcast unit was part of D&B's long-term strategy to redeploy its assets into the mainstream of the business services and information sector. The company promptly turned its investment around in mid-May, buying A.C. Nielsen Co., Northbrook, Ill., for $1.1 billion in stock. D&B had built up further cash reserves through the sale in 1983 of TVS Tv Network and in January, 1984, the divestiture of Funk & Wagnalls encyclopedia and publishing operations. D&B also is negotiating to sell Pembroke Cable Corp.

The acquisition of Nielsen, according to those close to the company, fulfills the desire of top management to make D&B a major marketing-advertising research company, and one with a strong databank orientation.

Nielsen meets all such criteria. In fiscal 1983 ended Aug. 31, 1983, Nielsen had net income of $49.5 million, an increase of 12.2% from the previous year, on revenues of $680.3 million, up 5.7%. Its research-only revenues of $463.6 million in the 12 months ended Nov. 30, 1983, grew 7%, largely because of the company's local market tv panel expansion programs.

The marketing advertising research strength at Nielsen is vested in its tv audience measurement service. Media Research Group, which competes in the meter-based panel systems against Arbitron Ratings Co., a Control Data Corp. subsidiary. Nielsen also is a major factor in product movement at the retail level through its Food Index Services, which competes head-on with Time Inc.'s SAMI service, which monitors grocery product movement at the warehouse level. Its test marketing service—ACN Marketing Research Group USA—competes heavily with rapidly growing BehaviorScan, a subsidiary of Information Resources Inc., Chicago.

In another acquisition, D&B in 1983 acquired McCormack & Dodge, an applications software company that produces proprietary packages for financial users. By internal use of the new acquisitions expertise, the company hopes to share its software-writing capabilities with other D&B divisions.

While the proliferation of personal computers is helping D&B's software business, it has hurt traditional computer service operations that offer time-sharing services to remote subscribers. D&B Computing Services continues to lose revenue, and the company says, "We do not now foresee a reversal of the decline in time-sharing revenue."

Responding to the recent recession's shakeup of the trade and professional publishing industry, D&B has restructured these operations significantly. In June, 1983, it acquired *Industrial Distribution* and *Contractor* magazines; in October, 1983, it acquired two more: *World Mining* and *World Coal*. It combined its October acquisitions with its *Mining Equipment International* to form a new monthly trade journal, *World Mining Equipment*, introduced in November.

Also in 1983, D&B sold *Purchasing World*, citing slow market growth and inadequate market penetration. It launched *Plant Engineering Products*, a tabloid to complement its existing *Plant Engineering*.

Last year also marked the company's major entry into electronic publishing. D&B introduced DunsNet, a private data network that delivers D&B resources to internal divisions and customers. While currently available on a regional basis, the startup service becomes nationwide by the end of this year. Also, the electronic edition of its Official Airline Guide came out last year. In addition to direct hookups, the ever-popular OAG is available through five D&B information networks.

DunsPlus, another internal development in 1983, capitalizes on the explosion of the personal computer market, combining the IBM PC with D&B's software for applications in financial, marketing and planning department of corporate users. Also introduced in 1983 was DunsVoice, a computer-generated voice network, accessed over any telephone. The new service provides subscribers with up-to-date business and credit information from Dun's National Business Information Center.

Revenues	1983	1982
Media	$260,200,000	$244,000,000*
Other	N/A	N/A
Total	N/A	N/A

*Restated

Evening News Assn., Detroit, whose flagship media property is the *Detroit News*, is the nation's 38th largest media company with total media revenues estimated by ADVERTISING AGE at $260.2 million.

The company, whose media revenues for 1982 were revised downward to $244 million to reflect deletion of the commercial printing or the nonmedia portion of Times Graphics Inc. that had been figured into the total, has experienced steady but slow growth in the *Detroit News* as with its other media properties.

The *Detroit News* represents about 70% of the company's total media revenues. It leads in the circulation race against a longtime competitor, the *Detroit Free Press*, a Knight-Ridder Newspapers property.

The *News'* average daily circulation for the six months ended March 31, 1984, was 657,015; its Saturday circulation increased to 628,493, and Sunday, 861,004.

Compared with competitor the *Free Press*, these gains meant leads of 25,928 daily, 52,767 Saturday and 73,704 Sunday. The *Free Press'* daily circulation dropped slightly (0.7%) while its Sunday paper increased 0.9% (compared with the Sunday increase of 0.6% for the *News*).

The *News* has an even higher lead in the city and retail trading zones, an area where a majority of the state's population lives. In the six-county area of southeast Michigan, the *News* has a daily lead of 104,610; 121,431 on Saturday's, and 220,830 on Sundays, according to ABC audited figures. The *News* admits the *Free Press* is strong on newsstands and "out-state."

The market is so competitive that it is one of the few remaining metropolitan areas in the country where the price of a daily newspaper is below 25¢. The *News* undercuts the *Free Press* in this battle with a newsstand price of 15¢ daily and 50¢ Sunday compared with the *Free Press'* 20¢, daily and 50¢ Sunday.

The *News* also offers seven-day home delivery at $1.40 compared with the *Free Press'* $1.65; however the *Free Press* makes up the difference by offering new subscribers a 25 cents per week discount on home delivery. The *News* counters with programs that discount up to 70 cents off its weekly subscription rate.

The *News* is losing some ground to the *Free Press* in advertising. The *Free Press*, which had total advertising revenues of $94.8 million in 1983, reached an all-time high in 1983 of 44.6% share of the linage total of the combined total of the two papers. According to the *Free Press*, this compares with 41.1% in 1982, 39.6% in 1981 and 38.7% in 1980.

While the *News* is believed to be making money, the *Free Press* is not. Knight-Ridder indicates that in recent years the *Free Press* has had operating losses.

Among the broadcast properties, the company's lead station, WDVM-TV in Washington, is locked in a ratings duel with ABC affiliate WJLA-TV, an Allbritton station, for the top spot. Other tv properties include NBC affiliates, WALA-TV in Mobile, Ala., and KTVY, Oklahoma City, both in third place in the ratings; ABC affiliate KVUE-TV in Austin, Tex., No. 2 behind the CBS station, and CBS affiliate KOLD-TV in Tucson, No. 2 behind ABC.

Detroit-based radio station WWJ, an all-news station, has risen to third place in that 40-station market ahead of WJR, the voice of the Detroit Tigers. But James F. Clark, director-corporate communications, says he believes that the baseball season will propel WJR back into third. ENA's WJOI-FM in that market has a "beautiful music" format, the only one in the city.

Circulation rates of ENA-owned publications also remain solid, Mr. Clark says. New Jersey publications and circulations are: Two daily papers, *Vineland Times Journal*, 17,698, and *Millville Daily*, 7,060. New Jersey weekly publications are: *Mainland Journal*, 6,800; *Hammonton News*, 6,212; *Egg Harbor News*, 2,046, and *Atlantic County Record*, 1,386. ENA California newspapers and circulations are *Palm Springs Desert Sun*, 29,355, and *Indio Daily News*, 8,758.

ENA is not looking for any more radio stations, but the search for tv stations is continuing. Top executives still are looking to buy another midsize paper, preferably in a Sunbelt monopoly market.

ENA is considering new cable tv ventures as well as using teletext for news purposes. However, ENA is studying and "looking into" these resources rather than doing anything at the moment.

Forbes Inc.

Revenues	1983	1982
Media	$89,700,000	$72,100,000
Other	22,500,000	16,600,000
Total	$112,200,000	$[illegible],700,[illegible]

Forbes Inc., New York, is the nation's 93rd largest media company with 1983 net revenues of $89.7 million, 80% of total corporate revenues of $112.2 million, a gross figure. Media revenues, almost all from *Forbes* magazine, were up 24.4% from a media contribution of $72.1 million out of total gross revenues of $88.7 million in 1982. (Forbes Inc. would not disclose total net income).

While the vast majority of company revenues and profits are derived from *Forbes*, its holdings include a range of properties, from real estate developments to founder Malcolm Forbes' substantial art collection. In *Forbes'* own annual listing of the nation's wealthiest individuals—the *Forbes 400*—Mr. Forbes is included, but his net worth is not disclosed. Estimates, however, range from $200 million to $300 million.

Forbes, a fortnightly, had another successful year in 1983. According to published audit figures, *Forbes'* advertising pages surged 15.6%, to 3,400 in 1983. At yearend, the magazine's circulation was 719,908, a 1.4% increase over 1982.

Both advertising and circulation revenue gains contributed to the magazine's performance last year. According to Publishers Information Bureau figures, gross revenues from advertising were $84.5 million, up 32% from 1982.

Forbes detailed its own breakdown of net advertising and circulation revenues. In 1983, according to the company, net revenue from advertising was $62 million, up from $47.6 million in 1982. Net circulation revenue was $27.7 million, compared with $24.5 million in 1982, the company said.

In addition to advertising rate increases, ad page gains and higher circulation, *Forbes* gained ground last year because it converted the *Forbes 400* into a separate special issue. The "Rich List" was a hit at the newsstands. The company sold 766,670 issues, making it the best-selling *Forbes* of the year.

April 30, *Forbes* published a second special issue—the annual *Forbes 500* index of the nation's largest companies. Previously, it was included in a regular issue. And this year, because of calendar breaks, *Forbes* will publish an additional regular issue.

A *Forbes* spokesman said the magazine had no plans for additional special issues this year. Moreover, he said, the magazine does not intend to increase its frequency to once-a-week, a move that is rumored periodically.

Mr. Forbes' well-publicized personal exploits have helped to promote the magazine in the past, and this year has been no exception. In February, 1984, he led a hot-air balloon and motorcycle tour of Egypt. He was pictured in national newsmagazines in a hot-air "sphinx" above the Pyramids.

Forbes continues to be an aggressive advertiser in major daily newspapers, magazines and the advertising trade press. Leading National Advertisers, which monitors ad spending for six media, credits Forbes Inc. with spending $1.4 million in advertising, largely on its resort property Sangre de Christo Ranch in Fort Garland, Colo.

To highlight its advertising and circulation gains as well as tweak competitors *Business Week* and *Fortune*, the magazine uses outdoor advertising, too. The magazine's long-running slogan, "*Forbes*: The Capitalist Tool," remains prominent in the ads.

During 1983, there were no major management changes at the publication. Both publisher James Dunn and editor-in-chief James Michaels are well-entrenched in their positions, sources say. Mr. Forbes' son, Malcolm S. Forbes Jr., continues in his position as president of the company.

Freedom Newspapers

Revenues	1983	1982
Media	$224,800,000	$207,700,000
Other	—	—
Total	$224,800,000	$207,700,000

Freedom Newspapers, Santa Ana, Cal., is the country's 45th largest media company, with 1983 revenues estimated by ADVERTISING AGE at $224.8 million, all from media operations. In 1982, media revenues were an estimated $207.7 million.

A privately held company, owned by descendants of the late R.C. Hoiles, Freedom Newspapers is a print-oriented media company, although two tv stations have been its most recent acquisitions.

Freedom in January, 1984, paid $49 million to Dallas-based A.H. Belo Corp. for two tv stations that had been in Belo's stable for several years—WTVC (an ABC affiliate), Chattanooga, Tenn., and KFDM-TV (a CBS affiliate), Beaumont, Tex.

Belo had to divest itself of the stations in order to comply with FCC regulations limiting ownership of tv properties to seven. Belo had picked up six stations sold as a package by Dun & Bradstreet's Corinthian Broadcasting.

The purchase boosted Freedom's number of tv properties to four. Existing tv stations are KTVL, Medford, Ore., and WLNE, New Bedford, Mass./Providence, R.I., the latter acquired in 1983.

Among other properties, growth was evident at the *Register* in Santa Ana, the largest and most rapidly growing of the Freedom properties. It serves affluent Orange County, the suburban area south of Los Angeles. The company also publishes two smaller dailies in this area: *Anaheim Bulletin* and *La Habra-Brea Star Progress*.

Freedom Newspapers owns 30 newspapers, of which the *Colorado Springs Gazette-Telegraph*, with 92,296 combined circulation, is next largest after the *Register*. Some of its newspapers have local partners holding minor interests, but in all cases Freedom Newspapers is majority owner.

Increasing circulation of the *Register* reflects the steady growth of Orange County. As of March 31, 1984, the paper was distributed daily to a high of 279,452, up 8% over the previous reporting period, according to ABC reports. Sunday circulation stood at 311,062, up 7.7%.

The *Register* did much better than the formidable *Los Angeles Times* in its backyard circulation area. According to the Sept. 30, 1983, publisher's statement, the *Register* showed an average daily circulation of 255,638, a gain of 17,759 from the previous year, compared with the *Los Angeles Times*, which posted a total of 161,143 for its Orange County edition, down 5,975 from year-earlier figures.

General advertising linage at the *Register* also has risen a dramatic 49.4% in the past five years, from 3.8 million lines in 1978 to a high of 5.7 million in 1983.

In January, 1984, the newspaper was No. 1 in the nation in color linage. It is fifth nationally in full-run advertising linage and fourth in full-run retail advertising.

Rollout of the *Register's* community editions in early 1983 provided the newspaper with full market coverage. Originally called *Orange County Week*, the section has been reconfigured from a broad sheet to a tabloid and renamed *Register Community Edition.*

The community editions are being sent by second-class mail to nearly 300,000 nonsubscriber households, with zoned advertising and inserts. As of May 1, the rollout had been completed, with 31 community editions blanketing all of the county with local news coverage and zoned advertising capability. Included with each community edition is a broadsheet section, called Section A, which contains articles of general interest from the *Register.*

Each community edition also is inserted into the *Register* on Tuesday of each week, bringing local news to all of the newspaper's subscribers. The combination provides an 83.3% penetration of the market, with a variety of advertising opportunities available, as well as a package that includes the other Freedom newspapers in the county, the Anaheim Bulletin and *La Habra Star Progress.*

Gannett Co.

Revenues	1983	1982
Media	$1.671 bil.	$1.493 bil.
Other	33,000,000	27,000,000
Total	$1.704 bil.	$1.520 bil.

Gannett Co., Rochester, N.Y., is the sixth largest U.S. media company, with media revenues of $1.67 billion in 1983, or 98.1% of total revenues of $1.7 billion. Newspapers accounted for about 76% of the total revenue, outdoor advertising 11.5% and broadcasting 11%, about the same percentages as in 1983.

Media revenues were up 10% from $1.49 billion in 1982 when total revenues were $1.52 billion. Total earnings rose to $191.6 million from $180.5 million in 1982, an increase of 5%, the same percentage gain as in the previous year.

The company reported that first-quarter 1984 earnings were $34.8 million, a 7% increase over the first quarter of 1983.

As was the case a year earlier, Gannett's national newspaper, *USA Today,* attracted heavy media attention. The daily, which debuted in September, 1982, is now available to 70% of the U.S. population, according to the company, which also said its circulation was 1.328 million at yearend. The long-awaited first audit on *USA Today* from the Audit Bureau of Circulations was to be released this month.

Early in 1984, Gannett announced the formation of an international task force to explore the possible printing and distribution of *USA Today* in Europe and the Far East.

Gannett chairman Allen H. Neuharth reported that 1984 would be the year for advertising at *USA Today.* Plans are to double the paper's color capacity from eight to 16 pages daily in July and expand the total page capacity from 40 to 48 pages. "Advertising is 11% to 12% short of goal," Mr. Neuharth said in April, and he termed this "well within the tolerance factor."

During 1983, new executives were installed both at *USA Today* and on the corporate level.

John J. Curley, president of Gannett's newspaper division and former editor of *USA Today,* was named president-chief operating officer of Gannett. Douglas H. McCorkindale, exec vp-chief legal officer, was appointed vice-chairman-chief financial officer. William J. Keating, president of the Gannett Central Newspaper Group and publisher of the *Cincinnati Enquirer,* was named president of the newspaper division.

Mr. Neuharth called these promotions "another step in the orderly and effective transition to younger top management." Mr. Neuharth, 60, has an employment contract that runs to 1989.

Cathleen Black continued her rapid rise in the company, being named publisher of *USA Today* this month. She replaces John E. Heselden, who previously announced he would retire next April, when he reaches 65. Mr. Heselden continues as deputy chairman of Gannett.

Ms. Black had been named president of *USA Today* in 1983, when Vincent E. Spezzano was appointed corporate senior vp-communications. Mr. Spezzano also heads Gannett's international task force.Replacing Ms. Black as president of *USA Today* is Paul B. Flynn, former executive vp of the paper and also former president of Gannett/Southeast Newspaper Group and president and publisher of the *Fort Myers News-Press.*Thomas J. Farrell, assistant treasurer of Gannett, was named executive vp-business manager of *USA Today,* a new position.

During 1983, John C. Quinn, Gannett's chief news executive and president of Gannett News Service, was named exec vp-chief news executive-editor of *USA Today.*

Other developments within the company include the start of construction of an offset printing plant in Chandler, Ariz., and the beginning of "USA Today of the Air," a daily radio feature series developed jointly with Mutual Broadcasting.

In January, Gannett's *Observer-Dispatch* in Utica, N.Y., distributed the first newspaper to contain pages printed with plates engraved electronically from the output of newsroom and advertising computers.

Gannett sold the *Oakland Tribune* to *Tribune* publisher Robert Maynard and a group of investors, and it terminated discussions with Chronicle Broadcasting to acquire KRON-TV in San Francisco. Gannett also sold KARK-TV, Little Rock, Ark.; WLKY-TV, Louisville; WPTA-TV, Fort Wayne, Ind., and the screen printing company Romo, Green Bay, Wis.

Gannett acquired WTCN-TV, Minneapolis-St. Paul, from Metromedia and WLVI-TV, Boston, from Field Communications. It also announced an agreement to acquire WDAE-AM in Tampa-St. Petersburg from Taft Broadcasting.

In April 1984, Gannett changed the call letters of KBTV in Denver to KUSA.

General Electric

Revenues	1983	1982
Media	$94,000,000	$175,000,000
Other	26.703 bil.	26.325 bil.
Total	$26.797 bil.	$26.500 bil.

General Electric, Fairfield, Conn., is the country's 78th largest media company, with 1983 revenues from media properties of $94 million, a 46.3% decline in media revenues of $175 million in 1983.

Media, which accounts for less than 0.4% of total revenue at GE, got the axe as GE divested itself of all of its tv properties but one and eight radio units.

GE had total revenues in 1983 of $26.8 billion, a 1.1% increase over the previous year. Net earnings were $2.02 billion, an 11.4% increase from 1982.

Revenues from continuing media operations in 1983 were derived from two sources—General Electric Cablevision, with revenues of $65 million, and General Electric Broadcasting Co., with revenues of $29 million, after the sale of 10 broadcast outlets.

GE during 1983 sold all but one of its broadcasting properties, KCNC (TV) in Denver, Colo., which the company said it is retaining because of the growth potential in the Denver broadcasting market.

The company sold two tv stations and eight radio stations for an estimated $115.5 million, which GE said resulted in a pre-tax gain of $81 million.

WNGE-TV in Nashville, an ABC affiliate, was sold to Knight-Ridder Broadcasting for $37 million; WRGB-TV, a CBS affiliate in Albany, N.Y., was sold to Universal Communications Corp., a company formed by former CBS president John D. Backe, for $35 million.

A.H. Belo Corp. paid $22 million for KOA(am) and KOAQ(fm) in Denver; Sky Communications paid $13 million for WSIX (am, fm) in Nashville and WGY(am) and WGFM in Schenectady, N.Y., and Susquehanna Broadcasting Co. paid $4.5 million for KFOG-FM in San Francisco.

RCA Corp. bought WJIB(fm) in Boston for an undisclosed sum. Industry observers estimated the station's sale price at between $3 million and $4 million.

GE had attempted to spin off its properties once before when it entered into bidding for Cox Broadcasting of Atlanta in 1979, but the deal fell through.

General Electric Cablevision, based in Schenectady, had 326,700 basic subscribers and 205,000 pay subscribers at the end of 1983, says Sal Belanger, vp-general manager.

The number of basic subscribers increased 6%, and pay subscribers increased 2.5% from the year earlier.

GE Cablevision is the 20th largest multiple cable system operator, with 12 systems in six states. GE systems are among the largest in Indiana, Michigan and Illinois, where they control at least 8% of the market in each state.

Despite industry speculation that GE has been seeking to acquire additional cable systems, the company made no acquisitions in 1983 and the first quarter of 1984. Mr. Belanger says GE continues to explore possible acquisitions, but says no deals are imminent this year.

GE chairman John F. Welch, in his annual message to shareholders, said GE improved its cash position during 1983 through the sale of a number of subsidiaries. He said the money will be used for acquisitions and to exploit existing business activities. GE's cash situation was improved further in March by the sale of its small appliance business to Black & Decker Mfg. Co. for $300 million.

Golden West Television

Revenues	1983	1982
Media	$140,000,000	$125,000,000
Other	—	—
Total	N/A	N/A

Golden West Television, Los Angeles, is the 68th largest U.S. media company in 1983 with media revenues estimated by ADVERTISING AGE of $140 million, virtually all from tv station KTLA in Los Angeles.

The station had estimated revenues of $125 million in 1982 when it was under the ownership of former movie cowboy star Gene Autry and Signal Cos. of La Jolla, Cal., the engineering and electronics conglomerate that also owns Mack Trucks.

In an acquisition involving a leveraged buyout, Mr. Autry bought Signal's 49.9% interest in Golden West Broadcasters (the name of the company then) for $225 million and then sold KTLA for $245 million to a corporation formed by Kohlberg Kravis Roberts & Co., the New York-based private investment banking company. Mr. Autry held on to seven radio properties but since has begun to sell them.

The price paid for KTLA exceeded the previous record of $220 million paid in 1982 for WCVB-TV in Boston. (In 1984, A.H. Belo Corp. topped this when it paid $342 million for KHOU-TV in Houston as part of a deal in which Belo put down $600 million to buy Corinthian Broadcast properties from Dun & Bradstreet.)

KTLA is the largest independent station in the Los Angeles tv market. It is worth more than $600 million in ad revenue from local and national spot buys, not counting network buys, according to AD AGE sources.

Under the leveraged buyout, Anthony Cassara, then president of Golden West Broadcasters tv division, became president and part owner of Golden West Television Inc.

Mr. Cassara gained additional responsibilities early in 1984 when he was named president, Wometco Broadcasting Co., a new company made up of the former tv properties of Miami-based Wometco Enterprises. The tv properties were purchased in a leveraged buyout by Kolberg Kravis Roberts. Estimated revenues of the tv properties for 1984 are $100 million.

In the Wometco deal, Kohlberg, Kravis Roberts acquired six tv stations to add to KTLA.

In addition to the radio properties, Mr. Autry's Golden West Broadcasters retained ownership of KTLA's studios in downtown Los Angeles and the California Angels professional baseball team.

Kohlberg Kravis Roberts also obtained in the buyout Golden West Productions, Golden West Subscription TV of Dallas and Golden West Videotape and Golden West Television Distribution, all relatively minor contributors to revenues.

Concerning the latter property, Mr. Cassara has noted that Golden West plans to step up its syndication activity.

H&C Communications

Revenues*	1983	1982
Media*	$90,000,000	$80,500,000
Other	—	—
Total	$90,000,000	$80,500,000

*Both years reflect only broadcast revenues.

H&C Communications, Houston, despite selling its leading media property, the *Houston Post*, to the Toronto Sun Co. in 1983, still was the nation's 92nd largest media company with revenues estimated by Advertising Age at $90 million, all in media.

That is a 12% increase over 1982's broadcast property revenues.

A private holding company owned by Houston's Hobby and Catto family interests, H&C is cash rich with $100 million from the sale of the *Post*. It is in the process of converting those proceeds into the acquisition of additional broadcast properties.

H&C is one of several suitors bidding for the tv properties of Orlando, Fla.-based Cowles Communications. Publicly owned Cowles owns the NBC affiliate, WESH, in Daytona-Orlando Beach, and the CBS affiliate in Des Moines, Ia., KCCI.

The Cowles properties, which are being sold through Goldman Sachs & Co., are valued at about $135 million. Jointly they generated earnings of $4.5 million on revenues of $24.1 million in 1983, with WESH the larger contributor.

Should H&C purchase both Cowles properties, it would have to realign its existing properties or spin off one of the new acquisitions, says Harold Crump, president of the broadcast unit. H&C already has four vhf stations—the FCC maximum is five—with WTOK, the ABC affiliate in Meridian, Miss., the only station not in a major market.

Mr. Crump suggested a sale of WTOK might be a possibility, although reluctantly so "because it's the only vhf in the market."

"We're the kind of company that buys a property and holds it," says Jim Crowther, president of the holding company. "It would be more than likely a tossup between Des Moines and Meridian. We obviously are not buying the Daytona-Orlando property to sell it."

H&C owns KPRC, the NBC affiliate in Houston that ranks second in several time slots and third in prime time in that market. The company is hoping a 2,000-ft. tower to be in operation in late summer will increase the density of its signal and improve its marketability, which has been a problem because of its low band. The Cowles station in Daytona-Orlando recently increased the height of its antenna and got better coverage as a result, Mr. Crump says.

H&C's other properties include KVOA, the NBC affiliate and No. 1 station in Tucson, and WTVF, the CBS affiliate and No. 1 station in Nashville.

Another official at H&C says the company does not intend to return to newspapers. "We fell out of love with newspapers, and I guess you'd say that leaves us in the market for more broadcast." Under regulations governing media crossownership in the same market, H&C can defer taxes up to 18 months on capital gains resulting from the sale of a major media property. If the proceeds can be turned over into other investments within that period, the company can accrue various tax benefits. "That is our intent," says Mr. Crump.

H&C has one other broadcast property—KPRC (am, fm) in Houston, its lone radio property—and owns the *Washington Journalism Review*. This spring, Crain Communications and H&C have entered into a joint venture to publish the *WJR*. Crain will provide advertising, circulation and some editorial support.

Jessica Catto, the daughter of Oveta Culp Hobby and a sister to Texas Gov. William P. Hobby, is publisher of the *WJR* and a board member of H&C. Gov. Hobby is chairman of the board, and Mrs. Catto's husband, Henry, is board vice-chairman.

Harcourt Brace Jovanovich

Revenues	1983	1982
Media	$101,200,000	$98,900,000*
Other	547,600,000	476,400,000
Total	$648,800,000	$575,300,000

*Restated

Harcourt Brace Jovanovich, New York, is the country's 87th largest media company, with media revenues estimated by Advertising Age at $101.2 million in 1983, or 15.6% of total revenues of $648.8 million.

In 1982, media revenues were estimated at $98.9 million (restated), or 17.2% of total revenues.

Media properties are part of the HBJ Communications and Services unit and include magazines and broadcasting. For the purpose of this analysis, other businesses in that HBJ division—insurance, book clubs and management consulting—do not qualify as media.

The company has two other operating units: HBJ Publishers (books, academic journals and instruction courses divided into two subgroups—elementary and secondary education, and university and professional education) and Sea World Enterprises (marine parks, food processing and services and land development).

HBJ Inc., which decentralized its operations from New York the last quarter of 1982, says it derived savings from its relocation move and attendant reorganization that contributed to 1983 earnings of $27.5 million—highest in the company history—on revenues of $648.8 million, a 12.8% increase over 1982. Company management now operates out of Orlando, San Diego, Cleveland and New York.

The 1983 results contrast strongly with 1982, in which net income plummeted 86% to $3.3 million from $23.8 million in 1981, as revenues rose some 6.7%. The 1982 figures, however, reflect a pretax charge for the expenses incurred in relocating company offices.

As for HBJ Communications and Services division, revenues increased $5 million, or 4.4%. Revenues from business magazines were $3.9 million higher, owing to increases in advertising pages sold, up 7.3%, in addition to a rise in ad rates, up 7.%. According to HBJ, all units of the division reported improved operating income. For their part, business publications enjoyed a $2.9 million increase in profits on higher revenues. Farm periodicals also showed improved operating income because of lower production and operating costs following the reorganization of publishing activities and the administrative separation of magazine publishing from rural insurance sales.

In nonmedia activity, elementary and secondary education division revenues increased $45.1 million, or 27%. School textbook sales vaulted $37.3 million, or 46.3%, most notably in the elementary market. Operating income from the elementary and secondary education division increased $11.5 million, predominantly from higher sales of school textbooks and somewhat from test publishing, which saved administrative costs by relocating in Cleveland.

Analysts applaud the cost-cutting results engendered by the corporate relocation, which when announced had more than a few skeptics, who feared that the company would have trouble attracting top talent to its new headquarter cities.

Analysts also believe that the next

EVERY DAY, THE NEWSPAPERS PUBLISH ALL OF YOUR COMPETITION'S LITTLE SECRETS.

Newspaper ads can tell you a lot about your competition that they'd rather you didn't know.

Like how big their budgets really are.

Or where they're test-marketing their new products.

And which existing brands are experimenting with major strategy shifts.

It's all there, if you read between the linage. And that's exactly what the ACB Market Intelligence Tracking System, *Mintsystem* for short, does for you.

Every day, we monitor the advertising placed in every daily and Sunday newspaper in America—all 1,760 of them. Plus hundreds of major weeklies.

And after looking at all that advertising in all those papers, we're able to discover quite a few interesting facts.

Facts that are next to impossible to get with any other single kind of research service.

Facts about everybody who uses newspaper advertising to sell any product or any brand, anywhere in this country.

So if you want to know more about your competition, you'll want to know more about *Mintsystem*.

Call us toll-free at 1-800-847-4600. (In New York, call 212/685-7300.) We'll be happy to send you a sample report.

decade holds promise for HBJ in terms of sheer demographics. The baby boom generation now is having children, whom HBJ can help to educate through its extensive schoolbook operations.

Indeed, the operating profit for the school department (books for grades kindergarten through 12) jumped 155%, increased 91% for HBJ Publications (business periodicals), and rose 45% for the college department (textbooks).

Among the top magazine performers during 1983, *Physician's Management* reported a 37% increase in ad pages, *Communications News* 34% and *Modern Medicine* 26%.

In addition to gains posted by existing magazines, earlier this year, HBJ purchased two companies with business magazines in new fields, Industry Media Inc.—which HBJ now is operating with the title of Resin Publications—and Davies Publications.

The acquisitions added nine new titles to the company's magazine roster. They include, under Resin, *Machine & Equipment, Machine & Equipment Postcards, Plastics Compounding, Plastics Compounding Postcards, Plastics Compounding Redbook* and *Plastic Design Forum*. From Davies Publications, the company obtained *Meat Processing, Meat Processing International* and *Telefood*.

The finishing touches will be put on the company's relocation efforts in Orlando in 1984. Currently, HBJ has placed in Orlando its major corporate offices, house counsel, contracts and copyright, real property management, data processing and general accounting. Upon completion of a new headquarters building there, HBJ will move into the building its school department, Academic Press (scientific books), Grune & Stratton (medical books), HBJ Insurance (as consolidated) and Beckley-Cardy (sale of school and office supplies and equipment), the latter of which has been placed under the umbrella of HBJ Communications and Services.

Harte-Hanks Communications

Revenues	1983	1982
Media	$332,100,000	$308,700,000*
Other	111,500,000	85,700,000
Total	$443,600,000	$394,400,000

*Restated

Harte-Hanks Communications, San Antonio, Tex., the 28th largest media company with media revenues of $332.1 million in 1983, is preparing for major changes as a team of shareholders continues its efforts to take the company private in a leveraged buyout.

The company showed an increase of 7.6% in its media contribution over 1982, but media dropped as a percentage of total revenues from 78.3% in 1982 to 74.9% in 1983. The company's media revenue sources include newspapers (dailies, nondailies and shoppers), 71.9% of total media revenues in 1983; tv, 16.1%; radio, 9.3%, and cable 2.7%.

Harte-Hanks generates other revenues from direct marketing and commercial printing that are not considered media in this issue.

Total operating revenues for Harte-Hanks, which is also the nation's largest direct mass mailer, increased 12% in 1983, to $443.6 million. Total earnings jumped 22%, to $33.3 million.

Late in March, the company, which has grown from a string of Texas newspapers in 1970, announced its plans for a leveraged buyout. The deal, estimated to be worth as much as $750 million, would place about 55% of stock in the hands of the Harte and Hanks families, with the remainder going largely to company officers.

There has been speculation that the move to go private was fueled in part by investor uncertainty in the company's direct marketing operations, a depressed stock price and a fear of hostile takeover attempts.

The company long has been thought of as a well-managed newspaper company, with a sharper eye on its bottom line than many similar companies. In fact, in a performance analysis by Veronis, Suhler & Associates, an investment banker, the company ranks among the top five publicly held companies in newspaper operations, and in the top 10 of broadcasting operations.

Its extensive investments in its Harte-Hanks Direct Marketing segment has given the company a large network of delivery systems for advertisers. Currently, it can reach 52 million people in 98% of the U.S. through those operations. The division contributed $139.5 million in revenues in

1983, a 16% jump from 1982.

The company also registered an 8% gain to $181.3 million in operating revenues for its newspaper division in 1983. Operating revenues in the radio group grew 16%, to $30.9 million, and in the tv group, operating revenues climbed 12%, to $53.5 million.

Newspaper operating revenues, representing 46% of the company's total operating revenues, were up largely as a result of a 28.1% increase in total inserts distributed. Total ad linage dropped 2.5%.

Circulation revenues dropped for the second year in a row.

In response to the soft economy of recent years, which hit Harte-Hanks hard because many of its holdings are concentrated in oil-dependent Texas, the company has unloaded marginal operations.

It sold the *San Francisco Progress*, the *Walton Tribune*, Monroe, Ga., and in 1984, the *Gloucester County Times*, Woodbury, N.J. Early in 1984 Harte-Hanks purchased a free distribution weekly paper in Tampa, Fla., the *Neighbor*, from Morris Communications Corp.

In radio, the company has said it will concentrate its resources in markets where it owns am/fm combinations.

Consequently, stations in Memphis and Portland, Ore., were jettisoned. Its final stand-alone station, in Birmingham, Ala., remains unsold.

Like many media companies, Harte-Hanks is hoping that 1984—with its presidential election and the Olympics—will increase advertiser spending.

Significant personnel moves in 1983 include the appointment of Tucker Sutherland to president, newspaper operations and corporate senior vp, replacing Richard Schlosberg III, who left San Antonio to head the *Denver Post* as publisher.

Four new group presidents were added in 1984—James Hopson, Frank Puckett Jr., Stephen Sullivan and John Williams.

The four new group presidents also were given the titles of corporate vps as part of a reorganization of the newspaper group.

Hearst Corp.

Revenues	1983	1982
Media	$1.116 bil.	$1.030 bil.*
Other	N/A	N/A
Total	N/A	N/A

*Restated

Hearst Corp., New York, is the tenth largest U.S. media company with 1983 media operating revenues estimated by Advertising Age at $1.116 billion. Media revenues at the privately owned company represented an increase of 8.4% over estimated revenues of $1.030 billion (restated) in 1982.

Hearst, founded by newspaper magnate William Randolph Hearst Sr., bills itself as the foremost monthly magazine publisher in the nation and continues to expand on all media fronts. During 1983, Hearst magazines saw substantial growth in advertising revenue, ad pages and circulation.

In the U.S., the company distributed more than 273 million copies of its 12 monthlies, one every-other-monthly and numerous special publications. Ad pages increased 5.7%, to 16,211, with the growth rate increasing in the last quarter. Total advertising for the 12 monthlies was up an estimated 10%.

Redbook, acquired in 1982, recorded impressive single copy circulation gains in its first full year of operation under Hearst ownership, reaching almost 4 million. Ad pages were up 5%, reversing several years of decline.

It was also the first full year in which *Country Living* was published as a monthly, to become one of the most successful startups in Hearst's history. Circulation was at an all-time high of 1 million and 1983 ad pages totaled a record 635.

The magazine division's "Corporate Buy" program in 1983 evolved into "Power Packages," an ad marketing program that enables advertisers to combine use of a group of magazines to achieve high penetration of key demographic markets at more economical rates. One of three Hearst "Power Packages" is "Woman Power," consisting of *Cosmopolitan, Good Housekeeping* and *Redbook*. The year also saw the unveiling of *House Beautiful's First Home*, a 64-page magazine that began publishing this month.

After two years of recession, the general upswing in the national economy had a positive effect on Hearst operations, particularly in newspapers, where an improved climate for advertising resulted in steady gains in retail and classified ad volume.

Total circulation at the company's 14 daily newspapers remained at slightly more than 1 million and circulation at its eight Sunday papers neared the 2 million mark. Circulation figures for Hearst's nondaily newspapers totaled another 400,000 per week during 1983.

Aggressive growth is at the heart of the major comeback taking place at some Hearst newspapers. The company has added seven daily and 30 weekly papers in the past four years, including a new daily sports product, *Sportsfirst*. Launched in 1983 at the *Baltimore News American*, the publication reportedly has received good

market acceptance. *Sportsfirst* has a magazine format, heavy emphasis on local Baltimore teams and a late deadline, which allows final scores on the West Coast to be included.

The *San Francisco Examiner* introduced a completely redesigned Sunday magazine. Circulation was up 1.5% to 706,150 for the combined *Examiner & Chronicle* Sunday paper in the March 31, 1984, ABC reports, but the evening *Examiner* dropped 0.7% to 152,321. Ad linage at the paper, particularly classified, began to grow again and new growth opportunities were expected with the added capacity provided by the new $36 million East Bay satellite printing plant.

In Los Angeles, circulation at the *Herald Examiner* declined 10.9% for the evening paper to 236,660, and 25.5% for the Sunday product to 219,900, according to the ABC March 31 report. The paper launched a weekly "Las Vegas" magazine, which is being circulated in the Sunday paper and through the network of Hearst's weekly newspapers in Southern California. At the same time, the newspaper continues to explore new editorial approaches to make it more competitive with its rival, the *Los Angeles Times*. Two such experiments were a redesigned Sunday prototype and a Spanish-language newspaper, the latter designed for high-density Hispanic areas in eastern and central Los Angeles.

Neither of the Los Angeles projects proceeded further than the testing stage. The exit of Buddy Hayden as president-ceo, *Herald Examiner*, came after a Hearst Corp. decision not to proceed with the redesigned Sunday edition.

Despite unfavorable economic conditions in some markets, four of Hearst's five vhf tv stations and its four am radio stations maintained the lead in their respective markets. The broadcast group also added a new unit, Hearst Broadcasting Productions, which in partnership with King Features Entertainment, is developing original programing for Hearst tv stations that can also be syndicated to other stations.

In cable communications, Hearst/-ABC Video Services, a joint venture of Hearst and ABC, continued to pursue opportunities in the advertiser-supported cable tv satellite network business.

However, two networks developed by the venture, ARTS and Daytime, made significant changes in their operations in recent months.

The Entertainment Channel, a joint venture of RCA Corp. and Rockefeller Center, folded in March, 1983, after less than a year of operation. It joined with Hearst's ARTS to become an advertiser and cable system-supported service in February, 1984. The new service is known as the ARTS & Entertainment Network. ABC Video Enterprises and RCA Cable each own one-third of the cable network.

At the end of November, 1983, an agreement was reached to merge Daytime with the Cable Health Network. The new 24-hour service started in February, 1984, and is called Lifetime. It is operated by Hearst/ABC Viacom Entertainment Services, a joint venture of Hearst/ABC Video Service and Viacom's Cable Health Network. It features programs on personal health, fitness, current trends and life style.

Hearst Cablevision of California now has four systems (Santa Clara, Los Gatos, Milpitas and Newark, Cal.) and serves about 28,000 subscribers.

With other Hearst groups, the cable communications group is developing a corporate strategy for the emerging electronic publishing field. The group also continues to study acquisition candidates and is pursuing systems that meet the company's acquisition standards.

Houston Chronicle Publishing Co.

Revenues	1983	1982
Media	$186,200,000	$167,900,000
Other	— —	— —
Total	$186,200,000	$167,900,000

Houston Chronicle Publishing Co., Houston, is the nation's 51st largest media company, with 1983 revenues estimated by Advertising Age at $186.2 million, all from the company's sole media property, the *Houston Chronicle*.

The company had estimated media revenues of $167.9 million in 1982.

The *Chronicle* continued its record as the nation's leader in classified ad linage for the sixth year in a row, and as the nation's second largest in total ad linage for the third year, second only to the *Los Angeles Times*.

The all-day newspaper strengthened its leadership in 1983, and in the first four months of 1984 increased classified ad linage by 16.5% over the first four months of 1983, despite the continued depression of Houston's economy.

Chronicle classifieds are promoted constantly in radio and r.o.p. ads and in some tv spots, but no discounting or promotional programs are used by the *Chronicle* unless it is forced to by competition, *Chronicle* officials say.

The *Chronicle* has continued its all-day strategy, emphasizing to prospective subscribers that they have a choice of morning or evening delivery. During the months that the paper's morning competitor, the *Houston Post*, was in negotiations to be sold, the *Chronicle* took advantage of the *Post's* relatively quiet time to promote and further position itself as *the* source of information in Houston.

In mid-1983, the *Chronicle* was expected to add a satellite printing and distribution center on a 21-acre tract west of Houston where the city's growth is strong.

That development was postponed when the *Chronicle* purchased the former *Post* downtown printing plant from Hobby-Catto Interests Inc., which had leased the facility to the *Post* until new presses could be installed at *Post* headquarters. The *Chronicle* will take over the plant in June, 1985.

In January, 1984, the *Chronicle* began to change its graphics, reorganize some areas and strengthen local coverage. The newspaper had made some graphic changes when *USA Today* entered the market during the year, but the 1984 shift was more extensive and coordinated.

Parade terminated its contract with the *Post* after Toronto Sun acquired the *Post*, and the *Chronicle* quickly picked up *Parade*. During the summer of 1984, *Parade* is testing distribution of the magazine in the *Chronicle* with the newspaper's own Sunday magazine tucked into *Parade* and presented as a single package.

In the fall of 1983, the *Chronicle* tested street sales in Dallas with about 75 racks placed in the city's downtown area. But the *Chronicle* withdrew the news racks before the end of 1983.

The newspaper's 5,000 racks in Houston were given a bold new design featuring a white background and super graphic decals wrapped around the racks, with a red accent. The design was created to position the *Chronicle* more effectively against the colorful point-of-sale display of *USA Today*, the *Chronicle* said.

Howard Publications

Revenues	1983	1982
Media	$150,000,000	$139,500,000
Other	— —	— —
Total	$150,000,000	$139,500,000

Howard Publications, Oceanside, Cal., is the 62nd largest media company in the U.S. All the company's 1983 revenues, estimated by Advertising Age to be $150 million, were from media holdings.

Howard derives its media from 19 daily newspapers, the CBS-TV affiliate in Buffalo, N.Y., and cable tv systems in California and Wyoming.

The privately held company's founder and owner, Robert S. Howard, indicates that advertising linage for his 19 dailies increased "very moderately" in 1983, after a "flat" performance the year before. Mr. Howard also says over-all newspaper circulation was up about 1% last year, when the total was 460,000.

The company's *Cedar Falls Record* has been merged with the *Waterloo Courier* in Iowa to create an afternoon and Sunday paper with a daily circulation of about 59,000. Howard purchased both papers early in 1983; the *Cedar Falls Record* had been the smallest of Howard's properties, with a premerger morning circulation of about 4,500. Howard's largest newspaper is the *Hammond* (Ind.) *Times*, with a daily circulation reported by the company at about 72,000 daily and 78,000 on Sunday.

Last year, the company expanded in cable tv. It added more than a half-dozen new franchises to its California properties. The subscriber total for Los Angeles-based Falcon Communications has more than doubled since mid-1983, to 71,000, according to Mr. Howard. Falcon is 80% owned by Howard and Donrey Media Group, Fort Smith, Ark. Newest franchises are Pasadena, Montebello, Monterey Park, Temple City, San Gabriel, West Covina, Norco, Walnut, Riverside and some areas of Los Angeles County.

Mr. Howard says no new additions are in the works. The company is concentrating on building up the current systems, which will take another year and a half. Howard and Donrey also own Overthrust Cable TV in Evanston, Wyo.

Mr. Howard says several of the company's cable operations are beginning to carry advertising "to a modest degree." While he says he believes that this is a growth area to pursue, he says nobody knows what the real potential of advertising on cable will be.

In the broadcast area, Howard's sole property is WIVB-TV, Buffalo, the No. 2 station in its market. The station's earnings have risen steadily since Howard purchased it in 1977, the company says.

International Data Group

Revenues	1983	1982
Media	$85,000,000	$49,000,000
Other	25,000,000	15,000,000
Total	$110,00,000	$64,000,000

International Data Group, Framingham, Mass., is the 97th largest U.S. media company with 1983 media revenues of $85 million, or 77.3% of $110 million total revenues recorded by this computer information company, which has grown like the computer industry it serves.

IDG media revenues increased 73% from the previous year. Total revenues soared 69% above 1982 totals.

IDG is a holding company with two subsidiaries, Interdata Corp. and CW Communications. Interdata is devoted to market research in the computer field, and CW Communications to the publishing of periodicals in the computer field.

IDG's large gains are attributed to three factors: The startup of *PC World* magazine, acquisition of the Wayne Green Group of publications, and growth of *Computerworld*, according to Jack Edmonston, IDG's group vp-communications services.

Company growth to date is only the beginning, Walter Boyd, publisher CW Communications, says of IDG, which entered the publishing business in 1967 as a kind of last-minute hip shot:

"Over-all, for the past two years our volume of business has doubled each year. IDG plans to be a billion-dollar company by 1990. To do that we will have to grow 40% each year from now until then, and I see every possibility that we will do so."

This growth is aimed at specific goals, strictly in IDG's proven field of activity—information processing. "We don't intend to become a McGraw-Hill, with publications in many different fields," Mr. Boyd says.

CW Communications has more than 400 editors and reporters producing more than 50 tabloids and magazines with combined monthly readership exceeding 9 million.

Of these publications, 15 are U.S.-based, published in four separate groups: CWC/I, Framingham, Mass.; CWC/I, Peterborough, N.H.; PC World Communications Inc., San Francisco, and Popular Computing Inc., Menlo Park, Cal.

Also, there are nearly 40 international publications in 17 countries organized into four groups: Northern Europe, Southern Europe, Central and South America and the Pacific.

At CWC/I, Framingham, is the company's leading publication, *Computerworld*, a weekly with total ad revenues of $42.8 million, an increase of 50% from 1982. The flagship publication established in 1967, is tabloid in format and has all-paid circulation exceeding 122,000 (CWC/I claims total readership of nearly 600,000).

The Framingham arm also publishes three related *Computerworld* publications, each with 115,000 circulation: Semi-annual *Computerworld Office Automation*, every-other-monthly Computerworld on Communications and every-other-monthly *Computerworld Buyer's Guide*.

CW Communications took a major step toward its development goals in July, 1983, when it purchased Wayne Green Publications Group, based in Peterborough, N.H. Under publisher Wayne Green, the southern New Hampshire company had established a number of microcomputer-user publications.

The group, newly named CWC/I, Peterborough, publishes mainly machine-specific publications. These magazines and their paid circulations are:

- *80 Micro* for Tandy Radio Shack TRS-80 users, 145,000 copies, with ad revenues climbing from $4.45 million to $5.7 million in 1983.
- *Hot Coco*, a paid monthly for users of the TRS-80 Color Computer, had 1983 revenues (seven issues) of $400,000. Its circulation of 145,000 was 190% ahead of 1983.
- *inCider*, more than 125,000 paid monthly circulation, edited for users of Apple computers and equipment compatible with Apples—a new magazine with 1983 ad revenue of $3.5 million.
- *Run*, for Commodore 64 and Vic 20 users, has circulation of 146,000 paid monthly.
- *jr*, an IBM PC*jr* magazine, which premiered in May with projected 100,000 monthly paid circulation.

CWC/I Peterborough also includes more general and less successful fare. *Microcomputing*, for the computer user with advanced skills, circulates more than 100,000 paid copies monthly. Ad revenues for 1983 were off 30%, dropping to $1.16 million. *73*, a hobbyist's magazine primarily geared to ham radio operators, circulates more than 90,000 paid copies monthly. Ad revenues were off 36% to $777,000, a reflection of the diminishing interest in amateur radio communications as its partisans' age (average ham radio operator is 57) and other kinds of electronics capture the fancy of the younger audience, says the company.

Although Wayne Green has stepped down as publisher, his name will continue on the masthead of the Peterborough magazines as "founder." He is now heading a new IDG-created company, Wayne Green Enterprises, that will produce a digital audio publication and a software protection device.

"Rocketing success" is the name of the publishing game at *InfoWorld*, produced by CWC/I subsidiary Popular Computing Inc., in Menlo Park, Cal. This weekly news magazine for personal computer users has a 100,000-plus paid circulation and zoomed 101% in ad revenues for the year to $10.05 million in 1983.

CW Communications' other California subsidiary, PC World Communications, San Francisco, publishes two other magazines, both new. *PC World*, a monthly, is aimed at operators of IBM PC and compatible computers. Monthly paid circulation exceeds 200,000, and 1983 ad revenues totaled $8.2 million. Covering Apple's Macintosh and Lisa II models is *MACWORLD*, an every-other-monthly due to go monthly in November and circulating more than 200,000 paid copies, but too new yet for revenue results.

At the heart of the IDG organization is the Central Services Facility in Framingham, which supplies the various publications with supportive services such as circulation promotion, sales programs, market research and printing production. Also in Framingham is the home base of IDG's International News Network, which services the tabloids and magazines with as much as 30% of their news copy.

Ingersoll Publications Co.

Revenues	1983	1982
Media	$129.0 mil.	$95.0 mil.
Other	—	—
Total	$129.0 mil.	$95.0 mil.

Ingersoll Publications Co., Lakeville, Conn., is the 74th largest U.S. media company, with media revenues estimated by ADVERTISING AGE at $129 million, compared with estimated media revenues of $95 million in 1982.

Traditionally known as "newspaper doctors," the company strayed from that role when, in May, 1983, it purchased the two family-owned chains that comprise Suburban Newspapers of Greater St. Louis for $80 million.

The St. Louis weeklies long have been considered a viable operation, which leads those in the industry to question the role they will play in Ingersoll's stable of "former underdogs."

"There definitely has been a shift in our operating philosophy—for a couple of reasons," says Ralph Ingersoll II, president of each newspaper corporation under the Ingersoll umbrella.

The main reason for the change is the availability of more resources, Mr. Ingersoll says. The company now has the capital to support strong—even growing—ventures.

Structurally, Ingersoll operates as a confederation, with various properties managed and some owned in part by Ingersoll. The company, which publishes 23 dailies and more than 40 weeklies in 12 states, earned its reputation by assembling syndicates to purchase ailing newspapers, often taking an equity position and then managing the papers.

Regarding the history of his company, Mr Ingersoll says, "When you're growing, you can buy more for less when it's broken."

This proved to be the case in the purchase of both the *Orange Coast Daily Pilot* in February, 1983, and the *Terre Haute* (Ind.) *Tribune-Star* in March, 1983. At the time of their purchase, both papers were suffering from what Mr. Ingersoll refers to as financial and managerial problems—and, for the *Tribune-Star*, union disputes.

According to Mr. Ingersoll, both papers are performing "very well." Since its aquisition, the *Tribune-Star* has shown a slight increase in circulation, despite the merging of a morning and evening edition, which usually results in some loss of readership. Tom Geyer, president-ceo, Ingersoll Publications, says the *Tribune-Star* is "one of our most pleasing turnarounds."

Mr. Ingersoll says the $80 million in cash paid for the St. Louis suburban papers was "well worth it." With most of the company's papers printing on a daily basis, Ingersoll sees a fundamental shift toward weeklies under way in America. "We've observed weeklies enjoying unbroken growth in market share, ad linage and reader acceptance," Mr. Ingersoll says.

Concerning the stiff competition metropolitan dailies are faced with from free-circulation newspapers in the St. Louis market, Mr. Ingersoll says, "We have it all under one umbrella."

The largest individual Ingersoll paper, in terms of circulation, is the morning *Trentonian*, in Trenton, N.J.,with the most recent available daily figure of 66,050 as of March 31, 1982.

The *Trentonian*—along with the *Trenton Times*—is in one of few markets left with evenly matched, independently owned newspapers.

In June, 1983, Mr. Ingersoll charged Allbritton Communications, owner of the *Times*, with illegally misrepresenting its circulation figures and that the Audit Bureau of Circulations (ABC) aided that fraud.

In October, 1983, the *Times* filed a countersuit in Trenton, N.J., federal court, contending that the *Trentonian's* management was using a variety of illegal tactics to run the *Times* out of business.

Following the ABC's attempt to have the suit filed against it dismissed, a federal judge in Newark, N.J., ruled that the *Trentonian* could go ahead with its suit against the *Times* and the ABC. The case still is pending in federal court in New Jersey.

Mr. Ingersoll, who is primarily concerned with what he considers inaccurate ABC audit procedures, says, "The case will come to a head this summer, in July, and we are absolutely right." To date, Ingersoll Publications has spent $1.4 million on the case.

In line with its new philosophy, Ingersoll is negotiating for newspapers with circulation between 30,000 and 50,000 daily.

Eugene Patterson

THE SECOND HUNDRED

The St. Petersburg Times, Florida's largest independently-owned newspaper, celebrates its 100th Anniversary July 25, 1984. In this golden year, the newspaper has twice won international acclaim: as one of Time magazine's 10 best U.S. newspapers and as Eastman Kodak's World's Best in color reproduction.

These honors serve as a benchmark of the newspaper's progress in its first 100 years and as a standard to uphold in meeting these goals set for The Second 100 by Times' Chairman of the Board and Chief Executive Officer Eugene Patterson:

"In our second century, the St. Petersburg Times will grow and stretch and enlarge its vision to match the coming growth of Florida and the communities we serve.

"To keep pace with public needs, we must elevate our capacities to explain and simplify and clarify complex issues that will confront the self-governing society so that citizens can comprehend and decide these issues wisely.

"We must maintain and advance the Times' commitment to highest quality in content, in printing, in service to our people's commerce as a vital advertising medium.

"We will renew this newspaper's dedication to placing the public's interest ahead of private advantage, and to shielding the people's rights against abuse by claimants of privilege or holders of power.

"Most of all, by the simple force of gathering and presenting facts and searching them for truths, we will seek to illuminate the new century for the public to whose service we rededicate our daily labors."

Jefferson-Pilot Corp.

Revenues	1983	1982
Media	$109,300,000	$101,100,000
Other	920,700,000	922,900,000
Total	$1.030 bil.	$1.024 bil.

Jefferson-Pilot Corp., Greensboro, N.C., is the nation's 82nd largest media company, with media property revenues in 1983 of $109.3 million, or 10.6% of total revenues of $1.030 billion. Of the media contributors, broadcasting provided $66.4 million and newspapers contributed $42.8 million in revenues. Media revenues on a year-to-year basis increased 8% over 1982.

The publicly held company's major business is insurance. Of the company's $98.7 million profit, its broadcasting division accounted for $8.67 million and publication (newspapers) division added $2.4 million.

Jefferson-Pilot Broadcasting rebounded from a sluggish 1982 with strong local sales in both radio and tv offsetting continued softness in national sales.

"The country had a consumer driven economic recovery, and our local retail business reflected that," says Waliace Jorgensen, president, Jefferson-Pilot Broadcasting.

"Our local sales showed substantial gains in both radio and television in all markets. The national spot business has been soft throughout the year, but we had enough increase in our local volume to offset the shortages in the national business we had anticipated," he adds.

Mr. Jorgensen says the company added more than $5 million in new business during 1983, a 1% increase over 1982. He notes the company's radio properties in Atlanta (WQXI am, fm) and Denver (KIMN am and KYGO fm) and the tv station in Richmond (WWBT) "did remarkably well. The common thread that ran through those markets was the stability of our sales staff. We had little or no turnover."

The company's Charlotte station (WBTV) expects to be broadcasting from its new tower by the end of October. The $5 million project will nearly double the present antenna height above average terrain.

WBTV pioneered the industry's first local-national teletext service in April when it added 20 pages of locally produced material to 80 pages of the CBS ExtraVision national teletext service. The local ExtraVision project cost about $300,000 to mount, but Mr. Jorgensen says the company would be spending "in six figures but much less than $300,000" annually to keep it running.

"It will be three years before we see any significant impact from it," he says, "and we're convinced the secret to making it successful is the local-national combination." He says the company wouldn't expand its teletext effort "until we get some action in the receiver area." High-priced decoders have kept teletext household penetration very low.

The company in March sold its Wilmington, N.C., radio stations, WWIL (am) and WHSL (fm), but Mr. Jorgensen says the company "is on the lookout for acquisition opportunities. Without disclosing markets, we're looking at three right now, both radio and television."

Jefferson-Pilot Teleproductions, a Charlotte-based production house, extended its involvement with the nation's most successful regional sports package by extending its three-year, $18 million contract to broadcast Atlantic Coast Conference basketball games through 1990.

The 38-game package regularly achieves shares in the mid-30s for prime-time games, and its commercial time has been sold out each of the three years Jefferson-Pilot has broadcast the games (in partnership with sports packager Raycom Inc. of Charlotte).

However, the basketball deal also spawned the disastrous "Season Ticket," a joint venture with Entertainment & Sports Programming Network in which a package of 21 additional ACC games were shown in the five-state ACC region for an additional cost but broadcast nationally as part of ESPN's basic feed. Cable operators complained, fans attacked the pay-for-play idea and avoided the package in droves. It was abandoned in mid-season. Mr. Jorgensen says he believes regional pay packages eventually will be accepted but, asked if the company would attempt to resurrect "Season Ticket" this season, his answer is a quick and resounding "No."

The Electronic News Processing computer newsroom system continues to be a slow seller, but Mr. Jorgensen says a microcomputer system for news archival and retrieval "has turned out to be popular."

Jefferson-Pilot Retail Sales, a consulting company that helps stations take advantage of vendor credits built up by their advertisers, "made a profit its first year of operation," Mr. Jorgensen says.

Operating income from Jefferson-Pilot Publications slipped 20% in 1983 as revenues increased only 0.5%. In May, the company announced it would sell its newspaper operations in eight Texas and Oklahoma cities. Those sales would leave Jefferson-Pilot with two dailies (in Beaumont, Tex., and Clearwater, Fla.) and a group of weeklies based in Plant City, Fla.

"We have decided that we should either go one way or the other in the newspaper business, either expand or cut back," Jefferson-Pilot vp John T. Warmath Jr. says. There is speculation within the company that Jefferson-Pilot eventually may get out of the newspaper business, but, Mr. Warmath says, "That decision hasn't been made."

Among the newspapers for sale are the *Mineral Wells Index* and the *Palo Pinto Star*, papers Jefferson-Pilot acquired in 1983. Other properties for sale are located in Altus, Hollis, Sayre and Snyder, Okla., and Jasper, Laredo and Texas City, Tex.

OTHER OPERATIONS

Life, casualty and title insurance.

Journal Co.

Revenues	1983	1982
Media	$177,300,000	$165,800,000
Other	125,400,000	124,200,000
Total	$302,700,000	$290,000,000

Journal Co., Milwaukee, is the 52nd largest media company in the U.S., with 1983 media revenues of $177.3 million in 1983, or 59% of total revenues of $302.7 million. In 1982, the company posted media revenues of $165.8 million, or 57% of $290 million in total revenues.

Net income rose 42%, to $26.7 million, in 1983, reversing the 17% loss the company reported in 1982. Journal Co., which is privately held, does not break down earnings by company segments.

A resurgence in publishing and broadcast revenues accounted for the gain, according to the company, but was offset somewhat by increased paper costs in its printing operations.

Performance of the Journal Co.'s print properties was mixed. While circulation figures were down slightly for both the *Milwaukee Journal* and *Sentinel* newspapers, ad linage and ad revenues were up.

Ad linage for 1983 grew 3.9% and ad revenues were up 5% over 1982, according to the company. Ad rates increased modestly.

The ABC March, 1984, report shows circulation for both papers fell slightly from the same period in 1983. Circulation for the *Journal* in 1984 was 306,055, off 0.5%; the *Sentinel's* circulation was 180,371, down 0.9%.

Thomas J. McCollow, former president of Journal Co., was promoted to chairman of the board, replacing Donald B. Abert, who retired after 55 years with the company. Mr. McCollow was replaced as president by Warren J. Heyse, formerly exec vp.

Robert A. Kahlor is now president of Newspapers Inc., which governs the two newspapers. Mr. Kahlor was formerly senior vp-operations of Newspapers Inc.

Staff for both papers voted to institute a guild in June, 1984, by a vote of 161 to 136. The guild will cover the editorial staff of the *Journal* and *Sentinel*, as well as the library staff, which serves both papers of the employe-owned company. Journal Co.'s tv properties include ABC affiliate KNTV, Las Vegas, and WTMJ-TV, the NBC affiliate in Milwaukee.

KNTV is ranked No. 1 in a tight market that includes the top independent station in the country, edging out CBS affiliate KLAS in the last Arbitron Ratings Co. rating period.

The station is attempting to establish itself as the market's "community station" with an extensive media campaign. It also is attempting to boost its news ratings, where it currently ranks No. 2, with a revamped news team lineup and new broadcasting facilities, which it will move into in August.

WTMJ-TV ranks third over-all in the Milwaukee market, tied in ratings and a share point below ABC affiliate, WISN. WITI, the CBS affiliate, ranks first, according to Arbitron. The station promoted Wayne Barnett, former news director at the station, to general manager. He replaces Wayne Godsey, who left to join WISN.

Radio properties include WTMJ (am) and WKTI (fm), both based in Milwaukee.

The company consolidated its printing plants, folding both Milwaukee-based Tempo Inc. and Trumbull Printing Co., Fairfield County, Conn., into Perry Printing Co., Waterloo, Wis. Add Inc., a group of shoppers in Montana and Wisconsin, added the *New London Press-Star* to its list of eight properties.

In its cable operations, Journal Co. discontinued its Teltron Electronic Informations Systems in 1983. The two-channel system, one news and one advertising, was dropped because it failed to penetrate the market effectively, according to the company.

The system, which was hooked up in late 1981, served the west and northwest suburbs of Milwaukee. It reached only 30,000 of the 400,000 homes in the Milwaukee market.

Another cable property, Teltron Inc., is meeting projections, according to the company. The system, which was added in 1982, serves the central Wisconsin cities of Stevens Point, Wausau and Wisconsin Rapids.

Journal Co. also owns Teleport, Skokie, Ill., a division of Midwestern Relay Co. Teleport supplies communications satellites to feed signals to Chicago-area broadcasters for pickup and transmission.

Knapp Communications

Revenues	1983*	1982*
Media	$88,500,000	$79,700,000
Other	10,800,000	13,200,000
Total	$99,300,000	$92,900,000

*Results from fiscal years 1984 and 1983 ended Jan. 31.

Knapp Communications, Los Angeles, is the country's 95th largest media company with media property revenues for the fiscal year ended Jan. 31, 1984, of $88.5 million, up 11% from the previous year. Media revenues were 89% of Knapp's total revenues of $99.3 million. Knapp's fiscal performance is treated on a calendar basis for this issue because there is only a one-month overlap.

During the year, each of Knapp's four magazines came under the leadership of new publishers, according to Harry Meyers, senior vp-magazine group publisher, who oversees operations.

Architectural Digest, which launched a much-awaited Japanese edition in November, 1983, now lists as its publisher Bob Griswold, who was recruited from the same position at McGraw-Hill's *Housing.*

Opportunities similar to the Japanese endeavor are being explored by the company in France, England, Germany, the Netherlands, Brazil and Australia. But "expanding overseas licensing agreements" is "a relatively small" part of Knapp's business this year. Instead, the company is concentrating on its four U.S. publications, Mr. Meyers says.

During calendar year 1983, *Architectural Digest's* ad pages declined 3.6% compared with 1982, but the magazine logged a 10.4% gain in gross revenues to $24.6 million. During the first six months of 1984, the magazine experienced a 22.7% increase in ad revenues over the comparable 1983 period, according to Mr. Meyer. Circulation during the six months ended Dec. 31 increased 8.1%, to 602,397.

Robert Phelps, former advertising director at Meredith's *Metropolitan Home*, this year became publisher of *Bon Appetit.* The gourmet magazine lost a slight 0.1% in ad pages, while gross revenues increased 13.8%, to $20.7 million. Circulation was up 2.8%, to 1.3 million. For the first six months of 1984, *Bon Appetit's* ad revenues were up 20%.

Geo, the natural history, travel and photojournalism magazine, entered the new year under new publisher Jack Grant, former ad director for the publication. *Geo* suffered the loss of its 47-year-old editor, David Maxey, who recently died of cancer, and is selecting a new editor. Mr. Meyers says *Geo* is "evolving on the basis of reader interest and research. We see it moving toward more and more travel."

Geo logged the biggest increase in ad pages, 54.5%, and ad revenue, 70.2%, to $2.6 million. Circulation was up 18.8%, to 233,600, and, during the first six months of 1984, ad revenues were up 44% for the still relatively new magazine that Knapp relaunched after purchasing it in September, 1981, from Gruner & Jahr, the German publishing house.

George Fields took over the publisher's post at *Home*, rising from the office of ad director. *Home* witnessed a 46.2% increase in ad pages and a revenue increase of 47.2%, to $4.6 million. Circulation was down slightly to 540,769. During the first half of 1984, *Home* has seen its ad revenues rise 74%.

"Recognizing the importance of market segmentation," as well as an improved economy are key to Knapp's improved results, Mr. Meyers says.

Last year, Knapp, "mainly as an effort of corporate good citizenship," published and marketed, at the request of the Los Angeles Olympic Organizing Committee, 15 posters by top American artists, including Robert Rauschenberg, Roy Lichtenstein and Billy Al Bengston. The posters are being sold in the U.S. and abroad.

Wilshire Marketing, which along with Knapp Press and Rosebud Books make up the balance of the Knapp organization, has become inactive as an operating entity, according to a company spokesman. He said the marketing operations that were once the responsibility of Wilshire have been divided among Knapp's other departments.

Knapp has moved to establish an as yet unnamed research and development venture.

Knight-Ridder Newspapers

Revenues	1983	1982
Media	$1.451 bil.	$1.305 bil.
Other	22,713,500	[illegible]
Total	$1.473 bil.	$1.327 bil.

*Restated

Knight-Ridder Newspapers, Miami, the nation's eighth largest media company, recorded media revenues of $1.45 billion in 1983, an increase of 11.2% from 1982.

Media accounted for 98.5% of the $1.48 billion in total revenues the company had in 1983, a proportion similar to that of the previous year.

The national economic recovery rubbed off on Knight-Ridder, as reflected in the company's earnings performance. Net income in 1983 amounted to $119.4 million, a 16% increase from 1982. In the previous year-to-year period, the company was beset by sluggish advertising revenue and managed only a 2.6% increase in income.

The surge continued into the first quarter of this year. The company recorded $26.9 million in net earnings, an increase of 36.7% from the first quarter of 1983. Revenues rose 14.7%, reaching $390.7 million.

Although newspapers continue to dominate the Knight-Ridder empire, most of the attention in 1983 fell on Viewtron, the pioneering videotex system that went into commercial operation in October, about six months later than scheduled.

Viewtron is the element of the Knight-Ridder family that differentiates the company from the nation's other media giants. It gives the company a roster of media holdings that few others, if any, can match. (Times Mirror Co. is preparing to introduce its videotex system, Gateway, in Southern California in September.)

Still, no one is ready to call the system a success. The company is projecting an operating loss of $17 million in 1984.

The system, in Broward, Dade and Fort Lauderdale counties, allows fee-paying customers to receive a variety of services and advertising in their home. Initially, the customers paid $600 for a Sceptre, the hardware developed by American Telephone & Telegraph that brings the message to the home's tv. There were also a set of monthly fees and hourly use costs.

But Viewdata Corp. of America, the Knight-Ridder unit that markets Viewtron, recently introduced a monthly fee system that enables customers to lease the Sceptre. The company said the $600 charge had been hindering sales.

The key to Viewtron is its two-way capability. This enables customers to perform such services as banking and shopping in their homes, as well as allows advertisers to convey messages that the viewer requests.

So far, Knight-Ridder professes guarded optimism for Viewtron's prospects. A total of 150 advertisers have signed up, and at last count 1,500 households were using the service.

Many outsiders have a less sanguine view. Critics have pointed out that videotex in general has been much promise but little delivery, at least in terms of financial returns.

Knight-Ridder has spent more than $27 million in developing Viewtron, but it does not break down how much it provided in revenue. Its financial reports say "other" revenues, of which Viewtron is a part, brought in $23.4 million in 1983.

A crucial strategy Knight-Ridder has devised for its videotex venture is to share interest in information developed on Viewtron with other major publishing companies. Knight-Ridder has contracted with, among others, Advance Publications (S.I. Newhouse newspapers) and Scripps-Howard. This means residents of Denver, Memphis, New Orleans, Pittsburgh and elsewhere someday could have Viewtron flashing across their tv screens.

In contrast to Viewtron, Knight-Ridder's newspapers spent a quiet year introducing incremental editorial changes, shoring up advertising strength and proceeding with capital improvement projects. Nonetheless, newspapers form the company's spine: In 1983, they provided 91.1% of total revenues.

No new papers were added to the roster in 1983. In three markets, however, Knight-Ridder merged the papers it owns. The morning *Lexington Herald* absorbed the afternoon *Leader*, forming the morning *Lexington Herald-Leader*. In Macon, Ga., the same procedure took place, creating the *Macon Telegraph & News*. And in San Jose, the morning *Mercury* combined with the evening *News* to make an all-day paper, the *San Jose Mercury News*.

In advertising, full-run linage declined about 4% from 1982, but advertising revenues rose 11.4%. Classified ads, which showed the strongest gains, were up 18.1%.

Among Knight-Ridder's newspapers, the flagship *Miami Herald* continues to be the individual revenue leader, accounting for 17% of the company's newspaper revenues in 1983. The *Herald*, expanding circulation and coverage in Florida and developing a reputation for laudable Latin American coverage, consistently is judged as one of the nation's 10 best papers by various surveys.

In the latest reporting period, the *Herald* showed continued slow circulation growth, rising to 451,206 daily for the six months ended March 31, 1984, from 443,223 from the similar period the year earlier. Sunday circulation rose to 545,356, from 533,539.

The Philadelphia market is where Knight-Ridder has made quicker strides, helped by the demise two years ago of the *Philadelphia Bulletin*. Combined, the company's two papers there—the *Inquirer* and the *Daily News*—accounted for 21% of the company's newspaper revenues.

But the effects of the *Bulletin's* closing are beginning to wear off. In 1983, the two papers had ad revenues of $222.6 million, up 15.6% from 1982. That compares with the 28% rise that came in the previous period, during which the *Bulletin* closed.

The case is more evident in circulation figures. The morning *Inquirer*—another mainstay of top-10 paper lists—reported a daily circulation of 536,065 in the latest reporting period, down from 544,777 in the previous period, which in turn represented a 16% increase from the year before. Sunday circulation also declined, to 1,008,225 from 1,035,717.

The evening *Daily News* also showed nominal drops in circulation, reporting 293,031 at the end of March, compared with 295,732 the year before. In the previous period, the paper had a 15% gain.

In Detroit, Knight-Ridder's *Free Press*, the only major paper in the company's family that faces head-knocking competition, eked out a gain in its share of the market's advertising to 44.6%, closing the gap slightly with the leader, Evening News Assn.'s *Detroit News*. Ad revenues at the morning *Free Press* grew by 10.4%, reflecting in part the recovery of the auto industry and reversing the sluggish growth of recent years.

But in circulation, the *Free Press*, which contributed 9% of Knight-Ridder's newspaper revenues in 1983, lost some ground. For the six months ended March 31, the *Free Press* had a daily circulation of 631,087 (the largest among Knight-Ridder newspapers), compared with 635,740 last year. The *News'* latest circulation figure, by comparison, rose to 657,015 from 651,763.

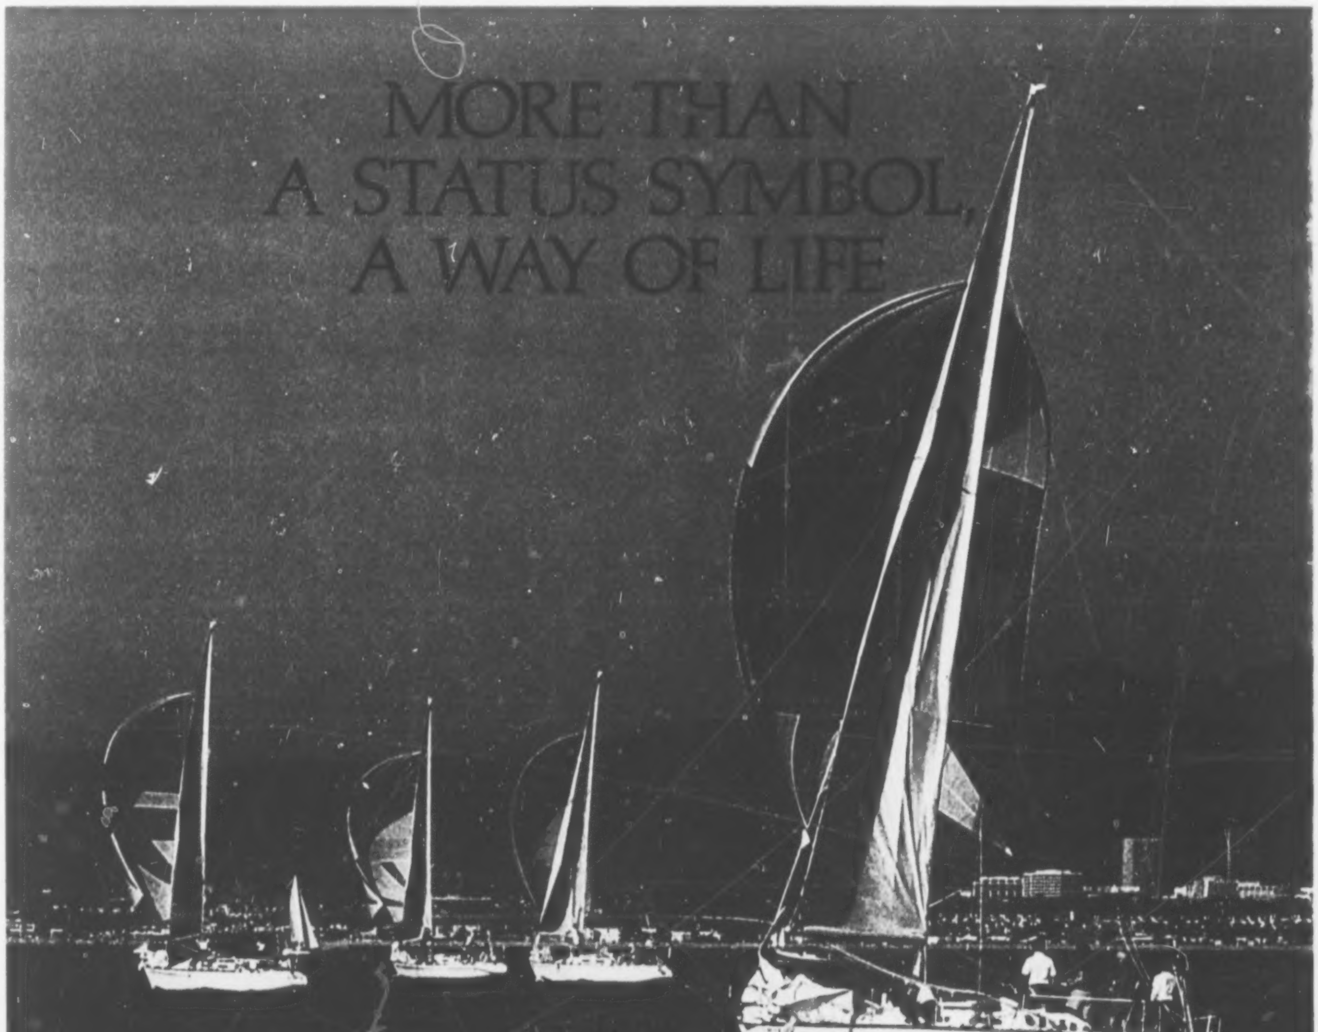
On Sundays, both newspapers recorded about the same advances. The *Free Press* saw its circulation rise to 787,300 from 780,647, while the *News* went to 861,004 from 855,461.

In San Jose, besides combining the *Mercury* and *News*, Knight-Ridder saw the combined property rise to No. 3 among newspaper revenue producers in its family. The all-day *Mercury News*, in the middle of high-tech country, contributed 10% of newspaper revenues in 1983, surpassing the *Free Press*.

The paper reported its most recent daily circulation figure at 245,868, up from 234,043 of the two papers combined last year. Sunday circulation increased to 298,797 from 287,574.

While all of these papers did manage gains in one form or another, such was not the case with Knight-Ridder's attempt to spin off an all-sports daily from its *Pasadena* (Cal.) *Star-News*. After reportedly losing hundreds of thousands of dollars a month on the project, the company killed the paper, called *All Sports*, in September, not quite a year after it started.

More successful was Knight-Ridder's effort to enlarge its broadcast family. In 1983, the company completed its $37 million acquisition of WNGE-TV, Nashville, from General Electric.



Orange County in Southern California is a market you can't afford to pass up for a wealth of reasons. The median household income at $30,126 is well above the national average and is reflected in a buying power that tops out at $25 billion — more than the po[illegible] of Miami, San Francisco or Seattle. On[illegible]ne major newspaper group sets a direct course to this marketplace. The Orange County Register MetroGroup.

It's largest paper, The Register, outdistances the nearest competition by 95,000 daily and has moved into 2nd place in all of Southern California. In just 5 daily issues, The MetroGroup reaches 65% of the affluent adults, those with $50,000+ incomes. When 8 out of 10 of our adult readers take no other daily newspaper, it's clear to see why The MetroGroup is considered the most powerful media buy in this highly desirable market.

Orange County Register MetroGroup

Bringing the best of Orange County to you.

Source: S & MM, Survey of Buying Power, 1983; Scarborough Research Corp., 1983

The addition of the station, now called WKNR, brought to five the number Knight-Ridder owns. All are ABC affiliates, except CBS affiliate WTKR, Norfolk, Va. With WKNR in tow for part of the year, the company's broadcast operations, including cable properties, brought in $46.1 million in revenues, up 6.6% from 1982.

Among cable properties, Knight-Ridder's operations—shared 50-50 with two other companies—saw revenues of $36 million in 1983. Tele-Communications Inc. shares interest in one venture, TKR Cable Co., which had 124,000 subscribers at the end of 1983. The other partnership, with Times Mirror and called Long Beach Cablevision, had 30,000 subscribers.

The kind of modern technology that cable tv represents came to Knight-Ridder's business-oriented properties. Reflecting in part the growing electronic content of these operations, the formation of Knight-Ridder's Business Information Services group last year consolidated Commodity News Services, Unicom News (50% interest), the *Journal of Commerce* and VU/TEXT. These business-data dissemination operations produced revenues of $58 million in 1983.

In another area, Knight-Ridder has followed other major media companies by acquiring interests in cellular radio ventures. As with Viewtron, these mobile phone operations are full of promise, but the magnitude of returns are not clear.

Landmark Communications

Revenues	1983	1982
Media	$265,000,000	$230,000,000
Other	—	—
Total	$265,000,000	$230,000,000

Landmark Communications, Norfolk, Va., is the country's 37th largest media company, with revenues of about $265 million in 1983, all in media, a 15.2% increase over 1982 revenues.

In 1983, Landmark gleaned $159 million (60% of revenues) from newspapers, $79.5 million (30%) from cable and $26.5 million (10%) from broadcast.

Cable tv showed substantial increases in 1983 as a percentage of total revenues at the expense of newspapers, according to new ventures analyst Bahnson Stanley. Newspapers were 65% of total revenues in 1982, and broadcast remained static both years.

While Landmark continues its emphasis in media, the company has recently started branching into other fields. These include local real estate development and the marketing of office computers and business systems through its Executive Productivity Systems division.

Landmark president Richard Barry says, "These are sidelines. We are really in the newspaper and broadcast business."

Effective Jan. 1, 1984, Landmark spun off its TeleCable Systems division into a separate company, headed by president Dick Roberts, because principal owner Frank Batten, who is chairman of both companies, thought newspapers and cable were disparate businesses in rapidly changing areas, requiring separate management.

Stockholders remain the same, and the new company also is privately held. Stock in TeleCable has been distributed to Landmark's stockholders, who after the split hold an equal number of shares in both companies.

TeleCable is the 14th largest cable tv operator in the U.S. with 20 cable systems and 410,478 basic subscribers in 15 states. It added one franchise in 1983 in Plano, Tex.

During 1983, Landmark's Weather Channel cable network was the focus of several major changes. John Coleman, president and minority owner, resigned after trying to put together $4 million to take control of the service from Landmark. Landmark contended that the Weather Channel lost $7 million in its first year and about $800,000 monthly because of overstaffing and other management mistakes made by Mr. Coleman. The company said escalating costs and ad revenue shortfall also contributed to a financial crunch.

Mr. Coleman was succeeded by interim president John Wynne, who is president of Landmark's broadcast and video enterprises division. John Janas, formerly president of Sea Shell Inc., a media company, then succeeded Mr. Wynne as president of the Weather Channel. Other management changes include the organization of a separate marketing department for the Weather Channel.

In August, the Weather Channel announced it would seek subscriber fees. About 85% of its customer base has agreed to pay.

Mr. Stanley says the service now has more than 12 million subscribers and soon would be eligible for A.C. Nielsen Co. meters, which should assist ad sales.

(Nielsen monitors a service once it reaches 15% of total U.S. households. There will be 83.8 million households by 1985, so the Weather Channel will need 12.6 million household subscribers.)

Mr. Stanley says ads sold for 1984 to date already exceed all of those sold in 1983. The Weather Channel has not been an easy sell. In 1983, the company estimated that the average sale took about 20 calls.

Landmark also set up a special publications division last year to publish newsprint magazines.

Port Folio covers the Hampton Roads market, the 34th largest market in the U.S. *Spectator Magazine of the Triad* covers Greensboro, N.C. The publications focus on entertainment.

Among its newspapers, the only change was the discontinuance of the nondaily *South Carroll Herald,* Sykesville, Md., and the startup of *Randallstown News,* Randallstown, Md.

Lee Enterprises

Revenues	1983	1982
Media	$166,059,000	$155,300,000*
Other	6,498,000	5,258,000
Total	$172,557,000	$160,580,000

*Restated

Lee Enterprises, Davenport, Ia., which is readying itself to expand through new ventures and acquisition now that regions covered by its media properties are coming out of a recession, had media revenues of $166.1 million out of total revenues of $172.6 million in 1983, ranking 57th among U.S. media companies.

The showing in 1983 for media properties represented an increase of 7% from 1982.

Media revenues, which represented 96.2% of total revenues in 1983, break down into $44.5 million from tv, an estimated $1 million from radio, $80.4 million from newspaper advertising, $29.4 million from newspaper circulation and $10.8 million from editorial services and management fees from associated companies.

In an industry characterized by corporate acquisitions and sales, Lee remained distinctly uninvolved in either in 1983.

"We made no acquisitions during the year, not from lack of opportunity," says Lee president Lloyd Schermer. He told stockholders, "We chose not to [purchase] at the prices being asked."

Lee comptroller Richard Galligan says the company during 1984 is on the lookout for tv stations in the top 50 markets and other media companies in state capitals.

Government services in state capitals provide the stability often lacking in cities where business concentration is in agriculture or is in a recession-vulnerable business segment, Mr. Galligan says.

Six of Lee's operations are in state capitals; five smaller enterprises are in communities reliant primarily on agribusiness.

While the company continues its search for new acquisitions, it plans in 1984 to improve color and graphics capabilities, increase newspaper circulation by 35,000 through stepped-up marketing, upgrade front-end systems for electronic copy processing, and continue expansion of the use of cable to distribute news and advertising in its markets.

Lee also has established as a priority for 1984 a thorough management training program involving more than 300 top and middle-level managers. The payoff, says Larry Seigel, vp-human resources, will be in a more effective working environment for Lee's more than 4,000 employes and a more consistent framework for management short and long-term planning.

Using outside consultants and staff resources, the company initiated the program 12 years ago. "The industry has been so planning and budgeting and numbers-intensive for so long, we've really neglected the behavioral side of the [management] equation," Mr. Seigel says.

During 1983, Lee entered into a joint venture with Audichron Co., Atlanta, to develop audiotext opportunities that have opened up as a result of FCC action and the divestiture of American Telephone & Telegraph and its 22 Bell operating companies.

Under the name of Call-It Co., Lee hopes to establish a national network of local and national mass announcement services in the top 150 markets. Under the system, a user (anyone with a telephone) calls a published number for sports scores, weather reports, humorous quips or Bible readings and quizzes. The caller is billed by the local phone company. Included in the bill is the phone company's locally regulated rate (19¢ per call in Los Angeles, for example) plus a fee, which contains a regulated ceiling, charged by Lee Enterprises and other service initiators. Total cost per call may run 50¢ or more.

Call-It Co. went on-line in January in Los Angeles in a joint venture with the *Los Angeles Times* and in Atlanta in a joint venture with the *Atlanta Constitution.*

Early this year, Lee's KOIN-TV in Portland, Ore., moved into its newly constructed studio, three years in the making.

Revenues	1983	1982
Media	$102,000,000	$83,800,000*
Other	5,300,000	4,600,000
Total	$107,300,000	$88,400,000

*Restated

LIN Broadcasting Corp., New York, is the country's 86th largest media company with revenues of $102 million from media operations, or 95.1% of total revenues of $107.3 million in 1983.

Media revenues increased 21.7% from 1982. Profits from media operations last year were $22.5 million, while total profits were $23.5 million, up 17% from 1982.

For the first quarter of this year, net income was $4.6 million, up 16% from the first quarter of 1983. Net revenues were $28 million, up 11% (excluding the effects of acquisitions).

In 1983, operating profits rose in all divisions but percentage gains were greatest in radio paging and specialty publishing. Tv gains were slightly more than 10%. The company attributed this to increased demand for the relatively fixed supply of advertising spots, which pushed up advertising rates.

In 1983, about 81% of LIN's operating income before depreciation and expenses was from tv, nearly 11% was from radio and 8% from radio paging and specialty hotel publications.

ADVERTISING AGE estimates in 1983 tv revenues were $71.5 million, radio $19.6 million, and ad-supported Guest-Informant publications $11 million.

About 74% of the company's operating income came from properties in Texas, where LIN operates NBC affiliates in Dallas-Fort Worth and Austin, am/fm radio stations and a radio paging company in Houston. LIN also publishes magazines for hotels in Dallas-Fort Worth, Houston and San Antonio. During 1983, the company bought Leisureguides Inc. for $3 million. Leisureguides publishes hardcover magazines on local attractions. The magazines are placed in hotel rooms in Chicago, Boston, Houston, Miami and several other major markets. Leisureguides has been incorporated into the company's similar GuestInformant operation. The combined operation now services hotels in 32 cities. That gives it a virtual lock on this market in the U.S., according to Virginia Butcher, vp of F. Eberstadt & Co. brokerage house in New York.

Other acquisitions in the past year include WOTV-TV, the NBC affiliate in Grand Rapids, Mich., 37th largest U.S. market; WISH-TV, the CBS affiliate in Indianapolis, Ind., 21st largest market, and WANE-TV, the CBS affiliate in Fort Wayne, Ind., 94th largest market. WOTV, purchased April 1, 1983, cost $32 million; WANE and WISH, purchased from A.H. Belo Corp. on Feb. 4, 1984, together cost $104.9 million. Belo acquired the stations in a package deal with the Corinthian Broadcasting subsidiary of Dun & Bradstreet, but divested itself of the property to comply with FCC regulations limiting ownership to five vhf and two uhf stations.

The company also has purchased 5.1% of the shares of *The New Yorker* magazine during the past two years for $3.2 million.

In its latest stock report on LIN, Standard & Poor's Corp. said the company "is actively seeking acquisition candidates."

Ms. Butcher says that still holds, but the most venturesome aspect of the company's efforts is its investment in cellular radio systems. The mobile telephone service is speculative, but LIN has been investing in a "safe, conservative way," she says. LIN's broadcast properties are steady money makers and provide substantial amounts of cash for investment, she says.

The company estimates that, if it were granted licenses to operate cellular radio in each of the five major markets for which it has applied, its initial investment would be $35 million, of which $7 million could be spent in 1984.

LIN applied for construction permits from the FCC, either alone or in partnerships, in New York, Los Angeles, Philadelphia, Dallas-Fort Worth, Houston, and eight smaller markets. The company has had mixed success in obtaining the licenses: FCC staff at various levels have approved its franchise applications in New York, Philadelphia and Houston, but an administrative law judge recommended against LIN in Los Angeles. No FCC staff had made recommendations for Dallas-Fort Worth at press time.

LIN president Donald A. Pels is optimistic about the company's investment in cellular radio and points out that the first operational system in Chicago (not LIN's) is selling ahead of projections. But he admits that "wireline carriers [such as the divested Bell companies] may well begin operations before us. This headstart results in a significant advantage, which includes the opportunity to pick up a substantial part of the initial demand. Nonetheless, we believe that our investment in time and expense [about $3 million pre-tax to date] will prove to have been very rewarding."

Ms. Butcher says she believes LIN is well positioned to prosper in cellular radio. If it gets franchises in only a couple of major markets, she said, the technology "could provide 25% to 50% of the company's revenue by 1990."

Maclean Hunter Communications

Revenues	1983	1982
Media*	$115,000,000	$75,000,000
Other	403,100,000	353,900,000
Total**	$518,100,000	$428,900,000

*U.S. only revenues

**Consolidated worldwide revenues

Maclean Hunter Communications, Toronto, the 80th rated media company in the U.S., had 1983 revenues from U.S. operations of $115 million, or 22.2% of the company's worldwide revenues of $518.1 million generated from U.S., Canadian and British properties.

U.S. media revenues, which represented an increase of 53.3% over 1982, included $60 million from cable, $40 million from periodicals and about $15 million from one month's consolidated revenues of the *Houston Post*.

Total revenues at Maclean Hunter were up 20.8% from 1982. Some 31% of total operating revenues come from international operations, which are located primarily in the U.S. (Over-all revenue figures are expressed in U.S. dollars in this profile based on the yearend rate of C$1 equals 0.817 U.S. dollars.)

Clearly the biggest single development affecting Maclean Hunter during 1983 was the acquisition of the *Houston Post* by Toronto Sun Publishing Corp., in which Maclean Hunter has held a 50% interest since 1982. Maclean Hunter reports the *Post* had revenues in 1983 of $140 million.

"The *Houston Post* would have to be the biggest thing for us last year," says Harvey T.M. Botting, assistant vp. It may be a year or two before the *Post* makes a significant imprint on Maclean Hunter's yearly results, but once that happens, the company expects it to be a healthy impact.

Until then, the *Post* is on its own from an operational standpoint, says Mr. Botting, who explains the parent company maintains, for the most part, a "hands-off" attitude toward the Toronto Sun Co. "We don't pretend to know the newspaper business the way they do," he says.

The *Post* was acquired last December for $100 million and the value of working capital from the Oveta Culp Hobby family. Almost immediately, new publisher J. Douglas Creighton set about improving the appearance and content of the paper, which has a daily circulation of 360,000 and 415,000 on Sunday.

Cosmetic changes such as new body type, masthead and more color already have been made, while new columnists, a new editorial page editor and editorial staff have been added.

Early this year, 19 new offset color press units were purchased for $20 million to modernize and consolidate its printing operations into a single plant, which should provide cost savings down the road, Mr. Creighton says. The *Post* also lost some circulation when *Parade Sunday* magazine changed its affiliation to the competing *Houston Chronicle*. The *Post* then started its own Sunday magazine, called *The Magazine*. The publication will have more of a local flavor than *Parade* and eventually will win back and surpass the lost circulation, Mr. Creighton predicts.

Even though the economic boom that blessed Houston for more than a decade has slowed, Mr. Creighton is not daunted about a delay in profitability of the *Post*. "We were not unaware of the economic slowdown in this area when we bought the paper, but we still felt it would be profitable," he says. "Our loss has only been 10¢ a share and our projections were for more than that. We forecast the growth for each of the next three quarters to be greater than the year before."

The purchase of the *Post*, Mr. Creighton says, is not to be viewed as a springboard for further Toronto Sun Co. expansion into the U.S. Not for a while, anyway. "We actually bought a paper that is larger than our company in Canada. We're going to wait and see how this works out before we move anywhere else in the U.S.," Mr. Creighton says.

In other international publishing ventures, Maclean Hunter Chicago posted a 21% increase in profits and 7% rise in revenue from operations of nine business periodicals and several vehicle pricing guides. Its Stamford, Conn., division, publisher of *Progressive Grocer* and *C-Store Business*, also responded to an improved U.S. economy by posting a 62% jump in income, thanks to a record year in customized information sales by *Progressive Grocer*. Last year, Maclean Hunter of New York bought *Hospital Practice*, a doctors' magazine.

On the Canadian front, the business press sector was not as profitable as in the U.S. because of a continuing lag in the Canadian economy, but 15 of nearly 80 business publications increased ad linage last year over 1982.

In Canada, the company has started three business publications in the past year including *Hospital Products and Technology*, *Electronic Products News* and *Canada Offshore*, an oil industry-related periodical. Planned for debut this year is a magazine called *Canadian Art* as part of a joint venture with Key Publishers Co. Ltd.

Consumer magazines, bolstered by a strong fourth quarter, posted revenue gains of 9%. The *Financial Post*, one of Maclean Hunter's flagship publications, showed a 4% revenue increase last year over 1982 on the strength of a 20% fourth-quarter jump.

Maclean's, a Canadian news magazine, increased weekly circulation to 2.6 million, up 7%, while its ad revenues rose by 3%. In addition, *Maclean's* opened a Paris bureau and expanded its Ottawa and Washington bureaus during the year.

Chatelaine, a women's-oriented magazine, improved revenues slightly over 1982 while *L'Actualite*, a French-

BUILD A CAMPAIGN AROUND BOWLING AND 69 MILLION RECRUITS WILL JOIN YOUR PARADE.

Consider Datsun. To demonstrate the superior ground clearance of their pickups, they showed how you can roll a 10-pin ball under the truck. This striking example created powerful viewing involvement.

We can tap this huge reservoir of viewer interest for your product, too. We're the National Bowling Council. Your promotional link to a nationwide network of thousands of bowling centers. And the 69,000,000 Americans who are active bowlers.

That's a big market. One with a median household income of $24,388. In short, it's a market you want to reach.

You can count on bowling to build awareness. And you can count on us to help you with your advertising concept. We'll also give you all the details that prove bowling can score impressive gains on your sales chart.

language periodical, improved revenues by 14%.

Maclean Hunter continues to strengthen its foothold in cable tv. With systems in Canada, New Jersey and Michigan, its subscribership base grew by 9%, to 594,000 basic subscribers. Acquisitions have leveled off, (at least in the U.S.) as the company looks toward selling add-on and specialized services to its current cable customers, Mr. Botting says.

Total subscribers in the U.S. were 229,410 at yearend—156,410 at Suburban Cablevision in East Orange, N.J., and 73,000 at Wayne Cablevision in Taylor, Mich. The basic-to-pay ratio in the older New Jersey operation was 1.17 to 1.

On the home front, Ontario cable operations have achieved a 79% penetration and increased subscribership by 3% last year. In New Jersey, Suburban Cablevision reached the 150,000 subscriber mark and added new services to the recently completed system. The Michigan system grew to 73,000 subscribers while Maclean Hunter Cable TV entered into a 10-year management pact with Barden Cablevision of Detroit in the building and operation of cable systems in the Detroit area. It has only a limited partner in this venture, however.

Maclean Hunter's broadcast division generated $51 million in revenues. Its holdings include a tv station in Calgary, Alberta along with five radio stations.

The company also has several nonmedia operations such as Transkrit, a U.S. business forms concern, Industrial Trade Shows, Paging and Book Distribution that showed over-all increased performance.

In the executive ranks, Frederick T. Metcalf steps down as president-chief operating officer after seven years in that post. He will remain, however, on the board of directors and on various committees. Ronald W. Osborne, vp-broadcasting and chief financial officer, has been elevated to Mr. Metcalf's post. Also, Arthur J. (Pete) Little has announced his retirement as Maclean Hunter director.

Macromedia Inc.

Revenues	1983	1982
Media	$96,500,000	$86,100,000
Other	600,000	1,200,000
Total	$97,100,000	$87,300,000

Macromedia Inc., Hackensack, N.J., a holding company formed by the Bergen Evening Record Corp. on Jan. 1, 1984, is the nation's 89th largest media company, with 1983 media revenues of $96.5 million, up 12% from 1982.

Media accounts for nearly all of the company's total revenues of $97.1 million, up 11% from 1982. Earnings were $7.9 million, up 50% from 1982.

The company is privately owned by chairman Malcolm A. Borg and family trusts.

Circulation and advertising revenue from the Record, the largest evening newspaper in New Jersey, contributed $75.7 million to the company's revenues last year. The newspaper contribution was up nearly $10 million from 1982. Revenues for the company's broadcast arm, Gateway Communications, were $20.8 million last year, up 4% from 1982.

Company officials attribute the improved revenue performance to a strengthening economy and the paper's increased competitiveness, a result of its new four-color capability. Advertising linage rose 7.3%; insert advertising 25%. Over-all advertising revenue rose 18.3% from 1982.

In the past two years, the company has spent $62 million to modernize, adding such equipment as high-speed, full-color offset presses and a Feras inserting-handling system. Color advertising in 1983, the *Record's* first full year with four-color capability, surpassed 4 million lines, compared with 2.4 million lines in 1982.

The *Record* last year rose to eighth among the nation's newspapers in color advertising linage. "Before, we were almost nowhere," Macromedia president Michael H. Heath says.

The *Record's* new look also helped boost circulation, Mr. Heath says. Sunday circulation rose about 6,000, to an average of 219,000 last year, compared with annual increases of only 3,000 before the days of color, he adds. Average daily circulation had rested at about 147,000, but last year rose to 150,000 and was 154,000 in April, 1984, according to the company.

Editorially, the *Record* is extending its reach. Last year, it sent a reporting team outside the U.S. for the first time to cover the invasion of Grenada. What the company calls "a major effort" went into producing an experimental tabloid in its northwest circulation area, but costs overran circulation and ad gains so it was dropped.

Mr. Heath says creation of the Macromedia holding company allowed further separation of newspaper and broadcasting operations. The *Record's* dominance within the company and the fact that the paper had bought the broadcast properties gave the impression that the newspaper was running the tv stations, he says. The reorganization was intended to allay the appearance of a conflict of interest and to show the company considers both the newspaper and broadcasting equally important, he says.

In early 1983, the company sold Toms River Publishing Co., publisher of the *Ocean County* (N.J.) *Reporter*, to Capital Cities Media.

Gateway Communications, the company's broadcasting arm, owns and operates one ABC affiliate and three CBS affiliates.

Macromedia likes broadcasting and may acquire more stations, but is not in hot pursuit of any, Mr. Heath says. A stronger economy and the 1984 elections, he says, should boost advertising and Gateway's profits. As for cable tv and videotex, ventures Macromedia was considering last year, Mr. Heath saw little prospect of Macromedia getting involved with either soon.

McCall Publishing

Revenues	1983	1982
Media	$121,600,000	$110,000,000
Other	—	—
Total	$121,600,000	$110,000,000

McCall Publishing Co., New York, is the nation's 77th largest media company, with total net revenues of $121.6 million in 1983, all from media properties. In 1982, total revenues were $110 million.

The company is privately held by the Pritzker family of Chicago, whose other properties include Hyatt Corp., Rosemont, Ill. Excluded from total revenues are the company's revenues from two properties owned in part with other media companies: American Family Publishers (50% owned) and Select Magazines (33⅓% owned).

The mainstay of McCall Publishing continues to be *McCall's*. The remainder of revenues are derived from *Working Mother* and its new spinoff, *Working Mother Digest*, and annual special interest publications: *Cooking School* and *Beauty, Diet & Health Guide*, formerly *Beauty & Diet Guide*.

As the outlook for the "Seven Sisters" women's magazines improves, so does the outlook for *McCall's* and, by extension, McCall Publishing. "We're pretty upbeat these days," editor Robert Stein says. "A couple of years ago, it was discouraging. Presumably, we were all dinosaurs about to be eaten by the new young animals in the forest. But we're co-existing nicely."

What seems to be happening, according to Mr. Stein, is a growing awareness in the advertising community that "it isn't either/or, that you have to have a *McCall's* or *Good Housekeeping* on one end or a *Working Mother* or *Savvy* on the other."

The joys of peaceful co-existence can be seen within the company, Mr. Stein says, as it has been able to show "gains with magazines on both ends of the scale, mass and specialized"—*McCall's* and *Working Mother*, respectively. "That's very encouraging," he says.

For *McCall's*, advertising pages and revenues both rose in 1983 after suffering declines in 1982: Pages were up 5.1%, while revenues rose 3.9%. And circulation climbed 1.4%, to almost 6.4 million. For *Working Mother*, ad pages rose 1.2% last year, while ad revenues soared 25.7%. Circulation was up 8.5%, to 484,656.

And those gains were being sustained in 1984, as ad pages for *McCall's* increased 9.5% in the first six months and newsstand sales rose about 8% in the first three months.

The "Seven Sisters" are doing better "because business is better," says Raymond Eyes, president, McCall Publishing, and publisher, *McCall's*. "Advertisers are gradually recognizing that mass magazines can complement what they do on television. That's got to help the mass women's magazines, which deal so heavily in package-goods advertising."

To help *McCall's* sustain its gains, various editorial and promotional projects are on tap for 1984. The most elaborate will be the third annual "Reader of the Year" promotion, due in the September issue. By offering a lucky reader, and family, prizes linked to both editorial coverage and advertising, this promotion is "a way to pull together what we do every month," Mr. Eyes says.

One reason for the resurgence of the mass women's books is because "we have kept ahead of what is going on" in readers' lives, he says, "and we have responded editorially. There are rather obvious differences between *McCall's* today and *McCall's* five years ago and ten years ago—and even two years ago." The major difference, as Mr. Stein sees it, is a focus on the trend that "the new generation of young women are getting more interested in marriage, commitment, children, in addition to having their careers."

That focus is also a key element in *Working Mother*, which celebrated its fifth anniversary last year by raising its rate base 25%, to 500,000. The monthly further expanded in 1983 via the introduction of *Working Mother Digest*, a special edition made available nationally by Kinder-Care Learning Centers. Initial distribution was 100,000 copies, which was raised to 300,000 in 1984 and could go higher in 1985, Mr. Eyes says.

McClatchy Newspapers

Revenues	1983	1982
Media	$215,000,000	$185,000,000
Other	—	—
Total	$215,000,000	$185,000,000

McClatchy Newspapers, Sacramento, Cal., is the 46th largest media company, with 1983 revenues estimated by ADVERTISING AGE at $215 million, all from media operations.

Media revenues in the family-owned and operated business were up 16% from 1982 estimated revenues, and continue to come from newspaper, radio and cable tv, although McClatchy is embarking on several ventures in videotex and cellular radio.

A joint venture with FMI, Miami, and Cellular Communications, New York (both partners of Western Union), has gotten McClatchy involved in cellular radio, the technology that permits transmission from cordless telephones in cars, briefcases and wristwatches. The company currently has active franchise applications pending before the FCC, but has yet to receive a ruling from the commission.

The past year saw the launching of two new projects in videotex, one of which was Eldorado Teleguide, a public access videotex operation based on the software technology provided by Infomart of Toronto. The system is designed to serve the travel and tourism industry and contains 35 terminals placed throughout public buildings and shopping centers in the Sacramento area.

A second videotex system, using the same technology, is a joint venture with Times Mirror Co., Irvine, and the Bakersfield *Californian*. It is called Grass Roots California, a service for the agricultural community in the central valley of California. The partnership with Times Mirror and the Teleguide project, according to corporate vp Erwin Potts, eventually may lead the company into some sort of home videotex system.

McClatchy continues to operate four cable systems, all of which have registered modest increases in subscriber numbers in the past year. Norcal Cablevision, the company's only mature cable system, has 26,000 subscribers, and Fresno Cable TV Ltd. rose to 42,500. Tel-Cab Communications Cable serves another 3,400 customers in the Reno, Nev., area, and Sequoia Cablevision, activated in 1982, now has 9,400 subscribers in the Tulare County region of Central California.

LegiTech, McClatchy's computerized service for tracking state legislation and political contributions, acquired in 1982, continued to show progress. The Sacramento-based service, sold for a fee to magazines, newspapers, government agencies and lobbyists, expanded eastward with the opening of a similar operation in Albany, N.Y., to provide instant access to information regarding legislative action for subscribers in New York state.

Newspapers represent more than 85% of the McClatchy business.

McClatchy's three "Bees"—*Sacramento Bee, Modesto Bee, Fresno Bee*—continued to show gains after going through a recession-related slump. The *Sacramento Bee*, the only one of the three in a competitive market, is well ahead in the circulation battle with the *Sacramento Union*, but losing ground. While its daily circulation increased 0.4% to 224,589, and Sunday went up 0.5% to 259,069 in the year-to-year ABC Fas-Fax report of March 31, 1984, the Union's circulation increased 16.8% to 99,366 for the daily and 15% to 98,418 for Sunday. Both are morning papers.

The *Anchorage Daily News*, a morning daily that the company bought in 1979 with a circulation of about 6,000, now has surpassed its chief rival, the afternoon *Anchorage Times*, in daily and Sunday circulation. According to publisher's statements submitted to the ABC, the *Daily News'* average morning circulation for six months ended March 31 was 51,180 and had risen to 58,109 on Sunday, up 14.4% from a year earlier.

Mr. Potts declines to comment on the profitability of the newspaper, which had been a deficit operation in the past few years, but he says, "The bottom line at the *Daily News* is beginning to look very good . . . we've moved ahead of the competition in share of advertising."

The company's other newspaper properties also began to record some post-recession gains. The *Gilroy Dispatch*, a five-day-a-week paper serving the southern end of Silicon Valley and the high-tech industries to the north, showed gains and reflected improved economic conditions.

But the *Tri-City Herald*, a daily in Richland, Wash., continued to mirror the slump brought about by Washington Public Power Supply System's scrapping of two partially completed nuclear power plants with the loss of 6,000 jobs in 1982. The paper's daily circulation dropped to 34,547 for the six-month period ended March 31, compared with 36,682 a year earlier. "The bottom appears to have been reached in Richland and we've been able to show some modest gains in recent months," Mr. Potts says.

All of the company's radio stations, particularly KFBK (am) and KAER (fm) in the Sacramento area, achieved dramatic gains in 1983 and were part of a major restructuring of McClatchy that saw the creation of a new electronics communications division.

All cable operations and radio stations are in the new division, headed by vp Frank Washington, who had been with Times Mirror as general manager of Videotex America.

McGraw-Hill

Revenues	1983	1982
Media	$888,683,000	$804,286,000
Other	406,317,000	389,301,000
Total	$1.295 bil.	$1.194 bil.

McGraw-Hill is the 12th largest media company in the nation, with revenues of $888.7 million from media operations in 1983, or 68.4% of total revenues of $1.295 billion. In 1982, media operations accounted for $804.2 million in revenues, or 67% of the total.

Divisions of McGraw-Hill contributing media returns include publications, 29.4% of total revenues and 24.9% operating profit of total operating income from all segments; information systems, 17% revenues and 22.7% operating profit; Standard & Poor's Corp., 10.4% revenues and 14.3% operating income; data resources, 6.2% revenues and 3.3% operating profit, and broadcasting, 5.5% revenues and 9.8% operating profit. A book division is the company's only nonmedia contribution.

McGraw-Hill, as in years past, is spending heavily on state-of-the-art communications and computer technology. The company earmarked $49.2 million for capital investments in 1983, a year when it achieved record high earnings for the 12th year in a row.

New management and a revived economy helped spur a turnaround in

1983 at McGraw-Hill Publications Co., the magazine division. This sector posted $65.2 million in operating income on $381.2 million in operating revenues, compared with $54.7 million in operating profit on revenues of $344.6 million in 1982, when operating profit from the division shrunk 11.2% from the previous year.

Early in 1983, John G. Wrede was named president, McGraw-Hill Publications. He was the former head of McGraw-Hill Information Services.

The company's flagship publication, *Business Week*, lifted its total advertising pages to 4,644, up 7% from 1982, a recessionary year in which *Business Week* ad pages dropped 10%. In 1983, for the ninth year in a row, the publication led all U.S. magazines in total number of ad pages.

The upswing in advertising, which paralleled a resurgence in the economy, came after a rare period of reconsolidation for *Business Week*. In June, 1982, the publication got a new publisher, James R. Pierce, former publisher of McGraw-Hill's *Aviation Week*. Later that year, Stephen Shepard rejoined the magazine from *Saturday Review* as executive editor. Last year, *Business Week* underwent a graphic facelift designed to give the publication a livelier look.

With a new foundation and in a healthier economy, the magazine's executives felt confident enough last fall to sink more than $2 million into an advertising campaign touting the magazine as "The Voice of Authority" in business. The campaign, designed to build ad sales and circulation, was coordinated by Bozell & Jacobs.

Ad sales continued to grow this year, and Mr. Wrede has predicted his leading publication is back on course.

Ad sales were aided in March by the introduction of the *Corporate Scoreboard* issue. The publication is a separately published comprehensive reference to the fiscal fortunes of 1,200 corporations, complete with balance sheets, inflation charts and detailed looks into research and development expenses. It attracted 120 ad pages in its inaugural run.

Business Week also doubled the number of issues of its *Career Guide*, from two to four each year. The special issues, which cover the job market from a beginner's vantage point, are aimed at the 19-to-22-year-old college student. Last year, they drew 47 pages of advertising in their first two issues.

The use of ad-generating special issues was evident at other McGraw-Hill publications as well. *BYTE* and *Popular Computing* both will put out two additional issues this year. *BYTE* plans a guide to IBM PCs in August and a similar issue devoted to Apple computers in October.

Popular Computing has on tap a guide to education for September and an issue devoted to recreational equipment in November.

Both magazines had good years in 1983, with *BYTE's* ad pages rising 8%, to 4,306, and *Popular Computing's* 93%, to 1,615. Company officials plan to make an announcement later this year about new developments in customer service for these magazines, but for now are remaining tight-lipped about specifics.

Last year, when the economy rebounded, several McGraw-Hill trade publications covering recession-racked industries also took a turn for the better. Showing significant improvement were *Architectural Record*, *Electrical Construction & Maintenance* and *Engineering News-Record*.

The trade magazine *Electronics* has been expanded to a weekly from every-other-week status and renamed *Electronics Weekly*. In addition, four publications have been spun off to service the specialty electronics market: *Computer/Systems Equipment Design*, *Communications/Systems Equipment Design*, *Military/Space Electronics Design* and *Industrial Electronics Equipment Design*.

lion in revenues, and broadcast contributed $105.9 million. With the increase in 1983 sales, net income climbed 10.4%, to $35.9 million.

In 1983, the daily papers averaged an increase of 6% in ad linage, posting 182 million lines, up from 171.2 million lines in 1982. However, circulation inched up only 1% to 2%. "It was relatively flat because of the saturated markets we are in," vp David L. Jordan says.

Revenues from the company's 33 Southern California weekly newspapers "made gains in 1983," Mr. Jordan says. In aggregate, he says, the two groups of weekly community newspapers—Highlander Publications and Golden West Publishing—reach more than 600,000 households.

"While the recent recession had a negative impact on the nondailies' market, especially in real estate and construction, there was a rapid recovery in 1983," Mr. Jordan stresses.

Over-all, he says, the strong gain in newspaper revenues primarily was due to a strong economy. However, the strong showing made by the broadcast divisions was not only due to the strong economy, but to the better-than-ever showing by Media General Broadcast Services, formerly William B. Tanner Co., Memphis, Mr. Jordan explains.

For the purpose of this analysis, Ad Age figures do not include ad placement revenues from Media General Broadcast Services, the media buying arm of the company.

The division faced considerable problems in August, 1983, when the William B. Tanner subsidiary—purchased in mid-1982 for about $39 million, plus $32.5 million contingent on future profits—became the target of a federal investigation into possible tax fraud and bribery charges.

The name change was an effort to counteract the negative publicity arising from the federal investigation of the company, which buys and sells tv and radio time as its basic business.

In March, Media General Corp. filed lawsuits seeking more than $230 million in damages against William B. Tanner and some of his associates, charging them with fraud and other wrongdoing in the sale of Mr. Tanner's former company to Media General.

Mr. Tanner denounced charges filed against him as "outright lies" inspired by Media General's inability to run his former company profitably after dispensing with his services last August.

In January of this year, a federal grand jury started investigating allegations in an FBI affidavit that Mr. Tanner illegally concealed millions of dollars in advertising revenues, and that he handed out kickbacks and payoffs to obtain advertising accounts.

The Media General subsidiary currently is operating "with a completely new management, headed by James A. Linen IV, a senior vp at Media General, and there have been some major changes to bring this subsidiary into conformity with our over-all standards and operating policies," Mr. Jordan says. Mr. Linen serves as chairman-ceo, Media General Broadcast Services, while L. Donald Robinson is president.

Discussing the changes at the company he now heads, Mr. Linen says the Media General subsidiary has not been unduly hurt by publicity that surrounded Tanner Co.

Mr. Linen says the name change was one effective way to assure both current and future clients that the company was on solid ground.

In addition to Media General Broadcast Services, Media General's broadcast division includes three tv stations, a cable system in Fredericksburg, Va., and a new major cable system being constructed in Fairfax County, Va.

In tv—with NBC affiliates in Jacksonville and Tampa, Fla., and an ABC affiliate in Charleston, S.C.—the company intends to continue its program calling for significant capital outlays aimed at modernizing each station, a company spokesman says. For example, the company's WXFL-TV in Tampa has been equipped with the technological tools to produce high quality commercials with a minimum of expense and time, and it is expected to become the center for such work on Florida's West Coast, company officials say.

In the cable field, the company's system in and around Fredericksburg, Va., has 10,000 subscribers—or about 60% of all available households.

The cable system serving Fairfax County also continues to grow. About 60% of households passed subscribe to the system, one of the more technologically advanced systems with 126 channels fully addressable at the studio, interactive capabilities including pay-per-view programing and home security services.

Cliggott Publishing Co., Greenwich, Conn., leading publisher of medical journals, has had a fourfold increase in revenues since it was acquired seven years ago. Its principal publication is *Consultant*, a monthly journal that is distributed to 121,000 physicians. In addition, the company publishes the *Journal of Respiratory Diseases*, distributed to 74,000 doctors, and *Psychosomatics*, distributed to 35,000 psychiatrists.

A new publication introduced in the fall of 1983 is the *Journal of Musculoskeletal Medicine* and is distributed monthly to 80,000 physicians. The Cliggott group also includes Marketplace Publications, which distributes five direct response publications in booklet format to about 800,000 physicians, dentists, corporate presidents, attorneys and accountants. Advertised products are directed to the life style of those professionals.

Another auxiliary holding is Media General Financial Services, with several publications relating to stock market data and an extensive database covering 4,100 public companies.

The database is available to customers in a variety of ways, including through the sale of computer tapes, contracting for special analyses or time sharing. Some of the data are available through the Dow Jones News Retrieval Service.

Data also are provided to a number of trade publications and to newspapers through a joint venture with the Associated Press, reaching 16 million subscribers.

"With the explosive growth in personal and home computers, it is anticipated that there will be a growing demand for our database and related services," the company says.

Meredith Corp.

Revenues	1983	1982
Media	$288,900,000	$275,400,000*
Other	158,800,000	173,700,000
Total	$447,700,000	$449,100,000

*Restated

Meredith Corp., Des Moines, is the 34th largest media company with media revenues of $288.9 million, or 64.5% of total revenues of $447.7 million for fiscal 1983, ended June 30. The company had record net earnings of $33.3 million, which included a gain of $3.8 million from the sale of radio properties.

Meredith media revenues, which increased 4.9% over 1982, come from magazines, newspapers, tv, radio and cable.

Company revenues, which were down 0.3% from 1982, appear to be on the rebound, however. Nine months into the 1984 fiscal year, Meredith had net earnings of $29.8 million on accumulated revenues of $333.9 million. This compares with net earnings of $22.5 million from revenues of $339.3 million for the comparable period in fiscal 1983. The latter figure included a $41 million contribution not found in 1984 from the Des Moines printing operation.

The printing operation was transferred in February, 1983, to Meredith/Burda Co. Ltd. Partnership. Meredith retains a 50% equity interest in the Meredith/Burda affiliate.

Meredith in 1983 had magazine revenues of $188.8 million, up from $187.6 million; broadcast revenues of $88.5 million, up from $78 million; $2.7 million from cable, up from $900,000, and $9 million from newspapers, the same as in 1982. A book division, not considered media in Ad Age's media terminology, contributed $77.8 million, up from $77.1 million in 1982.

During fiscal 1983, Better Homes and Gardens maintained its circulation of 8 million for the eighth consecutive year and its position among the five largest circulated magazines in the country. Cost reductions resulted in a larger profit contribution for the magazine, despite a decline in ad pages and lower ad revenues. Total advertising revenues for its May, 1984, issue reached $12.8 million, making the issue the most lucrative in the magazine's history.

Metropolitan Home achieved record revenues during fiscal 1983 despite about the same circulation level (730,000) and a decline in ad pages of 9%, to 733.

Successful Farming reported the second highest revenues in its history—despite the worst agricultural economy since the Depression. The magazine, with a circulation of 680,000, had fewer ad pages but a larger share of the ad market.

Forty-one editions of 20 titles were published by the *Better Homes and Gardens* Special Interest Publications during 1983. While the SIPs included fewer ad pages over-all, newsstand copy sales picked up during the last half of the year, particularly in home building and remodeling titles.

Over-all magazine ad pages during the first nine months of fiscal 1984 have exceeded the level of the like period the year earlier. A new magazine, *Better Homes and Gardens WOOD*, will begin publication Aug. 21. *WOOD* is designed both for the novice and the expert woodworker and will feature detailed home woodworking and do-it-yourself project plans as well as articles on woodworking tools and the origins and properties of woods.

Country Home now is being offered on a subscription basis. Previously, the magazine was offered only through newsstand sales. *Country Home*, which has a circulation of 600,000, will continue to be published six times a year.

KPHO-TV, Phoenix, WNEM-TV, Bay City-Saginaw-Flint, Mich., and WPGH-TV, Pittsburgh, Pa. generated significant revenue gains for Meredith's broadcasting group during fiscal 1983. KPHO maintained its position as the leading major market independent station in the nation. WNEM earned the highest revenues and profits in its history. WPGH has shown a steady improvement in market share since its acquisition.

The company acquired two tv stations during the fourth quarter of fiscal 1983: KSEE, an NBC affiliate in Fresno, Cal., was purchased for $17.6 million from San Joaquin Communications Corp., and Meredith bought the remaining interest (60% for $16 million) it did not already own in Omega Communications of Orlando, Fla., which owns WOFL, an independent uhf station serving Orlando-Daytona Beach.

In June, 1983, the company sold its Kansas City radio properties, KCMO (am) and KCEZ (fm) for $7.5 million to Fairbanks Broadcasting Co. of Kansas City Inc., Indianapolis. It has continued to sell radio properties in fiscal 1984, divesting itself of Omaha stations, WOW (am) for $2.1 million to Omaha Great Empire Broadcasting and KEZO (fm) for $3.35 million to Albimar Communications of Boston.

Meredith through Star CATV Investment Corp., Waxahachie, Tex., moved into southern Arkansas during May, 1983, by acquiring several systems from Omni Cable TV Corp. The cable company's major activity is in Texas and Louisiana. By January, 1984, Star had 26,722 subscribers and 66,206 homes passed.

Meredith's book publishing division, with revenues of only 0.9% higher in 1983 than 1982 and operating profit of $6.6 million, down 16.8% from 1982, added 18 new titles during the year, bringing to 85 the number of *Better Homes and Gardens* books. About 22 new titles are being published in fiscal 1984.

Security Systems; Separations Inc. owned 50% by Meredith.

Metromedia Inc.

Revenues	1983	1982
Media	$383,588,000	$326,800,000
Other	149,171,000	80,274,000
Total	$532,759,000	$407,074,000

Metromedia Inc., Secaucus, N.J., is the country's 24th largest media company with revenues of $383.6 million in 1983, up 17.4% from 1982. Media revenues were 72% of total revenues of $532.7 million for the company, whose top management took it private in mid-June in a leveraged buyout.

Metromedia gleans its media revenues from broadcasting and outdoor. For the year, broadcasting revenues accounted for $371.6 million, up 14.6% from 1982; outdoor came to $12 million, up from $2.6 million in 1982.

Broadcasting operating income came to $109.3 million, up 0.3%, and outdoor was $6.8 million, up 194% from the previous year.

Total corporate revenues, which increased 31%, as income from operations (before corporate expenses of $17.3 million were extracted) totaled $126.6 million, up 17.7% from the previous year. Metromedia's other prime contributors to revenues during the year were entertainment and telecommunications.

Entertainment amounted to $81.5 million (up 3.6%) with income from operations of only $1.3 million (up from a loss of $4.4 million in 1982); Metromedia's rapidly developing telecommunications division had revenues of $67.3 million, up from only $1.9 million, and income from operations of $9.2 million, up from $413,000 in 1982.

In broadcasting, sales from the company's seven owned tv stations increased 20.4% from 1982. However, the company says sales from its seven am and six fm radio stations declined.

After aggressively building its tv station holdings over the past several years (the most costly of which was WCVB-TV, Boston, for $220 million), industry observers have speculated that Metromedia later this year may decide to sell one of its more lucrative tv outlets, a probable candidate being WCVB. Metromedia's seven owned tv stations cover about 25% of the country's available tv audience.

Metromedia, in keeping with the FCC's crossownership rules, sold WMET (fm) Chicago to Doubleday Broadcasting Inc. for $9.5 million, while purchasing WFLD-TV Chicago for $136 million in May, 1983. Seven months later the company purchased KNBN-TV, a uhf station in Dallas, for $14.9 million. WTCN-TV, Minneapolis, and WXIX-TV, Cincinnati, were sold in exchange transactions in 1983 to comply with FCC regulations limiting the number of tv outlets a company can own.

However, it is likely that WCVB would be sold under such circumstances to a limited partnership that would maintain it as a Metromedia outlet. During the past year, Metromedia has conditionally sold a number of its real estate properties (with future options to buy them back) to raise funds for its rapid cellular radio activities.

Growth in the telecommunications division reflects the company's aggressive acquisition of cellular radio licenses in major markets such as Chicago, New York, Boston, Philadelphia and Los Angeles. Metromedia has spent close to $1 million applying for each of about 50 cellular radio licenses and is expected to spend about the same amount to construct each system awarded.

Cellular radio is expected to become Metromedia's primary focus now that the company has gone private through a $1 billion leveraged buyout, approved by stockholders June 19.

There has been heavy speculation that the company would spin off its cellular radio operation in a public offering once it becomes an established money maker.

Metromedia is expected to try to sell about $300 million in assets to supply final funding for the record buyout.

John W. Kluge, 60, Metromedia chairman-president-ceo, and three members of his executive branch—Robert M. Bennett, senior vp Metromedia and president Metromedia Broadcasting; Stuart Subotnick, senior vp-finance and administration, and George H. Duncan, senior vp-telecommunications—will put up $12 million in cash and finance the remainder of the transaction with loans from an insurance company, a venture capital company and various banks.

Under terms of the buyout, Mr. Kluge (who currently controls 26% of the common stock) will own 75.5% of Metromedia. The three senior executives will own 2% each. Boston Ventures Ltd. will own 3% and Prudential Life Insurance Co. will own 15.5%. However, all voting stock will be divided among Metromedia's four officers, with Mr. Kluge claiming a majority of 92.6%.

After 25 years at the helm of the company, Mr. Kluge says he believes that Metromedia will be worth more as a private company, which he will manage to maximize the company's cash flow. He has had to maximize Metromedia's earnings as a public company and then suffer the wrath of market analysts. Although Metromedia has been able to generate sufficient cash flow to underwrite its phenomenal growth during the past several years in the tv properties and program production areas (in addition to cellular radio), the company has had problems posting the earnings growth that impresses Wall Street analysts.

These analysts speculate that once Mr. Kluge leaves the company, Metromedia could become the target of acquisition by a larger concern or might even revert to being a public company.

Metromedia officials contend that the leveraged buyout will not interfere with the company's continued leadership role in broadcast ventures. The company continues to engage in coproduction with a variety of other major companies—such as Turner Broadcasting Systems, MGM/UA and TelePictures—and is increasing its own singular programing efforts.

This fall, Metromedia and TelePictures will launch the syndicated soap opera "Rituals," a five-day-a-week, year-round venture. Metromedia also has lined up Jerry Lewis to host a new late-night talk show that could begin as early as next season.

During the past year, Metromedia Producers Corp. has been a partner in the struggling "Thicke of the Night" late-night variety talk show, the news-feature magazine "BreakAway" and the first-run syndication continuation of such former network series as "Fame" and "Too Close for Comfort." It also recently launched the ambitious two-hour live variety series "On Stage America," which costs about $800,000 an hour to produce.

Metromedia also has spent a considerable amount (an estimated $10 million at its Houston tv station alone) beefing up its local news operations with an eye toward reviving its hopes for a national news service.

Morris Communications Corp.

Revenues	1983	1982
Media	$196,360,000	$117,600,000
Other	2,640,000	2,400,000
Total	$199,000,000	$120,000,000

Morris Communications Corp., Augusta, Ga., is the country's 50th largest media company, with 1983 media revenues estimated by ADVERTISING AGE at $196.4 million, representing a 67% increase over 1982 media revenues.

Total revenues of the privately held company are estimated at $199 million, up 66% from 1982's estimate.

Nearly all of Morris' revenues are generated by its weekly and daily newspapers scattered throughout Georgia, Florida and Texas—and nearly all of the company's 67% increase in media revenues during 1983 stems from its newest and largest property, Florida Publishing Co., purchased from CSX Corp. in late 1982.

Sources say Morris paid $211 million for CSX's one weekly and three daily newspapers, outbidding several other publishers by more than $40 million.

The Florida group, the sources report, added about $67 million to Morris coffers last year, $7 million in circulation revenues and $60 million from advertising. Those figures, on the strength of 1983's economic recovery, were up about 12% from the previous year.

In the deal with CSX, Morris acquired Jacksonville's only daily newspapers, the morning *Florida Times-Union* and the evening *Jacksonville Journal*, and their combined daily circulation of 205,707. Also included in the package were the daily *St. Augustine Record* (11,498 circulation) and the weekly *Crescent City Courier-Journal* (2,150).

Despite entailing few cosmetic changes, Morris' ownership has had a dramatic effect on the Jacksonville newspapers. In addition to boosting their advertising-to-editorial ratio, Morris' purchase has resulted in substantial personnel changes at the *Journal* and *Times-Union*.

As it has in previous newspaper takeovers, the company cleaned out top management, bringing in executives from its other newspapers; a number of additional staffers left on their own.

Morris combined what was left of the previously separate *Journal* and *Times-Union* editorial staffs and installed James Whyte, formerly of the company's Amarillo, Tex., dailies, as general manager.

Former *Times-Union* and *Journal* staffers term the Morris takeover "a very disappointing turn of events," citing "holding down expenses" as the company's apparent chief strategy.

In comparison, they describe the management style of former owner CSX, a railroad operator based in Richmond, Va., as "very hands-off."

The resentment expressed by the newspapers' editorial staff apparently has not spread to subscribers. Says one Jacksonville advertising executive, "The biggest conflict they've generated among the public is the comic strips they've chosen—except when they moved the weather to page two."

Although the *Times-Union's* daily circulation, most recently placed at 162,831, is more than double that of any other Morris paper, the market it serves is very similar to the parent company's other areas of operation. As in Jacksonville, the company has a newspaper monopoly in the Georgia markets of Savannah, Athens and Augusta, and in Amarillo and Lubbock, Tex. It publishes a morning and an evening newspaper in each city.

With a combined daily circulation of 79,042 for the *Chronicle* and *Herald*, Augusta, where Morris is based, is the company's second-largest market. It also publishes the *Savannah News* and *Press* (77,505 combined daily circulation); the *Amarillo News* and *Globe-Times* (75,720); the *Lubbock Avalanche-Journal* and *Lubbock Evening Journal* (75,099); the *Athens Ban-*

Scanners don't lie.

And 5000 scanners in 700 stores across 100 SMSA's tell more truth than even George Washington dreamed of. And that truth is available to you through National Scanning Services. The service that gives you a bigger chunk of reality. Reality instead of estimates. Reality instead of interpretation.

Because National Scanning Services gives you what everybody wants. Up-to-the-minute actual *sales.*

But even actual sales data doesn't do anyone any good if it's old news. That's why National Scanning Services gives you full market data on a monthly or even *weekly* basis. And let's face it, it's speed that wins the race.

Of course, National Scanning Services doesn't guarantee you'll like everything you hear. But then, all we promise is the truth.

ner-Herald and *News* (23,099), and the *Juneau Empire* (7,400) in Juneau, Alaska. The circulation for the 14 daily papers is nearly 555,000. Circulation figures for all Morris newspapers have been very stable: the company reports no significant gains or losses in any market.

Morris publishes three weekly newspapers in Georgia, one in Florida and one in South Carolina with total circulation of 18,555.

Early in 1984, Morris sold the Tampa *Neighbor*, a free distribution weekly, to Harte-Hanks.

The company's lone magazine is *Quarter Horse News*, published every other month, with 5,000 subscribers, based in Fort Worth, Tex. Morris also operates four job printing operations, each located in one of its newspaper markets.

Multimedia Inc.

Revenues	1983	1982
Media	$269,700,000	$225,500,000
Other	—	—
Total	$269,700,000	$225,500,000

Multimedia Inc., Greenville, S.C., is the country's 36th largest media company, with revenues of $269.7 million in 1983, all from media operations. This was an increase of nearly 19.6% from 1982.

Broadcasting accounted for 47% of Multimedia's 1983 revenues, down from 49% the year earlier; newspapers generated a 34% share of revenues, down from 36%. Cable provided about 20% of revenues, up from 15%.

Net earnings climbed from $28.9 million in 1982 to $35.2 million in 1983.

The strong financial position of Multimedia made it an attractive topic of takeover conversation in 1983. It has "good cash flow, low debt and it's underpriced," says analyst Sharon Armbrust, whose cable consulting company, Paul Kagan & Associates of Carmel, Cal., has reported Multimedia "a rumored candidate for a leveraged buyout."

Multimedia, however, strongly resists any suggestion that the company is in line for takeover. "That will never happen," says Hollyce Huff, director of corporate and financial communications. "We have a lot of old-line and family holdings [among the stockholder base]."

Meanwhile, at least one major securities company says Multimedia's strong performance should continue. Standard & Poor's says its "long-term earnings prospects are favorable," and "revenues of all major operating divisions are expected to advance strongly in 1984, aided by growth in broadcasting and newspaper advertising."

Standard & Poor's attributes its highly favorable prediction to the boost the company's advertising revenues should get from the economic recovery, the Olympics, the elections and more cable subscribers. The only problem it sees is higher programing costs.

On April 3, Multimedia stepped into the pay cable arena when Sports Time began operations. Multimedia is a minority owner of the network with brewing giant Anheuser-Busch and Tele-Communications Inc.

The sports programing station, based in Wichita, Kan., operates about 80 hours a week and is available to 1,600 cable companies, or about 1.2 million subscribers, in 15 states, according to Jerry Lovelace, manager of communications, Sports Time.

Sharing a satellite with the Financial News Network, Sports Time operates after 6 p.m. Mr. Lovelace says some 30,000 paid subscriptions were expected by the end of the first month. That would be 5% to 10% above initial projections.

Sports Time officials say they expect their subscriber base to be about 150,000 after the first year, and they will hit a break-even point after three years.

Competing for the sports fan of middle America, Sports Time differs from its 24-hour rival Entertainment & Sports Programming Network in that it will not be a national network and it will operate for a limited time daily.

Sports Time stresses three things: "Regional coverage, live programing [one live broadcast a day, at least] and exclusivity," Mr. Lovelace says.

Elsewhere in the communications conglomerate another change is in the offing. The company's production arm, Multimedia Entertainment Co., which controls the successful "Donahue" show, is preparing to move the property from Chicago to New York. According to Ms. Huff, the show, hosted by Phil Donahue, will begin broadcasting from New York in January and will undergo some format changes.

Meanwhile, Multimedia is awaiting the results of an appeal of the $5.9 million judgment against "Donahue" as the result of a parental child-custody case. A federal court jury in Denver awarded the money a year ago. Multimedia has appealed and is optimistic about having the ruling reversed.

In its broadcasting division, the company is putting considerable effort into the operation of its KSDK tv station in St. Louis, Multimedia's largest market. The acquisition took place more than a year ago in a trade with Pulitzer Publishing Co. for tv stations in Greenville, S.C., and Winston-Salem, N.C., plus about $8.8 million in notes. Terming the acquisition a good one, Ms. Huff says: "We made money."

Multimedia also made money in its newspaper division, which controls 13 daily newspapers—the only daily and Sunday papers in those markets—and publishes 31 nondailies, including the monthly *Music City News*, weeklies and shoppers.

Ms. Huff says the newspaper operations continued to grow faster than those of other newspaper companies. Multimedia has been shifting many of its afternoon papers to morning publication, and the papers involved "so far are breaking even."

Over-all newspaper revenues and circulation are both up 10%, and profit is up 21%.

In its cable tv division, the company had predicted 223,000 subscribers by the end of 1983, its fourth year in the industry. By last May, its subscriber rolls had climbed to 254,000.

Like other cable operators, Multi-Cablevision Inc. has been trying to consolidate its holdings and find strong acquisitions as the areas for new franchises dry up. Donald Sbarra, a Multi-Cablevision official, says his company is looking at three or four possible acquisitions.

Meanwhile, he says, "We're trying to cluster where we can." That cluster concept led to the swap early last year in which Multimedia picked up four cable tv systems in Oklahoma, with about 30,000 subscribers, for three systems in North Carolina, with about 9,000 subscribers, and $22.5 million in cash.

Behind the clustering drive, Mr. Sbarra says, are "economies of scale, marketing and a concentration of advertising." The company is awaiting the outcome of its Wichita, Kan., lawsuit against retailers that sell satellite receiving dishes, the chief method by which consumers can bypass cable systems. The ground station receivers can intercept, without cost, both traditional and pay tv signals from satellites.

Last year, the company agreed to sell two of its radio stations, WAKY (am) and WVEZ (fm) in Louisville, Ky., for $3.6 million, and radio stations KAAY (am) and KLPO (fm), Little Rock, Ark. In addition, the company still is awaiting FCC word on its application

National Enquirer

Revenues	1983	1982
Media	$142,000,000	$140,000,000
Other	—	—
Total	$142,000,000	$140,000,000

National Enquirer, Lantana, Fla., is the 65th largest U.S. media company with 1983 gross revenues of $142 million, a 1.4% increase from 1982. The all-media company derives revenues solely from two publications, the *National Enquirer* and *Weekly World News*.

Looking on the bright side of the flat year, publisher James Martise calls 1983 "a consolidating year for both publications."

A compilation of global news, features and brights, the four-year-old *Weekly World News* boosted circulation 6% in 1983 to 850,000. Mr. Martise says the tabloid stabilized during the year and no major changes are planned for 1984.

The company in 1984 is focusing on its larger publication, the *National Enquirer*. Circulation dropped 6%, to 4.5 million copies, when the newsstand price went from 45¢ to 65¢ in January, 1982.

Mr. Martise says the company will concentrate less on promoting circulation and mail order advertising and more on recruiting national advertisers, a project started last year.

"Circulation continues to be the largest portion of revenues, but in 1983 advertising revenues rose 10%," Mr. Martise says.

"We are making an enormous effort to position the *Enquirer* in the advertising community as a publication that reaches middle America."

The company has rebounded from actress Carol Burnett's much-publicized $1.6 million libel suit, scheduled for retrial in December, and its public apology to actress Shirley Jones. It is soft-pedaling articles about celebrities and emphasizing what Mr. Martise called "service-type articles."

"Our goal in 1984 is to show national advertisers that perceptions of the *Enquirer* as a sensational publication are not indeed the reality," Mr. Martise says. "We are showing them that the *Enquirer* editorially is dealing with more than food, fashion, beauty and how-to subjects. It is a balance of service, celebrities and human interest articles."

The company cut last year's tv advertising budget to focus on promotional mailings that target key ad executives. It also is advertising in trade publications.

National Enquirer continues to publish informational articles written in conjunction with the Arthritis Foundation, American Heart Assn. and American Cancer Society.

It also works with the Rochester, N.Y.-based Council of Adoptive Parents. Since 1980, 108 of the 192 handicapped and underprivileged children featured in newspaper writeups have been adopted. Nationally known ministers Robert Schuler, Norman Vincent Peale and Billy Graham write regularly for the *Enquirer*.

National Geographic Society

Revenues	1983	1982
Media	$202,000,000	$181,100,000
Other	125,400,000	99,300,000
Total	$327,400,000	$280,400,000

National Geographic Society, Washington, is the country's 48th largest media company with 1983 media revenues of $202 million, or 61.7% of total sales of $327.4 million.

For the year, the National Geographic Society generated operating revenues from advertising and circulation of $25.4 million and $176.6 million, respectively.

The company recorded net earnings of $30.1 million. Media-related losses of $1.2 million last year turned into a $10.9 million gain in 1983.

Over-all, the nonprofit group's earnings were up 46.1%, largely because of a National Geographic Society membership fee increase that went into effect Jan. 1, 1983. Under the new fee structure, which includes a subscription to *National Geographic* magazine, yearly dues increased to $15, from $13.50.

During the year, the *National Geographic*, which has a subscription base of 10.6 million, and the National Geographic Society introduced *National Geographic Traveler*, its first new adult-oriented magazine in 96 years.

National Geographic Traveler, which debuted in March with a rate base of 600,000, is a quarterly travel magazine designed to complement the *National Geographic*.

Since its unveiling, *Traveler* has surpassed its initial rate base of 600,000 subscribers and as of its September issue will increase its guaranteed circulation to 1 million.

Robert L. Breeden, the Geographic's vp-publications, expects *Traveler* circulation to reach 1.5 million by next year.

Geographic officials predict *Traveler* should break even in its first year of publication and will show a profit by 1985, even with its generous 3-to-1 copy to ad ratio.

Circulation for *Traveler's* sister publication, *National Geographic*, was up only 13,000 copies in 1983, but an increase in ad pages from a disastrously low 1982 level boosted ad revenues 35.3%, to $30.3 million. Ad revenues of $16.41 million for the first six months of 1984 are ahead of last year's pace, despite a slight decline in ad pages.

Geographic editor Wilbur E. Garrett boasts the magazine reaches one in every four American households and says that its renewal rate is at a record 85%.

In addition, Mr. Garrett expects circulation figures for the magazine to remain relatively steady during the next several years.

To boost advertising interest, the magazine is in the midst of a $1 million ad campaign that stresses the publication's high-tech oriented readership and impressive demographics. Using the ad themes "National Computergraphic, National Demographic, National Psychographic and International Geographic," the society is attempting to lure more advertisers by flaunting the magazine's upscale and worldwide readership.

Among other points, the ads note that *Geographic* readers have a combined annual income of $300 billion and that one in five adult subscribers owns a personal computer.

The current campaign, which will split its advertising dollars between the spring and fall, is the magazine's first large-scale ad effort in about six years.

Geographic officials continue to be pleased by the success of "Big G," an ad program that allows advertisers to buy space in 36 selected major U.S. markets.

At about half the cost of a regular *Geographic* ad page, Big G has been especially popular among corporate and upscale advertisers.

In other advertising moves, officials in the *Geographic's* ad department say they still are discussing whether to offer joint buys in both *National Geographic* and *Traveler*.

Although the magazine is pushing for more ads, the *Geographic* has yet to lift its ban on alcohol and tobacco ads in domestic editions. It does, however, allow beer, wine and cordial ads in editions sold abroad.

The *Geographic* also notched some editorial successes during the past year. This spring, it won the American Society of Magazine Editors 1984 National Magazine Award, and the *Geographic* dazzled the publishing industry by placing a mass-produced 3-D lasar hologram on the cover of its March issue.

The society's other print property, "National Geographic World," maintains its policy of not accepting ads. Officials say its $13 million in subscription revenues are enough to cover operating costs.

"National Geographic World," which is geared toward children between the ages of 8 and 13, is expected to maintain its 1.5 million subscription level through 1985.

Society officials continue to be mum about plans to expand into cable tv by building on the following of the popular National Geographic tv specials. Last year, National Geographic Society president Gilbert M. Grosvenor said he was negotiating with pay tv companies such as Communications Satellite Corp., but since then there has been no comment on cable or satellite ventures.

News America Publishing

Revenues	1983	1982
Media	$323,000,000	$270,000,000
Other	—	—
Total	$323,000,000	$270,000,000

News America Publishing, New York, the U.S. branch of Rupert Murdoch's international News Corp. Ltd., is the country's 30th largest media company, with estimated U.S. revenues of $323 million, up 19.6% from 1982.

Total revenues for the fiscal year, ended June 30, 1983, were all in media for News America and did not include returns from the *Chicago Sun-Times*, bought after the close of the fiscal year. News America's parent had net income of $79 million for fiscal 1983, a 98% gain over the previous year, while revenues were up 2%, to $1.37 billion, attributable to gains at most of the British and U.S. holdings.

In November, 1983, Mr. Murdoch indulged his penchant for buying media properties by purchasing the *Sun-Times* from Field Enterprises for $90 million in cash, outbidding the *Sun-Times'* publisher, James Hoge, whose syndicate of local investors had bid $63 million.

The deal, which included real estate and other communications assets, was closed Jan. 9, 1984. The newspaper, the nation's ninth largest daily in circulation, had been offered for sale in April, 1983, by Marshall Field V and Frederick Field, equal partners in Field Enterprises. The *Sun-Times* in fiscal 1983, ended Sept. 30, had revenues of $161.4 million and net income of $3.3 million.

On the day of the sale, four top *Chicago Sun-Times* executives resigned including Mr. Hoge. Pulitzer Prize-winning columnist Mike Royko also left for Chicago's No. 1 daily and the *Sun-Times'* direct rival, the *Chicago Tribune*. Robert E. Page, publisher of News America's *Boston Herald*, succeeded Mr. Hoge as publisher.

In another acquisition, at press time, News America had reached an agreement to acquire *New Woman* magazine from New Woman Inc., Palm Beach, Fla. The monthly magazine has a circulation of 1 million.

News Corp.'s only two U.S. properties to lose money were the *New York Post*, New York's No. 3 paper, and the *Boston Herald*.

The *Post*, purchased in 1976 for $27 million, has recorded circulation gains from 489,000 on the day of its sale to 960,000 as of November, 1983, although it lost $14 million in fiscal 1983.

The *Boston Herald* had a circulation gain to 335,000 in November, 1983, from 228,228 in the similar period a year earlier. The paper's losses decreased from $12 million in 1982 to $3.4 million in 1983.

Losses were offset by profitable U.S. properties such as the *Star*, a nationally circulated tabloid, the San Antonio Express and *News*, and *New York* magazine, making "$14 million last year," according to News America president Donald D. Kummerfeld.

In October, 1983, Mr. Murdoch acquired about 1 million shares of stock in financially troubled Warner Communications, New York, for nearly $20 million.

He stated publicly that he had no intention of turning his 1.6% stake into a controlling interest. By December, 1983, he had acquired a 7% interest in Warner, paying $101.2 million for more than 4.5 million shares, making him Warner's largest individual shareholder. Last January, Mr. Murdoch declared News Corp. was ready to begin a proxy battle for control of Warner, and purchased 1 million additional shares for $29.8 million, bringing his total stake in Warner to 8.5%.

Chris-Craft Industries, in an attempt to thwart a News Corp. takeover, arranged an asset swap involving 42.5% of its tv subsidiaries in exchange for a 19% stake in Warner. The 15-week battle ended in March, when Mr. Murdoch agreed to sell News Corp.'s shares to Warner for $180.6 million, making a $41 million profit.

News America is the holding company for Skyband Inc., Secaucus, N.J., formerly Inter-American Satellite Television, New York, a direct broadcast satellite service, purchased in April, 1983.

Plans to offer five channels of pay tv programing to U.S. subscribers have been postponed indefinitely. Mr. Murdoch also purchased 69% of the struggling pan-European Satellite Television (SATV) network in early 1983, drastically cut its rate card to attract advertisers and expanded broadcast hours from two to five a night, with another two hours added in March, 1984. SATV plans to expand into Britain this year and to explore broadcasts in Holland and Germany.

New York Times Co.

Revenues	1983	1982
Media	$1.073 bil	$890,600,000
Other	18,000,000	43,100,000
Total	$1.091 bil.	$933,700,000

New York Times Co., the nation's 11th largest media company, surpassed $1 billion in media revenues for the first time in 1983. Sales for newspapers, magazines, and broadcast and cable tv stations in 1983 reached $1.07 billion, up 20.2% from 1982.

Media revenues, which were 95.4% of total revenues in 1982, rose to 98.2% of $1.09 billion in total revenues in 1983. Total revenues increased 16.7% from 1982.

Books, information and education materials account for the remaining revenue, although that is changing. With the sale in 1983 of Education Enrichment Materials and Teaching Resources Corp., New York Times Co. has vacated the educational materials field.

Net income for the corporation rose 45%, to $78.7 million.

Continuing this pace, the first quarter of 1984 saw revenues increase 15%, to $297.3 million, from the first three months of 1983. The biggest gain was from magazines, a 34.1% boost to $55 million, although part of that increase was the result of an extra weekly published by *Family Circle* in the 1984 first quarter. Newspapers, the biggest segment of the company's business, recorded a 17.4% increase in the first quarter of 1984, to $228.4 million, while revenues from broadcasting and cable tv rose 15%, to $13.8 million.

The company's investment in new plants and equipment increased 37%, to $79.7 million in 1983 with plans to keep capital investment at that level in 1984. New York Times Co., with a reduction in long-term debt, described itself as "positioned now for further growth through both acquisitions and international development."

Last year was not a particularly major one in acquisitions, although the company had completed the purchase of 12 newspapers in late 1982, expanded its cable involvement through joint ventures and was reported to be more aggressively seeking magazine properties. It was said to be after *Gourmet* magazine, eventually sold to Conde Nast Publications. In 1984, it acquired *Cruising World*, a sailing book.

The *New York Times*, the flagship publication of the company, won two more Pulitzer Prizes in 1983, bringing it to an industry-leading 52. Ad linage in 1983 rose to 104 million lines in 1983, reflecting a 3.2% increase in retail and a 7.2% boost in national advertising; classified was down 1.1%. On the circulation side, average paid circulation rose 6,000, to 935,000, while Sunday circulation was up 28,000, to 1.55 million.

Ad gains increased into the first quarter of 1984. Total linage was up 4.9%, to 25.1 million, with classified showing the strongest gain (up 13.3%, to 5.8 million), followed by national (up 7.6%, to 8.5 million) with retail showing a decline (down 1.1%, to 10.8 million).

The *New York Times'* national edition is figuring more prominently in the newspaper's goals. The newspaper filed for status with the ABC as a national newspaper.

Also, national edition printing sites were added in Walnut Creek, Cal., and Austin, Tex., bringing the total to five. A goal has been set at 100,000 copies daily and 200,000 copies on Sunday for this edition.

Increased emphasis on the national edition was said to be one reason the newspaper, when looking for an ad agency to replace McCann-Erickson on its $4 million account last year, went to Bozell & Jacobs, an agency with 12 U.S. offices.

The *New York Times Magazine*, suffered a 9% decline in ad pages in 1982, but was up 82 ad pages in 1983, to 4,196, a 2% gain. It continued to add magazine Part 2 sections with the addition of a second "Sophisticated Traveler" section in October.

The regional newspapers, of which there are now 18, showed circulation growth, although not ad linage gains. Daily circulation rose 4.4%, to 284,000, while Sunday circulation increased 5%, to 251,800. For the weeklies, the circulation gain was 5.7%, to 46,100. The regional newspaper headquarters were moved from Lakeland, Fla., to Atlanta last year, and one of the weekly papers in that group, the *Zephyrhills News* in Florida, was sold.

Altogether, newspaper group revenues rose 23.6%, to $833.2 million in 1983, with the first quarter of 1984 showing a 17.4% revenue gain, to $228.4 million, compared with $194.5 million in the first three months of 1983.

The magazine group's revenues rose to $186.4 million and operating profit to $16.4 million in 1983. If $8.4 million recorded in 1982 from the sale of the company's Australian magazine operations were not included, those 1983 figures would represent a 16% revenue increase and a 7% operating profit boost. The first quarter of 1984 showed magazine revenues rising 34.1%, to $55 million, and operating profit ahead 44.3%, to $6.1 million.

A major investment was made last year to upgrade *Family Circle*, the largest magazine in the group. That publication's ad pages were up 96 pages, to 1,790, in 1983. *Golf Digest*, which boosted its circulation rate guarantee from 1,025,000 to 1,150,000, also had an ad page gain of 174 pages to bring it to 1,053 pages for the year. *Tennis* magazine, which increased its circulation rate base from 460,000 to 500,000 copies, had an ad page gain of 165 pages, to 924.

In the broadcasting-cable tv group, the company's three CBS affiliate tv stations all maintained their leading market positions in 1983. Revenues in this segment of the business rose 13.6%, to $53.4 million, while operating profit was up 80.9%, to $4.9 million.

Profits continued to leap in this area in the first three months of 1984 with revenues rising 15%, to $13.8 million, and operating profit jumping 191.8%, to $1.09 million.

The company's NYT Cable was an investment focus as newly constructed facilities were opened in Cherry Hill, N.J., which moved headquarters from Audubon, N.J. Cable subscriptions were up from 98,500 to 110,000 in 1983. NYT Cable last year also completed the test of a two-way system and began installation of an interactive system in Fort Dix, N.J. Also in the cable area, the company formed a joint venture with Warner Communications to produce and distribute informational programing for cable tv.

Oak Industries

Revenues	1983	1982
Media	$106,246,000	$139,000,000
Other	320,172,000	406,700,000
Total	$426,418,000	$545,700,000

Oak Industries, Rancho Bernardo, Cal., is the country's 85th largest media company, with media operations accounting for $106.3 million, or 25% of total 1983 revenues of $426.4 million.

Media revenues declined more than 24% from last year's $139.0 million. Total revenues also dropped nearly 22%.

Media revenues were contributed by Oak Media Corp., which operates three ON TV over-the-air subscription tv systems in Los Angeles, Chicago and Miami-Fort Lauderdale.

The company owns 100% of WKID (tv), which broadcasts the stv service in the Miami-Fort Lauderdale market. It also own 100% of KBSC-TV, which carries ON TV in Los Angeles. In Chicago, the company does its stv broadcasting via a 50% owned joint venture and owns a 49% interest in WSNS-TV, which carries the stv service.

Oak Media also sells ON TV programing in other pay tv systems through a satellite distribution service.

Oak Media had an operating loss in 1983 because of a decline in the ON TV subscriber base. During the year, Oak closed its ON TV systems in Phoenix and Dallas. At the end of the year, the three remaining systems had less than 345,000 subscribers. This represented a 41% decline from the subscriber base at the beginning of the year. These declines have continued into 1984.

In Chicago, ON TV bought out its only competitor, United Cable's Spectrum. Spectrum's subscriber count of 37,000 is down from a high of 60,000, and Oak's has declined to 87,000 from 100,000. ON TV made its debut in the market in Sepember, 1983, followed by Spectrum a year later.

Last fall, Oak Media turned management of operations of ON TV over to Twin Arts, an affiliate of Ritter/Geller Communications Inc., publisher of *Playgirl* magazine. This responsibility also covers the acquisition, production and scheduling of ON TV programing

OTHER OPERATIONS

Oak Communications produces both addressable and nonaddressable converters, converter/decoders and decoders for use in cable tv, over-the-air subscription tv and satellite tv systems. Racal-Oak Ltd., a British joint venture with Racal Electronics PCL, is developing pay tv in Britain and Europe. Oak also manufactures and markets a broad line of laminates used in the making of printed circuit boards.

Oklahoma Publishing Co.

Revenues	1983	1982
Media	$335,200,000	$302,C00,000
Other	N/A	N/A
Total	N/A	N/A

Oklahoma Publishing Co., Oklahoma City, is the 27th ranked media company in the U.S. with media revenues estimated by ADVERTISING AGE of $335.2 million in 1983, a 10.7% increase over 1982 media revenues.

OPUBCO, as it is known, is the tightly held, tight-lipped media arm of the Gaylord family of Oklahoma City. Its media contributions come from newspaper operations in Oklahoma and Colorado, the *Oklahoma/Texas Farmer-Stockman* magazine, and from Dallas-based Gaylord Broadcasting.

The company, through its Gaylord subsidiary, ventured into new turf in 1983 through the acquisition of Opryland properties in Nashville, Tenn., which also included radio station WSM (am, fm), the Nashville Network cable network, Opryland theme park, Opryland Productions and Hotel.

The company's largest single media property, the *Oklahoman & Times* newspaper in Oklahoma City, made waves in the market when OPUBCO merged its beleaguered evening Oklahoma Times on March 1, 1984, into the healthy morning *Daily Oklahoman*.

The move came sooner than expected by many in the market. Publisher Edward L. Gaylord only stated publicly for the first time last year that the *Times* was "becoming a dinosaur" and that it might have to be merged, although he noted the paper still was making money.

The *Times* had been losing readers since the mid-1960s when it had 125,000 circulation. It had fallen to slightly more than 82,000 when the merger took place.

The resulting product, called the *Oklahoman & Times*, was launched with the same national ad rate of $63 per inch as in 1983—high for a paper its size—and increased the local rate from $49 to $56 per inch, according to local advertising execs.

General manager Howard J. Nicks has stated the merged product would have a circulation of 275,000 to 280,000, although he gave no time frame.

ABC audited figures as of March 31, 1984, show that one month into the merger, the *Oklahoman & Times* had a daily circulation of 235,759. Just before the merger, the morning and evening paper had a combined circulation of 264,026.

There always has been considerable duplication of circulation between the two papers. This has compounded the problem of determining the paper's reach in Oklahoma City, an SMSA of about 900,000 people. Advertising sources claim the daily reaches 45% of the metropolitan households, although the paper puts its figures at between 70% and 80%. The *Sunday Oklahoman* does have such a reach.

Other activities in the local market include the development of a software products center in which OPUBCO's subsidiary, Datatek, is joining with Battelle Development Corp., Columbus, O., to offer Battelle's BASIS library to the newspaper industry. The system provides software for newspaper library applications. The center also operates as a service bureau to provide businesses with databases for a wide range of applications.

In Colorado Springs, OPUBCO's *Colorado Springs Sun* showed steady circulation gains for the morning paper, which reached 40,595, up 17% from the year earlier; Saturday morning, 40,553, up 17%, and Sunday, 43,465, up 19.5%. The paper also registered total ad linage gains of 2.5% in 1983 over 1982, compared with a 3.8% gain by its competitor and larger-circulated *Colorado Springs Gazette Telegraph* (92,296 for combined evening and morning) run by Freedom Newspapers.

The *Sun's* move to tabloid format early in 1983 and a resurgence of economic activity in the market are credited largely with the circulation and advertising increases.

Gaylord Broadcasting, which has seven tv and three radio properties, got a lot of tradition when it picked up WSM in Nashville. WSM was founded in 1925 by Nashville Life & Accident Insurance Co. as a promotional vehicle.

One of the programs created for broadcast was the Grand Ole Opry, which made its debut that year. The parent eventually became NLT Corp., which sold out to American General Insurance Co. of Houston in 1982. Gaylord bought the operation in September, 1983.

The biggest media asset among the Nashville properties, however, is likely to be the Nashville Network, an advertiser-supported cable network that went on the air in March, 1983, with 7 million subscribers. The subscriber list has grown to 15 million as of March, 1984, qualifying the network for monitoring by broadcast rating services. The network's ad sales and affiliate relationships are handled by Group W. The Nashville Network broadcasts 18 hours a day. Most of the programs are produced at Opryland Productions.

Gaylord also divested itself in 1983 of KYTE-AM and KLLB-FM in Portland, Ore., selling the stations to San Francisco contractor, resort property owner and rancher Charlton Buckley. Price was $3.75 million plus a $750,000 noncompete agreement.

Outlet Co.

Revenues	1983*	1982
Media	$95,000,000	$86,579,000
Other	—	—
Total	$95,000,000	$86,579,000

*Estimated; Outlet went private after its third quarter

Outlet Co., Providence, R.I., the nation's 90th largest media company, had total revenues estimated by ADVERTISING AGE of $95 million, all from media, up 9.7% from the year earlier.

Outlet turned private during the fourth quarter of its fiscal year ended Jan. 31, 1984, when it was purchased by Rockefeller Center Inc. for $335.4 million.

Not part of the sale was WSNE (fm), Taunton, Mass., a Providence-area station. It was sold in January, 1984, to a group of local businessmen for $3.6 million.

Outlet revenues during 1983 came from five tv and five radio stations. The company, which does not segment its broadcast properties for public dis-

If you still believe in me, save me.

For nearly a hundred years, the Statue of Liberty has been America's most powerful symbol of freedom and hope. Today the corrosive action of almost a century of weather and salt air has eaten away at the iron framework; etched holes in the copper exterior.

On Ellis Island, where the ancestors of nearly half of all Americans first stepped onto American soil, the Immigration Center is now a hollow ruin.

Inspiring plans have been developed to restore the Statue and to create on Ellis Island a permanent museum celebrating the ethnic diversity of this country of immigrants. But unless restoration is begun now, these two landmarks in our nation's heritage could be closed at the very time America is celebrating their hundredth anniversaries. The 230 million dollars needed to carry out the work is needed now.

All of the money must come from private donations; the federal government is not raising the funds. This is consistent with the Statue's origins. The French people paid for its creation themselves. And America's businesses spearheaded the public contributions that were needed for its construction and for the pedestal.

The torch of liberty is everyone's to cherish. Could we hold up our heads as Americans if we allowed the time to come when she can no longer hold up hers?

closure, traditionally draws 86% of broadcast revenues from tv and 14% from radio. Allowing the purchase of a Bethesda, Md., fm station in 1983, Outlet generated about $80 million in revenues from tv and $15 million from radio in 1983.

Only revenues for Outlet's first nine months were made public during fiscal 1983. ADVERTISING AGE projected total billings based on an historical reading of fourth quarters at Outlet.

For the nine-month period ended Oct. 31, 1983, the company reported revenues of $71.4 million, compared with $64.3 million the previous year.

Nine-month net earnings from continuous operations for the period were $6.2 million versus $9.7 million the year earlier when the sale of two radio stations produced one-time earnings of $5.4 million.

Aside from being purchased itself in 1983, Outlet acquired in February, 1983, WHFS (fm), Bethesda, Md., for $2.1 million and changed the call letters to WTKS.

Bruce Sundlun, Outlet Co. president-chief operating officer, is chairman-ceo of the Rockefeller Center Inc. unit. David Henderson, Outlet's exec vp, is president-chief operating officer of the Rockefeller-owned company. Joseph Sinclair, Outlet chairman, is a consultant to the company.

Rockefeller Center Inc., which had entered into a period of property realignment in which it divested itself predominantly of real estate and moved into areas of higher return, entered the media fray several years ago as a joint-venture partner with RCA Corp. in the Entertainment Channel. The cable channel closed in 1982 after reportedly recording losses of $34 million before taxes.

With that experience in cable, new acquisitions, if any, will probably continue to follow the Outlet pattern of keeping to traditional broadcast properties, primarily tv, say sources close to the company.

That pattern became apparent in late May, 1984, when Outlet came in a close second to Gulf Broadcast Co., Dallas, in bidding for independent tv stations KTXA in Dallas-Fort Worth and KTXH in Houston. The stations, sold by parent KTXH Inc., went for at least $125 million.

Park Communications

Revenues	1983	1982
Media	$86,300,000	$75,400,000
Other	—	—
Total	$86,300,000	$75,400,000

*Restated

Park Communication, Ithaca, N.Y., renamed from Park Broadcasting after the company became publicly traded on the New York Stock Exchange on Oct. 26, 1983, is the country's 96th largest media company with total net revenues of $86.3 million, all from broadcasting and newspaper properties.

Company net revenues, less commissions, which represented an increase of 14.4% over media net revenues of $75.4 million in 1982, were paced by broadcasting with $42.3 million in gross revenues (includes commission), up 5.6% from the previous year. Contributions came from seven tv stations, seven am and seven fm radio stations.

Newspapers had gross revenues of $44.1 million, up 23.5% from 1982. Total gross revenues were $93.8 million, up 14% from 1982.

The sizable jump in newspaper revenues was attributed largely to new acquisitions, including the daily *Courier News* in Blytheville, Ark., and a companion weekly in nearby Osceola, Ark., acquired in January, 1983, and the daily Waynesboro, Va., *News-Virginian*, acquired November, 1983. The Blytheville paper had audited circulation of 10,580 on March 31, 1983, and the Waynesboro product had audited circulation of 13,168 on March 31, 1983.

The newspaper division has 73 papers, including 25 dailies, 18 nondailies and 30 controlled-distribution weekly shoppers. Park only began accumulating newspapers in 1972 with the acquisition of the Warner Robins, Ga., *Daily Sun*. "At the time, we were well on our way toward accumulating our maximum broadcast properties, and we knew that if we were to grow it would have to be through newspapers," says Roy H. Park Sr., president-ceo.

Mr. Park says the company's acquisition policy is to acquire newspapers in small markets where competition is little to none and where local news—a Park forte—dominates state or national coverage.

The company has not changed its broadcast media lineup since 1977 when it obtained the full complement of tv and radio properties allowed by FCC regulations. The properties are located in the South, West and upstate New York. Mr. Park has stated he has no interest in acquiring cable operations.

The company undertook several capital improvements during the year, installing high technology front-end systems in a number of its newspapers and increasing the height of its tv tower in Birmingham, Ala., so it is now the highest in the market.

Park appears to be ready to acquire more media properties in the future as a result of generating cash from going public. Already in 1984 the company has purchased the *Journal-Register* in Medina, N.Y., a paper with Monday through Friday circulation of 5,002 as of the ABC audited report of March 31, 1984. Along with that purchase came the weekly *Albion* (N.Y.) *Advertiser* and two controlled-circulation shoppers.

The company stated when it filed its public offering (1 million shares of common stock at $17 to $20 a share) that funds may be used for acquisitions in addition to general corporate purposes and a $7.5 million bank note. Although the company is public, Roy Park Sr. owns 89.9%.

Mr. Park's son, Roy Park Jr., runs Park Outdoor Advertising, operating in Ithaca, Jamestown, Binghamton and Utica, N.Y., and Scranton, Pa. The outdoor advertising company, with billings of $2.8 million in 1983 and projected billings in excess of $3 million in 1984, is not consolidated into Park Communications, but is privately owned by Mr. Park Sr. through his RHP Inc. RHP also has real estate holdings, ranging from timberland to commercial properties.

Penthouse International

Revenues	1983	1982
Media	$153,000,000	$165,000,000
Other	12,000,000	10,000,000
Total	$165,000,000	$175,000,000

Penthouse International, New York, is the country's 61st largest media company, with 1983 media revenues of $153 million, a decline of 7.3% from media revenues of 1982.

Media revenues, which account for 92.7% of total revenues of $165 million in 1983, essentially come from *Penthouse* and related publications and *Omni*.

In politics, it's said that as Maine goes, so goes the nation. For Penthouse International, it can be said that as the "men's sophisticates" magazine market goes, so goes the company.

Five of its six publications (the exception being *Omni*) compete in the category, which generally remains in a slump because of changing economic and social factors.

For flagship *Penthouse*, 1983 was another year of declines. Advertising pages fell 4.1%, while advertising revenues fell 7.2%. Circulation at yearend stood at 3.56 million, down 6.4% from year-earlier levels. The magazine's rate base was cut 15%, to 3.4 million, effective with the October, 1983, issue.

There were two bright spots. The declines in ad pages and revenues were smaller, on a percentage basis, than those suffered by rival *Playboy*, and both declines were smaller than those *Penthouse* suffered in 1982—8.8% for ad pages and 8.5% for ad revenues.

The reduction in advertising volume and revenues was "reflected in our bottom line," says David Myerson, exec vp-ceo. Specific figures are not available because Penthouse International is privately held by Robert Guccione and members of his family.

To reverse this trend in ad volume and revenues, Mr. Guccione is taking what Mr. Myerson called "positive steps." By next January's issue, *Penthouse* is scheduled to drastically reduce the amount of service editorial it runs, replacing it with more pictorials, articles and fiction. The magazine also intends to increase its ratio of editorial to advertising to 5 to 1 from a range of 2 to 1 to 2.5 to 1. This reduction of advertising, coupled with the cutback in service features and higher production values, is designed to draw more readers to the magazine.

As for the other magazines the company publishes in the men's sophisticates field, *Forum* circulation has "basically leveled" at 425,000 to 450,000, Mr. Myerson says, "reflecting the decline in *Penthouse*." In earlier years, circulation was as high as 620,000 and more recently topped 500,000. The circulation of *Variations* continues to rise, to about 300,000.

Penthouse Letters, introduced as an every-other-monthly in April, 1983, has a circulation of 300,000 and is likely to increase its frequency to monthly. *Girls of Penthouse* is currently a special publication, but could follow in the footsteps of *Penthouse Letters*. As for *Omni*, which competes in the science category but is unusual in its editorial blend of science fact and fiction, its performance has been "basically spectacular," Mr. Myerson says. Last year ad pages rose 12% to 824 and ad gross revenues rose 16% to $14.7 million, according to Publisher's Information Bureau data.

The monthly's circulation gained by 4.4%, to 802,528, as the mix of subscription to newsstand sales changed somewhat so the former almost pulled even with the latter. This is a departure from the sales pattern of *Penthouse*, which in 1983 made 94.5% of its sales through single copies.

The company remains pleased with results of its program to license foreign editions. There are now seven licensed editions of *Penthouse* (Australia, Brazil, Great Britain, Italy, Japan, Spain, West Germany) and three of *Omni* (Italy, Japan and West Germany). Plans to license a Japanese edition of *Forum* have been carried out, giving Penthouse International three licensed editions in that country.

By this time next year, Mr. Myerson says, there could be a licensed edition of *Penthouse* in France, following a successful recent reintroduction of the U.S. edition into that market.

In Atlantic City, where Mr. Guccione for many years has tried to open a casino-hotel via Apex Properties and Boardwalk Properties, Mr. Myerson expects "some substantial progress" in completing the financing for the project by the end of this summer.

Plans for cable tv activities have been scaled back in favor of broadcast projects. One project is a syndicated show called "$1 Million Pet of the Year Pageant" which aired in April on 42 stations. It lost money. However, Mr. Myerson says the company is "looking forward to doing another pageant in '85."

At Penthouse Films, initial preproduction on "Catherine the Great" has been completed and the company is looking to a joint venture with a major, probably foreign, distribution company, Mr. Myerson says.

A new venture is Penthouse Video, which has released its first videocassette, Penthouse Films' "Caligula," at a suggested list price of $89.95. A second release is expected this summer, "a magazine-of-the-air" type of cassette, with a third release by yearend, Mr. Myerson says.

In books, *Omni* name titles are being emphasized over those bearing the *Penthouse* imprint, according to Mr. Myerson, including a series through Zebra Books and a proposed series of computer hardware and books.

Petersen Publishing Co.

Revenues	1983	1982
Media	$131,000,000	$117,500,000
Other	9,500,000	10,000,000
Total	$140,500,000	$127,500,000

Petersen Publishing Co., Los Angeles, is the country's 73rd largest media company, with media revenues of about $131 million, or 93% of total revenues of $140.5 million. Media revenues were up 11.5% from 1982; total revenues increased 10.2%.

The privately owned company's media revenues come primarily from its 15 special-interest monthly magazines. Petersen also has interests in real estate, restaurants and art galleries.

Petersen president Frederick Waingrow characterizes the company's performance in 1983 as "just about the expected rate of growth." So far in 1984, the company isn't projecting growth quite as dynamic as last year, because of a tightening of newsstand and subscription circulation patterns, he says. Ad pages for all publications for the first six months were up about 7%, but Mr. Waingrow expects total pages to rise about 10% in 1984. Total ad pages in 1983 rose 15.8%, to 10,217.

He expects total revenues for the year will reach $155 million and ad revenues will rise to about $80.5 million from 1983's $71.3 million.

As the U.S. automotive industry began to emerge from recessionary doldrums last year, Petersen's stable of automotive magazines was in a strong position to ride along. *Motor Trend*, a book featuring the latest domestic, imported and exotic cars, and *Petersen's 4-Wheel & Off-Road* have showed gains in both circulation and ad linage.

Petersen's hottest book was *4-Wheel & Off-Road*, with an 18.5% increase in average circulation, to 263,000 in 1983, and a 17% increase in single copy sales, according to Nigel P. Heaton, vp-circulation, marketing and development. Ad pages jumped 31.5% in 1983 and are up another 12% for the first six months of 1984 over the similar period last year.

Motor Trend's circulation increased more moderately, from an average of about 723,000 net paid in 1982 to 762,000 in 1983, with strong newsstand sales. The magazine had page gains of 13.1%.

But the surge in new car sales proved a mixed blessing as the interest in performance cars—and magazines written for that specialized segment—softened. Both *Car Craft*, edited for the drag-racing and high-performance automobile enthusiast, and *Hot Rod*, written for those with an interest in automotive machinery, felt the impact of this shift in focus. *Car Craft's* circulation remained static at about 392,000 in 1983, and ad pages fell 1.9%. *Hot Rod* circulation remained fairly flat at close to 800,000, with newsstand sales "somewhat soft" during the second half of 1983. Ad sales were up 1.6% in 1983 over 1982.

Petersen's hunting and gun books were also a little flat in ad sales and revenues in 1983. But that won't deter the company from spinning off one of its successful one-shot magazines, *International Combat Arms*, into an every-other-monthly to make its debut in August/September with a projected 80,000 circulation.

Also, ad sales in this segment should be spurred by interest in the shooting sports at the 1984 Summer Olympics. A special 54-page insert, carrying more than 30 pages of ads, will run in July issues of *Petersen's Hunting* and *Guns & Ammo*. Robert Petersen, a gun and auto enthusiast who founded the publishing company 36 years ago, is serving as commissioner of shooting events at the Olympics.

Another strong—and surprising—gainer for Petersen recently has been *Teen*. The magazine, while maintaining its 1 million rate base, increased ad pages a record 17% in 1983 over 1982 and is up 6% for the first six months of this year. The book, which struggled for years to overcome a negative image as a magazine for teenyboppers, apparently has won advertiser support. In revenues, the rewards were sweet—$8.4 million in 1983, a 20% increase over the previous year.

As its automotive and firearm magazines reflected industry trends in 1983, so *Petersen's Photographic* indicated hard times in the camera field. As Japanese photographic suppliers dealt with a tightening market by slashing ad budget, Petersen believes the industry is rebounding and is expecting a better second half.

Aside from the late summer debut of *International Combat Arms*, Petersen doesn't plan any other monthlies in 1984. *Drag Racing*, a 180,000 circulation every-other-monthly, started in

February.

Another every-other-monthly, *Sports Car Graphic*, covering the technical and racing aspects of sporting cars, went monthly at the end of 1983. Mr. Heaton predicts the growing interest in the sporty "fun-to-drive" car will help drive circulation up for this title. He anticipates 125,000 net paid circulation this year.

Petersen sold two of its regional boating magazines, *Rudder* and *Lakeland Boating* last year, after deciding the two were "marginal," Mr. Waingrow says. *Sea*, its western boating book, "is doing better," he says.

Earlier this year, the publisher changed the name of *Pickup, Van & 4-Wheel-Drive* to *Pickups & Mini-Trucks* as part of an effort to arrest a two-year circulation slide. The name change, effective with the May issue, was the company's latest effort to inject new life into the publication it purchased from CBS Publications in 1981.

Petersen had tried to change *Pickup, Van & 4-Wheel-Drive's* focus to street-truck enthusiasts, to distinguish it from its other publication in the field, *4-Wheel & Off-Road*. As circulation sank from the initial 237,000 to 185,000, Petersen decided to change its name—and editorial direction—again. The change reflects a greater emphasis on the increasingly popular downsized pickups and vans. So far the jury is still out on whether the new format is working, company sources say.

In 1983, Petersen issued 45 one-shot specialty magazines that sold more than 5.2 million copies at newsstand at prices ranging from $2.50 to $6.95. Another 45 one-shot titles are planned for 1984, including four teen-oriented specials, six or seven hunting and gun specials, and one called *Pro Football*. The remainder will be in the automotive area.

Petersen has expanded its special events division, seeking more tie-ins with major advertisers, as well as creating "customized" dealer promotion books for automotive dealers and car rental companies.

Pittway Corp.

Revenues	1983	1982*
Media	$98,000,000	$98,000,000
Other	$334,000,000	$313,100,000
Total	$432,000,000	$411,100,000

*Restated

Pittway Corp., Northbrook, Ill., is the nation's 88th largest media company with media revenues of $98 million for 1983, unchanged from year-earlier figures.

Media revenues, which came entirely from Pittway's business press subsidiary, Cleveland-based Penton/Industrial Publishing Co., were 23% of Pittway's total 1983 revenues of $432 million.

The company would not disclose how much Penton/IPC's publications contributed to Pittway's 1983 net earnings of $26.3 million.

In contributing to corporate revenues, publishing ranked behind burglar-fire alarms and packaging.

Advertising revenues came from 25 magazines and one annual catalog, accounting for three-quarters of Penton/IPC's revenues of $126 million. Graphic services, marketing and education services and its Saddlebrook Real Estate and Resort business made up the balance.

Thomas L. Dempsey, chairman-ceo, Penton/IPC, and vp, Pittway, says 1984's results will break company records, projecting a 15% ad revenue increase by yearend. Already this year, he said, 23 of the company's magazines are showing gains in sales and 21 have increased their profits.

"Media profits were the best in the company's history in the first quarter," Mr. Dempsey says.

Contributing to the increase has been *Industry Week*, which is experiencing a strong turnaround since its redesign last fall. Mr. Dempsey also credits the magazine's growth in circulation within the service industries for the surge in advertising.

"The industrial [circulation] base began to drop off in the recession, and *Industry Week* was able to shift to follow the growth of the service sector," Mr. Dempsey says. Through May, *Industry Week* was up 23% in ad pages.

Nevertheless, with 1983 ad pages totaling 1,248, the magazine still has a lot of lost ground to make up. The magazine reached its peak of 2,038 pages in 1979.

Strong gains, according to Mr. Dempsey, also have been experienced by *Government Product News, Restaurant Hospitality, Modern Office Procedures, New Equipment Digest* and *Machine Design. Machine Design*, which overtook *Industry Week* in 1982 as the biggest title in the house, continued to hold that position last year. The publication had estimated gross ad revenues of $18.5 million.

Computer-Aided Engineering, launched as an every-other-monthly in the fall of 1981, is scheduled to become a monthly this fall, a result of strong advertiser interest, Mr. Dempsey says.

The company also is looking at other computer-related magazine proposals that are broader based than *Computer-Aided Engineering*. Mr. Dempsey says one of those "could see the light of day this year," and adds, "it might have consumer appeal."

Penton/IPC instituted rate increases of 4% to 5% in 1984 for most of its titles, and will examine another round of rate increases this fall for 1985.

Playboy Enterprises

Revenues	1983	1982
Media	$158,500,000	$165,900,000
Other	$35,200,000	$44,200,000
Total	$193,700,000	$210,100,000

Playboy Enterprises, Chicago, is the 59th largest U.S. media company, with media property revenues of $158.5 million in fiscal 1983, ended June 30, 1983, down 4.5% from 1982.

Media revenues accounted for 84% of total 1983 revenues of $193.7 million, compared with 1982 when media properties represented 79% of the total.

Publicly held Playboy reported a net loss of $17.5 million for 1983, its second straight down year. However, the 1983 figure was an improvement over 1982's $51.7 million loss.

Playboy and *Games* magazines and the Playboy Channel provide the company's media contributions. About

We cure future shock.

Presenting the wrong results . . . because you've asked the wrong questions . . . of the wrong population? It's easy for research to go off target. That's why Chilton Research Services plans with expert care to be sure we know exactly **where** to look, exactly **how** to listen, and exactly **what to do** with what we see and hear.

We design the most effective scientific sample. We identify the study objectives. We build questionnaires to get information that can produce results. And when it comes to data analysis, we have the most sophisticated tools and computerized procedures in the hands of experts.

Do research any other way and you'll be caught unprepared for the future.

If you need to get the right information to make strategic decisions on products from high electronics to bubble gum, give us a call.

Diagnosing the present is the best way to ensure a healthy future.

A good reputation is the best recommendation.

- **ABC News/ *Washington Post* Polls.**
  Public opinion surveys are conducted for ABC News and the *Washington Post*. On short notice — one hour to a half day — Chilton Research gears up for overnight turnaround of data on Lebanon, Grenada, the elections, even AIDS. The surveys use CATI, and a national probability computer-generated sample. Results are frequently reported on Nightline and Good Morning America.
- **Manufacturer Determines What Hispanics Drink.**
  An awareness and usage study is conducted annually among eligible Hispanics in top Hispanic population centers utilizing a telephone interview. Using an Hispanic Household Sample procedure developed by Chilton Research, telephone households are computer generated at the exchange level. All interviews are in Spanish.
- **N.Y. Stock Exchange Gains New Insight Into Investors.**
  A two-phase survey was undertaken to determine the incidence of stock ownership and to develop a profile of individual investors. In Phase I, computerized telephone interviews were conducted with a national sample of households to obtain information about ownership of stock by each member of the household. One adult shareholder was randomly selected to take part in Phase II, a mail phase of the project. This methodology enabled CRS to screen households on a national basis, and to collect detailed projectable data.

PART OF THE ABC PUBLISHING COMPANIES

$150.2 million, or 93%, of Playboy's media revenues came from its publishing of the two magazines. The publishing segment's revenues in 1983 were down 9.2% from 1982 revenues of $165.3 million. Pre-tax income for publishing operations was $6.5 million in 1983, compared with $11.9 million in 1982.

The remainder, or $8.3 million, of the company's media revenues came from subscription fees earned by the Playboy Channel in the company's video segment. Revenues of $3.5 million attributed to programing produced for subscription tv systems and home video product sales were not included in ADVERTISING AGE's revenue totals for Playboy.

Playboy's video segment had revenues of $12.4 million, up from $584,000 in 1982. The segment posted a pre-tax loss of $2.3 million in 1983, compared with a $4.4 million loss the previous year.

Fiscal 1983 was a rough one for the company's flagship property, *Playboy* magazine. Total revenues for the magazine were $122 million, down 12.7% from 1982.

Playboy's circulation revenues declined $4.9 million on a yearlong volume decrease of 6.9 million copies, an 11.7% drop. Advertising revenues declined $13 million, or 281 fewer ad pages than in 1982. A cover price increase of 50 cents, to $3, with the October, 1982, issue partly offset the revenue declines.

The magazine's guaranteed rate base was lowered from 5 million to 4.4 million in January, 1983, and lowered again to 4.1 million, slightly more than half of which are subscriptions, in October, 1983.

The company attributes the declines in its flagship property to recessionary pressures on consumer and advertiser spending, but announced plans to revamp the 31-year-old magazine. Chairman Hugh Hefner and president Christie Hefner say those changes would include "clearer product positioning as a contemporary life style and service magazine and new targeted advertising campaigns" to enhance advertising and newsstand sales.

One of several top *Playboy* execs to leave the company last year was Henry Marks. In July, he resigned as senior vp-advertising to become associate publisher-advertising for *Rolling Stone* magazine. He was replaced by Charles Stentiford, previously with CBS Consumer Publications, New York.

The service-feature-oriented *Playboy Guides* publications, launched in 1980, were discontinued in the spring of 1983. Sent free to subscribers and sold on newsstands, the *Guides* were not profitable.

Advertising sales for its other consumer magazine, *Games*, which increased frequency to monthly from every-other-monthly in September, 1982, increased to $2.5 million, from $900,000 in 1982. The magazine's rate base was increased to 650,000, from 600,000, with the May, 1983, issue, and ad rates increased 6% with the October issue.

Playboy's activities in the video segment have been increasing, although they have not yet been profitable. The company's video segment ended fiscal 1983 with a net loss of $2.3 million on revenues of $12.4 million, compared with 1982's net loss of $4.4 million on $584,000 in revenues.

The center of attention in the company's video activities was the development of the Playboy Channel. Launched in November, 1982, it offers a mix of original programing and adult feature films. At the close of fiscal 1983, the Playboy Channel had 500,000 subscribing households. That number had reached nearly 700,000 by March, 1984.

The company also sells programing developed for the Playboy Channel to subscription tv systems and at retail in the form of videocassettes and discs. Revenues from these sources was $3.5 million in 1983.

Providence Journal Co.

Revenues	1983	1982
Media	$144,800,000	$132,500,000
Other	178,700,000	181,500,000
Total	$323,500,000	$314,000,000*

*Restated

Providence Journal Co., Providence, R.I., is the nation's 63rd largest media company with 1983 revenues from media operations of $144.8 million, or 44.5% of $323.5 million in total revenues. In 1982, the company had media revenues of $132.5 million, or 42% of total revenues.

The media operations of the company are diverse. It publishes the morning *Providence Journal*, the *Evening Bulletin* and the *Providence Sunday Journal*, owns WPHL-TV, Philadelphia, all-news radio stations WEAN-AM and WPJB-FM in Providence, and Colony Communications, the nation's 31st largest multiple system operator in 1982.

Its nonmedia operations consist of the Providence Gravure, which has four printing plants, in Texas, Illinois, Virginia and Rhode Island. The company is also involved in publishing the *Soap Opera Digest*, which reaches nearly 4 million readers.

The company's biggest property, with estimated 1983 revenues of $102 million, is the morning, evening and Sunday Providence newspapers circulated throughout Rhode Island and nearby communities of Bristol County, Mass. Combined ABC-audited circulation of the *Journal* and Bulletin was 214,034 in March 31, 1984, compared with 217,141 for the similar period in 1983. The Sunday paper demonstrated gains, however, moving from 245,958 in March, 1983, to 252,225 a year later, according to ABC audits.

Through its ownership of Colony Communications, Providence Journal Co. are now a major force in cable tv as well. With estimated revenues in 1983 of about $30 million, Colony has 187,500 basic subscribers and 180,000 pay.

Colony made headlines this year with its live coverage of two trials in Fall River involving a group of six men accused of raping a woman in a bar in New Bedford, Mass. Because of the trials' unpredictable schedules, Colony ran the coverage on an unused channel in its New Bedford system and on an alphanumeric message channel in the Fall River area.

Last year, a joint venture of Colony and Copley Press won the right to franchise a number of California communities. This year, it began construction of its new facilities for its Los Angeles County cable system, Copley/Colony Harbor Cablevision.

The facilities are expected to become the operations center for the franchise, which includes the San Pedro, Wilmington, Harbor City and adjacent Los Angeles County service areas. Colony also has won the right to franchise Costa Mesa, Cal., with a system that eventually will pass 33,500 homes.

In programing, the company's systems continue to receive awards and accolades for both their general and ethnic programing. Its Portuguese Channel is produced jointly with the local *Portuguese Times* newspaper and serves more than 70,000 Portuguese-Americans in the region.

Colony Electronic Information Services, a Providence Journal subsidiary, continues to produce two channels of advertiser-supported electronic videotex news and information—JTV 1 and JTV 2. JTV also has added computer-animated graphics and a colorful magazine page format, becoming the first teletext service in the nation to do so. JTV 1 consists of up-to-the-minute news briefs, 24 hours a day, while JTV 2 consists of entertainment and news features. In the evening it runs sports scores. Both JTV 1 and JTV 2 are available on Colony systems throughout the Providence-southeastern Massachusetts area.

Colony's systems continue to rebuild and upgrade both the hardware and the level of services provided to subscribers. The Greater Boston Cable Corp., a Colony system serving Woburn, Wilmington, Stoneham, Burlington and Billerica, Mass., has built 80 of a planned 140 miles of new plant and activated the first 10 miles. The company will continue to turn on 13 miles every month.

Subscribers to the system will be offered the Nashville Network, Lifetime, C-SPAN and CNN Headline News on the new, expanded basic service and the Disney Channel as a new pay option.

U.S. Cablevision Corp., a Colony system serving the Beacon-Poughkeepsie, N.Y., market area, is working with International Business Machines to interconnect the latest state-of-the-art computers using coaxial cable, enabling it to use computer-aided design and computer-aided manufacturing functions. It is also negotiating with Wang Laboratories to provide a dedicated 63-mile institutional network in Lowell, Mass. The company plans to market institutional services in major metropolitan areas, including Boston, Los Angeles, Miami, New York and Providence.

In cable advertising, Colony Interconnects, a subsidiary, signed its first interconnect agreement with Rollins Cablevision in the fall of 1983. The contract made way for an interconnection of Colony's systems in southeastern Massachusetts and Rhode Island with 16 of Rollins' systems in the same area. Colony Interconnects inserts commercials on Cable News Network, Entertainment & Sports Programming Network, MTV: Music Television, USA Cable Network and its own 24-hour a day movie service, Movietime.

Last year, Providence Journal Co. purchased the programing rights and some of the production equipment of WKBS-TV, Burlington, N.J., when the station's owner, Field Enterprises, Chicago, decided to liquidate the station's assets rather than sell the station. The price of the transaction was not disclosed.

Providence Journal Co. also is a major commercial printer through its Providence Gravure subsidiary. It provides offset and gravure printing, along with binding and mailing services at four printing locations for locally edited Sunday magazines, consumer publications, free-standing newspaper inserts for major retailers and mail order specialty catalogs.

Pulitzer Publishing Co.

Revenues	1983	1982
Media	$242,000,000	$224,000,000
Other	—	—
Total	$242,000,000	$224,300,000

Pulitzer Publishing Co., St. Louis, is the country's 42nd largest media company, with 1983 revenues, all from media, estimated by ADVERTISING AGE at $242 million, up 8% from 1982. Newpapers provided 60% of revenues and broadcast properties 40%.

The company is privately owned, with the majority of stock held by Joseph Pulitzer Jr. and other members of the Pulitzer family.

According to company sources, the 10% increase in total sales in 1983 was accompanied by record profits.

During the past six months, Pulitzer's flagship operation, the *St. Louis Post-Dispatch*, has gone through perhaps the greatest metamorphosis in the paper's 105-year history.

Last year, the *Post* was an afternoon paper working in tandem with the morning St. Louis Globe-Democrat, owned by Advance Publications (S.I. Newhouse). In February, the *Post* switched to morning publication after independent publisher Jeffrey Gluck took over the *Globe-Democrat.*

In 1979, the *Post* and *Globe* merged business functions under a joint operating agreement, an arrangement sanctioned by the federal Newspaper Preservation Act to ensure the survival of competing dailies. But Pulitzer and Advance officials said the venture was continuing to lose money and in November, Advance announced its intention to close the *Globe-Democrat.*

However, the Justice Department intervened, sought a buyer for the *Globe* and eventually paved the way for Mr. Gluck to make his purchase. Nevertheless, the operating agreement continues, and Advance will share half of the *Post-Dispatch's* profits, losses and capital expenditures for the next 50 years.

When the *Post-Dispatch* switched to mornings on Feb. 27, 1984, it expected to lose circulation for a while, but circulation has risen steadily.

"We really underestimated the circulation strength," Nicholas G. Penniman IV, general manager, *Post-Dispatch*, says.

"We had every reason to believe it would drop temporarily." He says other newspapers that have made the move to mornings lost about 10% of their circulation initially, though they regained it within a year.

According to ABC Fas-Fax data, the *Post-Dispatch's* daily circulation at the end of the five-week period ended March 31, 1984, was 254,333 for the morning daily, up from 234,066 from the evening daily of the comparable period in 1983; Saturday morning was 247,346, up from 145,391; Sunday climbed to 489,169 from 461,222. (These are Fas-Fax revised figures from its March 31 statements which originally picked up only the paper's city zoned editions.)

Mr. Penniman views the positive results as more a reflection on the company's aggressive approach to the market than in scaring up new readers because they are dissatisfied with the *Globe's* performance. He notes in markets lacking strong mass transit systems that evening papers generally suffer more than morning papers, so the *Post-Dispatch's* increased circulation could be benefiting somewhat from this tradition.

Ad linage also increased sharply. For example, in March, the *Post-Dispatch* alone recorded 92% as much advertising as did the *Post* and *Globe* together in the similar period in 1983, officials said.

Meanwhile, Mr. Gluck claims to be making money with the *Globe*. That paper now is thinner and has less advertising than it did under previous ownership, but Mr. Gluck says he has reduced operating expenses, so there's still room for a profit. The demands of the *Globe*, according to Mr. Gluck, have left him with too little time to concentrate on another media property, the *Saturday Review*. He canceled the March-April issue and was in the process of selling the magazine in late May.

The *Post-Dispatch*, apparently determined to press its competitive advantage, is moving ahead with ambitious expansion plans on several fronts. It is pushing distribution boundaries farther into Missouri, Arkansas and southern Illinois. "Our goal is to get final editions into all major cities within a 150-mile radius," Mr. Penniman says.

The paper also seems to be advertising and promoting much more aggressively than in the past. It spent about $250,000 in institutional radio and tv advertising when it switched to the morning slot.

A promotional game launched late last year yielded 10,000 new subscribers. The newspaper plans to keep up the momentum with four, 10-week games this year.

In addition, the paper recently introduced a new total-market-coverage section called "You." It bears a striking resemblance to the *Globe's* now defunct "Living Midweek," a total-market-coverage section that was dropped when the paper changed owners. "You," a color broadsheet with features, columns and celebrity news, is dropped at some 500,000 homes in St. Louis city and county.

In 1983, Pulitzer completed its roster of five vhf and two uhf tv stations, the maximum allowed by the FCC. Early in the year, the company traded its largest broadcast property—KSDK in St. Louis—to Metromedia for stations in Greenville, S.C., and Winston-Salem, N.C., along with about $8.5 million in cash.

Then in June, 1983, it bought uhf stations in Fort Wayne, Ind., and Louisville, Ky., from Gannett Co. Pulitzer says it plans no more changes in its tv lineup.

In other arenas, however, Pulitzer apparently will continue its entrepreneurial efforts. It recently considered—then rejected—the purchase of a direct mail company and "we regularly look at eight to ten newspaper prospects a year," Mr. Penniman says.

Pulitzer recently started a small production company, Frank Popper Audiovisual Productions.

Media	$175,700,000	$164,000,000
Other	159,700,000	127,800,000
Total	$335,400,000	$291,800,000

*Restated

RKO General Inc., a subsidiary of Gencorp, Akron, O., is the 53rd largest media company. Renamed from General Tire & Rubber Co., it had media revenues of $175.7 million in 1983, up 7.1% from 1982.

Media revenues, which represent 52.4% of total RKO revenues of $335.4 million, come from its broadcast division. The division's radio and tv properties had income of $18.6 million.

RKO's parent, Gencorp, generated revenues of $2.2 billion in 1983, compared with $2.1 billion in 1982. RKO is not consolidated in Gencorp returns. However, RKO would have ranked behind tires, aerospace-defense products and plastics in segmented revenues if included in Gencorp returns.

RKO comprises broadcast, soft drink bottling and a sizable investment in Frontier Airlines. Negative returns by the airline, however, dampened an otherwise strong year for RKO. After-tax losses for the air carrier totaled $9.9 million in 1983, down more than $22 million from 1982.

Competitive fare discounting, poor traffic demand and heightened competition in Frontier's hub market of Denver were cited for the poor showing.

In 1983, RKO weathered the storm of losing its license to operate WNAC-TV in Boston, ordered by the FCC in 1982 because of "improper activities." The company realized a net gain of $8.2 million from the sale of WNAC's assets to New England Television.

The company may find itself in another struggle, to keep KHJ-TV, Los Angeles, as the FCC's hearings are continuing on RKO's qualifications to run the station.

Despite setbacks, RKO forged ahead on the tv front, particularly with station WOR, New York, and KHJ, Los Angeles. RKO hopes to establish a leadership role for WOR with the addition of new programing along with upgraded public affairs programs.

WOR moved to Seacaucus, N.J., in 1983. Ground was broken early this spring on a new "state-of-the-art" broadcasting facility for WOR, according to RKO vp Steven Ellis.

Elsewhere in tv, RKO has received nationwide recognition for its award-winning series, "The Changing Family," introduced last year in New York, Los Angeles and Memphis.

In radio, 1983 was a year of "maturity" for its 12 owned-and-operated stations, a company spokesperson says. Two major format changes were made—WHBQ in Memphis and WRKO in Boston. Both stations went from music to news-talk, a format slow to reflect changes in ratings, but initial indications are that both stations will become market leaders, Mr. Ellis says.

Among fm stations, RKO owns ratings leaders WAXY in Fort Lauderdale, Fla.; WFYR, Chicago; WROR, Boston, and KRTH, Los Angeles. Also, WGMS, Washington, continues its prominence in the classical music area, and in New York, WRKS tops the city charts for urban-contemporary format and WOR leads in news-talk in New York.

RKO execs were disappointed in the performance of radio station KHJ, Los Angeles, and are deciding what to do with the station.

The company sold RKO Radio Sales in 1983.

The syndicated feature "Solid Gold Saturday Night" now is run by 225 stations and "Soap Opera Update" now plays on 210 stations, which could increase to 250 within a year.

RKO Pictures was active during the past year in the development and production of programs for national and international tv audiences and home video markets. Videogroup, a division of RKO Pictures, signed an exclusive agreement with the Royal Shakespeare Co. to bring its repertoire to worldwide tv and home video.

Aside from broadcast properties, RKO owns RKO Hotels and last year signed a management agreement with A. Cal Rossi Co. to develop and manage hotel properties. Currently, RKO/Rossi manages resort properties in Tucson, Ariz. and San Diego, Cal.

Another nonmedia property, RKO Bottlers, produces and distributes Pepsi-Cola, Dr Pepper and regional soft drinks in Ohio, Indiana, Tennessee, Virginia and West Virginia.

RCA Corp.

Revenues	1983	1982
Media	$2.090 bil.	$1.790 bil.
Other	6.890 bil.	6.450 bil.
Total	$8.980 bil.	$8.240 bil.

RCA Corp., New York, is the fourth largest media company with record media revenues of $2.09 billion in 1983, up 16.8% from 1982. All of the company's media dollars are generated from its National Broadcasting Co. operation.

NBC contributed 23.3% of total RCA's revenues of $8.98 billion in 1983, the latter figure of which was up 9% over the previous year. Pretax earnings from its NBC division gained 45% last year to a record $156.2 million.

All of NBC's operating units posted higher profits in 1983, when the NBC Television Network and the owned tv stations benefited from improved demographics and strong advertiser demand, RCA said in its annual report.

The NBC Radio division, encompassing the NBC, Source and Talknet networks and the owned am and fm stations, also increased its earnings last year, because expanded program services and audience growth. Its three networks are carried by more than 500 affiliates.

During the 1984 first quarter, RCA increased its net income by 73%, to $50.3 million, as revenues rose to a record $2.36 billion. As in the past, the company did not detail NBC's quarterly performance.

NBC enjoyed the highest profit in its history in 1983, when the tv network posted its 11th consecutive year of record ad sales despite less than satisfactory audience ratings. Part of its 1983 volume owed to NBC's coverage of the Super Bowl in January, 1983.

When the 1983-84 prime-time tv season ended, NBC had averaged a mere 14.9 rating for the 29 weeks. While that was the worst season-long A.C. Nielsen Co. rating for any network in 27 years, NBC did have some gains to tout, chiefly in demographic breakouts. Although ABC dominated the key prime-time demographic categories, NBC ranked second to ABC among males 18 to 34, 18 to 49 and 25 to 54. NBC ran third in the female groups, coming closest to runnerup CBS among females 18 to 49.

As NBC executives long have maintained, prime-time series such as "Hill Street Blues" and "Cheers" score highly among the young, urban, upscale audience "that advertisers find particularly attractive." The network's stronghold in the broad household ratings, meanwhile, is "The A Team," which began in January, 1983, and quickly moved ahead of ABC's longtime Tuesday anchor, "Happy Days." Last season, "The A Team" was NBC's No. 1 hit and the No. 4 series over-all, averaging a 24 Nielsen rating and a 35 share.

Last fall, NBC began further eroding ABC's longtime Tuesday ratings hold by building on "The A Team" lead-in with "Remington Steele" and, in the 1984 midseason, with "Riptide" (which ranked 16th for the season). NBC's other big raters were "TV's Bloopers & Practical Jokes" (No. 11) and the Monday night movie package (19th).

In other dayparts, NBC has been faring well on Saturday morning and late-night programing and has shown some improvements in evening news, daytime and early morning. In daytime as in prime time, NBC has languished in the ratings cellar for years, although this spring it has enjoyed something of a daytime comeback, closing the gap with ABC.

After dropping the dual anchor setup of Roger Mudd and Tom Brokaw in favor of Mr. Brokaw, NBC saw its evening newscast return to its runnerup position, albeit narrowly, over ABC in the ratings, although CBS through mid-April had increased its margin. However, NBC News suffered another in a long string of failures in the attempt to develop a successful prime-time news magazine. "First Camera" scored a dismal 6.4 rating and 10 share Sunday evenings, trounced by CBS' "60 Minutes" and consistently beaten by ABC's "Ripley's Believe It Or Not."

In early morning, "Today," NBC's onetime leader, has been second to ABC's "Good Morning America" for more than two years. "Today," however, has not only been increasing its margin over CBS' "Morning News" this spring but also eroding "Good Morning America's" lead somewhat.

NBC has dominated the Saturday morning children's ratings for no fewer than 33 consecutive weeks, topping CBS' old record of 31 straight wins 12 years ago. Its consistent Nielsen hits in this daypart have been "Smurfs" (the show that contributed most to NBC's change of fortune three years ago), "Mr. T," "Alvin & the Chipmunks" and "Amazing Spider-Man." NBC's strength among children during the past three seasons represents quite a turnaround from the 1970s, when the network was forced each year to scrap virtually its entire Saturday program roster.

In sports, NBC's major commitments are National Football League and major league baseball. This October's World Series will be the first under the six-year, nine-digit contract signed by NBC and ABC last year. NBC, paying more than $500 million for the Saturday baseball and rotating big-event coverage and even sought to become the only major league baseball network for a total $1 billion rights fee.

NBC currently is testing teletext, over-the-air text and graphics service offering news, sports and weather information and features as well as ad messages. The service is being tested at the World's Fair in New Orleans.

Reader's Digest Assn.

Revenues	1983	1982*
Media	$202,500,000	$199,300,000
Other	1.298 bil.	1.101 bil.
Total	$1.500 bil.	$1.300 bil.

*Restated

Reader's Digest Assn., Pleasantville, N.Y., is the country's 47th largest media company with 1983 U.S. media property revenues estimated by ADVERTISING AGE at $202.5 million, up 1.6% from last year's estimated media revenues of $199.3 million (restated).

Media revenues came from the U.S. edition of *Reader's Digest* and from Source Telecomputing, an electronic information service for personal computer users.

Reader's Digest is estimated to have provided 94.1% of the company's domestic media revenues. In addition, the company also derives substantial revenues from 41 editions in 17 languages.

Lila Acheson Wallace, who along with her husband, DeWitt Wallace, founded *Reader's Digest* in 1922, died May 8, 1984, three years after her husband's death. After the death of Mr. Wallace in 1981, Mrs. Wallace had gained control of all the voting stock. With her death, all voting stock of the company is to be administered by a trust. Most of the nonvoting stock, according to the company, is owned by foundations and employes.

Just before Mrs. Wallace's death, a major corporate shuffle occurred at Reader's Digest Assn., in which Edward T. Thompson, editor in chief, and John A. O'Hara, president, both trustees who between them controlled 50% of the voting stock, apparently were forced to resign.

Their resignation left the voting stock in the control of the two remaining trustees—Laurance S. Rockefeller, a former chairman of the Rockefeller Brothers Fund, and William J. Cross, who has become president and chief operating officer of Reader's Digest Assn.

Rumors reported in the press at the time of Mr. Thompson's resignation in mid-March (Mr. O'Hara's resignation followed a month later) indicated that an influential group within the company had become disenchanted with the magazine's straying from the *Digest's* original vision.

Following Mrs. Wallace's death, George V. Grune, previously publisher of *Reader's Digest*, was appointed chairmen-ceo, replacing Mr. O'Hara; Richard F. McLoughlin became vice-chairman, a new post, while William J. Cross became president-chief operating officer. The three, along with *Reader's Digest* editor Kenneth O. Gilmore, will make up the executive committee of Reader's Digest Assn.

Meanwhile, according to the terms of the DeWitt and Lila Wallace Trust, Messrs. Rockefeller and Cross will select four more trustees to help run the Reader's Digest Assn. The *New York Times* reported that insiders believe two of those are likely to be Messrs. Grune and Gilmore, and outsiders consider the remaining two slots will go to Donald C. Platten, chairman of the executive committee of the Chemical New York Corp., and its Chemical Bank, and Theodore F. Brophy, chairman and ceo of GTE Corp.

Most of the *Reader's Digest* editions are owned directly by Reader's Digest Assn., but several are licensed out. These include editions in Arabic, Czech, Hindi, Korean, English (India) and Spanish (Colombia). Of the total circulation of 30 million, 18 million is within the U.S. The worldwide economic slump has whittled these numbers down from record highs in the 1970s.

The circulation of the magazine has remained fairly stable over the past few years, although it took a dip in 1983 to 17,942,016 in the U.S., down from 18,171,628.

The stability is by design, notes a company spokesperson. "When you have the kind of circulation that we have, any major increase in the numbers could drive a number of advertisers out of the market," the spokesman says, pointing out that the rates could become too expensive for a number of advertisers. A typical four-color page in the magazine now runs $108,000.

Advertising, however, has been tracking the circulation drop. Ad pages fell nearly 6%, to 1,033, from 1982. At the same time, gross revenues dropped 3.2% to $101.6 million, according to Publisher's Information Bureau.

The ad picture has changed dramatically in the first six months of 1984, however. Total pages during the period jumped 5.7%, to 474.5 pages, compared with the same months in 1983.

Revenues in the period shot up 15%, to $41.3 million from January to June, 1984, compared with the corresponding months in 1983. The most dramatic turnaround came when ad pages jumped 19.6% to 85.6 pages in the June issue compared with the June, 1983, issue. Revenue that month alone rose 26% to $7.9 million.

The ad pages continue to be bolstered by special marketing inserts such as the eight-page detachable Better Life Guides from Campbell Soup Co.

Planned for February, 1985, is a special supplement titled "Helpful Eating: The Light Way."

Source electronic information service is Reader's Digest's other media operation in the U.S. It continues to be unprofitable, but has been undergoing steady growth and development since 1980, when Reader's Digest purchased an 80% stake in it.

As of April, 1984, Source had more than 55,000 subscribers. In March, it added 3,000 new subscribers to its list. Subscribers pay a $100 registration fee and are then charged for the time they are connected to the service—$20.75 an hour between 7 a.m. and 6 p.m., Monday through Friday, and $7.75 an hour for all other times.

A spokesperson for Source says there are six main categories of service available on the service: Communications, news and sports, business and finance, travel, games and consumer services. However, it also provides a service called Public, where members of Source can publish electronic newsletters or create services for other members to use.

During the past few years, Source has been aggressive in providing investment-related financial services to its subscribers. Last year, it began providing Stockcheck to allow subscribers to retrieve information on specific stocks and bonds from all the major exchanges by simply typing in the conventional Standard & Poor's symbol. Recently, it also added the Donoghue database, which provides comprehensive information and commentary about the money market and mutual funds. Information about other investment opportunities also is included.

Reader's Digest plans to concentrate on its magazine business. However, it will continue to develop its role in the publishing of books and records. The company expects Source to become profitable soon.

Rogers Cablesystems

Revenues	1983	1982
Media	$139,000,000	$107,000,000
Other	—	—
Total	$139,000,000	$107,000,000

Rogers Cablesystems, Toronto, Canada, is the nation's 69th largest media company with 1983 net revenues, all from U.S. media properties, of $139 million, a 30.4% increase over $107 million in 1982. Operating income in 1983 was $57.4 million, compared with $38 million in 1982.

The company's U.S. operations consist of Rogers U.S. Cablesystems Inc. and Rogers Cablesystems of America Inc., the latter of which is half the former Rogers-UA Cablesystems.

(Figures in this profile have been converted from Canadian dollars at the yearend rate of C$1 equals 0.817 U.S. dollars).

RUSCI consists of eight franchise groups with 745,000 homes and 385,000 passed by cable. There are 154,000 basic subscribers and 232,000 pay. RUSCI's net revenue increased by $15.2 million, to $29.8 million in 1983.

The increased revenue resulted from new subscribers in newly developed cable areas. Also showing an increase was the annual net revenue generated per subscriber—up from $210.80 in 1982 to $239.78.

Rogers owned a 51% interest in Rogers UA Cablesystems until August, 1983, when the cable systems owned by Rogers UA Cablesystems were distributed to its shareholders. The distribution resulted in Rogers receiving 307,000 basic cable subscribers and 374,000 pay subscribers. The systems are centered around San Antonio, which has 164,000 basic subscribers and 291,000 pay. The remainder are located in other parts of Texas and six other southern states.

RCAI's net revenue increased 64%, to $109.7 million in 1983. Its operating income rose to $48.2 million, up 44% from 1982.

At the same time, annual net revenue per subscriber increased from $174.43 to $184.43.

Two areas were added to the company's operations during 1983, both of which are adjacent to existing systems. These areas include part of the city of Minneapolis and part of Multnomah

County, Ore.

The company successfully has introduced a new generation of technology in its new systems, says Edward S. Rogers, ceo, Rogers Cablesystems. It has done so without cost overruns or management problems. "The investment in the latest technology allows us to gain new sources of income such as pay per view," Mr. Rogers says.

During the past two years, the company has acquired expertise in programing and marketing pay-per-view services with good results in Portland, Ore., and Southern California. Revenues also are being generated from the sale of communications services to banks and other institutions and from the sale of advertising spots in satellite network services to local businesses.

Nonetheless, the company says it is facing substantial wholesale price increases in pay tv and specialized satellite services. In addition, many of the satellite services that were once available free from suppliers must now be purchased. Says the company, "Where franchise agreements currently prevent passing these costs on to subscribers, the company is actively seeking regulatory relaxation."

Efforts to seek such regulatory relief became a major controversy in Minneapolis when the company's request for rate increases was vetoed by Minneapolis Mayor Don Fraser, who thought that the city's new agreement amounted to a "one-way give-back" of contract provisions. However, the week after the mayor's veto in February, the city council unanimously voted to override the mayor's actions, thus allowing Rogers to increase its rates for its premium movie channels and to shift some programs to its more expensive tiers. Rate changes were implemented on April 1, 1984.

Rogers also is seeking changes in Portland, Ore., where it has notified the cable office it is seeking to expand its franchise boundary to include unincorporated areas east of the city. If approved, the company would have control over one of the fastest growing urban-suburban zones in the state.

Amidst all this, Rogers is setting up a new management structure for its U.S. operation. It has named Robert Clasen, vp-U.S. operations, as head of all U.S. divisions. At the same time, it has reorganized its southern division operations (formerly part of Rogers-UA Cablevision) into three divisions: Rogers Cablesystems Central, Rogers Cablesystems West and Rogers Cablesystems of Texas.

Rollins Inc.

Revenues	1983	1982
Media	$82,000,000	$69,200,000
Other	$362,200,000	$457,300,000
Total	$444,200,000	$526,500,000

Rollins Inc., Atlanta, the 99th largest media company in 1983, had media revenues of $82 million for fiscal 1983 ended June 30, out of total revenues of $444.2 million. Media revenues were up 18.5% over 1982, but total revenues were down 15.6%.

Midway in its current 1984 fiscal year, Rollins took a major reorganizational step by moving to split itself into three new independent entities, including a communications division covering broadcast, cable tv and outdoor advertising.

At the midpoint of the fiscal year, the media revenue total was $45 million, compared with $40.1 million for the comparable period a year earlier, an increase of 12%. The returns were keeping pace with performance in 1983, which was up 2% in broadcasting, 47% in cable tv and 13% in advertising.

Pending government approval, Rollins will become three separate organizations: Rollins Inc., consisting of Orkin Pest Control Co. (termite and other vermin extermination) and Rollins Protective Services Co. (fire and intrusion alarms); Rollins Communications Inc. (broadcast, cable and outdoor advertising), and RPC Energy Services Co. (oil and gas field service).

"The reorganization will separate three basically dissimilar businesses—consumer, media and oil and gas services—and enable management of each business to concentrate its energy and skills on the respective business," says vp H. Tim Crow.

"In addition, the board believes that the aggregate value of the individual businesses exceeds the value placed upon Rollins Inc. as a whole by the equity markets. The reorganization will enable each business to be valued similar to comparable companies in the marketplace."

Rollins' various cable tv franchises are grouped under the collective title Rollins CableVue.

In its cable tv operations, Rollins is striving for maximum efficiency through several means, including developing markets it knows well from past experience, such as Philadelphia; building cable franchises in the nation's most compact and densely populated areas, such as Southeastern New England, and determining what viewers want to see on specific markets, as in Wilmington, Del.

In the case of Philadelphia, Rollins prepared bids for that city's four franchises of 155,000 homes each, submitting those bids in January, 1983. To Rollins, Philadelphia was of particular interest for cable, according to Mr. Crow, because "we know and understand the Philadelphia market." But in November, the city elected a new mayor, and he chose to re-initiate bidding, starting the process over.

The company is committed to active development of its cable tv operations in Delaware, Rhode Island, Connecticut and Massachusetts. For 1983, Mr. Crow characterizes growth of its cable tv systems in Delaware and Connecticut as "internal" and growth in Rhode Island and Massachusetts as "external," through the building of new franchises.

In May, 1983, Rollins circulated a 10-choice ballot to its Wilmington-area subscribers, asking them to pick their favorites for cable viewing. Reports Mr. Crow, "The results were successful in planning our programing."

Sammons Communications

Revenues	1983	1982
Media	$94,000,000	$81,000,000
Other	—	—
Total	$94,000,000	$81,000,000

Sammons Communications, Dallas, is the nation's 91st largest media company, with revenues in 1983 of $94 million, all in media. This represented an increase of 16% from 1982. The company is a wholly owned subsidiary of the privately owned Sammons Enterprises.

Sammons is the nation's 12th largest multiple system operator, with systems in 21 states. At last count it had 593,000 basic subscribers and 461,000 pay subscribers. A company spokesman says the remaining basic subscriber potential for the company is about 365,000.

Even though Sammons is not active in its franchising efforts, it continues to emphasize a strategy of consolidation. "But we're always in the market for a good purchase," the spokesman says. This year, Sammons acquired the assets of cable tv systems serving the Texas communities of Dumas and Sunray from Warner Amex Cable Communications. The systems together serve about 3,000 basic subscribers and are close to other Sammons' systems in the Texas Panhandle.

Since that time, the company has reached an agreement with Storer Cable Communications for the acquisition of 13 Fort Worth, Tex., area systems. The 13 systems represent 15,000 basic subscribers in an area ringing Fort Worth, which is served by Sammons.

Amid all this, Sammons is proceeding with an ambitious plan of upgrading and rebuilding its systems. Its largest rebuilding plan involves boosting the channel capability from 22 to 54 at its Harrisburg, Pa., system, which has been in existence since the early 1950s. The two-year construction program initially will increase the number of available channels from 22 to 30. Currently, 57,000 basic subscribers are on the system, about 70% of homes passed. About 44% of subscribers also take pay tiers. The Harrisburg rebuild is one of the largest single-system rebuilds attempted in the country.

Sammons' Fort Worth system is being constructed on schedule, the company says, with nearly 80% completed. The company has purchased the shares of a number of investors in the system, thus increasing its own equity to 81%.

Early this year, Sammons withdrew from a cooperative cable advertising campaign being organized through the Council for Cable Information and subsequently withdrew from the organization. While sources pointed to the company's displeasure with the campaign, the company itself wouldn't comment.

Revenues*	1983	1982
Media	$750,600,000	$670,600,000
Other	56,680,000	56,900,000
Total	$807,280,000	$727,500,000

*Consolidated revenues of E.W. Scripps Co. and Scripps-Howard Broadcasting for '83-'82.

Scripps-Howard, the trade name ascribed to E.W. Scripps Co. and Scripps-Howard Broadcasting, is the nation's 17th leading media company with estimated media revenues of $750.6 million, or 93% of total revenues of $807.28 million in 1983.

Media revenues in 1983 comprise the largely newspaper operations of E.W. Scripps Co., which ADVERTISING AGE estimated had $650 million in media revenues, and the tv, radio and cable operations of Scripps-Howard Broadcasting, which contributed media revenues of $100.6 million.

The two companies were combined in this fourth annual 100 Top Media issue because the companies themselves are seeking common identity. The two share common ownership and many of the same directors and executives, the difference being that Cincinnati-based E.W. Scripps Co. is private and Cleveland-based Scripps-Howard Broadcasting is public and has been since 1963. E.W. Scripps Co., however, owns 70% of the broadcasting company's stock.

Media revenues in 1983 compared with combined media revenues of $670.6 million in 1982 for an increase of 11.9%. Combined total revenues in 1983 were 11% above total revenues of $727.5 million in 1982.

E.W. Scripps Co.

Two years after sales of United Press International, its financially troubled wire service, E.W. Scripps once again is expanding its holdings. New corporate executives have been appointed to improve its public image and the marketability of its products.

Although the publisher and supplier of newspaper services suspended publication of one of its 16 daily newspapers in 1983, it acquired five additional weeklies and began manufacturing newspaper distribution equipment.

In 1878, Edward Willis Scripps started pulling together his network of communications companies. In 1907, he founded United Press International, which grew to be the second largest wire service in the world. It was sold to Media News Corp. in 1982. ADVERTISING AGE estimates UPI suffered losses of $7 million in 1980 and $8 million in 1981.

During the past year, funds partially generated from the $180 million UPI sale enabled the acquisition of three weekly Florida newspapers, *Destin Log, Jensen Beach Mirror, Port St. Lucie Mirror*, and two Kentucky papers, *Mt. Washington Star* and *Pioneer News*. This brings Scripps' weekly newspaper total to 28 with a combined circulation of 563,000.

However, "a continuing decline in circulation and readership" caused the company to suspend publication of one daily, *Memphis Press-Scimitar*. According to Robert K. Doerr, Scripps' communications director, from 1973 to 1983 circulation dropped from 127,000 to less than 80,000. Mr. Doerr says much of the defunct paper's news-gathering and publication equipment is now in use at another Memphis daily owned by Scripps, the *Commercial Appeal* (circulation: 195,000 daily and 280,000 Sundays).

Mr. Doerr is one of four company executives Scripps hired during 1983 and 1984 to help the company improve and expand. Charged with enhancing the company's image, he helped develop six page ads appearing in the *Wall Street Journal* promoting products and services under the heading of the company's now official trade name, Scripps-Howard.

One ad pictures a family at leisure. A woman is watching one of Scripps-Howard's six tv stations via one of its eight cable services. Her husband reads a Scripps-Howard newspaper as his son, wearing earphones, listens to one of seven radio stations while leafing through the "World Almanac" (published by Scripps-Howard). A little girl is snuggling her Snoopy and Garfield dolls.

The toys generate royalties paid by manufacturers that borrow cartoon characters owned by Scripps-Howard's United Features Syndicate.

Another exec, Banks Leonard, is now in charge of special publications produced by the Houston-based subsidiary, Cordovan Corp., which publishes 12 city business journals and several sportsman periodicals. Mr. Leonard also oversees Scripps' media service companies such as United Media Enterprises, the world's largest syndicate and features service, which include such diverse enterprises as Tele-Log of Atlanta (suppliers of tv listings to newspapers, magazines and cable tv systems), Scripps-Howard News Service, the "World Almanac" and Berkley-Small Inc., of Mobile, Ala., a supplier of newspaper racks. Scripps-Howard recently formed Berkley-Small Mfg. in Medina, O., to make newspaper racks.

Mr. Doerr says a graphics expert also was positioned at the company's executive level to introduce new color graphics technology to its newspapers, which now are headed by Bill Burleigh. Formerly of the *Cincinnati Post*, Mr. Burleigh took retiring George Hanna's place as vp-general editorial manager for the company's newspapers, which include the *Post* and Scripps' two largest circulation dailies: *Rocky Mountain News* (daily: 315,500, Sunday: 356,000) and *Pittsburgh Press* (daily, 255,000, Sunday: 609,000).

The *Stuart* (Fla.) *News* recently became a morning publication and expanded from six to seven days a week, operating from a new facility. The combined circulation of all Scripps daily newspapers is about 1.5 million.

Scripps-Howard Broadcasting

Scripps-Howard Broadcasting is putting its major thrust behind cable, although it is poised to conclude negotiations for its seventh tv station—its meat-and-potatoes business. The company's revenues of $100.6 million in 1983, all in media, represented a 5.2% increase over 1982. Net income, however, dropped by 11%, to $17.6 million. The decline was brought on by nonrecurring gains from the 1982 sale of radio station WNOX-AM, Knoxville, Tenn.

Cable revenues more than doubled from $2.5 million in 1982 to $6.2 million. In 1981, cable revenues totaled only $351,000. Nonetheless, broadcasting (tv and radio) still accounted for 95% of the company's operating revenues in 1983, down slightly from its previous year's percentage.

Scripps-Howard appointed Gilles R. Champagne in 1984 to direct cable tv and telecommunications ventures, which are slated to continue to expand as systems now being installed become available to new cable subscribers. New telecommunications ventures so far have meant an agreement with Knight-Ridder Newspapers to introduce Viewtron videotex in Denver, Pittsburgh and Memphis in the future, and a recent investment in cellular telephones with McCaw Communications of Bellevue, Wash.

The publicly held company increased subscribership in wholly owned and partnership cable systems to more than 72,000 last year and expects the total to surpass 120,000 by the end of this year because of a franchise agreement in Sacramento, Cal., says Donald L. Perris, president of the broadcast entity. Hopes are that within four years the company will have 400,000 total subscribers in its affiliated systems.

The company is expected to spend some $16 million this year on cable system construction.

The Sacramento cable package, described as a "large and desirable franchise" by Mr. Perris, was landed late last year by a syndicate made up of Scripps-Howard, Cablevision Systems Development Co., owned by tv entrepreneur Charles Dolan, and Sacramento investors. Scripps-Howard and Mr. Dolan's company each own 47.5% of the franchise. The local investors own the rest.

Landing the franchise culminated a lively scramble for the Sacramento-area cable rights. The race featured some fancy footwork by Mr. Dolan, who is known in the industry for an entrepreneurial spirit and innovative dealing. In 1982, Sacramento officials turned aside a bid by Mr. Dolan's Cablevision company and awarded the package to United-Tribune, a joint venture between United Cable and Tribune Cable.

But contract negotiations between the city and the company broke down last summer and the bidding was reopened. Mr. Dolan re-submitted his bid with Scripps-Howard as a partner and won the race to wire the 350,000-home area. "The first subscribers in the Sacramento system will be on line sometime this summer," Mr. Perris says.

Elsewhere in cable tv, the Southern Connecticut Cablevision System, also a partnership with Mr. Dolan, has some 55,000 subscribers, or almost one-quarter of the homes in the state, according to Mr. Perris. The system currently is the largest single area of Scripps-Howard cable operations.

The company added to its Colorado cable operations last year by acquiring systems serving the communities of Fort Lupton, Louisville, Loveland and Parachute, bringing total subscribers there to 20,000.

In tv broadcasting, Scripps-Howard's strong suit, the company recently announced it is acquiring KNXV, an independent in Phoenix, from New Television Corp. of Phoenix for $26 million. Acquisition of the station brings Scripps-Howard to its full complement of seven tv stations allowed by the FCC.

In another development, the FCC granted permission for construction of a 1,900-ft. transmitter tower in Tulsa, Okla., as part of a joint venture with A.H. Belo Co. of Dallas. The tower will serve Scripps-Howard's KJRH in Tulsa along with a Belo-owned station by improving transmissions and increasing the viewership area by 15%, Mr. Perris says.

Seattle Times Co.

Revenues	1983	1982
Media	$135,000,000	$116,500,000
Other	——	——
Total	$135,000,000	$116,500,000

Seattle Times Co., Seattle, is the nation's 70th largest media company, with revenues in 1983 estimated by ADVERTISING AGE at $135 million, all from newspaper properties.

A privately held business owned by Seattle's Blethen family (50.5%) and Knight-Ridder Newspapers (49.5%), Seattle Times Co. operates two newspapers, the *Seattle Times* and the *Union-Bulletin*, published in Walla Walla, Wash.

In 1982, the *Seattle Times* and the *Seattle Post-Intelligencer*, a Hearst Corp. property, merged their advertising and circulation departments under a Joint Operating Agreement, which gives the *Times* 66% of the papers' combined revenues, and the *Post-Intelligencer* 34%.

The agreement had been challenged by the publishers of suburban papers and a Seattle newsmagazine, but after the agreement was upheld by the Justice Department, the opponents decided not to appeal.

The *Times* dropped its morning edition under the agreement, and the Sunday *Post-Intelligencer* became an insert to the *Times*. These adjustments have contributed largely to declines in the *Times'* circulation, says W.J. Pennington, president-publisher of the paper.

As of March 31, 1984, the *Times'* Monday-through-Friday circulation stood at 226,038, off 23,615 from a year earlier.

Sunday circulation was 473,155, about 30,000 fewer than the *Times* had told advertisers to expect.

Mr. Pennington says much of the slippage is attributable to a 50% increase in ad rates for the Sunday paper following the implementation of the JOA and to the end of the *Times'* daily morning edition. Just a few months before the JOA went into effect, the *Times* had forced its readers in Seattle's outlying areas to take the morning edition in lieu of the regular afternoon paper. Some 12,000 of those subscribers were lost in the switch back to a p.m. edition after the JOA, according to Mr. Pennington.

Harold Fuhrman, *Times*, senior vp-general manager, says the *Times* also encountered more resistance to the combined Sunday edition from readers of the *Post-Intelligencer*, and he says there were more people who subscribed to both papers than research had indicated.

The *Times'* ad linage also is down, but only slightly. For the first 17 weeks of 1984, the number of column inches of ads in the daily *Times* was 723,000, off 2% from the similar period in 1983. The total for the Sunday paper dropped 9%, to 330,000 column inches.

Mr. Fuhrman says many advertisers reduced or eliminated their space in the Sunday paper because they didn't want or need to reach readers who formerly had subscribed only to the *Post-Intelligencer*, and he says about 50% of the ads sold so far under the JOA have been combined buys. "We've done much better than our goals," Mr. Fuhrman says.

Mr. Pennington notes the *Times* hasn't kept pace with the rapid growth of the suburbs and attributes that partially to stiff competition in Seattle's suburbs. In the past couple of years, both the *Everett Herald* and the *Bellevue Journal-American* have added Sunday editions. But Mr. Pennington notes changes in the wind. For example, the *Times* enjoys its highest penetration in Bellevue, an affluent city that has begun to outgrow its former status as one of the bedroom communities surrounding Seattle.

To boost readership in the suburbs, the *Times* has added to the zoned editions it distributes each Wednesday, and the paper's management is talking with advertisers about increasing the frequency of its total market coverage supplements from monthly to weekly. But Mr. Pennington says the *Times* isn't considering any "extraordinary" advertising or promotions to raise circulation. "We're not unhappy where we are," he says.

Farmer and *Southern Living*, declined to release total corporate revenues, but Emory Cunningham, chairman-president, says the Oxmoor House book publishing division "is the fastest-growing division in our company, including our media operations."

The company's only national magazine, *Decorating & Craft Ideas*, is undergoing a name change to *Creative Ideas*, effective July 1, 1984. Since its purchase from Tandy Corp. in 1975, the magazine has moved from quarterly to monthly, and has increased its circulation rate base to 725,000. *Creative Ideas'* editorial focuses on the how-to instruction of crafts, food and home decorating.

The company's flagship publication, *Progressive Farmer*, more than 95 years old, also is one of the country's oldest continually published magazines. The primary editorial focus is farm production and management, seasoned with life-style sections.

Effective Jan. 1, *Progressive Farmer's* circulation rate base dropped from 625,000 to 525,000, and regional publication was reduced to four from five regions in the South. Ad pages were up about 5% during the first half of 1984, says publisher Jerry Jehle.

"The lowering of the rate base was by design," Mr. Jehle says. "Like all farm magazines, we must keep circulation in line with the farm population, and over the years there have been sharp decreases in the number of farm units."

The restructured regional editions reflect agricultural breakdowns by region rather than by state line as had been established in the five previous regional editions. *Progressive Farmer* covers cotton, soybeans, peanuts, tobacco, cattle and hogs.

"By restructuring the regional editions, we achieved internal production efficiencies, and defined agricultural regions by crop rather than geographic regions. Agricultural crops don't stop at state lines," Mr. Jehle says.

The company's most profitable publication, *Southern Living*, continues to grow by using the editorial formula it has been using for 18 years: Home and family, community and travel information that enhances living in the South. "We've had 18 consecutive years of circulation growth, so we think we're very much on target with our editorial," says publisher Jim DeVira, who claims there is no direct competitor. "We feel very confident we have an enduring editorial format."

The figures bear out the company's strategy. The circulation rate base is 2.2 million, up slightly over 1982, and ad pages were up 54 pages, to 1,509, with 1,600 pages projected for 1984.

Southern Progress Corp. also added three radio stations to its syndicated radio show, bringing the total to 88. The program provides agricultural business news to farmers in Arkansas, Louisiana, Mississippi and Missouri.

In other developments, Emory O. Cunningham was named chairman of the board and retains his previous office of president.

Stauffer Communications

Revenues	1983	1982
Media......	$77,458,000	$63,952,702
Other.......	10,742,000	6,247,298
Total.....	$88,200,000	$70,200,000

Stauffer Communications, Topeka, Kan., reestablished itself as one of the country's 100 largest media companies, ranking 100th in 1983, with revenues from media properties of $77.5 million.

The company's return to the list after a one-year absence is attributed to an increase of 21.1% in media revenues, the result of several changes in company holdings.

Media properties account for 87.9% of the company's total operating revenues of $88.2 million, which represents a 25.6% increase over 1982. Net income increased 23.1%, to a reported $4.8 million for the year.

Ridding itself of two properties that continuously failed to meet the company's earnings expectations, Stauffer acquired *Daily Ardmoreite*, an Ardmore, Okla., newspaper in February, 1983, and Grit Publishing & Printing Co., Williamsport, Pa., in March, 1983. *Ardmoreite* recorded a profit and the *Grit* Sunday newspaper and periodical operations broke even for the year.

Stauffer sold KARZ (am) in Phoenix to Tom Chauncey, Phoenix, and KGBX (am) in Springfield, Mo., to Alfred C. Sikes & Associates, Springfield.

Newspapers and magazines were the two media segments showing growth at Stauffer. Newspapers contributed $50.4 million in revenues, up from $44.7 million in 1982; magazines, via the acquisition of *Grit*, delivered weekly by school children to 775,791 subscribers, contributed $9.4 million in revenues, up from $300,000 in 1982 when *Capper's Weekly* was the company's only entry in the magazine segment.

A steady increase in revenues is apparently in the picture for Stauffer. Company president Stanley Stauffer says, "The company is on target to receive $100 million in operating revenues for 1984."

Stauffer sees its future growth also coming through acquisition. "We are targeting newspapers and television stations primarily," Mr. Stauffer says, adding that Stauffer is "still interested in relatively small cable systems and good combined am/fm radio stations, if we can find them."

On March 1, 1984, the company purchased *Brainerd Daily Dispatch*, circulation 14,214, published weekday evenings and Sundays in central Minnesota's lake resort country. According to Stauffer's annual report, the company is enthusiastic about the growth potential of its newest daily newspaper market.

In addition to its media-related properties, Stauffer owns three Computer Patch computer retail stores; Capper's Insurance Service and Communications & Signaling, which markets security systems and small business telephone systems.

In 1983, Stauffer named four new assistant vps: David A. Belilies, publisher, *Grand Island* (Neb.) *Independent*; Robert D. Fromme, manager, Kansas City Royals Radio Network; Lee Porter, publisher, *Daily Ardmoreite*, and Rockford E. Smith, manager, Stauffer Media Systems.

Storer Communications

Revenues	1983	1982
Media......	$458,900,000	$379,300,000
Other.......	—	—
Total.....	$458,900,000	$379,300,000

Storer Communications, Miami, is the 23rd largest media company in the country, with revenues of $458.9 million in 1983, all generated by the company's cable and broadcast operations. The total is an increase of 21% from 1982.

However, the company slipped to a loss of $39.7 million for the fiscal year ended Dec. 31, a sharp drop from the $9.2 million net income posted in 1982, which, in turn, was a steep decline from the $31.9 million in net income of the previous year.

Management blamed the loss—Storer's first in more than a decade—on a 35% increase in depreciation charges and a 32% rise in interest expenses. Storer promises both areas will improve significantly in 1984 and future years, and is taking steps to shed all but its most cost-effective properties.

During 1983, Storer continued the policy of retrenchment started in 1982. It acquired no new cable franchises and put several systems it owned up for sale.

The company's strategy, according to corporate chairman Peter Storer, was to get rid of systems that were geographically isolated or drains on corporate investment.

"We have been out of the franchising business for 2½ years," he says. "This has been the year when we have been completing the clustering of our existing franchises."

In 1983, the company sold cable franchises in four communities in Colorado and five in Florida. It is trying to wrap up sales of other systems in Maryland, Pennsylvania and Texas. A franchise in the Minneapolis area has been optioned to Rogers Cablesystems, and another near the same city also is tagged for divestiture. In May, 1984, Storer agreed to sell its two systems in Virginia (Chesterfield County and Fort Belvoir in Leesburg) and a system in Northern Prince Georges County, Md. to a group of local investors for $49 million.

While profitability was nonexistent, revenues were at an all-time high, with both the broadcasting and cable divisions producing record revenues. Cable tv operations accounted for 63.5% and broadcast stations the remainder.

Storer owns and operates seven tv stations. In 1983, it serviced about 1.38 million basic cable subscribers representing 620 communities in 18 states. That was an increase of about 208,000 subscribers from 1982. Storer lost nearly 17,000 subscribers from the sale of cable systems in Colorado and Florida last year.

The tv division, which turned in net revenues of $167.8 million in 1983, was hurt by the recession because of its base in vulnerable industrial cities, including Detroit, Toledo, Milwaukee, Cleveland and Boston. But with the economy on the mend, sales in all these markets except highly industrial Cleveland have been expanding since the end of last year.

With a cautious eye on pay tv, Storer used its independent station WSTK-TV in Boston as a base for a new satellite-delivered New England Sports Network featuring the Boston Red Sox and the Boston Bruins. The cable sports network was launched this spring. A potential subscription base of 150,000 is expected.

Eventually, the network will expand to include feature sports, talk and interview shows and telecast rights to other sporting events.

Storer's cable division brought in more than $290 million in net revenues in 1983. Last year, the company eliminated its Dallas regional office, leaving it with three regional headquarter cities—Atlanta, Phoenix and Fairfax, Va.

Storer got out of another marginally productive commitment in January when it and three partners—Cox Communications, Tele-Communications Inc. and Times Mirror Co.—sold their Spotlight pay tv system to Showtime. Storer took a pre-tax loss of $1.28 million in disposing of its interest in the system, which had never become as profitable as was hoped.

Rate increases also figured into the plan to boost profitability. Local approval was given last year for rate hikes for about 300,000 subscribers. Storer has targeted an additional 700,000 customers for increases this year, pending approval.

Taft Broadcasting Co., Cincinnati, is the nation's 66th largest media company with media property revenues totaling $140.8 million for the 1983 fiscal year ended March 31, up 13% from 1982.

Broadcasting properties accounted for all of the company's media revenues, or about 37% of Taft's total revenues of $381.0 million, a total up 6.4% from the previous year.

Of the company's total operating profit of $79.1 million, Taft's seven tv stations and five am and six fm radio stations contributed $50.1 million, or 63%. While the company's total net revenues and operating profits were up 6% in fiscal 1983, broadcasting's operating profits gained 10%.

Taft's tv stations generated $110 million in revenue during the fiscal year, up 16% from the previous year; its radio stations brought $30.2 million in revenues, up 3%. For consistency, the figures used to rank Taft in this issue are for fiscal 1983 even though the company just concluded its 1984 fiscal year March 31.

During fiscal 1984, its broadcast group showed much stronger growth. Net revenues for Taft's broadcast group rose 22% to $171.5 million. The broadcast group's operating profit for 1984 was $58.1 million, up 16%. The company's total net revenues in fiscal 1984 rose to $453.8 million, up 19%, and total operating profit increased 11.6%.

Taft, which put its first radio station on the air in 1939 and brought tv to Cincinnati in 1949, always has considered communications its core business. For awhile, it was involved in building and operating amusement parks, but recently the company signaled that it was ready to turn its attention back to communications.

In April, 1984, Taft sold its three domestic theme parks—and one still under construction—for $167.5 million to Kings Entertainment Co., an independent investors group that included some of Taft's own Attractions Group management.

Sold in the transaction were Kings Island near Cincinnati, Kings Dominion near Charlotte, N.C., and Hanna Barbera Land near Houston. Taft, however, kept Canada's Wonderland in Toronto. The company said it would reinvest $5 million in the new venture and retain one-third equity.

Taft's chairman-ceo, Charles S. Mechem Jr., calls the sale a critical step in the company's goal of concentrating its resources on the expansion of its communications operations.

Taft often has expressed its hope that the FCC would lift its limit on the number of tv and radio stations a single company could own. Barring that, officials say their strategy is to improve existing properties and to trade up from small-market operations to larger ones.

The company has taken several steps in that direction during the past year. It moved into Miami—the 13th largest market—early in 1983, when it acquired vhf independent WCIX-TV from General Cinema Corp. in trade for WGR-TV in Buffalo and $70 million in cash and notes.

It is also making several changes in its radio roster. In fiscal '83 it sold KQV (am) in Pittsburgh. Then in March of this year, Taft finalized the purchase of two Portland radio stations, KEX (am) and KKRZ (fm), from Golden West Broadcasting for $8 million.

Also, it has announced plans to buy WSUN (am) in the Tampa/St. Petersburg market from Plough Broadcasting. WSUN has a stronger signal than WDAE (am) in Tampa, which Taft already owns. It intends to sell WDAE to Gannett Co. to comply with FCC ownership rules.

Finally, Taft plans to sell its two Buffalo radio stations, WGR (am) and WGRQ (fm), to CRB Broadcasting of New York. All pending transactions are subject to negotiation of final agreements and FCC approval.

Taft officials say the amusement parks sale also gives them the financial flexibility to take advantage of emerging opportunities in new technologies such as satellite networking and cellular radio.

In September, the company acquired 21.5% interest in VideoStar Connections, the nation's leader in point-to-multipoint videoconferencing, and 22.5% interest in Midwest Mobilephone Corp., an Indianapolis-based company that develops cellular radio service.

Taft and Tele-Communications Inc., Denver, jointly own 15 cable systems in Michigan and New England. Of 238,000 homes passed, the systems have 150,000 basic and 68,000 pay subscribers. These systems are being upgraded, and Taft says it would consider limited expansion of its cable holdings.

Taft has its limit of tv properties with five vhf and two uhf stations and in recent years it has developed them aggressively.

Three of Taft's four network affiliates—WKRC-TV in Cincinnati, WDAF-TV in Kansas City and WBRC-TV in Birmingham—have top-rated news shows. And two of its independents—WCIX-TV, Miami, and WTAF-TV, Philadelphia—rank as the top independent stations in their markets. WTAF's rights to broadcast Philadelphia Phillies baseball games is cemented by Taft's 47.5% ownership of the team.

Taft's Entertainment Group owns several production companies and one programing distribution company, Worldvision Enterprises, which handles tv series such as "Love Boat," "Barnaby Jones" and "Little House on the Prairie."

Two of Taft's production subsidiaries, Hanna-Barbera and Ruby-Spears, provide the bulk of the networks' Saturday morning cartoons. In addition, Taft Entertainment, which produces films and live-action tv shows, recently announced a joint venture with Keith Barish Productions to do nine movies in the next three years.

Taft's teletext experiment, Electra, still is in test at WKRC in Cincinnati. In a partnership arrangement, Zenith Electronics Corp. sells decoders to people in Cincinnati who want to receive Taft's electronic newspaper. But only about 150 decoders have been sold during the past six months.

Tele-Communications Inc.

Revenues	1983	1982
Media	$347,300,000	$265,600,000
Other	21,100,000	17,000,000
Total	$368,400,000	$282,600,000

Tele-Communications Inc., Denver, was the nation's 25th largest media company in 1983 with $347.3 million in media revenues, up 30.8% from 1982. Media revenues were 94% of total revenues of $368.4 million.

At yearend, TCI owned or managed cable systems serving 2.8 million basic subscribers and 1.9 million pay tv subscribers. Of these, nearly 170,000 homes were equipped with addressable converters.

Basic subscribers increased nearly 26% in 1983, while pay subscribers showed an increase of more than 39%, according to the company.

Regarding future growth, TCI recently noted it had commitments totaling more than $60 million for the purchase of cable systems in the coming months. In the past year, the company spent more than $216 million on acquisitions.

TCI, which earns about 6% of its total revenues from microwave operations, spun off its microwave subsidiary in the early part of 1984. It also sold several of its cable systems for a total of $45.3 million, resulting in a net gain of $5.75 million.

TCI's hectic pace in 1983 seems geared for duplication in 1984. In March, the company announced it had completed negotiations with Warner Amex Cable Communications for the purchase of its cable system in Pittsburgh for $93.4 million. TCI agreed to buy the franchise with its 74,000 basic and 55,000 pay subscribers subject to approval by the Pittsburgh city council.

That approval may face rough sledding because TCI has indicated that it may cut back on services in Pittsburgh. According to John Sie, senior vp, TCI, the company would have to scrap Warner's Qube system in Pittsburgh to make the system profitable.

During 1983, TCI purchased all the outstanding stock of Liberty Communications, several cable companies from Tele-Media for a price estimated at $145 million, and CableScope Inc., a unit of Cowles Media Co.'s Buffalo Media Inc. for $41.5 million.

The company also made several single-system acquisitions: Two Oakland, Cal., systems (23,000 subscribers) from Group W Cable for $15 million; Marquette, Mich. (16,000 subscribers) for $10 million, and Southern Illinois Cable TV (12,717 basic and 6,550 pay subscribers) for $9 million. Lenfest Communications is a 44% partner in the Oakland systems.

TCI continues to be involved in franchising bids, the most recent being in Baltimore, a 300,000-household city, where it competed with Cox Cable Communications and United Cable Television Corp. TCI dropped out after initial bidding and the franchise was awarded eventually to Cox.

TCI has been involved in a variety of joint ventures during 1983. In the Bay Area, it teamed up with five other multiple system operators to form the Bay Area Cable Advertising Cooperative. The co-op will represent systems that claim an aggregate of 300,000 basic cable subscribers. In the Midwest, TCI is involved in Sports Time, a pay cable network that is being offered to subscribers in several states. The other partners in the project are Anheuser-Busch Cos. and Multimedia Inc.

Amid all this, TCI has not been without its problems. Its major challenge came when the Richland County board gave it 90 days, ended Feb. 14, 1983 to clear up a plethora of problems with its Columbia, S.C., franchise—including picture quality and the existence of only one converter store. Failing that, the board threatened to revoke the TCI franchise, which passes about 25,000 homes and has about 14,500 subscribers.

At press time, TCI had obtained a delay in the revocation vote to complete correction of the problems.

Other media operations

Tele-Communications Inc. owns a 50% interest in Taft-TCI, which in turn holds interest in Black Entertainment TV. Also, it operates National Telefilm Associates (74% interest).

International Thomson Holdings

Revenues	1983	1982
Media*	$608,612,000	$462,287,000
Other	——	——
Total	N/A	N/A

*Revenues from properties held in U.S.

International Thomson Holdings, the principal U.S. subsidiary of International Thomson Organisation, London, ranked 19th among U.S. media companies in 1983 with aggregate operating revenues from U.S. media properties of $608.6 million, a 32% increase in media over the previous year.

Contributing to media revenues for ITO are Thomson Newspapers, Toronto, Ont., which has extensive newspaper operations in the U.S., and its sister company, International Thomson Organisation, the trade magazine group.

The two Thomson media companies, both private like the rest of the worldwide company, are united in this issue because ownership of both is controlled by the Thomson family (Lord Thomson of Fleet). The family has a 61% stake in Thomson Newspapers, down from 72% in 1982, and a 73.5% interest in International Thomson Organisation, down from 82% in 1982.

Thomson Newspapers publishes 84 daily newspapers and four weeklies with a combined circulation of 1.3 million for the dailies. Revenue was $281.6 million in 1983, up 10.9% from the previous year. Operating income was $113.3 million, up 16.6% from 1982.

During the year, Thomson Newspaper bought two properties, *Waukesha* (Wis.) *Freeman* and the *Daily Tribune* of Wisconsin Rapids, Wis., and closed the *Antelope Valley Daily Ledger Gazette*, Lancaster, Cal. In 1984, the company has acquired the *Express*, in Easton, Pa., and the *Daily Spectrum*, St. George, Utah.

Most development is expected to be in the U.S., since there is a possibility of legislation in Canada on the concentration of ownership. Thomson owns 53 daily and weekly newspapers in Canada.

In December, 1983, charges alleging the company's newspaper operations acted illegally in Montreal, Ottawa, Winnipeg and Vancouver were dismissed. The charges had been filed in May, 1981, under the Canadian Combines Investigation Act.

International Thomson Holdings, the magazine and book publishing arm, had total operating revenue in the U.S. of $327.0 million from its magazine interests, up 57% from 1982. ADVERTISING AGE does not count books as media.

ITH made big strides in magazine

The T-Shirtery Inc. now offers computerized precision embroidery. Embroidery adds that touch of class, creates a sense of permanence, and projects a quality image.

Now you can have three initials embroidered on this sweater or golf shirt for only $19.95 plus $2.00 for postage and handling. The sweater is available in kelly, navy, red, silver, ecru, camel, royal, and light blue and the golf shirt is available in navy, red, and maroon.

We also custom embroider company logo's. Send your logo to the embroidery quotation department for a free price quote.

publishing through its purchase of *American Banker* and *Bond Buyer* for $58.7 million.

The company, through International Thomson Business Press, began operations in the U.S. in the 1970s and has grown through acquisitions and launches. *Medical Economics*, one of the company's most successful trade magazines, had an estimated $20 million in ad revenues from more than 4,000 ad pages during 1983.

Further acquisitions can be expected during 1984, as the company's stated aim is to expand its media and information services, leaving oil and natural resources on the back burner for now.

Time Inc.

Revenues	1983	1982
Media	$2.249 bil.	$1.822 bil.
Other	468,000,000	549,000,000
Total	$2.717 bil.	$2.371 bil.

*Restated

Time Inc., New York, which spun off its huge forest products division last year, still generated record revenues in 1983 as media increased the contribution to $2.25 billion, making Time Inc. the third largest media company in the U.S. Excluding consideration of forest products in a 1983-to-1982 comparison, magazine and video holding revenues rose to 81.7% of the total $2.72 billion in revenues in 1983, from 75.8% in 1982.

Media revenues for the year increased 23.6% over 1982 as Time Inc. focused greater attention on its remaining business after the divestiture of its forest products activities, which in 1982 generated $1.2 billion in revenues for a third of the company's total revenue.

Magazines continued to represent the largest revenue source, though by a decreasing margin over video. In 1983, Time Inc.'s magazines brought in $1.13 billion, up 20.2% from 1982. Video contributed $1.09 billion, a 27.3% gain over 1982. Video, however, was considerably more profitable, yielding $215 million in operating profits in 1983 while magazines, including the $47 million in losses taken on *TV-Cable Week*, brought in only $106 million.

Time Inc. also derives media revenues from Pioneer Press, a chain of weekly newspapers, though it does not break out the revenue or income separately. ADVERTISING AGE estimates Pioneer Press generates about $32 million in revenue.

Time Inc.'s nonmedia businesses include Selling Areas-Marketing Inc., the company's market information service. The company, which lumps SAMI with Pioneer in its reporting procedures, reports the two pulled in $95 million in revenues in 1983, up 6.7% from 1982. Book publishing is Time Inc.'s other major line of business, and it produced $401 million in revenues, a drop of 21%.

Freed from its forest products division, Time Inc. only now is looking for new opportunities in the information and entertainment areas. Magazine acquisitions and startups also assumed greater importance, particularly after the folding of *TV-Cable Week*. The company formed a new Magazine Development Group late in the year.

TV-Cable Week was Time Inc.'s big fiasco. The guide was launched in April with five cable systems signed up, plans to invest up to $100 million and expectations that it eventually could become the company's biggest publication. It was folded five months later, a $47 million loss that had met resistance from cable operators and, as a result, was carried by only 19 cable systems at its demise.

However, Time Inc.'s established magazine properties continued strong with their combined circulation rate bases rising 905,000 and their share of the magazine advertising market increasing 21.4%. Each of the seven magazines reported increases:

- *Time* magazine's worldwide ad revenues rose 13.5%, to $396.7 million, and its worldwide circulation was up 1.8%, to 5,916,000.
- *Sports Illustrated's* ad revenues increased 12.5%, to $183.2 million, and its circulation was up 4.3%, to 2,425,000.
- *People's* ad revenues rose 10.2%, to $175.5 million, and circulation rose 7.2%, to 2,600,000.
- *Fortune's* ad revenues rose 33.1%, to $101.4 million, and its circulation 3.0%, to 690,000.
- *Money's* ad revenues increased 27.7%, to $42.0 million, and its circulation 27.3%, to 1,400,000.
- Life's ad revenues were up 26.3%, to $29.3 million, and its circulation was up 7.7%, to 1,400,000.
- *Discover's* ad revenues rose 22.9%, to $ 1.8 million, and its circulation rose 2.9%, to 875,000.

Time Inc. saw major growth and transformation in the video area, too, though there were also some disappointments. The company shelved its plans to launch a commercial teletext service after spending between $20 million and $30 million in tests in Orlando, Fla., and San Diego. Involvement also was ended in over-the-air subscription tv as the Cleveland service was closed and the Boston one sold.

But cable tv grew, and American Television & Communications, with cable systems serving subscribers in 464 municipalities in 31 states, experienced increases both in its total number of basic subscribers (up 14%, to 2.4 million) and pay subscribers (up 16%, to 2.2 million). ATC decided both to decentralize operations and to focus growth in areas it already serves, rather than become involved in new franchise fights. It did add one new franchise, the western part of the borough of Queens in New York.

ATC also entered the international arena, winning two franchises in Scotland and England that are partnerships with several British companies. Similarly, Home Box Office, the largest U.S. pay tv network, also expanded internationally, forming a joint venture to create a new pay tv service for British cable.

But HBO's biggest maneuvers were in the U.S. It added 2 million subscribers for the third year in a row. It now numbers more than 13.5 million subscribers in some 5,400 cable systems.

HBO also entered the feature film area. It formed, along with CBS and Columbia Pictures, Tri-Star Pictures, to produce and distribute feature films. It also established licensing agreements giving it exclusive rights to exhibit movies turned out by certain studios, including Columbia Pictures and Orion Pictures.

HBO was the subject of U.S. Supreme Court action this month that allowed Crimpers Productions Inc. of Hicksville, N.Y., to go ahead with its $50 million antitrust suit against HBO and Showtme Inc. They are charged with boycotting a trade show meeting staged by Crimpers.

Cinemax, the country's third largest pay tv network, also sought growth in directions parallel to HBO. Time Inc. originally began Cinemax as a film buff's supplement to HBO in 1980, but it soon broadened it into a network carrying original programing, a greater number of movies than planned and more varied programs. Cinemax also added more than 700,000 subscribers in 1983, giving it a total of 2.7 million.

MEDIA PROPERTIES

Cable/video

Cinemax, Home Box Office, USA Cable Network (33% interest). Also, American Television & Communications Corp., now divided into 13 divisions and one national division that includes many smaller communities in 23 states. The individual divisions include Birmingham, Ala.; San Diego, Cal.; Florida; Hawaii; Indianapolis; Kansas City; Manhattan, N.Y.; Rochester, N.Y.; Charlotte, Raleigh, Greensboro, Fayetteville, all in North Carolina; Austin, Tex. Times Journal Co.

Revenues	1983	1982
Media	$84,000,000	$73,700,000
Other	35,000,000	30,500,000
Total	$119,000,000	$104,200,000

Times Journal Co., Springfield, Va., formerly named Army Times Publishing Co., is the country's 98th largest media company, with 1983 media property revenues estimated by ADVERTISING AGE at $84 million, or 71% of total estimated revenues of $119 million.

The company continued its growth pattern in the first-quarter 1984. "We're about where we thought we'd be. Revenues have increased 14% over last year," says Henry Belber, exec vp.

Major developments at the company include a new name and new home. In January, Army Times was recast as Times Journal Co., a name bearing the titles of the company's *Times* military tabloids and *Journal* Washington suburban newspapers. Administrative headquarters recently were moved from Washington to a modern three-story complex in Springfield, Va., also the site of the company's production plant.

Times Journal Co. is made up of four operating divisions: Army Times Publishing Co. provides the military publications; Journal Newspapers publishes the suburban papers; Times Journal Telemarketing Co. provides telephone marketing services, and Times Journal Printing Co. rolls out the publications and prints for outside clients. ADVERTISING AGE media figures are based on revenues from Army Times Publishing Co. and Journal Newspapers.

Founded by Mel Rider, the company evolved during pre-World War II days with papers serving Depression-era work camps and the Army. Today, the circulation of the weekly *Army Times, Navy Times* and *Air Force Times* runs at 320,000. *Federal Times*, another paper in the group, has a circulation of 40,000.

In the 1970s, the company diversified with the *Journal* newspapers, serving five suburban counties that encircle Washington. When the daily *Washington Star* folded in August, 1981, and left the nation's capital a one-newspaper town, *Journal* executives executed their goal of making the papers dailies, publishing on weekdays but not weekends.

The three Virginia papers are managed at the new Springfield building, while the *Montgomery Journal* is based in Rockville, Md., and the *Prince George's Journal* operates in Lanham, Md.

While the *Journal* papers are still in the red, Mr. Belber cites "big improvements" over the past year.

ABC audit for March 31, 1984, places the *Journals'* total circulation at 147,000, compared with 136,000 the previous year. Ad linage is up 11% through April, Mr. Belber says.

In addition to printing its own publications, Times Journal presses roll out Gannett Co.'s national daily, USA Today, for the Washington-Baltimore, Richmond and Norfolk, Va., markets. The company also prints a portion of Rupert Murdoch's national tabloid, the *Star*, and all copies of Times Mirror Co.'s *Sporting News*.

The company's presses also produce the company's *Times Magazine* monthly military supplement and 11,000 copies of *Military Market*, a trade publication for military commissaries as well as the *Washington Post's* Sunday tv guide and occasional retail supplements.

Based on its success with telephone marketing to sell its own publications, the company offers phone services to outside clients through its Times Journal Telemarketing division. The telemarketing service is the second largest in the country, Mr. Belber says. Telemarketing is performed from offices in the Washington area, Virginia Beach, Va., and Florida.

The company has tested some teletext activity on a small scale in Virgina, but Mr. Belber says no determination has been made on whether to play a role in cable.

Times Mirror Co.

Revenues	1983	1982
Media	$1.667 bil.	$1.489 bil.
Other	824,000,000	722,000,000
Total	$2.491 bil.	$2.211 bil.

Times Mirror Co., Los Angeles, is the country's seventh largest media company, with media operations accounting for $1.67 billion, or 66.9%, of total 1983 revenues of $2.49 billion.

Media revenues rose 12.1% from last year's $1.49 billion. Total revenues were up 12.7% from 1982's $2.21 billion.

Newspapers made up $1.27 billion of revenues, broadcast $116.1 million, cable $154 million, and magazines $130 million.

For Times Mirror, 1983 was the best year in its 100-year history. Leading the surge was the company's Newspaper Publishing Group. Revenues for the group increased 11% from 1982 levels, fueled in part by hefty gains in classified ad linage. In the previous recessionary year, classified advertising had dropped 2% at Times Mirror newspapers over-all; at the *Los Angeles Times*, the longtime national leader in classified advertising, that category had fallen a staggering 23%.

For 28 consecutive years, the *Los Angeles Times* led U.S. newspapers in ad volume. It had 180,112,236 lines in 1983. Times Mirror says the paper's select market coverage program, started in 1982, played a major role in those gains—its preprint ad linage rose 66% for the year.

Editorially, the *Times* is continuing efforts to upgrade its coverage, to increase its dominance in its home base, Southern California, and build its reputation as a national and international newspaper. After more than 20 years of intense effort, the *Times* is considered one of the country's best, but it has yet to enjoy the influence and prestige of major eastern rivals, such as the *New York Times* and the *Washington Post*.

During 1983, the paper expanded coverage in its Orange County and San Diego editions, two regions in which the *Times* seeks further growth.

In addition, the *Times* also is looking to the affluent San Fernando Valley for expansion. Starting Oct. 1, the flagship of Times Mirror will begin publishing a newly designed Metro Valley section with added pages containing local news and advertising, plus an expanded sports section. It will be printed at the $96 million printing plant in Chatsworth, Cal. Parts of the paper have been printed there since December.

The paper also is contemplating a major overhaul of its Sunday *Home* magazine, which in recent years has been dwindling in size because of waning advertiser interest. The *Times* is testing three prototypes, and publisher Tom Johnson says it is unlikely the paper will make any changes in *Home* before fall, 1985.

Dallas and Denver continue to be the most competitive newspaper markets in which Times Mirror competes. In an attempt to solidify its precarious positions in those cities where it runs a close second, the company has increased staffing and is taking steps to modernize and expand production facilities.

In Dallas, the tug of war between Times Mirror's *Dallas Times Herald* and the *Dallas Morning News* continued. During the year, both papers claimed leadership and dominance in the market; over-all, the *Times Herald* still trails the *Morning News* in circulation and ad linage.

Denver Post publisher Lee J. Guittar moved to the *Dallas Times Herald* as publisher when Dallas publisher Thomas R. McCartin became president-ceo of Times Mirror National Marketing, a new ad sales organization for Times Mirror newspapers. Richard T. Schlosberg III succeeded Mr. Guittar at the *Post*.

Newsday, the nation's 12th largest paper, showed serious interest in moving beyond its Long Island base into New York City. The 500,000-plus circulation paper named a new editor to run its Queens edition, and coverage in the section has begun to focus more on citywide news. *Newsday* publisher David Laventhol denies the change in editorial focus is a precursor to the paper moving into Brooklyn or Manhattan. He maintains that Queens is the only section of New York that it makes sense for *Newsday* to include in its territory.

While newspapers traditionally have been the core of Times Mirror's business, the company also is increasing its involvement in electronic media. During the year, it strengthened its involvement in broadcast, cable tv and other new technologies.

The broadcast group's 1983 revenues represented a 16% increase from 1982 levels. Its operating profit reached $61.8 million, a 25% year-to-year improvement.

Times Mirror's cable operations continue to be a drain on company profits. Cable tv revenues increased 23% over 1982 results, but operating profit declined 23.5%, to $15.3 million. Times Mirror says its cable operations are making substantial subscriber gains in several markets.

In December, Times Mirror Cable Television and three other multiple system operators agreed to drop Spotlight, a pay cable tv service that was envisioned as a grass-roots competitor to Time Inc.'s powerful Home Box Office. After it failed to work, the backers sold the service to Showtime/The Movie Channel in January.

Videotex America, a joint venture between Times Mirror Videotex Services and Infomart, Toronto, to develop videotex systems, signed an agreement in 1983 with several newspapers.

Also, Videotex America joined forces with two California newspaper publishers to form a videotex service geared to farmers. The new service, which will get started in late 1984, will provide farmers in California's enormous San Joaquin Valley with information on weather, news and the stock market, in addition to chemical and livestock reports.

In mid-1984, the company will start its Gateway commercial videotex service in Orange County, offering electronic news and other services, such as home banking and shopping.

Larry Wangberg, former president of the metro division of Warner Amex Cable Communications, New York, joined Times Mirror Cable as president-ceo. He succeeded Ralph Swett, who assumed the new post of chairman.

As a marketing opportunity and as a way to show its support for Los Angeles, Times Mirror contributed $5 million to become an official sponsor of the 1984 Olympics.

In November, Times Mirror sold its New American Library paperback book unit to an investor group for $50 million.

Times Publishing Co.

Revenues	1983	1982
Media	$134,800,000	$119,500,000
Other	—	—
Total	$134,800,000	$119,500,000

Times Publishing Co., St. Petersburg, Fla., the 71st largest media company in the U.S., had revenues estimated by Advertising Age at $134.8 million in 1983, all from media operations.

The major impetus for the 12.8% year-to-year increase was a "surging economy in the Tampa Bay area and along Florida's Gulf Coast" and the city's downtown resurgence, according to Andrew Barnes, who was managing editor until he was elected president and editor this year.

The privately held company cited constant growth in satellite areas as reasons for a 4% increase in daily circulation of the *St. Petersburg Times*, to 260,682, and a 5% increase in Sunday circulation, to 330,089. This growth also has resulted in an increase in part-run and preprint advertising.

The company's afternoon newspaper, *St. Petersburg Evening Independent*, completed 1983 with a drop in circulation, dipping 563 subscriptions in 1983, to 37,837. This represents the third straight year of decreases. The company purchased the paper 22 years ago from Thomson Newspapers Ltd.

About the decline, Leo L. Kubiet, Times Publishing advertising director, says, "Anytime you have a minus where all other areas are pluses, you have to be concerned. This year we have a program concentrating on sales and promotion designed to change all that." He says he believes the entry of *USA Today* into the St. Petersburg market may have exacerbated the subscription declines.

Advertising linage showed strong gains for 1983. For the *Times*, the increase was 12.9%, to 91.9 million lines in 1983. For the *Independent*, linage climbed 3%, to 24.1 million. Linage rates were increased by an average of 8% for both newspapers in 1983.

The two newspapers continued to be among the leading U.S. daily publications in tourism and travel advertising with a total of 731,715 lines in that area last year, according to Walter R. Stecher, general advertising manager.

During the peak tourist season last winter, the combined newspapers posted 12 new daily and Sunday circulation highs. The Sunday *Times* peaked at 373,838 copies Feb. 20, 1983. Daily circulation reached a high of 309,685 March 3.

Color ad linage also reached a new high during 1983, with 12.03 million lines in the *Times* and 2.16 million lines in the *Evening Independent*, increases of 14% and 9%, respectively.

Executive changes in 1983 included the retirement in April of John B. Lake, publisher. No one has replaced him. Eugene C. Patterson, former president-editor, was elected chairman.

Mr. Barnes, 44, says that in his new position as president he will concentrate on "staying on top of the tremendous growth we've experienced in the past 10 years."

The paper also plans to expand its news coverage, which has concentrated on detailed coverage of the region, and beef up its foreign news. The foreign news department has grown from one person to four, and now includes a foreign news editor and an assistant editor.

Also in early 1983, the *Times* changed the title and content of the Family/Day sections—MonDAY, TuesDAY, WednesDAY, etc.—to the all-encompassing Floridian.

The publishing company's statewide business magazine, *Florida Trend*, which turned 25 years old in 1983, reached an all-time high circulation of 36,000. General manager Andrew P. Corty expects circulation to grow to 40,000 this year. Ad pages for 1983 totaled 890, compared with 788 in 1982, up 13%. Substantial increases in color advertising helped boost ad revenue gains to almost 40%.

Triangle Publications

Revenues	1983	1982
Media	$579,320,000	$549,400,000
Other	—	—
Total	$579,320,000	$549,400,000

Triangle Publications, Radnor, Pa., is the nation's 20th largest media company with 1983 operating revenues estimated by Advertising Age at $579.3 million, all from print media. The company's estimated operating revenues for 1982 were $549.4 million.

Three publications, *TV Guide, Seventeen* and *Daily Racing Form*, produce total revenues for the privately held company, which is controlled by Walter Annenberg.

Last year, *TV Guide* had an estimated $712.6 million in gross revenues, up 6.7% from 1982 revenues of $655.5 million. *Seventeen* magazine had an estimated combined advertising and circulation gross revenue of $53.3 million, while *Daily Racing Form* had estimated combined revenues of $62 million. (Ad Age estimates are operating rather than gross figures.)

For *TV Guide*, 1983 was a pivotal year as Time Inc. attempted to challenge the 30-year-old publication's dominance with the launch of *TV-Cable Week*. *TV-Cable Week* folded, however, after only five months of publication.

Revenues remained flat for *TV Guide*. Though 1983 was the publication's best year ever for advertising revenue, at $269.4 million gross, according to sources at the magazine, it increased only 6.7% from $241.5 million in 1982. Ad pages increased by only 28, to 3,644, a 1% increase. The publication instituted a 9.8% rate increase in July, 1983, and has announced a 5% rate hike for July, 1984, bringing the cost of a four-color page to $89,250.

At a cover price of 50¢, *TV Guide* generates an estimated $443.2 million in gross circulation revenue. Actual circulation fell to 17,168,824, a company spokeswoman says, from an average circulation of 17,260,297 in 1982. Eric G. Larson, publisher of *TV Guide*, says he believes that these numbers reflect a slight influence from *TV-Cable Week*, and that figures for 1984 will show a modest increase.

No cover price increase is planned, though *TV Guide* continues to test a 60¢ cover price in certain markets.

Future price increases may become necessary because of the high cost of producing the magazine. Paper costs alone will add $10 million this year to the $50 million paid out for paper in 1983. Postal rate hikes also are on the horizon, according to the company.

To keep circulation steady, Mr. Larson says *TV Guide* spent $10 million in 1983 on tv advertising, and will spend another $10 million in 1984. The new campaign features the song, "That's Entertainment."

TV Guide editorial director Merrill Panitt capsulized 1983 as a year of challenge and accomplishment. In response to *TV-Cable Week*, "We put more emphasis on cable sooner than we had planned," he says. That influence carried over into 1984 to include the magazine's first ever cable cover on the miniseries, "Far Pavilions."

"It was a bit of a gamble for *TV Guide* since only some 40% of its readers receive cable," Mr. Panitt says. "But our readers are interested in everything that's on television."

Apparently, the special cover did no better or worse than usual on the newsstand.

Mr. Panitt plans to continue as if he still had competition in 1984: "*TV Guide* will evolve to reflect the dynamic nature of television. Anything that's on the screen is our business, including videocassettes and dbs [direct broadcast satellite]."

Seventeen publisher Frank G. Wolf is bullish on 1984, after a slow start in 1983. Thus far in 1984, the magazine has added 130 pages over the first six months of 1983. For all of 1983, *Seventeen* gained only nine pages from 1982, increasing to 1,311.

Advertising gross revenues climbed 8.8% from 1983, to $25.8 million, according to Mr. Wolf. And, circulation rose 9.5% from the last six months of 1982, to 1,700,000 for the last six months of 1983. This growth has continued into 1984 despite the fact that the number of girls 13 to 19 has dropped.

Seventeen also had a cover price increase in August, 1983, to $1.50, from $1.25. *Seventeen* had an estimated circulation revenue of $27.5 million for 1983. The publication will be 40 years old in August.

Daily Racing Form will commemorate its 90th anniversary in November.

According to publisher Michael P. Sandler, the turfside broadsheet started celebrating a year early with an estimated 22% to 24% increase in its ad revenues in 1983. The increase of about $4 million gives the daily a combined income of about $62 million, Mr. Sandler says.

The newspaper sells for $1.75 and has an average circulation of 140,863 on Saturdays; 71,507 on Monday; 87,567 Tuesday to Friday, and 80,939 on Sunday, according to the ABC audit of March 31, 1983. Between 36 and 40 regional editions are published throughout the U.S. and Canada, varying in number with the racing seasons. The publication had a 6% rate increase in April, 1983, but has no plans for a 1984 increase, according to Mr. Sandler.

Tribune Co.

Revenues	1983	1982
Media	$1.397 bil.	$1.240 bil.
Other	190,000,000	190,000,000
Total	$1.587 bil.	$1.430 bil.

Tribune Co., Chicago, is the nation's ninth largest media company with media revenues of $1.397 billion, up 12.7% from 1982. Media revenues were 88% of total operating revenues of $1.59 billion in 1983.

Newspapers contributed revenues of $1.14 billion, a 9% increase over 1982. Tv and radio accounted for $229 million, up 26%, and cable operations added $31.3 million, up 32%.

Net income for the company advanced to $69.3 million, a 190% increase over last year's profits. This is attributed to improved earnings and circulation at company-owned newspapers and the nearing completion of restructuring and relocating the *New York Daily News*, which has experienced costly delays.

The newspaper group saw operating profits of $140 million, slightly more than double the 1982 results. Each of the newspapers reported record levels of operating profits and improved operating margins. The *Daily News*, after two years of losses, recorded the highest operating profits in its 64-year history. The *Chicago Tribune*, after its first year in its new $185 million printing plant, also achieved record results.

During the first quarter of 1984, the company reported revenues of $394 million, a 13% increase over the first quarter of last year.

The newspaper group experienced an 11% increase in revenues in the first quarter, to $298 million. The company noted strong performances by the Florida papers, the *News* and *Sun-Sentinel* in Fort Lauderdale, and the *Orlando Sentinel*.

This was an eventful year for Tribune Co., as its long-awaited initial public offering of 7.7 million shares in October generated $125 million. The big question is what the company plans to do with the cash.

So far, Tribune Co. has reduced debt—which had increased sharply during the past few years because of the $180 million in construction costs for the new plant in Chicago and a $75 million restructuring program at the Daily News—and financed the purchase of a tv station in New Orleans.

A major event for Tribune Co. in 1983 was News America Corp.'s purchase of the *Chicago Sun-Times*, the *Chicago Tribune's* major competitor. The buyout by News America's controversial Rupert Murdoch sent many top-name reporters and columnists scurrying to the *Tribune*.

Company officials decline to estimate what effect the *Sun-Times'* revamping under new ownership had on recently released circulation figures, which show the *Tribune* gaining substantially.

According to the latest ABC Fas-Fax figures as of the six-month period ended March 31, 1984, the *Tribune's* paid all-day circulation increased to 762,889, up 0.8%, and Sunday circulation increased to 1,145,387, up 1.6%. The company pointed out that increases in the second three months of the study, ended March 31, averaged 30,000 daily and Sunday—significantly higher gains than during the first three months, which might indicate the sale of the *Sun-Times* had a direct bearing.

ABC figures for the *Sun-Times* during the same period show a decline of 4.1%, to 628,285 in all-day circulation, and a drop of 0.2%, to 687,386, in Sunday circulation.

The increases in *Tribune* circulation look especially promising considering the trend of eroding circulation a year ago, when the *Sun-Times* was going after the affluent market traditionally considered the *Tribune's* turf.

The exodus from the *Sun-Times* included publisher Jim Hoge, recently installed as publisher of the *Daily News*. A combination of job buy-outs, union concessions and the sale of the paper's building contributed to its record operating earnings in 1983, but the company already has announced that the *Daily News* will not match that performance in 1984.

A 9% drop in circulation as of March 31 and continued costs of moving the paper's operations and distribution centers are sighted as reasons.

Maintaining its stated commitment to the *Daily News* continues to be a costly venture for Tribune Co. In 1983, almost a third of $97 million in total capital expenditures was spent on the relocation of *Daily News* production facilities. Another $24 million was spent on construction of new and existing cable tv systems, although the cost of the cable operations was much lower than anticipated due to delays on joint venture plans with United Cable Television Corp.

The company continued to spend money for broadcast properties, acquiring WGNO-TV in New Orleans for $21 million. In January, the company bought WANX-TV in Atlanta for $32 million.

The company plans to spend about $140 million in 1984, 1985 and 1986, of which $60 million is budgeted for cable acquisitions in each year. Cable operations posted a $4.8 million loss for 1983, because of costs of developing and marketing new systems in Tampa, Fla., Lakewood, Cal., and Montgomery County, Md. However, existing cable franchises continued to grow and contributed to a 30% rise in the segment's revenues, to $31.3 million, for 1983.

Tribune Co.'s restructuring of the *Orlando Sentinel* seems to be paying off, as the paper's circulation continues to increase between 5% and 10% annually. Its operating margins usually outstrip those of the *Daily News* and *Chicago Tribune*. Printed at a new $38 million-facility, the paper has recently implemented a policy of taking a harder stance on the news, and has beefed up business coverage and given it a separate section six days a week.

The *News* and the *Sun-Sentinel* in Fort Lauderdale continued to make inroads. The papers opened bureaus in Miami and Washington in 1983, expanded suburban operations and added a Sunday magazine.

The Los Angeles Daily News should not be discounted, as the renamed *Valley News & Greensheet* continues to resist the urge to compete directly with the mammoth *Los Angeles Times*, opting instead to strengthen its presence in the suburbs through a series of editorial changes and expansion.

The broadcasting division continues to exhibit strong profit performance. Mostly because of good returns from WGN and WGN-TV in Chicago and WPIX and WPIX-TV in New York, the division posted operating profits of $45 million.

Turner Broadcasting System

Revenues	1983	1982
Media	$201,300,000	$146,300,000
Other	23,200,000	19,300,000
Total	$224,500,000	$165,600,000

Turner Broadcasting System, Atlanta, is the nation's 49th largest media company with 1983 media revenues of $201.3 million, a 37% increase from 1982. Media revenues were about 90% of total revenues of $224.5 million.

TBS, which recorded a record $7 million profit, had its best year financially since the founding of Cable News Network in 1979. This compared with a $3.3 million loss in 1982.

After fighting to keep Satellite News Channel (SNC)—a floundering ABC Inc. and Westinghouse Broadcasting & Cable joint venture—from cutting into CNN's clearances with systems and ad revenues, TBS paid $25 million to buy SNC in late 1983. The company then folded the network by converting most subscribers to CNN.

The backlash of this bitter rivalry still was being felt in the first quarter of 1984 when TBS suffered a $5.3 million loss, compared with a $1.9 million gain for the same period of the preceding year. Revenues for the quarter climbed 21.6%, to $54 million.

Ted Turner, president, said the loss

was concessions made to hold on to cable operators and to debt service and other costs carried over from the SNC buyout. He predicted that CNN would return to the black after a new card firms up system rates for the two news networks, CNN and CNN Headline News.

Struggling to keep its advertiser-supported networks off of premium pay tiers, TBS's prices for CNN and CNN Headline News are designed to entice operators to put the services on basic, rather than premium pay channels.

TBS' three networks, superstation WTBS with nearly 30 million homes, the original CNN, with up to 25.1 million homes, and CNN Headline News, with 10.5 million homes, attracted more national cable tv advertising dollars than any other cable company. But meanwhile Entertainment & Sports Programming Network, with more than 30 million homes, and CBN Cable Network, with 23 million, were becoming more formidable rivals.

In 1983, TBS grossed $136.2 million from superstation WTBS and related broadcast activities, up 41% from 1982. Sources estimate the net profit of this hybrid over-the-air and cable operation at $42 million. (The fees from cable operators, a discounted 10¢ per home per month, do not go to the station's owner, but to the satellite carrier, Southern Satellite Systems.)

Between them, CNN and CNN Headline News took in $65.1 million from sponsors and cable operators, which paid a variety of fees for the service. In 1982, the comparable figure was $49.7 million.

Now that it has a cable news monopoly, TBS is trying to stabilize operator prices and persuade systems to pick up a greater share of escalating programing expenses. But buyer resistance forced the company to drop a plan to bill an operator for all his basic subscribers, even if CNN were being sold on a pay tier that was nowhere near 100% of basic. The revised structure permits an operator that is carrying either news service with less than 50% penetration to pay only for those people actually buying CNN or CNN Headline News.

TBS' media properties are expected to gross more than $225 million this year, but this depends on the impact the Olympics product at ABC has on the over-all fall tv market. Most sponsors do not include cable in their upfront buying.

Excluded from this media analysis is the Turner sports operation, which brought in $21.4 million. Mr. Turner, through a limited partnership, owns 96% of baseball's Atlanta Braves and basketball's Hawks. The Braves have played a major role in making WTBS a well-known name. But they face formidable competition for the informal title of "America's baseball team."

Games of both the New York baseball clubs, the Yankees, on WPIX-TV, and the Mets, on WOR-TV, now are covered via satellite. However, so far they are not challenging TBS for cable tv network ad dollars.

United Cable Television Corp.

Revenues	1983	1982
Media	$115,300,000	$91,800,000
Other	——	——
Total	$115,300,000	$91,800,000

United Cable Television Corp., Denver, the nation's 79th largest media company, reported revenues in 1983 of $115.3 million, all in cable, a 26% increase over the previous year.

The publicly held company continued to gain in the first nine months of fiscal 1984, ended Feb. 29, reporting revenues for that period of $102.9 million and operating income of $39.9 million. Those totals represent increases of 23% in revenues and 28% in income over the corresponding period in 1983.

United Cable's earnings for fiscal 1983, ended May 31, 1983, totaled $2.6 million, down from $16.4 million for fiscal 1982. The company has cited development costs for new cable systems and losses by its Home Entertainment Network subscription tv service as causes of depressed earnings. For the first nine months of fiscal 1984, United reports earnings have risen to $6.8 million.

By the end of February, the multiple system operator, which owns and operates 35 cable tv systems, reported that homes passed totaled nearly 1.1 million, serving 619,000 basic subscribers and 513,000 pay subscribers.

United Cable and its managed limited partnerships are developing eight new systems with an aggregate of more than 450,000 homes.

Last fall, the company was granted the long-sought-after East San Fernando Valley franchise, which includes an upscale portion of Los Angeles. Construction, now under way, is funded by a limited partnership.

United has been designated by Los Altos to operate the franchise for that city; the company will add Los Altos to its Cupertino, Cal., franchise operation. La Puente, Cal., also is under construction, as part of the United Cable Television of Los Angeles County system.

In the Los Angeles basin area, United has a management contract with an opportunity to purchase, with Communicom, Los Angeles, a system including Hollywood and parts of the city of Los Angeles.

United is in the process of purchasing two mature cable systems from Tele-Communications Inc.—Golden and Lakewood, Colo., and Papillion, Neb., and environs.

Construction of the Denver suburban system has been completed, and building in Scottsdale, Ariz., is almost done, the company says.

Early this year, United sold its Chicago Spectrum stv operation to Oak Media Corp., a subsidiary of Oak Industries. Oak operates ON TV in the Chicago market. Spectrum, which began broadcasting in Chicago in the latter part of 1981, had about 37,000 subscribers at the time of sale.

United's Spectrum had been part of its Home Entertainment Network unit, which continues with stv operations in Minneapolis and Cincinnati. Paul Beckelheimer, who had headed the HEN operation, now is vp-operations with the parent company.

Two of United's systems, the Tulsa, Okla., franchise and United Cable of Colorado, serving the Denver suburbs, have been successful in generating advertising revenues, the company says. By the close of fiscal 1984, ended May 31, the company expected that the Tulsa operation would have taken in advertising revenues of $850,000 to $900,000; the total for Denver was expected to be about $850,000. Most of the commercials inserted in the Denver system's programing are produced by United Cable of Colorado's in-house production facility.

In June, 1984, United agreed to sell its Denver tv station WBTI and its associated Cincinnati subscription tv operations to Channel 64 Ltd. The agreement is awaiting FCC approval.

Last summer, United began testing an umbrella ad campaign to lure tv viewers to cable. The two-city test was so successful it has been adopted by 12 of the company's systems, and United expects that about 20 will be using it next year. In addition, three other operators have purchased either a generic version of the campaign or the rights to adapt the United effort.

The original tv and radio commercials, credited with increasing the subscriber base by 3%, targeted light tv viewers with the line, "The more you watch tv, the more you should join the United family."

U.S. News & World Report

Revenues	1983	1982
Media	$133,000,000	$124,000,000
Other	16,000,000	8,000,000
Total	$149,000,000	$132,000,000

U.S. News & World Report, Washington, sold this year after 50 years of independent operation, scores as the nation's 72nd largest media company. Its 1983 media revenues are estimated by ADVERTISING AGE to be $133 million, or 89.3% of estimated corporatewide revenues of $149 million. The 1982 comparison is $124 million in media revenues; $132 million in total revenues.

The employe-owned company was purchased for $168.5 million in mid-June, 1984, by Mortimer Zuckerman, publisher and real estate developer. Mr. Zuckerman is no stranger to the company, having been a real estate partner several years with U.S. News & World Report. The purchase price was 57 times earnings.

Mr. Zuckerman, who plans to spend a year immersed in the operations of his new investment, says the only immediate plans are to strengthen the magazine graphically. Time will tell whether his left-leaning *Atlantic Monthly* will influence the operations of the more conservative *U.S. News*. However, in a press conference announcing the purchase, he said, "There are marriages in which liberals and conservatives get together quite happily."

The prospect of an ownership change had put the company in the media spotlight, and may have created uncertainty in the advertising community about the magazine's future because ad sales have slid since last December when management disclosed it was considering an unsolicited buyout offer.

After a prosperous 1983, when *U.S. News* scored a 12% ad revenue increase, to $93.9 million, on a 3% ad page increase reported by Publishers Information Bureau, the magazine has suffered a 4% drop in ad revenue and 12% drop in pages through mid-May of 1984. Competitors *Time* and *Newsweek* reported gains or small declines during the same period.

Despite the early year results, U.S. News management predicts revenue gains for its media holdings in 1984. Knowledgeable forecasters are projecting $142 million in media-related revenues this year and $161 million in revenues for the company as a whole. Profitability is another question. It may be hard for the magazine to keep pace with its current earnings level of $2.95 million. Some senior execs long associated with the company acknowledge that *U.S. News'* profitability has been up and down, and that in some years the magazine has lost money.

U.S. News itself has been counted out a number of times by naysayers since *Time* and *Newsweek* pulled away in circulation and ad pages in the 1960s. Its creator, David Lawrence, never let go of editorial control until his death at 84 in 1973, and critics dismissed the magazine as too stodgy, too conservative, too plain.

Under editor Marvin Stone, *U.S. News* has fought back with generous splashes of editorial color, a broader editorial reach that added coverage of important "social" issues to its meat and potatoes of politics and the economy. The magazine followed *Time* and *Newsweek* on to the college campus in search of a new generation of readers. Mr. Stone is being retained in his post.

At the corporate level, a successful diversification drive promised to make the company less dependent on the magazine's fortunes. A pioneer in developing computerized typesetting for its own operations, U.S. News opened Publishers Service International to service other publishers. Sales commitments quickly rose to $10 million and more a year.

A long-awaited deal for developing its real estate holdings in the booming west end section of Washington was made during the year. The first fruit of the real estate venture is luxurious new headquarters for the company, but hotels, office buildings and residential units are yet to be built. When completed, some observers have speculated that U.S. News' 50% stake in the development could be worth $200 million.

The irony in the U.S. News story is that its success with new ventures forced it to consider the sale option. The value of its stock, held in a profit-sharing trust and by many employes through a stock bonus plan, has exploded. Priced by a private appraiser hired by the company, the stock has gone from less than $100 per share in 1976 to $625 last year. Mr. Zuckerman paid more than five times this per share value.

Viacom International

Revenues	1983	1982*
Media	$271,286,000	$235,131,000
Other	44,291,000	46,287,000
Total	$315,577,000	$281,418,000

*Restated by company to reflect KSLA-TV acquisition.

Viacom International, New York, is the country's 35th largest media company, with media revenues of $271.3 million, up 13.3% from 1982. Media revenues were 86% of the company's total revenues of $315.6 million in 1983, up 12.2% from 1982.

Media company earnings from operations were $40.6 million, up 12.5%. This compared with total earnings from operations of $44.9 million, up only 2.5% from the previous year. Viacom's total net income, which climbed 8% to $28.1 million, means 1983 was the 13th consecutive year of growth for the electronic communications and entertainment company.

The profits trend continued into 1984, with net earnings climbing 33%, to $5.5 million, for the first quarter ended March 31. To keep major operations expanding, the company took on a debt load of $250 million from 10 major banks at prime or lower interest.

Viacom's media and program production activities overlap somewhat. AA terminology in these profiles include Viacom's radio and tv stations and cable tv systems in its ranking of media properties, but excluded Viacom Enterprises, the company's syndication division, and Viacom Productions, a movie, tv and cable program supplier.

Viacom gradually has been adding to its radio and tv station holdings. The company increased its number of tv stations to four with the acquisition of WHEC-TV, Rochester. The station was obtained from Broadcast Enterprises National Inc. in a swap for am radio stations KDIA, Oakland, Cal., and WDIA, Memphis.

The cable systems group revenues surpassed those of the broadcast group. The country's 10th largest multiple system operator, Viacom grossed $151.5 million in revenues from about 700,000 basic and nearly 600,000 premium pay cable tv subscribers.

Viacom systems are participating in two leading regional interconnects, the Bay Area link in the San Francisco

market and the Northwest Cable Interconnect with Group W Cable in the Seattle/Tacoma market. Its systems in Nashville; Cleveland, O., and Suffolk County, N.Y., are trying to sell national advertising.

Revenues for what the company calls "broadcasting and other services" declined 2% to $119.7 million. For this division, Showtime/The Movie Channel is figured into profits but not revenues.

Showtime/The Movie Channel Inc. was created in September, a joint venture of Viacom, Warner Communications and Warner Amex Cable Communications, which combined two of the leading satellite pay tv services under single management. Viacom owns 50%. Viacom also buttressed the new venture with an additional 650,000 subscribers by acquiring the assets of the spotlight national pay tv service. This co-venture also borrowed $150 million from a consortium of 10 banks during the year.

The Movie Channel was involved in an acquisition agreement likely to boost its future when it signed a deal for exclusive national pay tv service rights to Paramount Pictures Corp.'s theatrical motion pictures release over the next five years. "Terms of Endearment," "Flashdance," "Trading Places," and "Staying Alive" are movies currently included in the pact.

In November, the Viacom-developed Cable Health Network joined with Hearst/ABC Video Services' Daytime programing service for women to form a new network, Lifetime, which debuted on cable systems in February this year. Because of its 16 million subscribers at startup, it was the first advertiser-supported, satellite-delivered cable programing network to qualify, at launch, for measurement by the national audience rating service.

Terrence Elkes, president, assum the title of ceo from Ralph Baruch, who remained as chairman, with both men sharing the office of the chief executive. Mr. Elkes promised full speed ahead on acquisitions and expansion in his speech at the annual stockholders meeting. He said the company will test two-way interactive cable and pay-per-view and push more aggressively for local and regional advertising through interconnects. Undeterred by rivals' well-publicized headaches with construction in large cities, the company is competing to wire the nation's capital.

Mr. Baruch mentioned direct broadcast satellite as an area to be scrutinized by Viacom as a new business opportunity.

Both men stressed plans for growth in programing. They intend to obtain more product from outsiders and to step up Viacom's own productions of shows to be marketed on a worldwide basis to a variety of outlets.

Warner Communications

Revenues	1983	1982
Media	$251,000,000	$183,800,000
Other	3.174 bil.	3.907 bil.
Total*	$3.425 bil.	$4.090 bil.

*Includes WCI's 50% share of Warner Amex Cable

Warner Communications, New York, is the country's 40th largest media company, with media revenues estimated by ADVERTISING AGE at $251 million, up 36.6% from 1982. Media revenues increased from 4.5% to 7.3% of total revenues, which dropped 16.3% to $3.425 billion in 1983.

Warner's media revenues are attributed to its 50% ownership in Warner Amex Cable Communications (American Express owns the other half) and the publishing of "Mad" magazine and DC comics by its publishing division.

With an after-tax loss of $417.8 million compared with a gain of $257.8 million in 1982, last year was the worldwide conglomerate's "most difficult in its 22-year history," chairman Steven Ross told shareholders

Warner Communications was forced to fend off a takeover attempt by publishing mogul Rupert Murdoch. Mr. Murdoch did not win controlling interest in Warner, but his company, News America Corp., emerged $41 million richer by driving up the price of Warner's stock.

To block Mr. Murdoch's efforts, Warner acquired a 42.5% equity position in Chris-Craft Industries' wholly owned subsidiary, BHC Inc., the fourth largest non-network-owned broadcasting company with six independent tv stations. Chris-Craft as a result got 19% of Warner. In essence, this made Warner a tv operator, blunting the takeover attempt by Australian-born Mr. Murdoch because of limitations on foreign nationals owning tv stations.

Warner streamlined and decentralized its Warner Amex Cable Communications under the tutelage of Drew Lewis, former U.S. Secretary of Transportation, who became chairman-ceo in February, 1983.

Economies of scale were sought in the September, 1983, merger of Warner Amex Cable Communications' The Movie Channel with Viacom International's Showtime. The merged unit, which operates as a 24-hour-a-day pay service, created a subscriber base of more than 7 million homes. Warner Amex closed the year with 1.36 million subscribers and 1.3 million paid.

But the cable subsidiary continued to be plagued by losses amounting to a pre-tax deficit of $99 million. The division was responsible for the majority of these losses. Attempts to improve productivity were implemented throughout the year, including laying off more than 200 employes.

Warner also is trying to renegotiate the lofty franchise promises it made in several major cities, including Milwaukee and Dallas.

In addition, the company folded its Pittsburgh regional pay tv sports service and has agreed to sell its cable system there to Denver-based Tele-Communications Inc. While this transaction still needs city approval, Warner systems in St. Louis and suburban Chicago also reportedly are for sale.

The outlook is more promising on the programing side, and Warner is considering taking this division public. While both of its programing services have yet to turn a profit, two significant steps were taken toward that direction last year. Warner began to charge cable systems that carry MTV:Music Television, programing originated and distributed by Warner Amex Satellite Entertainment Co. (WASEC). It also began accepting advertising on Nickelodeon, its cable channel for children.

In other areas of the company, Warner announced in January, 1984, the sale of Warner Cosmetics to Cosmair for $146 million. Warner expects a pre-tax profit of $100 million from the sale to appear in its 1984 returns. The company bought 37% of Hasbro Industries, the toy company, and has an option to purchase additional shares. In sports, WCI purchased 48% of the Pittsburgh Pirates baseball team from Pittsburgh Athletic Club Inc. (Warner owns the New York Cosmos professional soccer team through a 95%-owned subsidiary). WCI reportedly made attempts to sell its Franklin Mint subsidiary.

Major reorganization at Warner's Atari unit resulted in naming James Morgan as the subsidiary's chairman. In 1983, Atari had an operating loss of $539 million on reported revenues of $1.1 billion. Much of Atari's problems were because of increased competition in the videogame market as well as a decline in the market's over-all growth.

Under the new leadership of Mr. Morgan, Atari's overhead is being reduced by 40% to bring its costs more in line with expected revenues.

In addition, late last year the company raised the prices of its complete line of home computer and videogame hardware. This move was aimed at reversing the downward price spiral that so disastrously affected the industry during the year. Recently, sales policies were tightened to eliminate the returns of nondefective product that cost the company more than $100 million during 1983.

On the positive side, 1983 was a good year for the company's film and publishing subsidiaries.

Warner Brothers Pictures had revenues of $877.8 million, up 26% from 1982, while operating income increased 7%, to $109.4 million. Major successes included "Sudden Impact," "Never Say Never Again," "Risky Business" and "Superman III."

Meanwhile, Warner says its publishing business revenues and operating income were substantially ahead of 1982. DC Comics and "Mad" magazine, the only media properties in publishing, contribute only a minor portion of the division's revenues.

Washington Post Co.

Revenues	1983	1982
Media	$861,600,000	$786,200,000
Other	15,800,000	15,200,000
Total	$877,400,000	$801,400,000

Washington Post Co., Washington, is the country's 13th largest media company with 1983 media revenues of $861.6 million, or 98.2% of total sales of $877.4 million.

The major Post revenue source again was the newspaper division, contributing $456 million in revenues, an estimated $440.2 million of which was media. Magazines brought in $302 million and tv, $120 million.

Operating income from the newspaper division increased 39% to $79 million in 1983; the magazine property, *Newsweek*, had earnings of $15 million, a 15% increase over the previous year. Income from four network affiliated Post-Newsweek tv stations hit a record $39 million, up 33% from 1982. Over-all, net income of $68.4 million increased 30%.

Fueled by a strong performance in its core print and broadcast businesses, the company is in the midst of an expansion campaign, including multi-million-dollar investments in cellular radio partnerships, pay cable sports enterprises and a new weekly national edition of the Washington Post.

Observers say the expansion beyond the Post's traditional print and tv holdings best reflects the management objectives of company president Richard D. Simmons, who envisions the Post not only as a publishing and broadcast company, but as a communications conglomerate.

"Our business strategy is to improve the margins of our current businesses, while at the same time stake out investments in new businesses that have significant growth potential," Mr. Simmons says.

In the past year alone, the Post cellular partnerships began the mobile telephone service in Washington and Baltimore, were granted a license to operate in Detroit and had a dozen other licenses pending before the FCC.

Also, the company has expanded the scope of its regional pay cable sports franchises by purchasing a 90% interest in Philadelphia's SportsChannel PRISM and an 85% stake in SportsChannel, Chicago. The latest acquisitions are in addition to the Post's existing sports cable partnerships in New York, where it has a 50% interest, and in Boston, where it owns 25% of a cable tv operation.

Despite a good performance in its core businesses, the Post is paying a price for its expansion efforts.

Lynch, Jones & Ryan, a Washington securities research company specializing in newspaper stocks, estimates the Post already has spent $44 million on its cable sports partnerships and estimates it will dole out between $12 million and $15 million more before the systems show a profit in 1987. In the past year alone, the company said, sports cable enterprises drained $2.3 million from the Post's treasury, and it is estimated the cable operations will lower this year's pre-tax income by another $8 million.

In addition, the research company estimates, the Post already has sunk $4 million into its existing cellular radio operation and predicts between $6 million and $8 million more will be needed before the cellular systems enter the black in 1986.

Mr. Simmons says there is "a very exciting future" in the Post's cellular radio operations and predicts that when the FCC completes its cellular licensing process, "The Washington Post Co. will be one of the leading players" in cellular franchises, with profit margins comparable to those of Post-Newsweek tv stations.

The Post's most significant publishing event of the past year was the introduction in November of the *Washington Post* national weekly edition, a tabloid with a rate base of 30,000. As of early May, Mr. Simmons says, the paper had a circulation of more than 50,000. With respect to advertiser reaction, he says there has been a "representative number of ads" for a start-up publication.

Company officials expect continued growth in newspaper profits in 1984, citing first-quarter advertising linage for the *Washington Post*, up about 10% over last year. Also, the *Post* hopes to expand its circulation base in Washington by intensifying marketing efforts at home. More preprinted inserts and more frequent updates of nonsubscriber lists are slated for 1984 to preserve its highest per household penetration of any metropolitan paper in the nation.

Circulation figures for the six-month period ended March 31 show the *Washington Post's* daily circulation up 2.8% from last year, to 768,288, while Sunday's circulation of 1.04 million is up 3.7%.

Newsweek, which celebrated its 50th anniversary last year, had a drop in ad revenues. But during the first quarter of 1984, its ad revenues were rebounding and circulation is up. Its 1984 domestic rate base of 3 million is up 50,000 from 1983 and ad pages for the first three months of 1984 were 7.4% above first-quarter 1983 editions, which included an additional golden anniversary issue. The rate base for *Newsweek International* also increased to 578,000, up 8,000 from 1982.

At the Post's annual shareholders meeting in May, chairman Katharine Graham put to rest any speculation that her company would either sell *Newsweek* or take the magazine private. She was responding to questions about the company's decision to repurchase 200,000 shares of its stock and *Newsweek's* disappointing profit history.

Special magazine editions geared toward college students, women and executives continue to be a part of *Newsweek's* marketing strategy, with *Newsweek on Campus* scheduled to boost its circulation to 1.2 million copies from 825,000 this year.

Newsweek also backed up its circulation drive with a multi-million-dollar ad campaign, which broke last September, aimed at "baby-boom generation readers" who comprise a large segment of the magazine's readership.

In addition to its *Newsweek* holdings, the Post also purchased a 20% stake in the "National Journal" and its sister publication, the "Almanac of American Politics." The decision to buy into the "Journal," a political affairs magazine with a small but influential subscriber base that pays $494 a year for the weekly publication, was seen by observers as a "prestige buy" to complement Legi-Slate, the Post's computer database of legislative and regulatory affairs.

Operating margins at the four Post-Newsweek tv stations increased to 33%, up from 28% last year, while the company's outlets in Miami, Jacksonville and Hartford were ranked No. 1 in their respective markets. Also, WDIV-TV in Detroit extended through 1988 its rights to carry Detroit

Tigers baseball.

The Post discontinued a handful of unprofitable operations during the year, including Newsweek Books and Post-Newsweek Video, a tv segment that produced programs for nationwide distribution. The close of the video unit marks the end of the company's involvement in the tv syndication business.

Westinghouse Electric Corp

Revenues	1983	1982
Media	$802,400,000	$663,000,000
Other	8.930 bil.	9.082 bil.
Total	$9.533 bil.	$9.745 bil.

Westinghouse Electric Corp., Pittsburgh, is the country's 15th largest media company, with revenues of $802.4 million from its broadcasting and cable operations in 1983. Media represented about 8.2% of total Westinghouse sales.

Media revenues, which were up 21% from 1982, came from six tv and 11 radio stations and cable tv systems operated by Westinghouse's Group W division. Revenues from program syndication, a line of business not classified as media in this issue, are not included in the totals. Although media revenues were up significantly, 1983 marked a period of change and turmoil for Westinghouse.

In December, the corporation installed a new chairman, Douglas Danforth. He succeeded Robert Kirby, who had served as chairman for the past nine years.

Only two months earlier, the company sold its ill-fated Satellite News Channel operation to rival Turner Broadcasting System. SNC, a joint venture between Westinghouse's Group W Satellite Communications subsidiary and ABC Video Enterprises, lost about $40 million.

After paying $20 million for SNC, TBS subsequently folded the network by converting most of its subscribers to its own Cable News Network service. Some 400 employes were laid off when the channel shut down.

Last October, the company imposed two other belt-tightening moves on its cable ventures. About 100 employes were laid off at the Group W Cable subsidiary, which is the country's third largest operator of cable systems. In addition, a proposed national pay tv sports network of sister company Group W Satellite Communications began to fall apart.

At the National Cable Television Assn.'s annual meeting in May, the company unveiled plans for a national pay tv sports service that was to launch in no less than six markets this year. But after months of difficult negotiations with professional sports teams, Group W Satellite Communications ended up with only two regional networks—in Seattle and the Washington-Baltimore area.

Amid the chaos, Group W Satellite Communications' president Jonathan Hayes resigned and was succeeded by Harlen Rosenzweig, former exec vp.

Another major executive move came at Group W Cable in December when Harry Murray left his post as vp-pensions and investments of Westinghouse to succeed William Bresan as the company's chairman-ceo.

More maneuvering at Group W Cable included the company's dropping out of two franchise races, one in Wheaton, Ill., and the other in Costa Mesa, Cal. The company said it withdrew because it already had been more successful than expected during the past year in winning new cable tv franchises primarily in the Midwest and West, and it preferred to concentrate on these outstanding commitments.

Among broadcast properties, the company sold its Pittsburgh WPNT fm radio station to industry veteran Saul M. Frischling for $3 million. It also signed a letter of intent to sell tv station WPCQ in Charlotte, N.C., reportedly for more than $20 million.

During the first quarter of 1984, despite marginally lower sales, Westinghouse profits increased 16%. Net income was $116.6 million, up from $100.3 million for the similar period a year earlier. Revenues remained virtually the same at $2.27 billion. The company did not break out media earnings or revenues.

Wometco Enterprises

Revenues	1983	1982
Media	$169,300,000	$155,500,000
Other	350,300,000	337,900,000
Total	$519,600,000	$493,400,000

Wometco Enterprises, Miami, was the country's 55th largest media company, with media revenues of $169.3 million, up 8.8% from 1982. Media revenues were 32.6% of total revenues of $519.6 million.

Broadcasting accounted for $79 million in revenues, or 46.7% of media revenues, while cable and subscription tv combined for revenues of $90.3 million, or 53.3% of total media.

Net income rose 19% last year, to $30.9 million. Like total revenues and operating income, it was the highest in Wometco's 59-year history.

Wometco founder, chairman and president Mitchell Wolfson died in January, 1983.

In March, 1984, stockholders approved a $1 billion leveraged buyout by the New York banking firm of Kohlberg Kravis Roberts & Co.

The company since has reorganized as two privately held corporations, which will retain Wometco's media holdings. "The focus of the company will ultimately be in three areas—television broadcasting, soft drink bottling in the U.S., Canada and the Caribbean and cable television," says Gerry Whaley, vp-public and employe relations.

WEI Enterprises Corp. is made up of the cable tv operations, which in 1983 showed the largest annual divisional gain. Income rose 53%, while revenues showed a 25% increase. At yearend, Wometco held 47 cable systems in 163 communities in New York, North Carolina, Georgia, Alabama, Mississippi, Louisiana, and Oklahoma. In February, WEI added 3,900 subscribers to the 272,000 it claimed at yearend and six franchise communities in North Carolina.

WEI also holds the Coca-Cola bottling operations that in 1983 posted a 10% decline in earnings on a revenue gain of 7%. Heavy price discounting in the company's competitive domestic market and losses in the Newfoundland operation contributed to the drop in profits.

The second company, Wometco Broadcasting Co., consists of six stations, including vhf stations in Miami; the Greenville-Spartanburg-Asheville market of North and South Carolina; the northern Washington-Vancouver, British Columbia area, and Grand Rapids, Mich. The broadcasting company also holds two uhf stations used for the subscription tv operations in the New York area.

Spurred by a boost in the company's New York-area operation, the stv division turned a 1982 loss of $2.8 million into a $635,000 profit in 1983. Mr. Myers attributed the gain to improved credit controls and reduced advertising expense in the Philadelphia market.

The company would not disclose plans for 1984. However, a press release pre-dating the buyout said Wometco may liquidate or sell its Philadelphia stv operation. The station over which it broadcasts is not owned by the company and is reorganizing under the Federal Bankruptcy Act.

The company also plans to sell its 100 movie theaters, its vending, industrial food and electronic games operations, and possibly the Miami Seaquarium, using the money to pay off the loan, Mr. Whaley says.

Vending division revenues increased 5%, but income dropped 14%, reflecting a decline in the popularity of electronic games.

In 1982, Wometco phased out a Latin American film-distribution business, which contributed to a $3.3 million loss for the entertainment division that year. The division posted a $2 million profit in 1983.

Ziff-Davis Publishing Co.

Revenues	1983	1982*
Media	$322,100,000	$300,000,000
Other	—	—
Total	322,100,000	300,000,000

*Restated

Ziff-Davis Publishing Co., New York, media operating arm of Ziff Corp., is the nation's 31st largest media company, with media property revenues estimated by ADVERTISING AGE at $322.1 million in 1983. Media revenues in 1982 were estimated at $300 million (restated). All media revenues are from consumer and business magazines at Ziff-Davis, a subsidiary of Ziff Corp., a privately held company.

Spurred by the interest of William Ziff Jr., president of the company, Ziff-Davis throughout the late 1970s vaulted onto unfamiliar turf and lived to regret it. In 1982, the company sold its operations in two of those new areas, tv stations and Wharton Econometric Forecasting Associates.

Over the past year, however, Ziff has rekindled activity in the area of its first love: Special interest magazines. The big news at the company in recent months has been the formation of the consumer computer and electronics magazine division, which publishes a growing list of titles that now includes *A-Plus for Apple Microcomputing, A-Plus Disc, Color Computer, Computers & Electronics, Creative Computing, Digital Review, Microsystems, PC, PC Disc, PC Junior, PC Tech Journal, PC Week* and *Stereo Review.* This division is estimated to have recorded gross ad revenues of nearly $60 million.

Industry observers applaud Ziff-Davis' quickness to see the potential in the computer magazine market, currently between $7 billion and $10 billion. It could vault as high as $30 billion, sources say.

Consequently, competition has mounted, as is evidenced by the fact that the very week Ziff-Davis introduced *PC Week,* another company—a small Newton, Mass.-based company called PC Week Inc.—published a magazine with the same title. Last summer, Z-D and PC Week Inc. reached an agreement under which they could combine forces. At that time, Z-D purchased the assets of PC Week Inc. for an undisclosed sum.

Ziff also has completed the divestiture of both *Camera Arts* and *Psychology Today.* The former, whose assets and subscription lists were sold to CBS Inc., was reportedly a victim of the "gray market"—a pipeline through which foreign distributors sell products directly to their counterparts there, undercutting the price structure.

As for *Psychology Today*—long the darling of Bill Ziff and the "hot book" of the late 1960s and 1970s—it was sold to the American Psychological Assn. In recent years, *Psychology Today* suffered significant declines in ad pages and revenues, which between 1977-82 had dropped 49% and 27.6%, respectively.

Full-size value in a full-size Litton.

Want to spend less time in the kitchen, and still provide satisfying meals for the family?

Here's the affordable answer: the new Quick 'n Easy microwave oven from Litton.

Quick because it has 700 watts of microwave power with a full 1.3 cubic foot oven. Big and fast enough for any cooking, from tasty dinners for the entire family to all those hurry-up week night meals.

Easy? Model 1752, shown above, is especially easy: has Electronic Touch Control, Ten Power Settings, Time and Temperature Cooking, plus Temperature Probe and Time of Day Clock.

And the Quick 'n Easy cooking performance is combined with fresh and attractive styling that'll brighten any kitchen. It even fits easily under your custom or standard size kitchen cabinets.

Sound nice? Your nearby Litton dealer will be pleased to assist you in owning one Quick 'n Easy.

The new Quick 'n Easy Microwave Oven. A full-size value in a full-size Litton.

Nobody knows more about microwave cooking than **Litton.**

THE NEW LITTON QUICK 'N EASY™ MICROWAVE

New wave

Litton Microwave, Minneapolis, is introducing two microwave ovens, Quick 'n Easy and Little Litton, as its ad and promotion budget for 1984-85 doubled to $20 million. Ads are handled in-house.

Don't burn those logs, ad units tell tv stations

By DIANE MERMIGAS and STEVEN W. COLFORD

Three advertising organizations had a message last week to now-deregulated tv stations: Keep maintaining your logs so that advertisers can verify that their commercials have been broadcast as ordered.

The message—sent by the American Assn. of Advertising Agencies, American Advertising Federation and Assn. of National Advertisers—came in response to the Federal Communications Commission's sweeping deregulation of tv stations last week. Among the rules the FCC lifted was a requirement that tv stations keep detailed logs of programing and commercial airings.

"Advertisers will continue to need authentication of the details relating to the broadcast of their commercials, including such specific information as the time of broadcast, duration of commercial, adequate sponsor identification and competitive product separation to assure value received for their expenditures," the groups said in a statement June 29.

While this one issue provoked immediate response from the ad community, a more far-reaching result of the FCC actions may come in the deregulation of commercials.

A potpourri of commercial formats, now partly the stock of cable tv, may filter into conventional tv broadcasts. Broadcasters said they are likely to explore such new freedoms as engaging in program-length commercials—"infomercials" in the parlance of cable—because of the rulings.

Yet, at least for now, this may be the only visible change resulting from the FCC actions. A survey of

Football glut called myth

By ROBERT RAISSMAN

The predicted glut of college football tv broadcasts this fall has stumbled behind the scrimmage line because of a lack of enthusiastic advertisers, the closeness of the football season and general uncertainty.

College athletic officials had hoped that a decision striking down the National Collegiate Athletic Assn.'s role as broker for college tv rights, which the U.S. Supreme Court finally rendered last week, would open the door to riches for major college teams.

But the expected pot of gold in ad dollars awaiting the fragmentation of college football appears not to exist at all. Advertisers already are saying that, in the 60 days remaining before the start of the college season, it will be impossible to sort through the myriad network, cable and syndication proposals that will be placed before them in the next few weeks.

These advertisers also say they did not hold back money for college football in anticipation of the logistical maze that may take a few years to negotiate. Colleges are not likely to see increased revenues through rights fees for a number of years, and the decision will probably be disastrous for some of the schools.

"It couldn't have happened at a worse time for the schools," said David C. Martin, exec vp, Stroh Brewery Co., Detroit. "With sports ratings down, I can't imagine that advertisers were holding back millions waiting for this thing to break."

Although the Supreme Court

A-B hops on rare upfront prime-time buy

By JAMES P. FORKAN

New York—Anheuser-Busch, in a rare upfront prime-time tv buy, is pouring a reported $16 million into various nonsports network tv series in 1984-85.

The A-B buy, which the St. Louis-based brewer said has not been completed, marks a significant adjustment to its advertising and marketing strategies. For years, the brewer has paid premium rates to secure franchise positions in key network and local sports teams programing. The network upfront buy, however, is reportedly for "run of schedule" rather than specific programs.

News of the buy came as the upfront selling season, for all intents and purposes, was ending, according to a couple of industry sources. Several network executives expected the upfront prime-time volume among the three networks to be between $2.2 billion and $2.3 billion (AA, June 25). Last year, the networks combined sold $1.85 billion in non-Olympic upfront sales.

Price increases this season reportedly averaged about 8% over 1983-84, indicating that to reach the $2.2 billion mark the networks made more time available upfront than last year.

The A-B expenditure was a highlight of the season's activity.

Tony Ponturo, director of media services at A-B, said, "We won't deny it [the buy], but nothing has been signed, sealed or delivered." He declined to comment on the reported figure of $16 million being diverted to prime time.

Network sales executives, without attesting to the $16 million figure, confirmed the beer marketer made the rare upfront commitment.

"A-B had always bought positions," one source noted. "This time they bought tonnage."

A network executive added, "They [A-B] haven't done it in quite a while, but this is

Stock buy stalls DDB rumors

By STEWART ALTER

New York—Doyle Dane Bernbach International slowed speculation about an imminent takeover last week by purchasing the 15% block of stock in the agency owned by the family of the late William Bernbach and its various trusts.

Also, John L. Bernbach, president of DDB's international division, was elected to the executive committee and to the board, replacing his brother, Paul, who has resigned. Paul Bernbach, reported to be concerned about the fate of the family's estate in light of DDB's weak financial performance and volatility of the stock in recent years, is said to have been the chief force pushing for a sale of the agency.

The stock sale consolidates company power in the hands of current management. In a statement, Paul Bernbach said, "The large amount of stock held by the family gave rise to far too much concern and speculation about 'family domination' and about 'outside offers' in recent months." In that same statement, agency president-chief executive officer Barry Loughrane commented, "This should, once and for all, put the lid on rumors that we are for sale or not in control of our own destiny."

The purchase of the 914,910 shares was for $22.35 per share, or about

Texize to go national with liquid bleach

Greenville, S.C.—Texize division of Morton-Thiokol plans to introduce nationally its Vivid color-safe, all-fabric liquid bleach by the end of the summer. The latest entry into the $230 million all-fabric bleach category has been in test markets in the Northeast for a year. The product earlier had been pulled from test. A $20 million network tv and print campaign will support, created by Henderson Advertising, which also handles Texize's Spray'n Starch and Spray'n Wash laundry products. Ad copy for Vivid reads "You know you sort your laundry. Now you can sort your bleach, with regular bleach for whites and new Vivid for colors."

Rydelle moves $7 million laxative account

Chicago—Advertising for Fiberall, a sugar-free powdered laxative marketed by Rydelle Laboratories, has been assigned to Laurence, Charles & Free, New York. Foote, Cone & Belding here lost the account in the abrupt switch. Rydelle, a subsidiary of S.C. Johnson & Son, Racine, Wis.,

What's on tap? U.S. decisions and Miller time

By SCOTT HUME

This week could prove significant for the troubled beer industry for more reasons than the July 4 holiday's sales peak.

Several events on tap epitomize both the internal competitive pressures and the external social pressures that have stalled breweries' growth and left them in a quandary over how best to deal with those pressures.

One of those events, of course, is Miller Brewing Co.'s expected announcement of which of three agencies will get the lucrative—$50 million—but difficult task of rescuing its faltering Miller High Life brand.

The finalists are incumbent Backer & Spielvogel, Leo Burnett USA and Chiat/Day.

Industry sources last week were casting Burnett as the favorite to land all, or at least part, of the Miller account, citing the number of assignments it already has from Miller parent Philip Morris Inc. (corporate advertising, Marlboro and several other cigaret brands, 7UP international assignments and domestic new-product work).

Brewers this week also will be facing what John Collopy, an analyst with Robert Baird & Co., Milwaukee, calls "the two imponderables": President Reagan's expected signature on a bill effectively setting 21 as the national drinking age and the process of sorting out the ramifications of the Supreme Court's ruling that broke the lock the National Collegiate Athletic Assn. had on football broadcasts rights.

Both promise to further complicate the business of beer marketing, which has been in upheaval for the past year.

Consider:

- Major brewers' blind rush to introduce brands into the still-unproven low-alcohol market.
- Faltering sales in the superpremium category, fueled partly by the sales growth of imported beers. This trend has led Miller to withdraw its Special Reserve brand from test and reportedly has led Anheuser-Busch to review advertising for its Michelob and Michelob Light brands.
- Tougher competition in the previously quiet low-price segment, brought on by new brands, including Miller's Milwaukee's Best.
- A push by the "second-tier" brewers—Coors, Hei-

Jergens Aloe & Lanolin ads position the new product as a creamy, moisturizing bar soap. Cunningham & Walsh, New York, is the agency.

Jergens bubbly over new soap

By LAURIE FREEMAN
and JANET NEIMAN

Andrew Jergens Co., Cincinnati, using a heavy print and tv campaign, is introducing nationally its Jergens Aloe & Lanolin skin-conditioning bar.

The skin-conditioning bar, containing "the natural ingredients of aloe and lanolin," is available in both a 3.5-oz. regular bar and a 4.75-oz. bath size.

Aloe & Lanolin will be positioned differently from the company's Gentle Touch face and body bar.

Gentle Touch contains baby oil and is being promoted as a solid, good-for-the-whole-family soap. According to Jergens, the Aloe & Lanolin bar meets consumers' needs "for a mild, moisturizing soap that will

Canada turning up orange for Coca-Cola test

By NANCY GIGES

Atlanta—Coca-Cola USA plans to use Canada as a test market for the future U.S. introduction of Minute Maid orange soda.

The company plans to introduce the orange soft drink with 2.5% juice content in 36% of Canada in August.

The U.S. introduction, not expected this year, would further Coca-Cola's direct competition with Procter & Gamble, which markets Orange Crush soda as well as Citrus Hill brand orange juice. The Minute Maid item parallels Sunkist's brand extension from juices to soft drinks.

Sergio Zyman, senior vp-marketing, indicated the orange-flavor segment could approach the lemon-lime business in size, and he described the Canadian situation as a "working lab."

Although he said the product was not just another orange drink nor would it be advertised in the traditional manner, he conceded it would compete directly with Sunkist and Orange Crush.

It will be supported by the ad theme "The minute you taste it, you'll know. . .it's Minute Maid." Agency is Marschalk Co., New York, which handles Minute Maid juices.

This new product was among information presented to Coca-Cola bottlers at its first systemwide gathering in five years.

Amid pyrotechnics, lasers and special sound effects, the bottlers heard Brian Dyson, president of Coca-Cola USA, proclaim that the company had not only achieved its objective of pulling away from rival Pepsi-Cola in food-store sales but, in fact, may be over four share points ahead of Pepsi by the end of the decade.

Currently, Coca-Cola brands are two share points ahead of Pepsi's, according to A.C. Nielsen Co. figures, he said.

In presenting new marketing and advertising plans to 3,500 bottlers and company officials (AA, June 28), Messrs. Dyson and Zyman discussed other new products and techniques as well as highlighting the progress made over the last five years.

Media spending this year for soft drinks is expected to approach $150 million with at least an equal amount in promotions.

Mr. Dyson said the company would probably test Fresca with some juice content in a few markets in this country this summer. Pepsi has just introduced Slice soft drink with juice into several U.S. markets.

Coca-Cola is also investigating introduction of soft drinks in aseptic containers and is negotiating with the National Aeronautics & Space Administration to develop technology that would put soft-drink dispensing units on space shuttles and stations.

In what Coca-Cola believes to be a first in American business, the company used data from political

Cleese computes pitch for Compaq

By BRIAN MORAN

New York—Compaq Computer Corp., an upstart competitor in the frantic IBM-compatible market, will feature wacky British comic John Cleese in a $15 million campaign heralding the arrival of its first line of desktop computers.

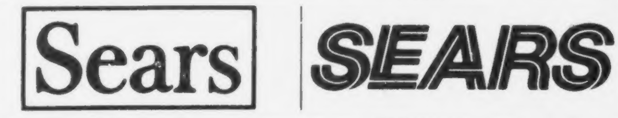
Network tv spots, in production last week in London, will break July 27 during a Summer Olympics preview on ABC. The four commercials set Mr. Cleese in a pie shop in a re-creation of Compaq's founding in a pie shop in 1982 by Texas Instruments employes.

Houston-based Compaq will join Big Blue and Apple Computer as the only computer marketers slated to advertise during the Olympics. Compaq's $20 million ad budget for 1984 is up 400% over last year; the account is handled by Ogilvy & Mather, Houston.

The commercials will have a "competitive flavor" but will not name Compaq's rivals, James D'Arezzo, a Compaq vp, said following a press conference here last week. Mr. D'Arezzo said the commercials will be "humorous in a sophisticated way" and will lampoon both IBM and Apple's images.

A print schedule supporting the commercials will kick off July 10 with a half-page spread in the *Wall Street Journal.* Inserts will run in the third quarter in *Business Week, Forbes* and computer trade books, Mr. D'Arezzo said.

Print and broadcast advertising will continue to carry the corporate tag line used for Compaq's successful IBM-compatible portables: "It works better."#



New Sears logo

Advertising this week introduces a new logo for Sears, Roebuck & Co., replacing the boxed logo (left) the retailer has used for more than 20 years. It said the new logo is to reflect "the contemporized personality of the recently introduced Sears 'Store of the Future.' " The changeover on packaging, etc., will take two years.

Armour-Dial flies into a lather over Minnetonka ads

By LAURIE FREEMAN

At least one publication is refusing to accept future Softsoap ads from Minnetonka after Armour-Dial officials complained the ads were "false and inaccurate."

The Phoenix-based soap company is up in arms over print ads for Minnetonka's Softsoap and Derma Scrub liquid soaps that show disease-causing bacteria superimposed over a picture of a soap bar.

The ads have been running in medical trade publications since last December, but in June the ad appeared in *Golf Digest*.

"The ads are deceptive, sensational and the campaign is an example of Minnetonka's shabby ad practices," said Dave Richardson, Armour-Dial vp-research and development. "The ads are catering to the fear that bar soaps can cause illness and that's just not true."

A spokesman for the *Journal of the American Medical Assn.* said the publication tries to prescreen all ads, with any questionable ad claims checked with advertising director Ray

(Continued on Page 40)

YOU COULD PICK UP MORE THAN A BAR OF SOAP IN THE SHOWER

This Minnetonka print ad has run into a challenge from Armour-Dial over the validity of Minnetonka Inc.'s claim that bar soaps transmit disease-carrying bacteria.

Plot's thick in Heublein's McCann pick

By GAY JERVEY

New York—The Interpublic Group of Cos.' desire to maintain its longstanding and lucrative connection with R.J. Reynolds Industries led to unusual twists and turns in the recent agency review for Smirnoff, the best-selling vodka marketed by RJR subsidiary Heublein Inc.

Farmington, Conn.-based Heublein last week announced that it had moved its $14 million Smirnoff account from the Marschalk Co. to McCann-Erickson, both Interpublic agencies. To many, the choice of McCann was a surprise in the drawn-out battle, actively contested for several months by, among others, SSC&B:Lintas, another Interpublic agency.

Although McCann reportedly assured Heublein that it would break with Brown-Forman Spirits' business, B-F executives were not informed until early last week, when Willard Mackey, McCann's chairman and ceo, flew to Louisville with the news.

For 13 years, McCann has handled advertising for Canadian Mist, Early Times and Southern Comfort, with combined billings of around $12 million. Daniel Schusterman, president of Louisville-based B-F Spirits, said the company will review its marketing strategy for at least the next month before talking to any agencies.

For its part, Heublein plans to break new ads for Smirnoff this fall. Sources said that Heublein

Free of Esmark, Kelly forms own company

By PAUL MERRION
Crain News Service

Former Esmark chairman Donald Kelly is starting a new company that will acquire and manage "one or two" diversified corporations with at least $1 billion in sales.

Along with former Esmark vice-chairman Roger Briggs and the backing of a small private-investor group, Mr. Kelly intends to repeat the success he had with his consumer products marketing giant, according to *Crain's Chicago Business*, a sister publication of Advertising Age. The Chicago-based company will be called Kelly, Briggs & Associates.

"Before the first of the year we'll be in a position to know where we're going," said the 62-year-old Mr. Kelly, who had been talking about retiring as recently as a year ago. "If we find something that fits our pistol. . .we'll make a move on it."

Mr. Kelly resigned last week, as consummation of the $2.8 billion takeover of Esmark by Beatrice Cos. neared completion.

Unlike with other investor-backed outfits that specialize in large, leveraged buyouts, Mr. Kelly plans to run the company or companies he acquires.

For that reason, Messrs. Kelly and Briggs will probably stick to the kind of businesses they know best—diversified consumer product companies—rather than high-tech or "smokestack" industrial companies, he added.

Within those limits, Mr. Kelly at this point sees only one company he would definitely not pursue. For ethical reasons, given his recent dealings with the company, Beatrice would not be a potential target.

That leaves a broad range of well-known U.S. companies in that size—sales of at least $1 billion—and product category, including

(Continued on Page 40)

Beatrice shuffles

Chicago—As Beatrice Cos. and Esmark merge into one of the nation's top advertisers, there are signals that the major agencies handling Esmark's food brands could be on thin ice.

Beatrice has kept its plans for the Esmark shops—Dailey & Associates; Foote, Cone & Belding, and Ketchum Advertising—close to its vest. But the company last week indicated it is reorganizing its new U.S. foods group in the likeness of Beatrice Foods and without some of Esmark's top

Fast-food chains' tv spending

The rate of increase for the restaurant industry's tv advertising spending quickened in the 1984's first quarter, rising 30% over the year-earlier quarter. Tv spending in 1983 grew 24% over the previous year. For the first time, the Big 3 burger chains ranked 1-2-3, with Wendy's moving past KFC into third place. Moving into the Top 15 for the first time was Dallas-based ShowBiz Pizza Place, which doubled its tv ad spending. Note that network spending (up 45%) outpaced the increase in local tv (up 23%). ***Source: Television Bureau of Advertising from Broadcast Advertisers Reports data.***

Big fast-food chains gluttons on spending

By SCOTT HUME

This year's first quarter proved to be a good one for the nation's major fast-food chains and a bonanza for the agencies that handle those chains.

For many chains—especially the Big 3 burger chains—tv ad spending is rising at two or three times the rate of sales growth.

McDonald's, as always, spent the most of any chain on tv advertising: $44.9 million.

But its 36% increase in over-all (network and local) tv spending compared with last year's first quarter was smaller than that for Burger King ($20.1 million, a 41% increase) or Wendy's ($15.4 million, a 79% increase).

Eating-and-drinking-place sales for the first three months of 1984 totaled $28.6 billion, a 10% increase over 1983's first quarter. But tv advertising spending by the nation's top 15 chains during that period, according to figures from the Television Bureau of Advertising released last week, totaled $171.5 million, up 30% from the year-earlier quarter.

During McDonald's first quarter, systemwide sales were up 18% over the year-earlier period, rising to $2.2 billion. But its tv ad spending increased at twice the sales-gain rate.

Increased network tv spending accounted for all of the gain. McDonald's network tv spending during the quarter—and the network billings handled by national agency Leo Burnett USA, Chicago—was $25.4 million, more than

(Continued on Page 37)

Leaf turns over new frozen snacks

CHICAGO—Leaf Confectionery unit of Huhtamaki Group's Leaf Inc. is introducing into five states Ice 'n Creamy, a two-item line of shelf-stable "freezer snack bars" that become an ice cream-like confection when frozen.

The product, which uses a patented process, is shipped and shelved as a liquid, packaged in plastic tubes, but it can be frozen in about two hours. It is eaten from the tube in frozen form by pushing up from the bottom of the tube.

Ice 'n Creamy also can be used in its liquid state as a dessert topping or drink flavoring. Leaf, though, considers the latter uses secondary.

The Ice 'n Creamy line, in strawberry parfait, banana creme, orange sherbet and butterscotch sundae, is testing here and in downstate Illinois, Indiana, Iowa, Michigan and Wisconsin, and is being sold in various retail outlets, including grocery and mass merchandisers. Each package contains 16 bars, although Leaf's introductory program will include four-bar sample packs.

Ice 'n Creamy marks the company's second move into the frozen-novelties category, which Leaf estimates at $1 billion to $1.5 billion. Leaf also markets Mr. Freeze pops flavored ice bars. Like the new line, Mr. Freeze is marketed in shelf-stable tubes that are frozen before eating.

Ice 'n Creamy will compete most directly with frozen pudding bars, according to Robert Anderson, vp-marketing at Leaf. Top sellers in that area include General Mills' Jell-O Pudding Pops and Beatrice Cos.' Swiss Miss pudding bars.

Initially, Leaf is making available to the stores special displays patterned on the product theme of an old-fashioned ice cream parlor. But the company also is hoping to obtain permanent shelf space in the confection aisle, where Leaf has its greatest strength, or near the ice cream freezers.

Ads, via PGM will include free-standing newspaper inserts with 50¢ coupons beginning in July, and best-food-day newspaper ads once a month during the first three months. The ad theme is "Surprisingly like ice cream. . .Amazingly not ice cream."#

New products

(Continued from Page 32)

next year. The product is a dry pasta, which reconstitutes in water and can be cooked in minutes. The company plans to market the product primarily to the food-service industry but has plans for the consumer market, too. An $8 million ad campaign will support. Clark-White & Associates 6/25, P. 36.

PepsiCo—Frito-Lay expanding its GrandMa's Rich'n Chewy cookies into six undisclosed new markets. The cookies already have reached about 30% of the country. Couponing. 6/18, P. 2.

Procter & Gamble—Introducing its Duncan Hines chocolate-chip cookie line into most of New England and parts of New York state, including New York City, along with parts of Louisiana and Texas. Grey Advertising 6/18, P. 2.

Quaker Oats Co.—Introducing nationally its first puppy food, Puppy Kibbles 'n Bits. Couponing, direct mail, newspapers, tv. J. Walter Thompson USA 6/18, P. 8. Introducing nationally in September Mr. T presweetened cereal—a frosted corn and oat-based product. The product name is licensed from Taft Merchandising. Tv. AdCom 6/25, P. 116. Introducing nationally Ken-L Ration Snausages, premium sausage-style dog snacks in beef and liver flavors. Tv. JWT 6/28, P. 85.

Ralston Purina Co.—Entering national markets with Gremlins ready-to-eat presweetened cereal, set to be on store shelves by midsummer. Using the name licensed from Warner Communications' summer film, the vitamin-fortified, multigrain cereal is shaped like Gizmo, the movie's hero. Couponing, newspapers, premiums, tv. Don Tennant Co. 6/18, P. 8. Introducing a three-item line of S'mores chewy granola bars in a "substantial portion" of the country. Flavors include caramel nut, chocolate chip and chocolate chip with peanut butter. They contain graham, granola and marshmallows. An estimated $19 million-to-$24 million multimedia campaign will support. MCA 6/25, P. 8.

Schering-Plough—Plough testing la Solarie suntanning creams, gels and oils in Louisiana, New England, Southern California and Texas. Bloom 6/18, P. 93.

Sterling Drug—D-Con division introducing d-Con Exact, a roach and ant killer that comes in a felt-tip "pen" dispenser, in the Sunbelt. Couponing, print, tv. Warwick Advertising 6/11, P. 8.

Unilever U.S.—Thomas J. Lipton Inc. introducing Cala-bay wine coolers (in bottles and cans) in Southern California. Cala-bay will come in several flavors including rosé and white. Spending in the Los Angeles market is estimated at $1 million. Foote, Cone & Belding 6/25, P. 116.

U.S. Tobacco—Rolling national with Borkum Riff Ultra Light pipe tobacco, Borkum Riff's first low-nicotine entry. The product is made in Sweden. Magazines. Warwick 6/4, P. 8.

Victor F. Weaver Inc.—Rolling with Crispy Light, its first frozen fried chicken product aimed at the calorie-conscious market into undisclosed midwestern states. Tv. Marschalk Co. 6/4, P. 8.

Wienerschnitzel International—Introducing into Southern California supermarkets the hot dogs it sells at its restaurants. They are sold in 1-lb. packages bearing the company's logo. Suggested retail price is $1.69 per unit. Magazines, tv. Marsteller 6/18, P. 3.#

Introductions down from '83

NAPLES, N.Y.—New-product introductions, which were up 3.7% in the first quarter of the year versus a year ago, appear to be leveling off in 1984's second quarter, Marketing Intelligence Services reports in its new-product publication, "Product Alert."

Retail drug-outlet products are up 15.3% from last year. To date, 346 new products in this category have been reported for the January-through-June period, compared with 300 for the comparable 1983 period.

Food products are down slightly to 1,518 compared with 1,649 in the comparable 1983 period, and beverages, including beer, wine, spirits, soft drinks and fruit juices, are up to 283 versus 276 a year ago.

Cosmetics and toiletries are running below last year's total of 336, with 293 brought out to date.

The biggest drop is in the household products category. Household product introductions to date in 1984 are 176, down from 254 in the first five months of 1983. Pet products, food and nonfood, are the same as last year at 66 products introduced for the six-month period. Miscellaneous products, including automotive, gardening and pesticide categories, are up for the period to 169 versus 125 a year ago.

"We seem to be seeing less innovation and more line extension, particularly in food products," said Robert McNath, publisher of "Product Alert." "I suspect that many companies feel it is safer and it is certainly less expensive to make line extensions than to gamble on totally new products."

Marketing Intelligence Services has a staff of 19 here and 250 people across the country who report new-product introductions weekly.#

Fast-food glutton on spending

(Continued from Page 3)

double the $12.6 million spent on the networks during the first three months of 1983.

That first-quarter network budget also is 30% greater than the $19.4 million spent during last year's fourth quarter, in which the year's heaviest tv spending period occurred.

McDonald's spent $19 million on local tv in the first quarter, 4% less than it spent during the year-earlier quarter and 36% less than in 1983's fourth quarter.

Last fall, McDonald's owner/-operators voted to increase to 2% from 1.25% of sales their contribution to the Operators National Advertising Fund (which funds network advertising).

That increased commitment, coupled with rising sales, threatens to confirm the fear voiced last year by one competitor that McDonald's expanded network presence could "drown out" all competing messages aired (AA, Oct. 3).

How much is the McDonald's account worth to Burnett? While it's unlikely network tv billings for the whole year will double the $81 million spent in 1983, industry sources estimate network tv spending for the year could top $125 million.

Heavy third-quarter tv advertising spending to back the new "It's a good time for the great taste of McDonald's" theme before and during the Summer Olympics should help McDonald's reach that projection.

Wendy's agency, Dancer Fitzgerald Sample, New York, also is seeing billings blossom.

Network spending in the first quarter was $6.7 million, 79% higher than a year earlier. Local tv spending also increased 79%, to $8.7 million.

Network spending should continue to grow. Wendy's operators last fall also boosted their contribution to national advertising, increasing it from 1% of sales to 1.5%. Meanwhile, sales are growing at a record rate. First-quarter systemwide sales were $535.9 million, a 32% increase over year-earlier sales.

Network spending for the year could top $30 million, compared to $18.7 million in 1983.

The debut later this year of WTB III (the third "Where's the beef?" campaign) should contribute substantially to that total.

Burger King's advertising strategy continues to be the opposite of McDonald's. BK's first-quarter network spending was only 2% greater than in the year-earlier quarter ($7.7 million vs. $7.6 million), while local tv ad spending rose 84% ($12.4 million vs. $6.8 million).

While Burger King gets its breakfast program sorted out (regional menu variations still preclude network advertising support) and strengthens its operator co-op system, local tv advertising should continue to predominate (network ad spending for all of 1983 was only 1% greater than during 1982).

But the recent full-scale ($40 million in total support) revival of its "broiling vs. frying" campaign should benefit its national agency, J. Walter Thompson USA, New York. #

for the record

MAGAZINE ADVERTISING pages and revenues set records for May and year to date, Publishers Information Bureau reports. Pages were up 6.7%, to 13,836, for the month and 8.4%, to 60,838, for the year to date over the same periods last year. Revenues rose 11.4%, to $419.5 million, for the month and 16.3%, to $1.8 billion, for the year to date. May marked the 17th consecutive month of gains for both pages and revenues.

SHERWIN-WILLIAMS CO., Cleveland, has named Griswold Inc. to handle its consumer division paint products. The $5 million-to-$8 million account moves from W.B. Doner & Co., Baltimore. It includes paints marketed under the Baltimore, Dutch Boy, Kem-Tone and Martin-Senour labels. Wyse Advertising still handles the company's stores division.

LILLER NEAL, Atlanta, has resigned the Jim Dandy Co. dog food account. Dandy, which has been working with Promotional Merchandising on a project basis, says that it has not used Liller Neal as agency of record for more than a year. Dandy's brands, including Jim Dandy Chunx and Jim Dandy Dog Ration, are distributed in the Southeast. Dandy's ad budget is undisclosed.

KIRIN USA, Los Angeles, a subsidiary of Kirin Breweries, Tokyo, is introducing a new premium draft beer into California, the District of Columbia, Massachusetts, New Jersey, New York and parts of Connecticut. Additional markets in the Midwest and Southwest are due later this year. The product is packaged in a reusable minikeg container, similar to that introduced by Suntory Ltd. last year (AA, May 23, '83). No ad plans yet. Dentsu/Y&R, Los Angeles, is Kirin's agency.

"A TURNING POINT" for ABC came in 1959, says ABC-TV Network president James Duffy. The turning point was ABC's success in convincing major film studios "to work in television," he said at the Stanford Graduate School of Business, adding that the result was such hit series as "Maverick" and "Wyatt Earp," among the "more than 30 western series" on tv 25 years ago. Today, however, tv is leaning more to special-event programing and "serious issues," he said. ABC's annual revenues in 1959 were less than $300 million, or "barely 10% of the $3 billion-plus they'll total this year," Mr. Duffy said in his first speech since snaring the added post of senior vp, ABC Broadcast Group.

TV AD SPENDING rose 16.9% to $3.5 billion in the first quarter of 1984, says Television Bureau of Advertising and Broadcast Advertisers Reports, New York. Network spending alone was up 19.3% to $1.9 billion. Procter & Gamble led the network and spot lists. AT&T posted the biggest percentage gain within the network top-10 list (up 91% to $59 million). A.H. Robins Inc., up 131% to $12.1 million, was the biggest gainer in the spot tv top 10. McDonald's, at $19.5 million, led the local top 10, where Wendy's International and Southland Corp. showed the largest jumps (up 81% to $8.8 million and 175% to $4.8 million, respectively).

NORTH ATLANTIC TREATY ORGANIZATION has launched a campaign to stir public support. Created on a volunteer basis by J. Walter Thompson USA, New York, tv spots in the public service campaign note: "For the past 35 years, there has been one organization that has not taken our peace or our freedom for granted. NATO has succeeded in helping to prevent Europe from going up in flames." The campaign also features print ads.

CHESEBROUGH-POND'S, Greenwich, Conn., has appealed a court's refusal to grant a preliminary injunction against comparative ad claims for Wondra skin lotion, marketed by Procter & Gamble, Cincinnati. P&G's ads compare Wondra with Chesebrough's Vaseline Intensive Care lotion. In the opinion (AA, June 14), a federal district court judge here denied both Chesebrough and P&G's requests to halt the other's advertising, noting that it was not within his province to evaluate the different standards used in conducting the tests to support the claims.

FEDERAL TRADE COMMISSION has ruled that Robinson-Patman Act provisions against discriminatory advertising allowances do not apply to millions of dollars in promotion funds that General Motors gives large car-rental and leasing companies. FTC said that the act does not apply because the large car-rental companies are not reselling the vehicles in competition with smaller companies that get no allowances. Ford Motor Co. also benefits from the decision. In a companion case settled earlier, Ford agreed to halt discriminatory ad allowances to its rental fleet customers with the stipulation that its FTC order would be voided if the GM case were dismissed. In other business, FTC has squashed a marketer's ad claims that its Pest Sentry uses ultrasound to eliminate insects and rodents. Under the consent agreement, Sentronic Controls Corp., Chicago, and two related companies agreed to make no future performance claims unless they have "competent and reliable evidence" to back them up.

U.S. SUPREME COURT, by a 5-to-4 vote, has ruled that First Amendment free-speech guarantees were violated by a Maryland law aimed at fund-raisers. The law prevented fund-raisers from spending more than 25% of their gross revenues for advertising and other administrative costs. In striking down the law, the justices said that the ceiling on ad spending was not an appropriate way to achieve the state's purpose—to protect the public from fraudulent fund-raisers.

ACCOUNT ACTIVITY: **Wicks'N'Sticks**, Houston, to **Rives Smith Baldwin Carlberg/Y&R** for a $1 million-plus national consumer ad campaign. The chain, consisting of 250 franchised candle stores in 40 states, expects to break the campaign in 1985 when it plans to have more than 300 stores. Previous advertising has been handled on a project basis. . .**Wendy's International**, Dublin, O., to **Cuneo Sillon Turner**, Boston, for its New England regional account, from Sonder Levitt, Philadelphia. Budget not disclosed.

WORTH NOTING: **United States Satellite Broadcasting Co.**, Minneapolis, has contracted with RCA Astro-Electronics to design and build two satellites. The two "birds" will cost a total of $160 million. Hubbard Broadcasting owns USSB, a direct broadcast satellite operation. . .**Angostura International**, Rahway, N.J., is introducing two low-sodium products, Angostura worcestershire and Angostura soy, first in Florida and nationally by yearend. Newspaper and radio advertising by Hicks & Greist backs the debut. . .**American Airlines**, New York, will introduce nonstop service between Dallas-Fort Worth and Frankfurt and Paris on April 11, 1985, and the island of Maui in Hawaii on Dec. 15, 1984. American expects Dallas-Fort Worth to become the key Southwest hub in the U.S. for international travel, said a spokesman for the airline.

Dewitt snaps upfront buys for Polaroid

By STEWART ALTER

Polaroid Corp.'s recruitment of DeWitt Media to design its upfront tv buy last month is raising further questions about the camera marketer's relationship with Doyle Dane Bernbach.

Gene DeWitt, who formed his own media management company 3½ months ago, confirmed that he had received the assignment. Mr. DeWitt is a former exec vp-director of media services, McCann-Erickson Worldwide.

"We have been engaged to negotiate upfront network prime time buys for several advertisers and Polaroid is one of those," Mr. DeWitt said, adding that Pizza Hut is another. For both of those clients, he said, "We've basically completed our negotiations and have our buys on hold."

Carl Johnson, vp-worldwide advertising, Polaroid, said Mr. DeWitt has been retained as the equivalent of an in-house media expert, a position that Mr. Johnson said does not exist at Polaroid. "As a prelude to creating an in-house media group, we have dealt with many consultants, and [Mr. DeWitt] is one of them. Gene is functioning as our in-house media person."

Mr. Johnson said Mr. DeWitt's role will not affect

Nabisco bakes deal for ESPN as ABC partner

By CRAIG REISS

New York—ABC Video Enterprises is reportedly prepared to sell Nabisco Brands as much as a 30% ownership interest in Entertainment & Sports Programming Network for an undisclosed price, according to sources.

These sources also report that as part of the deal, Ohlmeyer Communications, half-owned by Nabisco, will play a management role in the cable sports network. Ohlmeyer Communications' chairman is Don Ohlmeyer, former executive producer of NBC Sports, and its president is John Martin, formerly No. 2 man to Roone Arledge at ABC Sports.

Officials at ABC Video Enterprises declined comment. A Nabisco spokesman also declined comment but called the report "conjecture." Officials at Ohlmeyer could not be reached for comment.

The deal with Nabisco is reportedly one of several offers ABC Video considered for part of its 100% ownership of ESPN. Other offers reportedly came from Gillette Co., Stroh Brewery, Coca-Cola Co. and Viacom Broadcasting (AA, May 7).

Sources said ABC Video is interested in having Ohlmeyer involved because of its sports background and the Olympics experience of Messrs. Ohlmeyer and Martin. Mr. Ohlmeyer was the executive in charge of NBC's aborted 1980 Moscow games coverage, and Mr. Martin handled setup of ABC's 1984 Olympics coverage.#

USFL eyes syndie play

By ROBERT RAISSMAN

New York—In the face of declining tv ratings, the U.S. Football League is exploring moving into syndication if owners decide to move to fall football in 1986.

McKinsey & Co., which is conducting research for the league on a move to the fall, has approached some major advertisers, asking if they would be interested in a syndicated USFL package if the league did not have a network option.

Jim Byrne, a USFL spokesman, said syndication is one of the scenarios that is being placed before advertisers.

In June, it reached agreement with Entertainment & Sports Programming Network for a three-year cable package worth more than $70 million. ESPN executives have indicated that they would support a USFL move to the fall. The USFL is negotiating with ABC-TV, which has exercised its option to renew its current contract.

Remy tests new import

By GAY JERVEY

New York—Remy Martin Amerique and Premium Wine Merchants are introducing Frisson wine into limited test market in the U.S.

Frisson is scheduled for a Sept. 1 debut in Providence, R.I., and one city each in California and the Midwest.

The French import is made from the same grapes used to make Remy Martin cognac. "This is the first time that anybody has taken that wine [used to make cognac] and sold it as wine alone," said Gary Kreissman, Premium's vp-marketing. Remy and Premium market the cognac in the U.S.

At $2.99 a bottle, Frisson falls into the low-price range of the wine spectrum. But the main thrust of its advertising campaign will not be price but attitude and image.

"The prime target is the person in his or her early to late 20s, people who do not think of themselves as conservative and who like to be thought of as individuals," Mr Kreissman said.

Ads by Avrett, Free & Ginsberg will be themed "Frisson. . .the party is on" and will sport a youthful and upbeat look. Radio and tv will be the predominant media used, including strong use of MTV: Music Television.

"With Frisson, we will be selling wine as entertainment, as fun," Mr. Kreissman said. "It meets with the American psyche."

Ideally, Frisson will begin a regional, market-by-market rollout by spring, 1985. Mr. Kreissman did not disclose advertising budget figures but said that it was "in the millions on a national rate."

In addition to the flagship Remy Martin brand, Remy and Premium import the DeLuze Classique line of wines; Grand Empereur, a premium French brand, and Krug champagne.#

Circulation $$ top 50%: MPA

By STUART J. ELLIOTT

New York—For the first time, magazines are getting more of their revenues from circulation than from advertising, according to the latest Magazine Publishers Assn./Price Waterhouse financial survey.

The survey, based on responses from 154 magazines about their operations last year, showed 50.13% of revenues came from circulation, while 49.87% came from advertising.

Subscriptions contributed 33.7% of revenues and single-copy sales amounted to 16.43%, resulting in the 50.13% total for circulation revenues.

Revenues from circulation have been rising steadily in the past decade, as publishers increased newsstand and subscription prices. As recently as 1976, circulation revenues were 45% of the total. In the previous survey, covering 1982 results, 49.8% of revenues came from circulation and 50.2% from advertising.

The survey also showed the average magazine made more money in 1983 than in 1982. The average pretax profit, as a percentage of revenue, rose to 10.89%, from 8.76% for the previous year. In 1981 the figure was 8.97%, while in 1980 it was 7.77%.

Magazines with circulation of more than 2 million had the highest pretax operating profits, 13.26%, followed by weeklies and every-other-weeklies, at 13.02%, and those with circulations of 1 million to 2 million, at 9.66%.

One category, magazines with circulations of 250,000 to 500,000, showed a pretax operating loss of 4.05%.

Results in other categories: Less than 250,000 circulation, 9.54%; 500,000 to 750,000, 7.40%; 750,000 to 1 million, 9.49%; 1 million to 2 million, 9.66%, and not-for-profit magazines, 8.58%.#

Firestone drops BBDO for Canadian agency

Akron—Firestone Tire & Rubber Co. has changed national ad agencies in order to target retail marketing.

BBDO, New York, lost the estimated $20 million account this week to Saffer, Cravit & Freedman, Toronto, the Firestone of Canada agency for the last two years.

Ironically, it was BBDO that created the campaign for Firestone's MasterCare service program, a retail-oriented service.

"We are redirecting our advertising to emphasize retail activity for Firestone [-owned] stores and retail stores. We selected Saffer because of its specialized expertise in retail advertising," said Gerald Kerr, director of Firestone's sales and service group. Saffer will be responsible for Firestone tires and auto service via national tv and magazine advertising and retail and newspaper advertising. BBDO had the account since 1980.

Brubaker, Cole & Associates, Twinsburg, O., handles Firestone's $2.5 million-to-$3 million farm, off-highway, light-truck, performance tire and trade advertising. Brubaker got the account in December, 1983, from Ketchum Advertising/Cleveland.#

Special Report

Latin America

17 Media test advertisers' spirit of adventure
Advertising in Latin American media requires a crash course in dealing with inflation and a spirit of adventure. You don't know who will own the medium next month that you've placed your ad with or if it will have been closed by the government.

18 Governments hold press freedom hostage
Many Latin American governments control more than half of the economy in their countries and, in their role as biggest advertiser, can make or break a publication.

24 Soap operas slip sales pitches into scripts
Consumer product advertising is built into the scripts of Brazil's popular soap operas.

27 After Europe, *Wall Street Journal* looks south
After last year's successful introduction of a European edition, the *Wall Street Journal* is considering launching a Latin American edition.

32 Cable on obstacle course
Cable companies in several countries have overcome lack of funding, interventionist governments and anti-American programing sentiments to cable their nations.

10 Parting Shot

To our readers

This week's Special Report on Latin America is a good example of a real joint effort between two professional journalists. Carolyn Hulse, a veteran AD AGE staffer on both the features and the international desks who recently "retired" to spend more time with her young sons, and Laurel Wentz, our Latin America special correspondent based in Sao Paulo, teamed up to create a blend of stories that would give a sense of Latin America's media and advertising.

The two met in Chicago in late March to exchange ideas and then sort out the strongest of them to assign to writers all over Latin America. In the planning sessions, Carolyn offered her knowledge of American readers and Laurel provided her insights on the events and culture of Latin America.

Then the teamwork really began, coordinating the efforts of correspondents in such countries as Colombia, Brazil, Peru, Mexico, Paraguay and Guatemala. Laurel contacted the writers and doled out the assignments. As their "files" poured in, Carolyn faced the task of trimming and blending several full-length stories into one that would capture the essence of the assignment.

One of the challenges for this Special Report was locating a knowledgeable opinion writer for the Commentary Corner. Laurel and Carolyn, through the efforts of two stringers in Latin America, reached Nobel Prize winner Gabriel Garcia Marquez and Argentinian writer Jacobo Timerman, but both were unable to take on the assignment. Robert Cox, an Englishman now working in South Carolina and formerly editor-in-chief of the *Buenos Aires Herald*, accepted.

Dealing with problems of communicating via telex, overloaded phone lines and the mails, coping with difficulties in comparing advertising expenditures among the various countries and melding many reports into coherent, cogent articles were all part of a day's work for Carolyn and Laurel.

On another international note, Rance Crain's lead feature story this week is an interview in Switzerland with Nestle S.A. managing director Helmut Maucher.

Letters

Ethnic images
In the article, "Using ethnic images—an advertising retrospective" (June 14), your commentary contained an unfortunate racial slur which only perpetuates the very "crude and condescending images that appealed to largely Anglo-American audiences who found it difficult to reconcile their own visions of beauty, order and behavior with that of non-Anglo-Americans."

Clearly you are also having difficulty reconciling this vision when you make a statement that "advertisers may have gone too far and created stereotypes of 'successful' ethnic group members that are as unrealistic as those of the past."

As a "successful" (and why must you put successful in quotes?) ethnic group member, I have yet to see one advertisement that presents an exaggerated portrayal of ethnic success. Since when has it been unrealistic to see well-groomed, professional minorities socializing, leading board meetings or even breaking world records like Carl Lewis in his Nikes?

Anne Kenney-Daniels
Advertising sales representative
People
New York

Editor's note: The passage that Ms. Kenney-Daniels refers to was not written by ADVERTISING AGE, but was a direct quote from the "Ethnic Images in Advertising" catalog issued by the Balch Institute for Ethnic Studies in Philadelphia. And the word successful *was bracketed by quotation marks in the catalog.*

Feathering with fables
What a delightful addition to your publication: Stanley Burkoff's Fables (June 14).

Since his latest positions as president and creative director each were for 10-year periods, do we assume that he'll be feathering our issues for the next 10?

Irwin Dushkin
President
G/D Advertising
Miami

Tribute to Shaw
I thoroughly enjoyed James Brady's column "The old lion," (June 7) the tribute to Irwin Shaw.

As a young veteran of World War II, I enrolled in college in 1946. Two years later, I played the chief protagonist in Irwin Shaw's "Bury the Dead." Since that time I think I've read just about everything that he had published. Mr. Brady's tribute was one of the best that I have read, and I thank him.

Cable in paradise
After reading the headline "Cable finds trouble in paradise" (Cable Tv, May 31), I was prepared for the worst. A close reading of the articles, however, reveals an industry that will soon be the dominant technology for delivery of entertainment and information to the American household. Who could complain about that?

Instead, I'm writing to congratulate ADVERTISING AGE for telling it like it is. From Craig Leddy's summary of the improved prospects for passage of legislation to deregulate cable to Nancy Josephson's piece on successful techniques for marketing cable, it is clear that cable is achieving its potential. In fact, cable households more than doubled during the past four years. Moreover, cable will pass 70% of tv homes by the end of 1984. Without doubt, there have been growing pains during the rewiring of America. But research released at the National Cable Television Assn.'s annual convention confirms that cable is winning high marks from satisfied subscribers. Indeed, most who drop the service wind up regretting the decision.

Local

(Continued from Page 19)

"We can't provide expensive stunts, so we concentrate on local appeal, on the show's unique Peruvian quality."

The twice-monthly series costs about $5,000 per episode to produce—high by Peruvian standards—and is one of the first productions to be shot on location.

Despite "Gamboa's" high ratings and devoted fans, leading tv network Panamericana, which co-funds the series with the new production company Cinetel S.A., may replace the popular series with a soap opera.

"These are hard times," Mr. Llosa says. "Panamericana knows it can sell a soap opera outside Peru even if it's not that well done . . . they need to make money off their productions."

Chile

Chile's seven-hour tv extravaganza *"Sabados Gigantes"* ("Giant Saturdays") is an advertiser's dream. Happy program participants shout consumer product brand names, sing advertisers' snappy jingles and even gambol around the stage clutching sponsors' products. All this and high ratings, too.

"Sabados Gigantes" combines skits, songs, amateur talent competitions, games and contests. The show has been running for 22 years and still averages a 60 rating or better—the highest on Chilean tv. The show's emcee is the 43-year-old Don Francisco, quite possibly the most popular man in Chile.

Don Francisco's one-man tv kingdom is inseparable from advertising. On a typical program, a couple is chosen at random from the audience and challenged to sing the Pepsodent gel toothpaste jingle. If the two get it right, they win a handful of pesos.

Colombia

The pride of Colombian tv is an all-too-real 62-episode adaptation of Peruvian writer Mario Vargas Llosa's semi-autobiographical novel "Aunt Julia and the Script Writer."

Mr. Vargas Llosa, 48, drew on his own experience with radio in the Lima of the 1950s to write his nostalgic comic novel about the bizarre world of writers obsessed with inventing new plot twists for radio soap operas. It is also a great love story between the protagonist (age 19) and the beautiful Aunt Julia (32), whom he eventually marries.

In real life, Mr. Vargas Llosa did marry his own stunning Aunt Julia. The marriage lasted nine tempestuous years—until he fell violently in love with Julia's 15-year-old niece, Patricia, now his second wife. (Neither woman is a blood relation.)

After seeing the tv series, the enraged Aunt Julia has written her own best seller called "What Varguitas Didn't Tell" about their stormy marriage. The book picks up where Mr. Vargas Llosa's novel and the tv series leave off.

The tv series so far has been aired in seven countries outside Colombia, with negotiations going on with U.S. Spanish-language Channel 41 in New York. Now fans of Latin American literature are wondering if and when a serialized "What Varguitas Didn't Tell" may come to the small screen.

Mexico came to a standstill the night the final episode of the soap opera "The Curse" was aired.

Brazil

If there is any unifying theme to the carnival-like pandemonium of *"Cassino do Chacrinha,"* it is music. The music and assorted deafening noises never stop during the two hours Chacrinha presides over a show that alternates some of Brazil's top singers with the rankest amateurs from the studio audience. He dispatches the worst contestants with a piercing toot of his big yellow horn.

Chacrinha has been doing the show for 15 years and has been on four tv networks. He averages a 25 rating and a 50 share of audience for the 4 p.m.-to-6 p.m. Saturday slot.

Chacrinha is the master of what his current network, TV Globo, calls the "integrated commercial." Periodically during the show it is Haspa Savings Bank time. Chacrinha leads several choruses of the Haspa jingle, the Chacretes don Haspa t-shirts and ribbons, Haspa neon signs flash on and off and Chacrinha draws entries to the Haspa lottery. ■

U.S. tv series get pushed around

Brazil's cavalier treatment of its imported U.S. series would make an American programing executive shudder. Shows such as "Magnum, P.I." and "Hart to Hart" bounce from one time slot and day to another, temporarily are replaced with weekly Kung Fu movies, disappear for months and return with no fanfare at a different time.

"Hill Street Blues" and "Matt Houston," shown a few months ago at 11:30 p.m. Mondays and Tuesdays, now are being aired at 5 a.m. weekends. A loyal audience rarely develops.

Figuring out what a foreign program was called before it was dubbed into Portuguese is as much of a challenge as discovering when it is aired. Brazilians know "Hart to Hart" as "Couple 20" (*"Casal 20"*) and "Matt Houston" as "High Box" (*"Caixa Alta"*). "Hill Street Blues" becomes "Heavy Lead" (*"Chumbo Gross"*) in Portuguese. The Spanish-speaking countries where "Hill Street Blues" is popular translate it somewhat more logically as "The Price of Duty" or "Paying Your Dues" (*"El Precio de Deber"*).

Venezuelans like to watch U.S. major league baseball as well as "Fantasy Island," "Charlie's Angels" and "CHiPs." In Argentina, with "Dallas," "Dynasty" and "Dukes of Hazzard" to choose from, viewers really turn on their sets for double-feature reruns of "Get Smart." To the amazement of Argentine tv executives, the 1960s Mel Brooks' comedy about bumbling secret agent Maxwell Smart draws 29% of the prime-time audience at 8 p.m. Monday through Friday.

Peruvians watch "Fantasy Island," "Dynasty" and, twice-a-day, reruns of "The Untouchables." High quality Brazilian soap operas are guaranteed hits, but only one lucky network, Panamericana, can afford to buy them. Other channels make do with cheaper soap imports from Argentina and Venezuela.

In Mexico, nine of the top ten rated programs on one channel during a recent week were soap operas, led by a soap called "The Beast" (*"La Fiera"*). U.S. series such as "Charlie's Angels" and "Bionic Woman" were popular with Mexicans until private tv monopoly Televisa, hard-hit by massive peso devaluations, stopped importing new episodes.

"When the 'Dukes of Hazzard' began running, it achieved a 30-point rating, but viewers were seeing the same chapter five times," says Lilia Guajardo, media director at Walter Thompson de Mexico.

New episodes of U.S. shows are being imported again, but one channel nearly has doubled its ratings since last year with series such as "The Munsters" and "The Addams Family." ■

Chex hopes bananas add to its appeal

By JANET NEIMAN

Ralston Purina Co. is giving Chex cereals a two-pronged boost this summer, with a new tv campaign and an estimated $15 million promotional tie-in with bananas.

The new commercials, from Wells, Rich, Greene, New York, have an upbeat jingle themed "The simple pleasures of Chex." It replaces the line's year-old "Can you hear it?" theme, also from WRG. Four of the five Chex flavors (all but Wheat & Raisin Chex) are included in the spots.

No print support for the tv campaign is scheduled.

Chex cereals hold about 5% of the $3.7 billion ready-

Crucial voting bloc

GOP briefed on Hispanics

By JENNIFER PENDLETON

'84 Marketing the Candidates

Four months ago, representatives of William F. Arens & Associates, a La Jolla, Cal.-based ad agency, trekked to Washington with a mission that, while not impossible, seemed unlikely.

The agency, meeting with the Reagan-Bush '84 campaign staff, as well as the Republican national, senatorial and congressional committees, went to the capital to discuss what at first hearing seems strange for the political party associated with the privileged and the powerful: The U.S. Hispanic market.

Arens, which has marketed goods and services to the nation's fastest-growing minority group through work for Banco Nacional de Mexico (BANAMAX) and other clients, showed the Republicans some of the mistakes Anglo marketers make when trying to reach the Spanish-speaking population.

The lessons were meant to en-

(Continued on Page 64)

May double budget to $140 million

Apple to ad-tack IBM

By BOB MARICH

Apple Computer may pump well in excess of $100 million into advertising next year as it vows to slug it out with IBM in the ad arena.

Some sources expect the ad budget for fiscal 1985, which begins Oct. 1 of this year, to hit about $140 million. That would be double its current spending level.

Cupertino, Cal.-based Apple, the second-largest marketer of personal computers, wants to distance itself from the rest of the pack as well as grapple with market-leader IBM.

The fiscal '85 ad budget has not yet been set, but Apple is certain to end up playing in the big leagues, said advertising and sales promotion manager Bruce Mowery.

"If IBM is going to spend next year what it did this year, we're not going to sit back and take a back seat to anybody," Mr. Mowery asserted.

IBM, Armonk, N.Y., will spend more than $100 million this year to advertise its personal computer products, according to various estimates.

Apple is stepping up advertising because it is the most mass market-oriented of the personal computer marketers, industry sources say. This is a result of pricing—its Apple IIe, at $995, actually falls into the home-computer category (under $1,000) as a result of recent price cuts. It also is a result of Apple's historical strength in the small-business market, which is characterized by unsophisticated, image-conscious consumers.

John Sculley, the marketing-oriented former soft-drink company executive who became Apple's president in April, 1983, told a dealers' meeting in January that the company is raising the marketing stakes in the computer industry.

Apple will spend about $70 million in the fiscal year ending Sept. 30, a 40% increase over what it spent in fiscal '82, industry sources say.

Apple's 1983 annual report claimed that personal-computer advertising exceeded $100 million for the

L.A. shops brace for Olympic agony

By RUTH STROUD

Los Angeles—John Turner hopes the rings in the Olympic symbol aren't an omen that will bring his ad agency two weeks of running around in circles.

But just in case, the senior vp-operations at DJML here, is preparing for the worst.

"We're going to send letters to all our clients saying that we hope they'll understand our services will be affected—or at least be unpredictable—during that period," Mr. Turner said of the weeks beginning July 28 when Los Angeles will be the host of the 1984 Summer Olympics. "We don't even know if we can get ourselves into the office, never mind getting [ad materials] to and from vendors."

Mr. Turner's apprehension is representative of the fears many Los Angeles agency executives have. This is especially true of those with offices near the Los Angeles Coliseum, where opening and closing Olympic ceremonies and the popular track and field events will take

Looks like big week for Chiat

By JENNIFER PENDLETON

Pizza Hut will name Chiat/Day, Los Angeles, to handle its $20 million-plus national advertising account early this week, sources report.

The agency's second new-business coup of the week is likely to be the $8 million-to-$9 million Porsche Cars of North America assignment, an addition that may have repercussions on Chiat's corporate ad work for Mitsubishi Motors.

Neither Pizza Hut, Wichita, nor Porsche, Reno, Nev., would confirm their agency selections last week. Both predicted decisions or announcements this week, however.

Sources say Pizza Hut has informed Chiat/Day that it has been chosen. The New York offices of Ammirati & Puris and Ogilvy & Mather, the two other finalists for the business, also have been told of the Los Angeles agency's appointment, sources say.

The naming of Chiat/Day follows a two-month agency review in which Pizza Hut talked to several major national agencies, finally paring the list to three finalists. The agencies made personnel and strategy presentations, but not

Kodak ad sports non-Olympian

By ROBERT RAISSMAN

With the pre-Olympic hoopla beginning to bubble and ads oriented toward the games proliferating, some companies are taking liberties with their casts, using athletes who have no chance of making the team.

Three athletes in Eastman Kodak Co.'s Olympics spot—Carl Lewis, Mary Decker and Edwin Moses—have made the team. Another, Brian Oldfield, a world-class shot putter, never had a chance to qualify.

That he couldn't qualify had nothing to do with Mr. Oldfield's ability to throw the shot. He was banned from the last two Olympic games and will not be allowed to participate in Los Angeles because he previously participated in the International Track Assn., a professional track tour. He lost a bid to the ninth U.S. court of appeals to issue an order allowing him to compete in the Olympic trials.

A Kodak spokesman said the commercials were not designed to tout the Olympic stars but to show athletes "striving for excellence." The uniforms the athletes are wearing, however, have the letters "USA" across sweatshirts and are similar to the uniforms U.S. athletes wore at the World Track and Field Championships held in Helsinki, Finland, last summer.

John Mahar, senior vp, J. Walter Thompson USA, New York, said only track savants would clearly recognize Mr. Oldfield in the spot. "Our intention was to show the intensity of competition. Brian has a tremendously impressive appearance and adds a lot of presence to the commercial."#

FLASH REPORT: Newspaper advertising investment for April

Newspaper ad spending surges

NEW YORK—Advertising investments in daily newspapers continued rising in April, 1984, with 10 of 16 categories showing increases over a year earlier, according to data supplied to ADVERTISING AGE by Media Records.

The largest percentage gains in national spending went to the cameras, photo supplies and services category—up 193.6% to $1,013,772—and the cosmetics, makeup and manicure products category—up 114.2% to $361,023, says Media Records' Flash Report of Newspaper Advertising Investments.

The biggest dollar totals came in the retail categories. Department store advertising investments spurted 30.3% to $73,971,829; food store spending rose 26.2% to $24,265,320, and radio-tv-phonographs-records spending was up 22.8% to $12,569,248.

Other categories showing increased ad spending were: Beverages-coffee and tea, rising 24.3% to $89,552; publishing and media, 19.6% to $11,098,451; alcoholic beverages, 19.3% to $2,293,156; new passenger cars, 9% to $11,359,288, and airlines, 8.6% to $12,427,609.

Among the declining categories: Headache remedies and sedatives dropped 65.4% to $12,476; beverages-soft drinks, diet and nondiet, 51.8% to $226,462; soaps, cleansers and polishes, 44.2% to $137,627; sporting and leisure-time equipment, 39.3% to $400,818, and cigarets, 36.6% to $4,535,457.

Cold, cough and sinus remedies showed no advertising activity this April or last.

The Flash Report is based on Media Records' measurements of advertising linage in major-market newspapers.#

Scarborough gives software to schools

By BRIAN MORAN

Scarborough Systems, looking to cash in on the growing interplay between home and school use of microcomputers, will donate up to 125,000 software programs to teachers this fall in a matching promotion with retailers.

The program, dubbed "Be a hero—software your school," will be supported by a $1.25 million campaign set to break in September in dealer publications. Consumer advertising will begin in October in computer magazines, to be followed by inserts in December issues of women's books including *Woman's Day*. The agency is Henderson Friedlich Graf & Doyle, New York.

For each software program bought by pupils and parents at retailers between Sept. 15 and Dec. 15, Scarborough will donate a program of the purchaser's choice to a local teacher. Scarborough, a Tarrytown, N.Y.-based independent marketer of educational and home productivity software, now offers seven programs selling for $39.95 to $59.95.

Like other small software developers without in-house sales forces, Scarborough is battling major textbook publishers to establish brand identity in the growing school microcomputer market. By the end of 1985, schools will have an estimated 650,000 computers, up from 400,000 last year. The school software market is expected to grow from $38 million last year to $128 million by 1986, according to Communications Trends, a Larchmont, N.Y.-based market researcher.

Retailers set to participate in the "Software your school" promotion include Sears, K mart and Waldenbooks, according to Sanford K. Bain, Scarborough vp-marketing. The company also plans a mailing on the promotion, supported by inserts in educational books such as *Instructor* and *Electronic Learning*.

Scarborough is best known for its MasterType computer-literacy program, which just passed the 200,000 mark in sales. MasterType sales are expected to reach 400,000 by yearend, bolstered by a book-software promotion beginning this month with Waldenbooks. Buyers of the program at a Waldenbooks outlet will receive $10 from Scarborough toward the purchase of a computer book at Walden.

Scarborough, which shipped its first product last October, projects revenues of close to $10 million this year, Mr. Bain said.#

Who helped hatch the perfect design for a well-known pantyhose?

A full-service marketing company, The Howard Marlboro Group helped design the now classic L'eggs® Pantyhose retail display units seen in stores nationally. This helped L'eggs make merchandising history and become the #1 brand of women's hosiery.

Helping major national brands market and merchandise their products more effectively is what The Howard Marlboro Group is all about.

From research and creative design to shelf management, from sales promotion to direct marketing...The Howard Marlboro Group has the formulas for in-store success. With a staff of over 300 employees, our disciplined approach to meeting objectives and developing unique strategies has contributed to a healthy market share and profits for our clients.

Scripps in circulation scrap

By LAURIE FREEMAN

E.W. Scripps Co. management is digging into its pockets for what's anticipated to be a long, drawn-out battle by its business journals to fight slumping circulation and defend against local competitors.

The company is pouring personnel and money into all its papers, with the biggest push in San Francisco and Pittsburgh. The effort stems in part from declining circulations and loss of market shares.

"One day we woke up and realized that we couldn't compete for the local business market with the pitiful numbers we had reading the papers," said Dan Hover, corporate sales director, Scripps-Howard Business Journals.

In addition, news coverage was thought by many in the business community to be soft, with little hard-hitting news.

Scripps-Howard Business Journals owns weeklies in Atlanta, Dallas/Fort Worth, Denver, Houston, Los Angeles, Miami, Phoenix, Pittsburgh, San Diego, San Francisco, Seattle and Washington.

Circulations range from a low of 9,000 in Denver to a high of 22,000 in Houston. Business Publications Audit of Circulation audits are in progress at the papers now. Page rates average $1,065.

In San Francisco, the staff has grown recently from six to 23 full-time employes, with a goal of 31 by September.

The main competition in San Francisco comes from the city's two dailies, the *Chronicle* and *Examiner*.

In Pittsburgh, the battle lines are drawn between the Scripps-Howard *Pittsburgh Business Journal* and the *Pittsburgh Business Times*, published by Business Journals Publications, St. Louis.

Business Journals Publications also publishes in Baltimore, Cincinnati, Indianapolis, Philadelphia and St. Louis.

Mark Vittert, president of the tabloid chain, is tight-lipped about competition between the two publications, preferring "to let the paper's merits speak for itself."

For his part, Mr. Hover said, "We consider Mr. Vittert's Pittsburgh journal to be our stiffest competition."

Circulation margins between the two papers are slim. *Business Times* publisher's statement listed an average circulation of 12,500, effective February, 1983. The latest figures for the *Pittsburgh Business Journal* list circulation at 10,176.

The two business papers have been slugging it out in Pittsburgh for the past three years, and observers say in the past few months the war has been escalating.

Scripps-Howard recently unleashed a $100,000 radio and outdoor board campaign created by the George Hill Co. Previous efforts were done in-house.

Radio ads began running in April on KDKA (am), and an all-city outdoor board campaign kicked off in late May. The 50 boards state: "The *Pittsburgh Business Journal*—ahead of the *Times*."

Money is being pumped not only into San Francisco and Pittsburgh. "All of our papers now have $60,000 to use for promotions at their discretion for the rest of the year. The corporation adds an additional $500,000 to promote the entire chain in major trade publications," said Mr. Hover.

As part of the effort to rebuild circulation, a selective, controlled circulation drive was instituted at many of the papers. Free subscriptions were sent to members of organizations like the Smaller Manufacturers Council.

Scripps now is switching those individuals over to paid subscriptions through telemarketing.

Along with the push for circulation comes an increase in advertising sales. From January to May, 1984, an increase in advertising of 289% was recorded for the *South Florida Business Journal* in Miami. In Atlanta, a 49% gain was reported.#

Hispanics place trust in ads

New York—Hispanics in the U.S. tend to find advertising more believable than do Anglos, concludes research by Ogilvy & Mather.

The agency is using the recent research as a springboard to note the importance of reaching the Hispanic audience directly.

By a 2-to-1 margin, Hispanics are more likely than Anglos to believe in advertising's credibility, according to the study. When asked whether they agreed with the statement, "Advertising presents an honest picture of products," 41% of Hispanics in the telephone survey said they agreed. Only 22% of Anglos surveyed agreed with that statement.

Similarly, 41% of Hispanics agreed that "advertising gives a good idea about a product by showing the kind of people who use it," and 27% agreed that "the way an average family is shown on tv commercials is true to life." This was in marked contrast with the 20% of Anglos who agreed with the first statement and only 12% who agreed with the second.

"With Hispanics responding less critically to advertising that is primarily designed to reach Anglos," concluded the O&M research, "it is little wonder that marketers who understand how to address them directly are finding out just how rewarding this market can be."

The research document, which also looked at the demographics and values of Hispanics, observed that "Hispanics seem to be more committed to brand-name products" than are Anglos. A total of 60% of Hispanics and 52% of Anglos agreed with the statement "I always feel better when I buy well-known name brands."

On the other hand, Hispanics tend to be significantly less interested in coupons. Only 44% said that they used coupons, compared with 76% of Anglos.

Hispanics also tend to be more likely to switch brands based on price increases—58% said that they have changed from their usual brand recently because it costs too much, compared with 43% of Anglos.#

SIN sees strong Latin auto market

By PATRICIA STRNAD

Detroit—SIN Television Network is backing its case that it is a major Hispanic-language medium for advertisers here with a study that shows Spanish-Americans spent $1.8 billion on new 1982 vehicles.

New York-based SIN already is winning some points: First-quarter ad revenue this year is up 50% from the same period a year ago.

"Spanish USA as a Market for New Cars and Trucks," a study conducted by Donnelley Marketing, Oak Brook, Ill., compared R.L. Polk registrations with Spanish-surname registrations for 1982 model vehicles in 18 bilingual cities, where about 73% of U.S. Hispanics reside.

When the households in these 18 markets were totaled, Donnelley estimated that 13.[illegible]% were Hispanic, and about 8% of new-vehicle registrations—133,947 units—were listed under Spanish surnames. At an estimated $9,910 per unit, the Hispanics in these markets represented a $1.3 billion auto market. The study projected these figures to all of the U.S. Spanish population, concluding that U.S. Hispanics bought 183,489 vehicles with a value of $1.8 billion.

SIN, in its 22nd year, is the nation's first Spanish-language tv network, with 277 satellite-interconnected affiliates reaching 86% of the Hispanic population of the U.S.

William Stiles, exec vp of the network, said the 1984 ad revenue gains reflect a continuing upward spending trend by advertisers seeking to reach the $70 billion Hispanic market.

According to John Pero, director of national sales for SIN, ad gains came partly from new advertisers and partly from existing clients that increased their spending. SIN has a half dozen advertisers in 1984 that signed national campaigns representing more than $15 million in billings, said Mr. Pero.

In June, 1981, Yankelovich, Skelly & White, New York, also conducted a survey for SIN, examining the U.S. Hispanic population's true value as a market. According to this survey, Hispanics generally are more interested than most Americans in "quality" products and nationally advertised brands.#

Smokeless tobacco market evening out

By JOHN C. MAXWELL JR.

During 1983, the smokeless tobacco industry had a basically flat year in terms of sales volume compared to a down year in 1982.

One possible reason for the stabilization of the market in 1983 is that some cigaret smokers are switching to smokeless tobacco.

The only category to post any significant increase was the moist snuff/fine-cut area, which was up some 7%.

Looseleaf was flat, with plug, dry snuff and twist-roll showing declines of 6.8%, 4.5% and 3.8%, respectively. The moist-plug category had the largest decline, dropping 14.2% year to year.

U.S. Tobacco led the way in the moist snuff/fine-cut area with 89.3% market share, followed by Helm Tobacco and Conwood with the balance of this sector. As an aside, Conwood introduced H.B. Scott and Red Fox in 1983 as looseleaf products. They captured a combined share of 3% of that market in 1983.

Among individual companies, Conwood retained its No. 1 position with 26.2% of the total smokeless market.

This is a slight increase over last year's 25.4%. U.S. Tobacco, No. 2 in the industry, also gained share, moving up two percentage points to capture one-quarter of the total market. This is largely due to the success of its Skoal and Copenhagen brands in the moist-snuff area.

Helm Tobacco captured fifth place from RJR in 1983 with an 8.2% market share, while other rankings remained unchanged.

According to a 1983 study conducted by Simmons Market Research Bureau, 3.2% of male households, on a national basis, use smokeless tobacco.#

Mr. Maxwell is with A.G. Becker Paribas, New York.

Spendthrift son tells his father he wants to run for Congress when he grows up in one new spot (top) created by the Tuesday Team. The spot later cuts to the Capitol, where an actor blames Democrats for blocking a balanced-budget amendment. Another spot (bottom) shows presumably Democratic congressmen reading newspapers while a Republican argues for a balanced budget.

Tuesday Team's rolling new ads

By MARK LIFF

NEW YORK—From an unobtrusive mid-Manhattan office, replete with rental furniture and holes left by bookshelves ripped out of the walls, come the powerhouse tv commercials of the Republican election campaign.

There is no sign on the door to announce that this is the home of the Tuesday Team, a wealth of creative talent on leave from their ad agencies to work for the Reagan-Bush '84 reelection effort (AA, April 2, *et seq.*). In fact, the group isn't listed in the lobby directory of the building at 1270 Avenue of the Americas.

"We're behind the dancers at the Radio City Music Hall," quipped James Travis, who directs the Tuesday Team, as he attempted to give directions to the office.

The dancers could very well trot out the team's latest effort. Last week, two Tuesday Team-created tv spots broke in 85 markets in 30 states for the Republican National Committee

Marketers vie for $60 million bonanza

S.F. lures Dem cash

By JENNIFER PENDLETON

SAN FRANCISCO—It hasn't gone as far as having official sponsors of the 1984 Democratic national convention. But for many major corporations and retail establishments here, this week's gathering is a prime marketing opportunity.

Consider the numbers: The Convention '84 Host Committee is expecting 3,933 delegates, 1,313 alternates, 6,000 official guests, 4,000 hangers-on and 15,000 members of the media to attend the convention, which runs from today to July 19.

No doubt that among these 30,000 people there are more than a few bulging wallets to be opened. The city and its businesses are in line to gain about $60 million in direct benefits, the host committee says. The projections break it down as follows:

- Individuals will spend $31.1 million to $31.6 million.
- The media will shell out $12 million to $15 million for facility construction.
- The Democratic National Committee will spend $6 million.
- The city will find its bill totaling $7 million.
- The host committee itself will drop $500,000.
- The value of media exposure for the city will amount to $3.1 million.

And it is estimated that after all the money is circulated through the city's economy, the total benefits could reach $91 million to $103 million. That amounts to about $25 million a day added to this colorful city's economy.

Such numbers are lucrative enough to attract the interest of the

How to sell Fritz & Gerry?

By MARK LIFF

'84 Marketing the Candidates

SAN FRANCISCO—When Walter Mondale anointed Geraldine Ferraro his vice-presidential running mate last week, he may have made the challenge just that much tougher for his campaign image-makers.

Prominent ad agency executives told ADVERTISING AGE last week that had Mr. Mondale selected Gary Hart instead, the job might have been easier. If Walter Mondale is the "Coca-Cola" of the Democratic party, they said, then Gary Hart could have been his "Diet Coke"—the requisite product-line extension to widen the appeal of the "brand."

The executives said Mondale campaign workers, preparing for the formal nomination of their candidate at the Democratic national convention here this week, must give Ms. Ferraro a highly visible role before the Nov. 6 election. The difficulty, they said, will come in deciding exactly how to fine-tune that role.

Rep. Ferraro was one of the potential candidates who paraded to Mr. Mondale's new home in North Oaks, a suburb of St. Paul, Minn. But her selection by Mr. Mondale surprised even key aides to President Reagan, who were expecting a Mondale-Hart ticket.

The Mondale creative effort need not do anything other than display the vice-presidential candidate, said John O'Toole, chairman of Foote, Cone & Belding Communications, New York, and current chairman of the American Assn. of Advertising Agencies.

"Nothing more is required than her picture on the package, like Betty Crocker," he said. "No one is interested in her views. Just have her smiling in the background and visible in all the communications."

Other executives, however, contended that Rep. Ferraro should be in the forefront. "The worst thing to do would be to stick her in the background," said Richard Penny, president of Weekley & Penny, Houston.

Mr. Penny said that he expected a backlash by some voting blocs against the Mondale-Ferraro ticket. Some spots must intimate subtly that the Ferraro nomination is targeted to the single-largest voting group—women,

Upjohn out to get relief two ways

NEW YORK—Under mounting competitive pressure in a field it once owned, Upjohn Co. has set out to protect Motrin, its original prescription ibuprofen pain reliever, on two fronts: Legal and marketplace.

The Motrin brand now is threatened by the new over-the-counter ibuprofen tablets, Advil from American Home Products' Whitehall Labs and Nuprin from Bristol-Myers under a licensing agreement with Upjohn.

Last week, Kalamazoo, Mich.-based Upjohn said it would slice the price of Motrin by 35%. Motrin, the world's leading prescription arthritis pain reliever and Upjohn's largest-selling ethical drug product, last year accounted for

Godfather's seeks to stop Chiat-Pizza Hut deal

LOS ANGELES—Godfather's Pizza, Costa Mesa, is suing Chiat/Day to halt the agency from handling the $20 million-plus Pizza Hut account. Godfather's is suing to prevent Chiat from taking to Pizza Hut proprietary information that the agency received during Godfather's recent review. Godfather's awarded its $5 million creative account to Dailey & Associates last month (AA, June 14). Chiat recently won the Pizza Hut account (AA, July 9), though the company has yet to confirm the selection. Chiat, an early contender for Godfather's, left the review just before the decision to pitch the larger Pizza Hut account. A hearing is set for today in Los Angeles superior court. Godfather's declined comment because the matter is in litigation.

FCC may hike 7-7-7 to dozen

By MAURINE CHRISTOPHER

Odds are good that 12-12-12 will replace 7-7-7 as the Federal Communications Commission's enforced limit for each broadcast station group owner.

At press time, the numerical ceiling of a dozen each for ownership of tv stations and am and fm radio stations was emerging as the most likely formula to get an okay from the five-person commission.

The tv limit probably will apply only to the more valuable and powerful vhf stations. Under the revised policy, there is expected to be no maximum on stations in the uhf band. The latest chapter in the

Telescan plans test of tv spot verification

By STEWART ALTER

With Pepsi-Cola as its first client, Telescan will move into test market this December with a system for electronically verifying whether tv commercials have actually run on stations as planned—at the right time, in full and with the desired video and audio quality.

To be tested in New York, Chicago and Los Angeles for six months at a cost just under $1 million, the Telescan system will be the first such system for independently verifying tv commercial airings to be launched since the advertising industry moved from film primarily to videotape in the 1970s.

The announcement of the new system, which has a patent pending, comes coincidentally three weeks after the Federal Communications Commission's sweeping deregulation of tv stations, which, among other things, freed stations from keeping detailed logs of programing and commercial airings. That move prompted advertising industry groups to urge stations to continue to maintain a record of ads run (AA, July 2).

Telescan does not require any tv station participation in its monitoring of commercials; it is done with electronic decoding equipment and computers from a remote site.

The system is the brainchild of Burton Greenberg, a tv commercials director who first worked on developing a system for monitoring airings of filmed tv spots in the late 1960s following his disappointment at seeing some Wheaties commercials he had shot appear scratched and with distorted sound on a tv station. But that system was not launched successfully.

But then in 1977 the FCC allowed that source identification could be included on videotape line 20 in commercials. A videotape picture is made up of over 1,000 horizontal lines, much in the way that a printed photograph is made up of dots. Line 20 is not visible to audiences. In the Telescan system, that line is electronically encoded with a number that can be picked up through decoding equipment and stored in computers. The numbers Telescan intends to use are the ISCI, or Industry Standard Commercial Identification, numbers the ad industry already uses to identify commercials.

Two years ago Mr. Greenberg formed Telescan in

'No fear' at ABC over 'Today' surge

Morning news war heats

By DIANE MERMIGAS

Several ABC network executives contend no changes in "Good Morning America" are warranted by the sudden summer raid on the program's audience by NBC's "Today."

"There really isn't any kind of fear here. We're sort of used to the ratings dropping during the summer," said Phyllis McGrady. Ms. McGrady was named interim senior producer for "Good Morning America" July 10 following Susan Winston's abrupt resignation as executive producer.

Ms. Winston will oversee ABC's daytime coverage of the Summer Olympics.

Many industry observers, including NBC executives, believe "Today's" virtual tie with "Good Morning America" the week of June 25 primarily was a function of NBC's uncommon dominance of prime time ratings that same week.

For the week, "Today" averaged a 4.1 rating, 21% share of the available national tv audience compared to 4.2/22 for "Good Morning America" and 3/16 for the "CBS Morning News."

However, "Today's" aggressive bid for viewers was thwarted the week of July 2, when NBC once again slipped behind ABC in the morning news race even though NBC narrowly led prime time for the second consecutive week.

For the week of July 2, "Good Morning America" averaged 4.2/24, "Today" 3.8/22 and "CBS Morning News" 2.7/15.

It is a widely held theory that a strong prime time showing benefits the morning because sets are already tuned to that station.

Steve Friedman, executive producer of "Today," said he intends to make the most of the program's ratings boost by offering special reports and features, and

Jackson snafus? Pepsi still happy

By SARAH STIANSEN

DALLAS—The Pepsi-Cola Bottling Group of Texas, unable to give away nearly one-third of its promotional tickets for the Jacksons' Victory Tour, still believes the Michael Jackson connection is paying off.

Despite a last-minute push to slap its promotional plans together in time for the Jacksons' appearances here last weekend—and the negative publicity that has followed the tour's ticket-selling methods—the bottling group seems convinced that the tour can only enhance the Pepsi brand's image.

Dallas was the second stop on the tour after Kansas City. Other cities on the tour are Jacksonville, Fla.; New York; Knoxville, Tenn.; Indianapolis; Detroit; Los Angeles; Buffalo; Philadelphia; Pittsburgh; Cleveland, and Anaheim, Cal.

"We feel as good now as we did when we signed [Mr. Jackson],"

Bergin in new Coke role at M-E

By STEWART ALTER
and JOHN J. O'CONNOR

NEW YORK—John Bergin, president of McCann-Erickson USA and the key man on the Coca-Cola account worldwide, will be devoting more of his time to the creative side of keeping Coke No. 1.

Nudged by Coca-Cola USA, McCann-Erickson Worldwide has tapped William C. Thompson Jr., exec vp-director of worldwide accounts, to add top account-management responsibilities for Coke USA.

He assumes functions that previously were part of Mr. Bergin's continuing worldwide role.

Commenting on the appointment, Robert James, McCann-Erickson Worldwide president-chief operating officer, stressed the move was made in response to future "business needs" Atlanta-based Coca-Cola had outlined.

A Coke spokesman said, "We regularly express our business needs and they respond accordingly."

Mr. James said the move in no way affects Mr. Bergin's position as the top person on the account.

"They needed an outstanding man on the account side," explained Mr. Bergin. "I'll now be

(Continued on Page 8)

Football syndicators stew while nets stall

By ROBERT RAISSMAN

NEW YORK—As the tv networks wait for concrete plans from three organizations that apparently have control of college football rights, some syndicators that had struck contingency deals with college conferences are watching those deals fall apart.

If the networks don't present their packages to advertisers soon, the fallout is likely to extend to syndicators that already have agreed on guaranteed rights fees with conferences. Sources said the networks could wait until the first week in August before finalizing their plans.

The conferences will be faced with the possibility of restructuring those contracts along profit or revenue-sharing lines, which will likely mean less money for conferences and schools. This would further shrink the revenues colleges and conferences can expect from tv. If too much time passes, syndicators could get out of football in 1984, which would mean an abrupt halt to talk of a glut of college football on tv.

Barry Frank, group vp in charge of worldwide sales for Trans World International, a subdivision of the International Management Group, which has linked the Ivy League with Public Broadcasting Service for a football series this fall, said the clock is running quickly for syndicators and advertisers. "It's getting late now. It's the middle of July, and people still can't commit to sign for a series that starts in a month and a half," Mr. Frank said.

Raycom, a Charlotte, N.C.-based syndicator, which struck a contingency deal with the Atlantic Coast Conference in November, has put advertisers and stations on notice that it has halted ACC sales until the networks submit their college football schedules. Ken Haines, vp-network operations, Raycom, said the company took its action because their contingency deal was dependent on the Supreme Court handing down a ruling in early spring and having a regional window spelled out. However, sources said the University of North Carolina wanted to establish its own tv package, thus eliminating the conference's most powerful team.

The ACC is not the only major conference without a syndicator. The Southeastern Conference, Southwestern Conference and the Big Eight Conference all are without representation. Then there are some major independents, including coveted Notre Dame, looking for deals. Two other major conferences, the Big 10 and Pacific 10, are being sold by TCS/Metrosports.

Even schools and conferences that have deals are facing a radically different revenue setup if syndicators are forced to continue to wait before they can offer a tangible package to advertisers.

Last week, members of the National Collegiate Athletic Assn. voted down a voluntary tv plan submitted by the organization. That action was the climax of developments that started three weeks ago when the Supreme Court ruled that the NCAA's 33-year-old exclusive control over college-football telecasts violated antitrust law. The Big 10 and Pac 10 then decided to strike their own deals with the networks. Besides these two conferences, the networks will be dealing with the College Football Assn. and the Football Television Planning Committee.

CBS and ABC are likely now to sift through what they are offered and pick the best games. Whether they will be locked into a set schedule before the season or will have the flexibility of picking contests on a week-to-week basis is still open to speculation.

Whether the networks think that prolonging their decision will help their own financial plight—by further pushing back college football's scatter market closer to the start of the season—is open to debate.

Terry Hanson, director of sports, Turner Broadcasting System, said another problem—the apparent control of the CFA—also could short-circuit syndication deals. "If the CFA is indeed in charge of college football, they have some questions to answer," he said. "If I buy 'X' conference's game of the week at 1 p.m. and there is a network game at 4 [p.m.] and a cable game at 8 [p.m.], all involving CFA teams, then my 'X' conference game might be the third-best attraction of the day."

The CFA, which includes 19 major independent schools as well as members of the ACC, Big Eight, Southeastern, Southwest and Western Athletic Conferences, agreed on a tv plan that gives over-the-air and cable networks a chance to bid on games for Saturday afternoons and evenings. The plan also provides a third Saturday afternoon window for member schools that don't want to compete directly with the network telecasts.#

corrections & clarifications

- The line above the chart on Page 40 in the international section of this issue incorrectly identifies the second set of figures as representing advertising expenditures in the first six months of 1984. The figures represent projected expenditures for all of 1984.
- The Travel & Tourism Research Assn.'s name was misidentified in a story devoted to its annual convention (AA, July 9, P. 33).
- Stockton West Burkhart, Cincinnati, is the ad agency for the Greater Cincinnati Convention & Expo Center (AA, June 28, P. 86).
- The following additions and corrections refer to the 1984 foreign agency income report (AA, April 23, P. 57):

Saffer Cravit & Freedman, Toronto, 1983 gross income of $7.3 million and billings of $51.2 million, compared with '82 figures of $6.5 million and $45.5 million, respectively.

Bold Advertising, Athens, '83 gross income of $1.2 million and billings of $8.6 million, compared with '82 figures of $1 million and $6.8 million.

GFM/Propeg, Salvador, Brazil, '83 gross income of $3.7 million and billings of $16.2 million, compared with '82 figures of $5.2 million and $18.7 million. Also, GFM/Propeg merged with Castelo Branco e Associados in March of this year and was not purchased by CBBA, as stated in the Page 58 footnote.

George Patterson Pty., part of Ted Bates Worldwide, should have been listed in the "World's top 50 ad agencies in 1983" chart as No. 50, with '83 gross income of $28 million and billings of $182 million.#

Smoke seems to clear for cigar industry

By JOHN C. MAXWELL JR.

Last year appears to have been a turning point of sorts for the cigar industry. Although total sales were off slightly, both large and little cigars registered year-to-year increases, 1.6% and 5.4%, respectively.

The decline is much less than in previous years and is fully attributable to the dropoff in small cigars.

If this year's first quarter is any indication of how the remainder of the year will progress, we believe that the industry can show its first year-to-year volume increase in over a decade. Removals for the first three months of 1984 have been up an average of 5% over the same period in 1983. The March increases make five months of consecutive improvements.

The greatest percentage of cigars continue to be in the 8¢-to-15¢ range. This price category grew to 54.8% of the total market this year versus 50.7% in 1983.

Although large cigars achieved an increase of 1.6% in units for the year, when these units are taken in combination with the "small" category (smaller versions of large cigars) the total large category declined 2.4%. John Swisher is now tied with Consolidated Cigar for the No. 1 spot in this area. Each has about 25% of the total market.

Little cigars (cigarillo types) are having the best growth of any regular category. We believe the key reason is price. The average price of a cigaret is now about 5¢. An average small cigar sells for about 5½¢, most large cigars are about 20¢ each, while the average price of a little cigar is about 2½¢. Obviously, with consumers becoming more price conscious, the little cigar is a better buy.

Within the category, the bulk of the growth appears to be coming from Consolidated Cigar's Dutch Treats, which now has almost 40% of this market.#

Mr. Maxwell is with A.G. Becker Paribas, New York.

Cigar market shares

Little cigars registered a slight increase in unit sales last year, while the decrease of small cigars' unit sales more than offset the gains made by the sales of large cigars. ***Source: John C. Maxwell***

Independent agencies join to form pr network

MINNEAPOLIS—Ten independent public relations agencies around the country have formed a national network to assist clients with multimarket and national accounts.

The new network, Public Relations Exchange, is intended to offer clients of the 10 agencies "increased nationwide service with specialized assistance in major metropolitan markets throughout the country," according to Lou Brum Burdick, chairman-chief executive officer of Brum & Anderson Public Relations here. Mr. Burdick is the exchange's first president.

In addition to Brum & Anderson's Minneapolis and Denver offices, other agencies in the exchange are Bohle Co., Los Angeles and San Francisco; Cone & Co., Boston; Janet Diederichs & Associates, Chicago; Earle Palmer Brown Cos., Washington and Baltimore; Makovsky & Co., New York; Pharr Cox Communications, Dallas; Spiro & Associates, Philadelphia, and Woody Kepner & Associates, Miami.

The companies had combined billings of more than $12 million in 1983.

Mr. Burdick said there are future plans to expand the network to additional U.S. and international markets this year. Negotiations are under way with agencies in Europe, the Far East and Canada, he said.

Kenneth Makovsky, president of Makovsky & Co., is vp of the exchange, and Sue Bohle, president of Bohle Co., is secretary treasurer.#

Officers elected for GMA

WASHINGTON—Consolidated Foods Corp. chairman John H. Bryan Jr. has been elected chairman of Grocery Manufacturers of America.

Kellogg Co. chairman William LaMothe has been named vice-chairman. Campbell Soup Co. president R. Gordon McGovern has been elected treasurer.

Six new association members were elected to the board: Charles Harper, ConAgra chairman; Reuben Mark, Colgate-Palmolive Co. president; Hamish Maxwell, Philip Morris president; Boyd Schenk, Pet Inc. president; J. Tylee Wilson, R.J. Reynolds Industries president, and Richard Zimmerman, Hershey Foods Corp. president.#

Need an Idea?

Send for a "FREE" Direct Response Format Idea Kit!

If your print quantity requirements are 20,000 pieces or more, Webcraft would like to send you a free format idea kit. You'll receive printed samples of unusual formats with attention getting involvement devices and built-in reply envelopes. We've specially designed our web-off-set presses for the efficient and economical production of:

☐ Direct Mail Formats
☐ Ink Jet Personalization
☐ Mini Catalogs & Booklets
☐ Catalog, Magazine and Newspaper Inserts
☐ Games, Sweepstakes and Traffic Builders

To receive your free format idea kit send a letterhead request describing your needs or call Jack Cooper today at: (201)297-5100.

C. 1983 figure reflects four regional editions; 1984 reflects national edition and two regional inserts.

Shop hours

(Continued from Page 3)

and Marstelier have instituted half days on summer Fridays, almost every New York agency has some version of special summer hours.

Most agencies give Friday afternoons off. A handful do it with no quid pro quo, though many insist employes make up the time by staying a half hour later during the rest of the week or arriving a half hour earlier.

But that can vary: a half hour earlier at D'Arcy MacManus Masius means 8:30 a.m., while at Doyle Dane Bernbach it's 9 a.m. It's also 9 a.m. at Kenyon & Eckhardt, which has the longest of the summer seasons; half-day Fridays begin in early June, compared to July for most other agencies.

Some of the major New York shops don't close early on Friday, such as McCann-Erickson and SSC&B. Instead, they give employes off two July/August Fridays of their choice. JWT's New York office joined this school this summer but makes it three Fridays.

Another approach to shorter summer hours is the alternating week. Needham, Harper & Steers/USA gives every other full Friday off. Bozell & Jacobs makes it a half day on every other Friday, but throws in another full day during the summer to build a long weekend.

William Esty Co., which has had summer hours in the past, still was surveying its clients last week to try to decide what to do this year. Ted Bates Advertising/New York treats summer the same as winter and gives no special hours or days off.

Chicago

Unlike their New York counterparts, most Chicago agencies, including BBDO, N W Ayer and Young & Rubicam, retain their 9 a.m.-to-5 p.m. schedule throughout the summer.

One exception is Tatham-Laird & Kudner, which switches to an 8:30 a.m.-to-5:30 p.m. Monday-through-Thursday and 9 a.m.-to-noon Friday schedule for July and August.

A TLK spokeswoman speculated the summer hours are intended to be "a kind of summer benefit for employes," based partly on the fact that "a number of clients do it."

She noted that summer hours are "a dubious benefit for a lot of employes," because the press of business often doesn't allow them to leave at noon Friday anyway.

NH&S' Chicago office is on summer hours this year for the first time. After testing a schedule of 8:30 a.m.-to-5 p.m. Monday through Thursday and 8:30 a.m. to 1 p.m. Friday during June, NH&S polled its employes, who overwhelmingly favored the idea. The agency will continue the same Monday-through-Thursday schedule and an 8:30 a.m.-to-1:30 p.m. schedule Fridays through August.

"The feeling was that a lot of people are putting in long hours and weekends," an NH&S spokeswoman said. "We wanted to give them something back.

"Some people get to take advantage of it, some don't," she said. "The place doesn't become a ghost town after 1:30 on Friday."

Detroit

Summer hours for Detroit area ad agencies are "long and hard," one veteran adman says. Summer is when agencies and their automotive clients are toiling to produce fall-introduction advertising. D'Arcy MacManus Masius' Bloomfield Hills parking lot is still pretty full after 4 p.m. Fridays. Staffers have the option of leaving an hour early, but not many do. D'Arcy has two auto accounts, Pontiac and Cadillac.

But most agencies are like Kenyon & Eckhardt, Birmingham. Although the New York offices keep summer hours, the Detroit office doesn't. K&E vacations run more to nonsummer periods, because of the needs of client Chrysler-Plymouth division.

J. Walter Thompson USA, Detroit, says its hours are "come early and leave late"—at least for those on the Ford division account.

"We work all the time," added a Campell-Ewald executive, now busy on 1985 advertising for Chevrolet.

Los Angeles

In Los Angeles, "summer hours" are as common as winter storms. For most agencies here, the only change in work hours will come during the two-week Olympic period when many will work from 10 a.m. to 4 p.m. Some are making plans to close on Aug. 3 and 10—"black Fridays" when crowds and traffic are expected to be at their worst.

A few agencies that do follow the tradition of their New York peers say summer hours are really a disadvantage since their clients don't normally have such hours. "In a service-oriented business, you've just got to be around when the clients need you," says John Carter, general manager-senior vp, Benton & Bowles.

B&B staffers are working half days every Friday during the months of July and August, which is great, Mr. Carter says, for the "least busy people."

Chiat/Day's offices in Los Angeles, San Francisco and New York also follow the Fridays-off summer schedule. But again, only those employes who are "all caught up" have the opportunity to take advantage of the three-day weekends, said one agency executive.

Some think the idea sounds great, but "We're much too busy," in the words of Keye/Donna/-Pearlstein managing director Leonard Pearlstein.#

High Life execs quit at Miller

MILWAUKEE—Two Miller Brewing Co. executives with responsibility for troubled High Life beer resigned last week as the review of the brand's advertising continued.

The first to leave was vp-brand management William Catlin, who resigned on July 19. No reason for the resignation or Mr. Catlin's future plans were given.

The following day, Miller announced the resignation of High Life brand manager Douglas Rogers. Again, no reason was given for his departure.

Succeeding Mr. Catlin as vp-brand management is Robert Toledo, formerly group product director. He reports to Miller president-ceo William Howell. No successor to Mr. Rogers was named.

Alan Easton, Miller's vp-corporate affairs, said the resignations had "no direct bearing on our continuing efforts to develop alternative advertising for Miller High Life that may result in a change of agencies."

Speculation increased last week

(Continued on Page 86)

For those big odors

Airwick Industries, Totowa, N.J., is using 15-second tv spots in a campaign for Stick Ups air fresheners breaking this week. They will be paired with commercials for other brands marketed by parent Ciba-Geigy Corp. The spots feature giant props to dramatize some of the biggest household odor problems. In each case, the item representing a big odor is brought down to regular size when the people "Stick it to 'em with Stick Ups." Bloom Agency, New York, created the spots.

Polaroid loss staggers DDB

By GAY JERVEY and BRIAN MORAN

In perhaps the darkest week of what has been a trying year for Doyle Dane Bernbach, the agency watched, almost helplessly, last week while two high-tech clients, Polaroid and Atari videogames, pushed bad-news buttons: Each client, representing a combined $40 million in billings, is pulling out of DDB.

Polaroid is taking away from DDB all but its international and professional/industrial advertising. The domestic consumer amateur photo products business, worth an estimated $30 million, is going to Ally & Gargano, New York.

On July 20, Polaroid chairman William McCune and chief operating officer I.M. Booth visited DDB International chairman Joseph Daly, one of the early account men on Polaroid, to tell him of the loss, nearly 30 years to the day the two companies first shook hands.

Ally & Gargano is already agency for Polaroid's PerfectData floppy discs account. Ogilvy & Mather handles Polaroid's video products line.

Atari, which was sold July 2 by Warner Communications to former Commodore Computer chairman Jack Tramiel, has reportedly told DDB it will concentrate its ads on Atari computers and will phase out its $10 million videogame budget. Wells, Rich, Greene, New York, which handles the $8 million Atari computer account, is expected to keep that business, although reports persist that Mr. Tramiel may throw that or other assignments to Ally & Gargano. Atari insiders report a firm decision will be announced July 24.

In a separate development, H.J. Heinz last week pulled its Weight Watchers ice cream, bread, fruit

Block, W-L cold-fighters bow

By NANCY GIGES

Block Drug and Warner-Lambert are joining Pennwalt in introducing new cough/cold remedies for next season (AA, July 19), guaranteeing another year of heavy advertising expenditures.

In a category already crowded with entries from major marketers such as Johnson & Johnson, Bristol-Myers, A.H. Robins Inc., American Home Products and SmithKline Beckman, Block Drug is introducing an extra-thick liquid, called Efficol Cough Whip, while Warner-Lambert is rolling out Mediquell chewy cough squares.

The category is a new one for Block, best known for its entries in denture care and medicated shampoos. Although W-L already has cough/cold products under the Halls, Benylin and Sinutab names, with Mediquell it is aiming to create a new segment, positioning its cough tablet as more competitive to syrups than cough drops.

For Pennwalt, the introduction of Cold Factor 12 extends its growing list of products using a patented time-release delivery system.

Aimed especially at children, Block's Efficol is whipped into a pudding-like consistency to prevent spills and comes in banana bubble gum flavor. The product is available in three types: Cough suppressant/expectorant, cough suppressant/decongestant and cough suppressant/decongestant/antihistamine.

Ad spending, at a $12.7 million annual rate, breaks Oct. 15. During the season, Block's actual spending on

Coke may tap Bates for agency-juggling act

By NANCY GIGES

Coca-Cola USA, in a move suggesting broad implications for the future of its agency lineup, is strongly considering switching Fresca diet soft drink from McDonald & Little, Atlanta, to parent Ted Bates Advertising/New York.

A Coca-Cola spokesman at first confirmed the reassignment but later said discussions are still going on. He pointed out that both agencies have been working on creative for the relaunch of ailing

last minute news

Marsteller special-markets unit reorganized

CHICAGO—Marsteller Inc. has reorganized its Marsteller Special Markets Group, giving the unit more autonomy. It now has its own creative and media departments reporting to James Head, who remains the unit's director-special markets, and becomes a senior vp from group vp. The Marsteller unit specializes in business-to-business and retail accounts. It has about 25 employes serving 23 clients.

Kriemelman to head RKO Radio sales

NEW YORK—Arthur Kriemelman will resign on Aug. 1 as president of the Radio Network Assn. to become head of sales for RKO Radio Networks. That GenCorp unit currently is steeped in a $4 million overbilling scandal (AA, July 9). Mr. Kriemelman fills the spot vacated by Kevin Lyons, now head of sales for Lifetime cable network.

ABC draws fire; CBS leads ratings

Nets make news in S.F.

By DIANE MERMIGAS

The three tv networks knew they weren't likely to find big stories at last week's Democratic national convention: Walter Mondale was the virtually assured nominee and Geraldine Ferraro already was a household name before the show began. Still, the networks made some news themselves:

- ABC's decision to abort its live coverage of the convention July 17 in favor of entertainment programing prompted more viewer reaction than any other aspect of e network's performance.

CBS appeared to be the na nal ratings winner in common ne convention coverage, al ugh ratings were down over-all. ose ratings slumped despite the fact that the networks continued their trend away from gavel-to-gavel coverage. At press time, it appeared CBS and ABC were battling for the over-all convention coverage ratings lead.

Despite lower ratings, and despite the cost of covering conventions, the networks' had some good financial news. Ad revenues were expected to be up a third over four years ago.

- Overlong speeches from the podium forced the networks not to run some commercials, opening up the likelihood of make-goods during next month's Republican convention in Dallas.

ABC executives called their decision to preempt July 17 coverage with 20 minutes of a "Hart to Hart" rerun "the shape of things to come."

"If there's no news being generated, we're not obliged to cover it," declared David Burke, ABC News vp. "It was purely a news judgment. We were informed Jesse Jackson's speech had been pushed back an hour.

"We don't feel the need to have our anchors, reporters and producers running around the floor like crazy people trying to justify their expense accounts if there's nothing going on," Mr. Burke said. "The other networks will be doing the same thing we did four years from now."

The fact that only 20 minutes or so of "Hart to Hart" aired before ABC jumped back into live coverage prompted outraged viewers to light up the network's switchboards. ABC News officials

Dairy board makes picks

At D'Arcy, it's milk & money

By JANET NEIMAN

CHICAGO—D'Arcy MacManus Masius was the big winner in the National Dairy Promotion & Research Board contest, which ended last week when the board named the Dairy Promotion Federation Assn., an industry organization, to handle an eight-month, $50.6 million advertising program.

D'Arcy and three other federation agencies—Foote, Cone & Belding; McCann-Erickson, and Vickers & Benson/TBWA—will share the wealth of the campaign by conducting the federation's network tv and magazine campaigns between Sept. 1 and April 30, 1985.

The campaigns will begin with existing creative work from the four federation member organizations: United Dairy Industry Assn., California Milk Advisory Board and the Oregon and Washington state dairy commissions.

The program allocates about $24 million for advertising cheese, $17 million for advertising fluid milk and $7 million for advertising butter. Another $3 million will go to a new campaign promoting the health benefits of calcium.

About 85% of the total will go to UDIA, and about 15% will go to the West Coast organizations (known as COW).

D'Arcy and V&B/TBWA, both Chicago, handle UDIA accounts; Foote, Cone, Los Angeles, and McCann, San Francisco, handle CMAB accounts.

D'Arcy will handle the federa-

Chains pull ads after tragedy

OAK BROOK, ILL.—Count McDonald's Corp. among the victims of last week's shooting spree at its San Ysidro, Cal., restaurant.

After the shootings that left 37 persons dead or wounded, McDonald's found its name linked with murder in headlines across the country.

Although expressing confidence that the tragedy would have no lasting effect on its business, McDonald's halted its network advertising and suggested to its operator groups that they delay local advertising. The moratorium would be in effect "for a few days," after which McDonald's would "take the temperature" and determine when it would be appropriate to resume advertising, a company spokesman said.

McDonald's said the chain will donate $1 million to the San Ysidro Family Survivors Fund.

The ad suspension interrupted advertising support for McDonald's Olympics-themed scratch-card game promotion (AA, July 16) but is expected to be lifted before the Summer Olympics themselves begin on July 28. McDonald's reportedly will spend $35 million on tv advertising during the 16-day event.

Jeff Campbell, chairman of Burger King Corp., Miami, phoned McDonald's headquarters to offer any help his company could provide. When later informed of McDonald's decision to halt advertising, Burger King decided that it should follow suit

Newspaper ad dollars up; so is competition

By WILLIAM GLOEDE

MAUI, HAWAII—Daily newspaper advertising and marketing directors, enjoying a banner year as ad revenues continue to surge, are turning their attention to something besides keeping their heads above water.

Newspapers are expecting to take in $23 billion in ad revenues in 1984, representing a 10% gain in national ad revenues, 12% in retail and 15% in classified. Over-all, the medium should post a 12.6% gain over '83, according to estimates from the Newspaper Advertising Bureau.

With the revenue picture looking bright, newspaper marketing executives meeting here last week for the summer conference of the International Newspapers Advertising & Marketing Executives (AA, July 19) were able to concern themselves with serving advertisers better and combating the onslaught of direct mail.

"Newspapers have made enormous efforts in the past decade, adapting to forces of change to remain the dominant advertising medium," said Craig Standen, NAB president. "But changes in our competitive environment are coming fast."

It used to be that newspapers considered tv their most formidable competitor. But the growth of direct mail—more specifically, "shared" mail—has forced newspapers to reevaluate their competitive strategy. Said Mr. Standen, "The threat of shared mail. . .concerns virtually every newspaper in the United States."

That reevaluation is causing dailies to examine how they set their advertising rates and is leading many to consider seriously what the chairman of one major newspaper advertising rep company calls "a leveling of our rates."

Joseph Lafferty, chairman of Branham Newspaper Sales, New York, said, "You can just feel the slight rumblings about [rate leveling] in the corridors.

Once that happens, then the conversations begin about how we're going to do it," he said.

The reason shared mail has been weaning preprinted inserts from daily newspapers is simple—it's less expensive, and offers advertisers blanket coverage of market areas as large as a city or as small as a neighborhood.

"We must maintain a concerted, industrywide effort to secure equitable postal rates for all," said Mr. Standen of the pricing issue. And on the issue of market coverage, "Individual newspapers can and must find ways to establish viable competitive alternatives to shared or direct mail in their markets."

The threat posed by shared mail was hammered home by A.E. Stine, Central region advertising director, K mart Corp., Troy, Mich. Mr. Stine is responsible for all advertising for K mart's 351 stores in Ohio, Indiana, Kentucky, the lower peninsula of Michigan and adjacent states.

Less than two years ago, newspapers carried most of K mart's preprints. And they welcomed the business, even though the circulars carried advertising that had previously run run-of-press and contributed to the size of newspapers' news holes.

Mr. Stine shifted almost all of K mart's Central region preprint distribution from newspapers to shared mail. The result: Newspapers in the Central region lost

Post office may zap Zip code

By PAUL L. EDWARDS

NEW YORK—In a move that could end Zip codes' role in demographic selection for direct marketing, the U.S. Postal Service has been asked to implement new technology that would eliminate the need for mailers to include Zip codes in addresses.

The congressional Office of Technology Assessment has proposed that USPS install optical-scanning equipment that would read the address on the envelope, consult a computer directory for the proper Zip code and then print the code on the envelope in bar-code form.

Since the codes then would be used strictly for internal distribution, it would not be necessary to make the codes available for other uses.

"We made the proposal because we do not see the use of Zip+4 approaching the rate that the Postal Service initially projected," said Fred Wood, OTA project director. Two years ago when it introduced Zip+4, USPS predicted that within five years, 90% of all business users would adopt the nine-digit Zip code to expedite the flow of mail and to take advantage of an addi-

Best laid plans

The first of three Pacific Bell tv spots breaking this week shows an architect electronically relaying plans to another location. Foote, Cone & Belding, San Francisco, handles. *(See story on Page 3.)*

Olympic advertisers: Let the games begin

An Advertising Age roundup

The torch that lights up the 1984 Summer Olympics flame this week is igniting the tv advertising plans of more than 60 companies muscling in for viewer attention.

More than 130 official sponsors, suppliers and licensees have contributed to the $500 million-plus budgeted to operate the games, which run from July 28 to Aug. 12.

Just as significant are the advertisers that have bought time on ABC-TV's coverage of the games, more than covering the $225 million ABC paid for broacast rights.

Though the games reign as the tv darling of the summer, they are not likely to be used as a stage for new campaigns.

The reason is twofold. First, holding back on a campaign until the games begin forces the advertiser to miss out on much of the pre-games hype and promotions. Waiting to run a new spot also leaves the "official" sponsor vulnerable to competitors already running Olympics-themed spots.

Second, the games run for two weeks, during which audiences rise and fall with the time of day and popularity of the event. To receive the full impact of a new campaign launch, the advertiser would have to maintain costly weight throughout the games.

Still, the games are prime advertising property, even with the brouhaha that surrounded the Soviet-bloc boycott.

The following are highlights of what some advertisers are planning to showcase:

Transamerica Corp., the games' official insurance company, breaks a new campaign Aug. 1 with a spot, using a scale-model of San Francisco, the company's headquarters, which shows King Kong scaling the famous Transamerica pyramid building after wreaking havoc on the city's streets.

The spot uses the company's ongoing theme line, "Transamerica: Insurance, finance, manufacturing, transportation, innovation. The power of the pyramid is working for you."

Transamerica is running 53 spots

McDonald's net tv buys up to $80 million for fall

By SCOTT HUME

McDonald's shift in advertising emphasis from local to network tv is taking shape.

Its operators last fall voted to increase from 1.25% of sales to 2% their contribution to the Operators National Advertising Fund, boosting the money available for network advertising to approximately $125 million.

That increase not only made possible McDonald's $35 million Olympics buy, but will allow it to boost its network presence next season.

Sources say McDonald's upfront network buy for the fall totals $80 million, a 60% increase over last year's $50 million upfront package.

McDonald's in the past has been an active sponsor of family-oriented network specials, especially those with high appeal for children. But network sources say McDonald's, now with an extra $30 million in its coffers, is considering buying time during specials more intently than ever before.

According to one source, the chain hopes to be a primary advertiser during at least one major network special per quarter.

While it will not compromise the family image it has worked so long and hard to establish, McDonald's is considering involvement with programing that is more controversial than it has in the past. Made-for-tv movies that positively deal with delicate issues, such as last season's "The Trouble with Amelia" (which examined incest), may get McDonald's sponsorship.

McDonald's officials could not be reached for comment.#

JWT to lose financial chief

By STEWART ALTER

New York—Herbert Eames Jr., who joined JWT Group as exec vp-chief financial officer when the agency holding company was first formed in 1980, is leaving.

Mr. Eames, 48, has been the agency's chief financial officer during the period when it had to restate its 1981 earnings downward because of irregularities associated with its syndication unit. However, the agency said his leaving has nothing to do with that episode. JWT's second-quarter figures indicate the agency has recovered and is recording new highs in commissions, fees and pretax earnings.

"Mr. Eames has expressed an interest [in] more operating responsibility in a larger company," said an agency spokeswoman. "He intends to leave and pursue that." Mr. Eames was on vacation and could not be reached for comment.

Mr. Eames, who joined JWT after three years

Palmer Brown merging with Kalish & Rice

By DAVID SNYDER

Washington—Earle Palmer Brown Cos., the area's largest independent ad agency, is merging with Kalish & Rice, Philadelphia, establishing Brown as a leading player in the mid-Atlantic agency market.

The deal, which results in combined annual billings of $87 million, culminates more than three months of negotiations and marks the boldest expansion effort yet by Bethesda, Md.-based Brown. The agency long has stated a desire to increase its presence beyond Washington and go head-to-head with New York agencies for a greater share of mid-Atlantic accounts.

Brown's arrival in Philadelphia follows the opening this year of service offices in Baltimore and Richmond, Va., and a failed attempt last fall to merge with Eisner & Associates, Baltimore.

The merger with Kalish should set the stage for

New cigaret design debuts in Canada

Rothmans cuts smoke

By MICHAEL DEIBERT

Toronto—A "low-smoke" cigaret being touted as the biggest breakthrough in cigaret products since the introduction of "light" brands is being test-marketed in Ontario by Rothmans of Pall Mall Canada.

Rothmans spent two years and $1.1 million developing the new brand, known as Passport.

The cigaret is described by company officials as a mid-tar cigaret that emits only half the "sidestream" smoke—that which is given off when the smoker is not puffing on the cigaret—of regular brands.

The "low-smoke" effect is achieved with a specially designed filter and new type of paper, according to Rothmans.

The cigaret has a filter that includes a small plastic insert that prevents smoke from entering the air when the cigaret is not being puffed on.

The brand now is being tested in London, Ont., and St. Thomas, said Peter Bone, executive director of pr for Rothmans.

If the test is a success, the brand will be rolled out nationally, according to Carl Katz, director of corporate planning for Rothmans in Toronto. Mr. Katz declined to comment on how long the test would last.

Rothmans is an autonomous division of the Rothmans World

NEWSPAPER

Wall Street split on DDB's outlook

By STEWART ALTER

Is the worst over for Doyle Dane Bernbach?

Wall Street, reacting to DDB International's loss of the domestic Polaroid business and the imminent departure of the Atari videogames account (AA, July 23), has mixed emotions. Some analysts say the worst is now over for the agency; others warn that DDB must show it can replace those two prestige clients.

"Over the last two years, there have been consistent questions about the agency's vulnerability, with the possible losses of the Polaroid and Atari accounts mentioned most frequently," said Jerry Levine, a vp at Merrill Lynch, Pierce, Fenner & Smith. "Once that news is out, you can't really raise those questions anymore about the agency's vulnerability. Substantially, the worst is over."

Although the clouds of Polaroid and Atari may have cleared, another analyst felt that the hard questions about DDB still must be

Ford in Vanessa's future?

By PAT SLOAN

Vanessa Williams, deposed for what she exposed, may not be without work for long.

The first black Miss America turned in her crown after it was revealed she was revealed in nude photos in *Penthouse* (AA, July 23).

Seeking a career in entertainment, Ms. Williams has received an endorsement from the doyenne of the modeling industry, Eileen Ford, who presides over Ford Models in New York. Ms. Ford, reached in Rome, noted that although she knew nothing about the controversy Ms. Williams' photos caused, "it would be very hard to discourage me" about Ms. Williams' modeling future.

But Ms. Ford's competitors at EliteModel Management aren't likely to raise her bid, if she makes one. "We won't be offering Ms. Williams anything," said a spokeswoman for the New Faces division, because "she's too short."

During her reign as Miss America, Ms. Williams, in addition to personal appearances, was expected to fulfill her duties by working for pageant sponsors including Gillette, American Greetings and Nestle. She also made a cameo appearance in Diet Coke ads.

While representatives from Coca-Cola Co. and Nestle have said no further plans were made before the *Penthouse* disclosure, so no future advertising is affected, Gillette has nixed promotional tie-ins to the pageant using Ms. Williams. And American Greetings has canceled print ads featuring her that were to have run in five national women's magazines, but still plans to be a corporate sponsor of the next Miss America Pageant on Sept. 15 and participate in promotions.

Some 5 million copies of the September *Penthouse* featuring the 10-page portfolio of Ms. Williams' nude photos were rushed to newsstands earlier this week. Cover price is $4, $1 more than usual for the special issue, marking the monthly's 15th anniversary of U.S. publication.

The publicity over Ms. Williams' photos is a particular boon to *Penthouse* because more than 94% of the magazine's circulation comes from single-copy sales. For the six months ending Dec. 31, *Penthouse's* average single-copy sales were 3.3 million.#

Fonda garb not working out

By PAT SLOAN

New York—Jane Fonda Workout's sportswear and fitness garb, introduced by Capri Beachwear only this year, already may be running out of steam.

All advertising for the line is "on hold," said Jack Fiman, exec vp at Zimmerman, Gallanty & Fiman, Santa Monica, Cal. The line had been expected to get more than $2 million in ad spending this year via the agency (AA, March 26, *et seq.*).

About $800,000 has been spent, primarily for the initial April tv flight in 14 markets, Mr. Fiman said.

A substantial amount of clothing was delivered to retailers earlier this year, and "some of the stuff didn't sell," he said, adding that there are plans now to drop many of the sportswear designs and concentrate on exercise clothing such as leotards.

Asked whether the account was in jeopardy, Mr. Fiman said, "Only to the extent that they [may not] spend any money." He said his agency has submitted a trade campaign to the company and is waiting for Capri to okay it.

Century Factors reported last week that it expects to lose as much as $750,000 for the first six months of this year due to what it claims to be more than $4 million in losses on loans it made to Capri for the Fonda line.

Three other factoring companies—Ambassador Factors, Meinhard-Commercial Corp. and NatWest Commercial Services—have filed a Chapter VII bankruptcy petition here. The petition asks for the liquidation of Capri, which the factoring companies say has failed to pay money owed them. The three companies are seeking an amount totaling a little more than $171,000. The companies did not specify whether any of that money had been used on Fonda Workout clothes.

Capri president Ron Mester could not be reached for comment, but he is reportedly negotiating with new investors for a cash infusion to aid the Fonda line.

Mr. Mester has said the holiday line has been canceled as a result of late deliveries on the spring line.#

Bristol-Myers to syndicate tv show

By SUSAN SPILLMAN

New York—Bristol-Myers' "Alive & Well" fitness program, seen on cable's USA Network, will be syndicated to at least four major-market broadcast stations beginning in October.

The 3-year-old program, Bristol-Myers' first foray into cable program sponsorship, also will continue on the USA Network. Stations that already have agreed to carry "Alive & Well" five days a week—the same frequency it has on USA—are Metromedia's tv outlets in Chicago, Dallas, Houston and Los Angeles.

The series will be cut from two hours to an hour.

Pete Spengler, vp-advertising services, Bristol-Myers, said, "There will be little duplication between cable and broadcast coverage." The company is only looking to air the show in about a dozen major markets, he said.

The show is being syndicated on a barter basis by Orbis Communications. Six minutes per show will be devoted to Bristol-Myers products, while another six will be sold by affiliates.#

at presstime

SmithKline unwraps new decongestant

Philadelphia—SmithKline Beckman Corp.'s Menley & James Laboratories is introducing Congestac decongestant/expectorant tablets in September. The rollout will be supported by $10 million in advertising and promotion. MCA Advertising, New York, handles.

Atari torpedoes media-buying department

Sunnyvale, Cal.—Atari Inc. has dissolved its New York-based media-buying department in the latest round of marketing cuts at the company (AA, July 16, *et seq.*). Departing are Rick Glosman, vp-media, and Robert Hanley, media director. Messrs. Glosman and Hanley have formed Creative Media, New York, a full-service media planning/buying and programing agency.

MECA puts brakes on ads for running software

Westport, Conn.—Micro Education Corp. of America has postponed indefinitely the introduction of a software program featuring running enthusiast James Fixx, who died July 21 of a heart attack while jogging. The Running Program, "personalized running guide" software, had been scheduled to ship in two weeks. MECA's print advertising featuring Mr. Fixx has been suspended after appearing in computer magazines and in the special Olympics issue of *Sports Illustrated*.

Tofu Time serves account to Levine, Huntley

New York—Tofu Time has chosen Levine, Huntley, Schmidt & Beaver as its first agency. The shop will handle the company's Tofutti soy-based frozen dessert. A revised figure (AA, June 25) puts ad spending for the item at $2.5 million.

● Englewood Cliffs, N.J.—**Konica Corp.** is reportedly considering moving its film division advertising to Calet, Hirsch & Spector from Levine, Huntley, Schmidt & Beaver. Konica films last year billed under $1 million.

● Oak Brook, Ill.—**McDonald's Corp.** has decided not to reopen its store in San Ysidro, Cal., site of shootings last week that left 21 slain. It has not been decided yet what will be done with the site, but the chain plans to open a new store elsewhere in the town.

● New York—**USA Network** is in discussion with its parent companies—Time Inc., MCA/Universal and Paramount Pictures—about providing exclusive movies and other programing for the basic cable network. The programing deals, expected to be completed within two weeks, would essentially create a new window for movies between pay tv and broadcast tv. In another move, USA Network's new "Cover Story" series, sponsored completely by Procter & Gamble, will be syndicated to broadcast stations. The half-hour show, which profiles show business personalities, also will continue running on USA.

● Memphis—**Federal Express** has broken a tv campaign in 12 markets for its new Zap Mail electronic mail service being introduced this month. The company will expand its campaign into more markets in August before going national in the fall. Ally & Gargano, New York, handles.

● Miami—**AmeriFirst Savings & Loan Assn.** has awarded its $1.5 million account to Ryder & Schild, ending its 6½-year tie to Caravetta Allen Kimbrough/BBDO. Both agency and client had admitted dissatisfaction with the relationship; AmeriFirst was Caravetta's largest account.

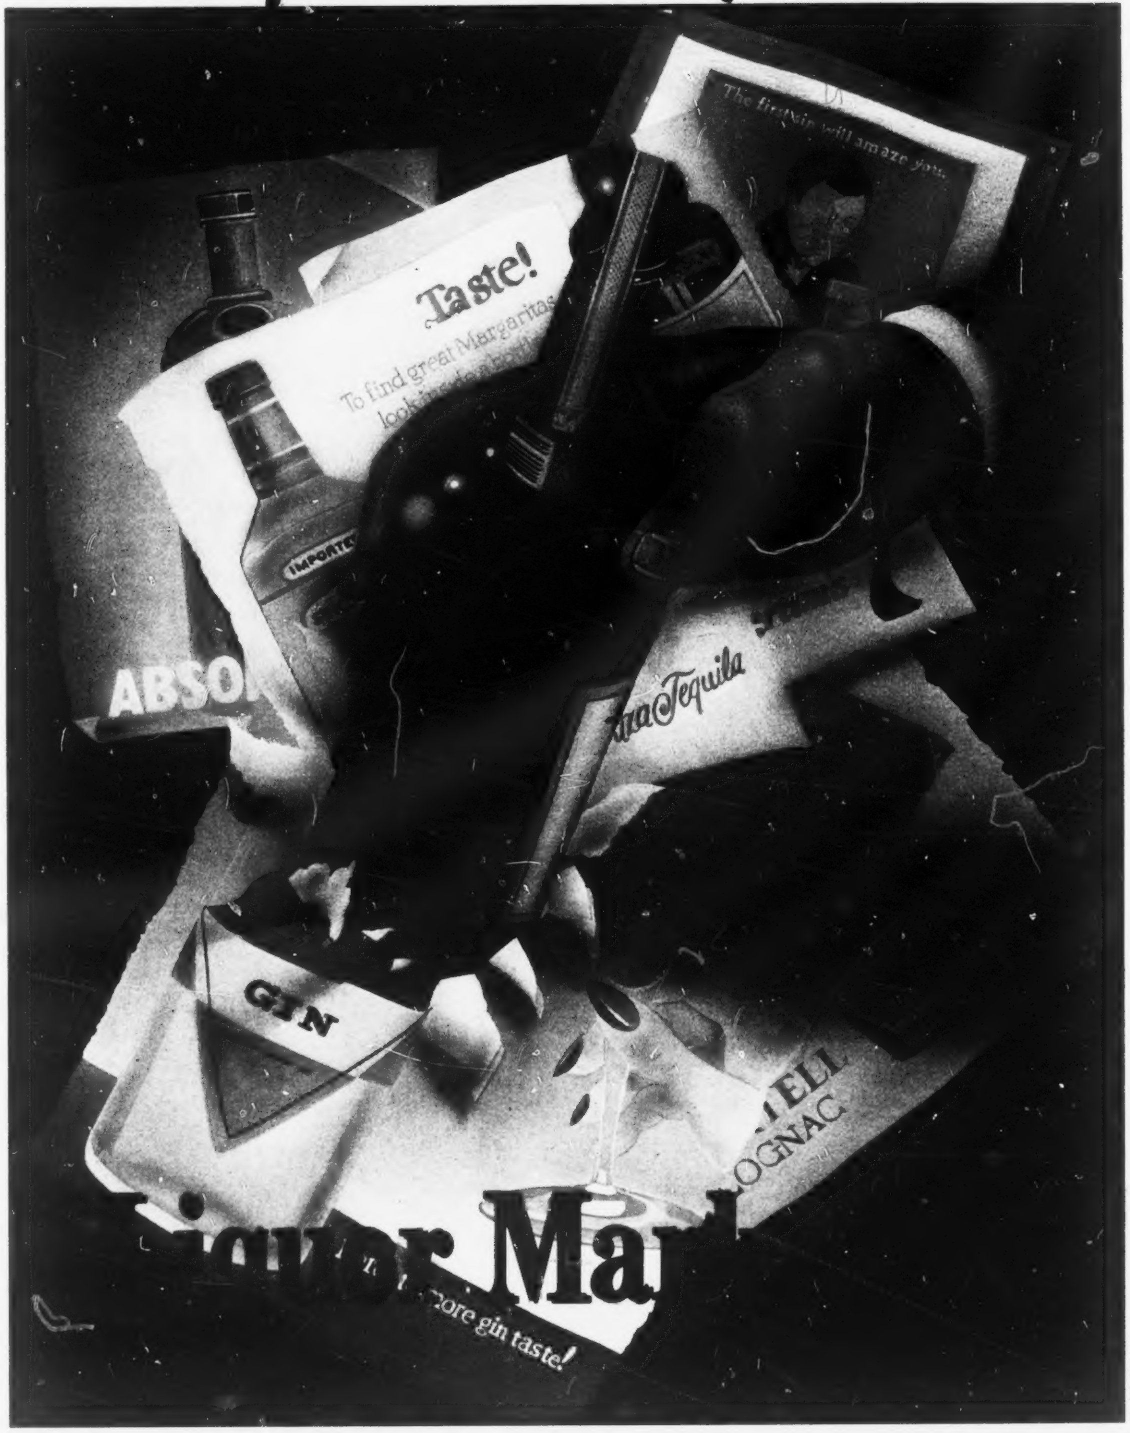
● Chicago—**Beatrice Cos.** will divest its Buckingham Corp. liquor division (AA, July 23) and four other businesses to help reduce the debt from its acquisition of Esmark Inc. The other businesses are Beatrice Chemical, Beatrice cookie and bakery operations, Beatrice food-equipment operations and Estech, which markets fertilizers. Indications are that R.J. Reynolds Industries, Winston-Salem, N.C., is interested in Buckingham.

● Framingham, Mass.—**CW Communications** in November will spin off from *Computerworld* a new monthly tabloid. *On Communications* will cover data and voice communications. Controlled circulation will be 60,000; a b&w page costs $5,750, and a color page is $6,625.

● New York—**Faberge** will air its first split 30-second commercials during the Summer Olympics via Nadler & Larimer. Half of Faberge's 16 minutes of Olympics ad time will go to regular commercials. The rest will be taken by split 30s featuring the company's Organics haircare line along with either Babe antiperspirant or Brut antiperspirant.

● Houston—**Coca-Cola Co.'s** foods division, which is supplying Minute Maid apple and orange juices at the Summer Olympics, has placed a pull-out insert in the July 28 *TV Guide*. The insert highlights the events of the summer games in Los Angeles and includes cents-off coupons for Coca-Cola foods products. Marschalk Co. handles.

● **NEWSLINE: Southwestern Bell Telephone Co.**, St. Louis, has begun a $5 million ad campaign for its new Tele-Help program, targeting the 83% of its customers it says are still confused about the breakup of AT&T. Newspaper, radio, supplement and tv ads via D'Arcy MacManus Masius promote an 800-number. . .**Bridgestone Tire Co. of America**, Torrance, Cal., "is getting close" to selecting a new agency for its $5 million-to-$7 million account after reviewing presentations of four or five agencies (AA, July 9), a spokesman said. Old agency Dancer Fitzgerald Sample resigned effective Oct. 8. . .**Inacomp Computer Centers**, Troy, Mich., says that it will enter the Chicago market in September with a suburban store followed by the October opening of an outlet on fashionable Michigan Avenue. Inacomp has 33 units in California, Canada, Georgia, Florida and Michigan. . .**Titsch & Associates**, Denver, is being reorganized into two separate divisions: Special interests, for publications with specific target audiences, headed by president Robert Weiber, and consumer, headed by president Douglas Hanes. . .**Panther Car Co.**, a Korean-owned company based in England, will start producing small sports cars in Long Beach, Cal., and in England in late 1986, *Automotive News* reports. . .**Times Mirror Videotex Services**, Santa Ana, Cal., says it has more than $1 million in ad commitments for the first year of Gateway, its consumer videotex service scheduled to start in September. . .**Boyle-Midway** division of American Home Products is testing Radiant liquid bathroom cleaner in Kansas City, Mo. Print and tv support the test. Kornhauser & Calene handles.



Ted Gadecki

Bursting through the clutter

It's a bottle-and-glass jungle out there. Everywhere you turn, some liquor bottle is blasting off an outdoor board or pouncing from a magazine page.

Like some whiskies, the messages begin to blend; it becomes quite difficult to distinguish one distilled spirit from another. What often comes through is a cry of "Drink me, drink me!"

And what's lost is brand identity.

According to Graham Walsh, vp-marketing director at New York-based Schenley Imports Co., the premium liquor segment is "selling fashion, not beverage." And like fashion marketers, distillers and distributors mostly rely on image and identity to sell their products.

The difficulty is that many marketers seem to have latched onto the same image. How can a Canadian whisky corner the clear sky and water identity when its competitors illustrate their image in the same manner? "Pull the headline off of a dozen liquor ads and put them on any other and you won't be able to tell the difference," says one agency executive who handles liquor accounts.

Compounding this problem is media clutter. Governmental and self-imposed restrictions limit liquor ads' placement to a few select media—magazines, outdoor, newspapers, point of purchase. Also the seasonality of many brands shifts ad placement to the same time of year. Look through a December issue of many magazines and you will be bombarded by liquor brands' messages.

Those messages also are being scrutinized more critically by more people. The recent furor about drunken driving is spawning an ever-growing number of lobbying groups attempting to pull liquor ads out of the few media outlets they can use. Consider the health-consciousness of America and the size and receptiveness of a liquor advertiser's audience diminishes further.

So, it's a tough life for the distilling crowd, and spirit sales show it. According to *Impact*, a wine and spirits newsletter, shipments of distilled spirits have regressed to pre-1975 levels. And as sales have faltered, ad expenditures have declined. *Impact* reports that the 20 leading liquor brands' ad budgets were cut 11% in 1983, and the top 10 distilled spirits advertisers reduced their ad spending by an almost identical 11.1% from 1982 to '83.

Some marketers say they have not reduced ad spending, but shifted it from media to point-of-purchase and promotions. Couponing also has become quite popular to stimulate trials.

"Without point-of-purchase support, you really can't establish a presence on the retail floor," says Victor Zast, director-marketing for James B. Beam Co., Chicago. "But it's not a vehicle for building brand loyalty. People basically know what they're going to buy before they enter the store. They may buy peanuts on impulse, but they're not going to buy a spirit because it has an attractive display."

Research from the Point-Of-Purchase Advertising Institute, Fort Lee, N.J., backs up Mr. Zast's contention. The "1983 POPAI/DuPont Drugstore Consumer Buying Habits" study indicates that the in-store decision rate for liquor purchases is 42.31%, which is lower than the study average.

"Advertising works," Mr. Zast says. "Liquor brands are consumer driven. When someone buys a spirit, they're buying more than taste. They're buying fashion, value and status, and the best way to appeal to those considerations is through print."

And so the elusive search for the message in the bottle continues. ■

Using soft drinks' hard sell

Windsor Canadian is showing that comparison advertising can sell beverages more potent than soft drinks. In a series of taste-test ads, Windsor Distillery Co., New York, is taking on brand leaders Seagram's V.O. and Canadian Mist with its "Windsor Challenge" ad campaign.

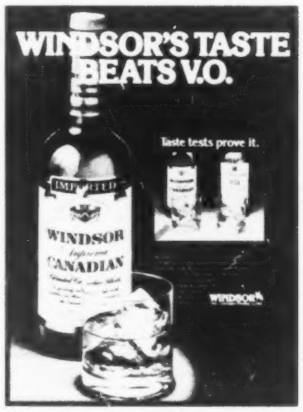
Understandably, the competition is upset. "I'm sorry to see comparative advertising. I'd rather say something good about my brand than knock somebody else's," says C.R. (Bud) Ballard, Canadian Mist's senior brand manager.

Another brand manager criticizes the ads for not revealing the testing agency or survey methodology.

"We did some soul searching before we began the campaign," says Emil A. Pavone, vp-public relations, National Distillers Products Co., New York, the parent company of Windsor. The taste test was the idea of a former brand manager who conducted tests on blindfolded customers.

"At first we weren't all that enthusiastic about the idea. We knew it was successful with soft drinks, but we weren't sure it would be successful with whisky," Mr. Pavone says. "We decided it was something that customers could establish for themselves."

The approach was selected both because it is novel for Canadian whiskies and because it highlights the quality and price of Windsor against top-selling brands.



Windsor Canadian is borrowing a technique from soft-drink advertising by comparing itself to rivals.

"We had tried most of the ad strategies that were successful in the Canadian whisky field," Mr. Pavone says.

Despite the lack of information about the taste tests in the ads, the campaign helped boost Windsor's sales 1% in 1983, while sales of most other Canadian whiskies stagnated or declined.

A major limitation of taste-test advertising is that it has to react quickly to changes in formulation of the products against which it is tested. This can become quite difficult when media centers on print and outdoor advertising and in-store promotions.

For instance, Windsor found itself in the lurch last year when Seagram's reformulated V.O. to 80 proof from 86 proof. Windsor "had to run the tests all over again," Mr. Pavone says.

Advertising had to be redone and media placement was halted for several weeks. "In a situation like that, you want to react quickly and can't," he says. "Certain media just don't lend themselves to instant changes."

Brand managers at Windsor declined to say whether the brand comparisons would continue or whether Windsor would compare itself with any other brands. Mr. Pavone says anything could happen. —*R.E.*

Major effort to woo minorities

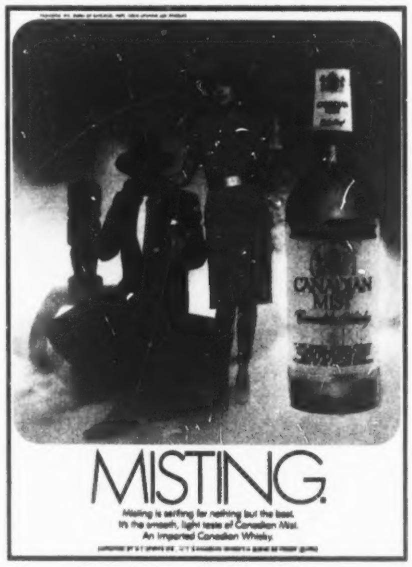
Reaching minority markets is critical for Canadian whiskies, which are looking to expand their customer base in the rapidly declining whisky category. Targeting Canadian whisky advertising to minorities can be as simple as finding an ethnic model or as complex as delving into the buying motivations of many separate pockets of consumers.

"I don't believe there is such a thing as *a* black market," says Walter Haimann, president, Seagram's Distillers Co., New York. The market may be fragmented into age categories, income levels, geographic location and a host of other factors.

"We're going to appeal to each of these groups with different messages," he says. "You wouldn't run the same thing in *Black Enterprise* as you would in *Ebony* or *Jet*." Mr. Haimann says the same theory applies to Hispanic and other minority groups.

Reasons for such targeting can be found in the size of the minority market. For instance, Mr. Haimann says minorities account for about 10% of Seagram's V.O.'s sales, which totaled 3.5 million cases in 1983, according to *Impact*. Seagram's gin also happens to be the No. 1 spirit in the black market, Mr. Haimann says, explaining Seagram's attention to the minority market.

Seagram is not alone, however; other marketers also pay close attention to these market segments. Louisville, Ky.-based Brown-Forman Corp.'s approach in selling Canadian Mist to blacks is typical of many companies' efforts. Because the image-oriented "Canada at its best" campaign, which features photos of the untamed wilderness, does not carry the same meaning for most urban blacks as it does for other consumer markets, Brown-Forman uses a life-style approach, says C.R. (Bud) Ballard, senior brand manager.



CANADIAN MIST
MISTING.
Misting is settling for nothing but the best.
It's the smooth, light taste of Canadian Mist.
An Imported Canadian Whisky.

Canadian Mist uses sophisticated models when targeting blacks.

"Most blacks who like Canada enjoy the night life. The mountains and woods are not as appealing, especially to younger black consumers," Mr. Ballard says. Brown-Forman's "Misting" campaign, which began in 1974, features models in fashionable, expensive clothes, surrounded by a cool mist.

Similarly, Heublein Spirits' Black Velvet reaches out to Hispanic markets with a simple translation of its "Feel the Velvet Canadian" campaign, says Martin Tazzani, marketing manager.

Each year, the Hartford, Conn.-based importer hosts "Miss Black Velvet Latina" contests in Los Angeles and San Francisco. The winners become the brand's spokeswoman—making personal appearances and modeling in print and outdoor ads—in California's Hispanic communities.

Canadian Club targets both Hispanic and black markets, portraying the brand as "part of the leading edge" in fashion and sophistication, says Stephen Nadelberg, senior vp-marketing at Hiram Walker, Detroit.

"Culturally, the markets are different. You have to hit the right emotional chords," he says. The extent to which a brand can segment its minority markets is limited, Mr. Nadelberg says.

"We're not planning to target senior citizens," he says. "We do not have a prune liqueur." —*R.E.*

Distillers try to stir up interest in premix market

By Eileen Norris

In the land of liquor, premixed cocktails make up only a munchkin's worth of the population—no disrespect intended toward the little guys. Still, that 2% of the market is trying not to get clobbered by the liquor giants in the industry.

It's no easy existence. In this get-it-done-now age, premixed cocktails would seem to have a lot going for them; no muss, no fuss, just shake and pour. Add in the popularity of mixed drinks, sweet drinks in particular, and the recent fury over drinking in moderation, and one must wonder why more people aren't buying the generally sweet, lower-proof premixed cocktails.

> **"Some of our competitors do not advertise much and frankly, it would really help the over-all business if they did."**
>
> *Edwin Gualtieri*
> *Heublein*

Some critics contend the cocktails are underpromoted, saying advertising appears only when a new flavor is launched, disappearing soon after, minimizing brand awareness. Others say the products' market is so minuscule that no one should expect much of it.

Expectations may be justifiably low. Mixed cocktail sales have been going down for quite a few years. Purchases in 1983 declined about 5%, but on paper the industry saw an 8.3% increase over 1982, thanks to shipments of new items, says Ben W. Corrado, a liquor consultant in Pompano Beach, Fla., and author of the "Wine and Spirits Marketing Bulletin" for the advertising department at *U.S. News & World Report.* But even 1983 sales look good when compared with the 13.6% decline in cocktail sales the year earlier.

Mr. Corrado says he thinks sales will move up in 1984. By keeping tabs on what consumers are ordering in bars and restaurants, the cocktail industry constantly is developing and introducing new drinks that are hot in the onpremise market.

Three of the category's major players—Heublein Spirits, Hartford, Conn., which markets premixed Heublein Cocktails in bottles and the Club Cocktails in smaller cans and bottles; Schenley Distillers Co., New York, which distributes Cocktails For Two, and Glenmore Distilleries Co., Louisville, Ky., which offers its Mr. Boston Prepared Cocktails—are in a battle to outmix and outintroduce one another.

All are rolling out drinks such as Long Island tea, a 25 to 42 proof concoction that is very popular in the summer, and the tequila-based sombrero. And they're coming up with new versions of some old standbys, such as the strawberry daiquiri, pina colada, margarita and the Bloody Mary.

The distillers won't say if or how they plan to back up new introductions with advertising, but if 1983 activity is an example, agencies' hopes of promoting these products may prove dim.

The top premixed cocktail companies spent only $1 million in magazine advertising during the first nine months of 1983; that's a 25.3% budget cut from the amount spent during the same period a year earlier.

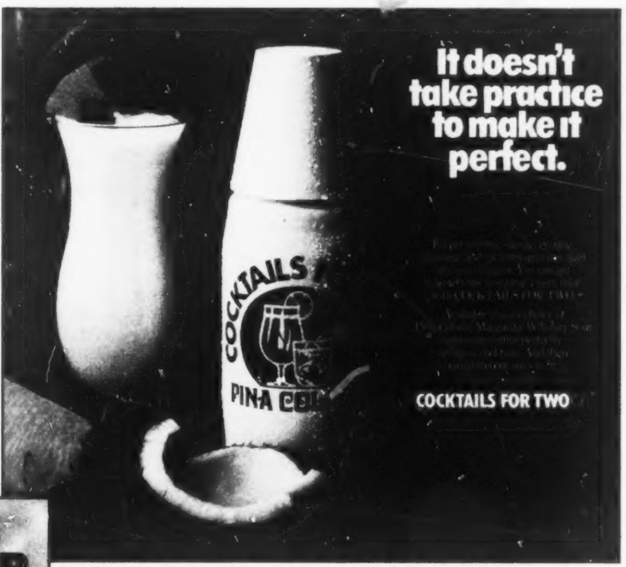
DON'T JUST BRING A BEER. BRING THE CLUB BAR.

Heublein hopes to attract the young and active drinker with its convenient Club cocktail.

Heublein, the market's leader with a 55% share, altered its marketing mix, pumping more dollars into outdoor boards, says Edwin Gualtieri, group marketing director. "Some of our competitors do not advertise much and frankly, it would really help the over-all business if they did."

Schenley's Cocktails for Two, the category's No. 2 seller with about 20% of the market, uses slick, colorful ads in *People* and other consumer books, says Sheila Spicehandler, group product manager. "More money is being spent on advertising every year," she says, "but I can't say how much."



It doesn't take practice to make it perfect.
COCKTAILS FOR TWO
PINA CO

Cocktails for Two, the No. 2 seller in the premix cocktail category, is increasing its ad spending.

Glenmore advertises very little for Mr. Boston Prepared Cocktails, says James McKee, brand manager. "Quite honestly, we're not the No. 1 guy on the block, and we can't afford to go after the competition and spend money like they can," he says. Liquor consultant Mr. Corrado says Glenmore has only between 8% and 10% of the premixed market.

Mr. McKee says in-store promotions to boost awareness are the best place for his ad dollars. That philosophy is shared by Schenley, and to a lesser extent, Heublein.

"The cocktail category recognizes we don't have the consumer awareness of a bourbon or a tequila," Heublein's Mr. Gualtieri says. "It's one of the things we shoot for when we're developing a new ad campaign. The other thing is, we're just not that large a part of the distilled liquor business."

The main consideration for distillers these days is whether to put ad dollars in the media, instore promotion or both. Because prepared cocktails are thought to be an impulse buy—and because sales often don't justify massive media expenditures—much is spent at the retail level.

Heublein, for example, provides retailers with $200 display racks to position the cocktails prominently.

"It's expensive, but we want good retail presence and we want the product visible," Mr. Gualtieri says.

Cocktails for Two's Ms. Spicehandler says a total marketing effort, not just an ad campaign, is necessary to capitalize on the impulse-buy appeal of its brand. "We support the brands at the point of sale with instore promotions for shelves and the cold box," she says. "We have a Cocktails For Two Party Center concept where we cross-merchandise cocktails with high profit snack items, all of which helps stimulate increased sales." A Party Survival Kit helps customers with party planning and serving suggestions.

Schenley also has decided to pay more attention to women consumers. Thus, "The Women's Market" newsletter was born, advising retailers on how to merchandise to women on the go, how to design workable promotions and how to win the female's loyalty to particular brands.

While Glenmore promotes its Mr. Boston line with free-standing displays, it is most proud of the "Mr. Boston Official Bartender's Guide," 9 million of which are distributed to most liquor stores, bars and restaurants. "It helps with our brand support," Mr. McKee says, "but as an industry, we can do a much better job with consumer awareness."

To define those consumers' purchase criteria, Schenley surveyed 1,000 consumers in six cities and found that taste and convenience were most important to its target group, which Ms. Spicehandler describes as all 80 million cocktail users in the U.S. Glenmore's Mr. McKee says his market audience consists of the baby boomers, who seem to respond well to impulse products that make life easier.

Heublein draws two different kinds of people to its products, Mr. Gualtieri says. One is young and active; probably the typical beer or wine drinker attracted to the convenience of the Club cocktail in ready-to-pour cans and bottles. To entice that segment, Heublein advertises "Don't just bring a beer. Bring the Club Bar."

The other individual Heublein approaches is older; he is the consumer who enjoys drinking at home, but may not be fond of mixing ingredients in a shaker, Mr. Gualtieri says. Heublein more often than not sells its regular 24-oz. bottle to this consumer.

(Continued on Page 42)

The incidence of prepared cocktail use is highest among . . .

- Females
- Consumers age 18 to 24
- Those who have attended college
- People working in clerical/sales positions
- Households with annual incomes of $15,000 to $19,999
- People residing in the West

Prepared cocktail users say they are economy minded, brand switchers, impulsive buyers and style conscious. They are skeptical of advertising claims and are not particularly brand loyal.

Premix

(Continued from Page 41)

Heublein's second target consumer group is the one that Sam Haas, owner of Worldwide Promotion Co., sees at his liquor retail and distribution store in Chicago.

"Our buyer is generally the older person; probably upper blue-collar class and retired. We sell a lot of the half-gallon premix," he says.

Not surprisingly, prepared cocktails are a small portion of his liquor business, but, Mr. Haas says, "so are a lot of other items." He says he could sell even more bottles of premix if the distillers provided more advertising and more instore promotion.

"Anything will sell based on promotion and advertising, but some of those distillers don't think they have to do anything to sell their product," Mr. Haas says.

"There's room for premixed cocktails, mainly because a lot of people out there don't know how to mix a drink or don't want to be bothered with the process."

Still, Mr. Haas questions why some distillers, such as Heublein, stress only convenience and not taste in promoting and advertising its brands of premixed cocktails.

To that Heublein's Mr. Gualtieri answers: "We don't stress taste because we do stress that the drink is refreshing and easy to use. Taste is important, but stressing convenience is most appropriate. The best ads are the most highly focused."

Cocktails For Two, however, tackles both taste and convenience in its ads.

The newest advertising campaign uses a gatefold layout with the lead-in: "Making a perfect pina colada is as easy as turning the page." Under the gatefold, another headline reads: "It doesn't take practice to make it perfect."

"Making it perfect," so to speak, may be part of the category's problem, according to consultant Mr. Corrado.

Consumers really can't add or delete anything to or from a premixed drink, especially if they buy for out-of-home consumption.

"We're a country of fussbudgets," he says. "People like to prepare their drinks as they like them and that is a tough obstacle to overcome." Heublein says it tries hard to match a flavor combination with what most people like.

Even in warm weather—when the drink-on-the-run-in-the-sun factor would seem to favor premixed products—no real surge in cocktail sales occurs. Distillers say their business operates year-round, and that they can't rely on summer sales. Heublein, however, says Sunbelt states account for 70% of Club Cocktails sales, but, like its competitors, Heublein says premixed cocktails are just as popular at tailgate parties in the colder weatheras they are for picnics in July.

Distillers also generally discount the impact of the trend toward lighter, more moderate drinking. However, premixed cocktails, most of which are 20 to 42 proof, should benefit from America's new-found moderation.

Mr. McKee says consumers want a lower proof cocktail. "People like to consume, but in moderation. I think it's the future of premixed cocktails," he says. "It's the healthier, more modern approach."

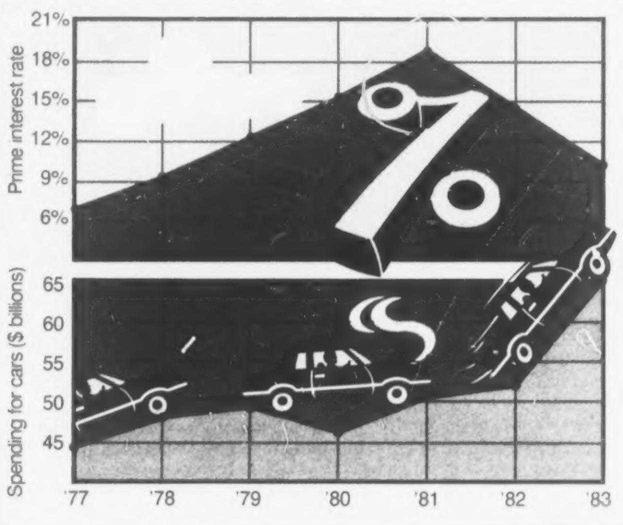
High-interest marketing

Auto sales are just one example of a rough axiom: When interest rates go up high enough, sales tend to take a dip. Chart by Steve Musgrave. *Source: U.S. Department of Commerce.*



How high is up?

An Advertising Age roundup

With each tick of the economic clock, interest rates register another gain. Now the question—for clock-watchers in the marketing industry—is whether the ticking represents a time bomb or just some annoying static.

For now, many executives are banking on the latter, an Advertising Age survey of a swath of industries indicates. But the memory of the early 1980s, when rates reached 20%, is burnished deeply into each executive's psyche. The prime rate now stands at 13%, up from less than 12% just three months ago. Mortgage rates have leaped past the 15% mark. And auto loans hover in the 14% range.

What follows are overviews of how high rates and the anticipation of even higher ones are affecting different business segments.

Bill payment tops agency list of worries

Just the memory of high interest rates early in this decade is enough to give ad agency executives headaches.

It's not that the agency business is in anguish now; to the contrary, figures indicate that the industry is going through a period in which it can enjoy counting profits.

But lay out the prospects of high interest rates and their potential impact—late payments, cutbacks in client budgets, slowdowns in new-product introductions and an over-all drag on financing various agency operations—and agencies grow a bit restive.

Of all the problems, agency executives say, the biggest is the delay of client payments.

An agency is "between a rock and a hard place," said Robert Wise, exec vp-chief financial officer and treasurer of Kornhauser & Calene, New York. "Because of the client relationship, you can't charge interest on late payments back to the client. Agency-client relationships are so tenuous at best, and there's always another agency willing to take the business on."

So what's an agency to do?

"The key is to manage cash flow more effectively and keep your cash position up," said Eugene Beard, exec vp-chief financial officer, Interpublic Group of Cos.

Mr. Beard raised the holding company's cash position from about $35 million, where it was

(Continued on Page 56)

Mondale ticket plots issue vs. issue attack

By MARK LIFF

Scrapping the primary election strategy of attacking the man and not the issues, Walter Mondale's campaign is forging a battle plan that will emphasize the topics it considers vital to all Americans: The future of the family, the impact of the deficit, education budget cuts and arms control.

The media fight behind the race for the White House thus will be issue versus issue. The Reagan-Bush '84 campaign's creative group, the Tuesday Team, has said it is preparing an "issue-oriented strategy" to compare the incumbents with the Democratic party's Mondale-Ferraro ticket.

The revamped Mondale strategy will be revealed this week in Washington, where the Democrats' media team plans to open an office a half block from the Mondale campaign headquarters. Richard Leone, former New Jersey state treasurer and Mr. Mondale's campaign director in that state, will play a major role in determining the focus of the new strategy, according to campaign sources.

An expanded creative team, similar to the Tuesday Team, will be formed to map the drive. No target date for the first round of Mondale media spots has been set, although sources indicated they might begin shortly after the Republican national convention in Dallas, which begins Aug. 20.

All creative and media buying operations will be directed from the new office. Roy Spence, the 35-year-old chief media strategist for the Mondale camp, will move his political operations to Washington from Austin, Tex., after having successfully handled Mr. Mondale's primaries media drive. Mr. Spence, a Texas adman, is exec vp of GSD&M in Austin.

In an interview last week, Mr. Spence provided a glimpse of the campaign's general outlines. He said, for instance, that Geraldine Ferraro, Mr. Mondale's running mate, will play a prominent role in promoting the ticket. He rejected contentions that either her New York accent or image might limit her marketability in certain sectors of the country.

"She adds a dimension to the campaign that opens up a whole new avenue of opportunity," Mr. Spence said. "We have a presiden-

Ally spot heavy on sentiment

Polaroid goes for heart

By GAY JERVEY

Ally & Gargano's first campaign for Polaroid could take a tug at the heartstrings as it strives to sell the intrinsic benefits of instant photography.

A new spot features a moment many mothers will recall nostalgically: Her child's first day at school. In the commercial, a little boy bids good-by to his mother, gets on the school bus, opens up his lunchbox and finds a picture of mom, with the words "I love you."

New York-based Ally also is said to have prepared an ad for Polaroid film, currently being tested for initial recall, that involves a family witnessing the arrival of extraterrestrials and, much to their dismay, not having film to record the event. Details of other Ally executions are not known.

Polaroid, Cambridge, Mass., is scheduled to announce its plans this week, and the ads are slated to air a few weeks later. But the campaign that reportedly helped turn the tide to Ally in the recent creative runoff with rivals Ogilvy & Mather and the 30-year incumbent, Doyle Dane Bernbach (AA, July 23), had strong sentimental appeal—if relatively low scores on recall testing, sources say.

According to the original parameters of Polaroid's agency competition, the scores the trial ads garnered on recall tests—an area of increasing importance to Polaroid's marketing team—were critical in determining the winner. The Ally ad is said to have been the hands-down Polaroid favorite, even though DDB's ads scored a bit higher, sources say.

Although Ally's work will be revised slightly before airtime in the ongoing effort to improve recall test

last minute news

Hamlin jumps to Dr Pepper marketing slot

Dallas—Dr Pepper Co. has named Robert Hamlin its vp-marketing. Mr. Hamlin, formerly vp at Young & Rubicam, New York, succeeds William Schermerhorn (AA, April 30), who left the company. Mr. Hamlin has been the Dr Pepper account supervisor at Y&R since 1978. During that time, the "Be a Pepper" and current "Hold out for the out of the ordinary" campaigns were created.

RKO suspends controller Musumeci

New York—RKO Radio Networks controller Frank Musumeci has been suspended with full salary as the company continues probing a $4 million error in overcharging advertisers (AA, July 9). Earlier, Ken Harris, director-affiliate services, was suspended to facilitate his cooperation with the investigation. Lawsuits related to the incident are expected soon.

Wragg becomes ad sales director for 'Life'

New York—*Life* has named Alan Wragg advertising sales director. Formerly eastern sales manager at the magazine, Mr. Wragg succeeds Charles (Carky) Rubens II, who becomes advertising sales director, *Money*, succeeding James Hayes, who has become publisher at *Discover* (AA, July 23, *et seq.*). Mr. Hayes' move to *Discover* is only one of a spate of personnel changes swirling through that Time Inc. magazine (*see related story on Page 8*).

Bates may snare more Coke lines

By NANCY GIGES

New York—Coca-Cola USA is planning to assign Mello Yello, Mr. PiBB and Ramblin' root beer to Ted Bates Advertising/New York, along with Fresca (AA, July 23), according to sources close to the company.

A spokesman at Atlanta-based Coca-Cola would not comment on the report. Sergio Zyman, senior vp-marketing, did not return phone calls.

However, Mr. Zyman spent several days last week in New York. Earlier, a company spokesman acknowledged there have been talks about assigning Fresca to

Outguns fast-food rivals

Upfront buys Big Mac coup

By BRIAN MORAN
and CRAIG REISS

New York—If it were a game of chess, McDonald's Corp.'s network tv upfront strategy would be called "end game."

By moving into the prime time upfront market with more than $80 million—latest reports from network sources put the McDonald's upfront buy at as much as $95 million—the company has climbed to an overwhelmingly dominant position among fast-food chains on network tv (AA, July 26).

None of its competitors can consider even trying to match the weight of McDonald's in network tv, and Burger King Corp., its prime rival, has all but conceded the contest.

"There's not much I can do about it," said Don Dempsey, senior vp-marketing director of Miami-based Burger King. "We're always competing at a tremendous disadvantage with [McDonald's] because they have so many stores."

Consider Burger King's plight: It plowed $23 million into network prime time upfront spending for the 1983-84 broadcast year but was outspent by more than 2 to 1 by McDonald's, which came in with $50 million.

For the coming network season, Burger King increased its upfront budget an impressive 22% to about $28 million. But even with that hefty increase, Burger King will now be outspent on network by McDonald's at a more than 3-to-1 ratio.

The more it spends, the farther Burger King falls behind.

"If they're going to outspend us

Final rule on substantiation voted by FTC

By STEVEN W. COLFORD

Washington—After a turbulent past, the Federal Trade Commission's review of ad substantiation policies came to a quiet, almost harmonious, end last week with adoption of a policy refining its position that advertisers must have a "reasonable basis" for objective ad claims.

As an added bonus for advertisers, FTC at the same time overruled its junior staff and halted a long-pending rule making that would have forced antacid advertising to include side effects warnings that now appear only on the product label. The antacid rule originally was seen by FTC staffers as the first step toward applying the rule to all over-the-counter drugs.

Ad industry leaders immediately praised the new substantiation policy statement as a useful clarification of how FTC will enforce the substantiation rule. The industry, alarmed by the threat of major changes in the policy, had lobbied hard to convince FTC chairman James Miller not to tamper with the fundamental requirement that advertisers have support for the claims in hand at the time the claim is made.

The ad substantiation policy the FTC commissioners

Magazines rap Ford for 'rate busting'

By RALPH GRAY

Detroit—Ford division's latest plan for concessions from magazines will bust their rate cards, several publications charge.

The warnings sprout from two requests, said magazine marketers, that requested anonymity. The division of Ford Motor Co., Dearborn, has asked for increased emphasis on multiyear rate protection and less emphasis on merchandising awards. The former would protect Ford from annual rate increases or delay those hikes; the latter would reduce funds used for merchandising awards, in which the advertiser and magazine stage joint promotions, in favor of more ad space in the magazines.

Ford division declined comment last week on its plans for 1985.

"Whatever Ford negotiates will be put under a microscope, and magazines will make it available to everybody," said Gene McCarthy, senior vp-executive director of media services at BBDO, Southfield, which handles Chrysler Corp.'s Dodge models.

"We will not do multiyear; we aren't planning on freezing rates," one magazine executive said. Another called turning merchandising credits into ad credits "rate cutting. We can't do that."

"If they don't spend their merchandising allowance on merchandising and instead it is subtracted from space rates, you are obviously reducing your rates, and that is a rate-card bust," one magazine veteran said. "There is something to be said for both the publication and advertiser benefiting from rate protection. The publisher benefits from a commitment, but the bottom line is he receives less revenue because he's working off the last rate card."

Rate protection would be a little difficult anyway because Ford wants it to be based on the auto maker's model year—October to October—though the magazines usually run on calendar years. Ford, in effect, wants to lag any rate increases, always running one rate card behind, a magazine executive said. And that's a "rubber rate card," he said.

One magazine marketer said that he interprets the requests via J. Walter Thompson USA, Detroit, as simply "asking us to make sure they get the best discount and give the best position. My rate card is my rate card. This isn't rate busting."

But his publication does not have multiyear rates, though some publications do, and his book does not offer merchandising awards.

Ford's '85 "magazine planning requests" include a "positioning package consisting of second cover spreads, third and fourth cover pages and franchised positions opposite most-read editorial," said a Ford letter to publications. It also calls for "innovative discounts, network pricing, multiyear commitments, etc."

Under the heading of merchandising, the Ford letter says that "rather than merchandising awards, we would prefer receiving additional space."

Ford division also has cut 31 magazines

College tv grid prices cut in half

By ROBERT RAISSMAN

New York—ABC and CBS have dropped the price of advertising on college football by 50% compared with last season, and advertisers are saying the uncertainty of ratings and inventory could force the price down even more.

Sources said ABC is asking $30,000 for a 30-second spot during its coverage of College Football Assn. games. CBS has priced its spots a bit higher for its upcoming coverage of Big Ten and Pac 10 games. CBS also will air two games it purchased last year outside the National Collegiate Athletic Assn. pact, which was declared in violation of antitrust law by the U.S. Supreme Court.

Last season, under the NCAA pact, advertisers were paying from $60,000 to $65,000 for a 30-second spot. The two networks last year, however, staggered the airing of their games. This season, ABC and CBS will broadcast college football simultaneously, and advertisers expect the head-to-head competition will drive down both networks' ratings.

Furthermore, the Court decision allowed the networks to get out of their contracts with the NCAA,

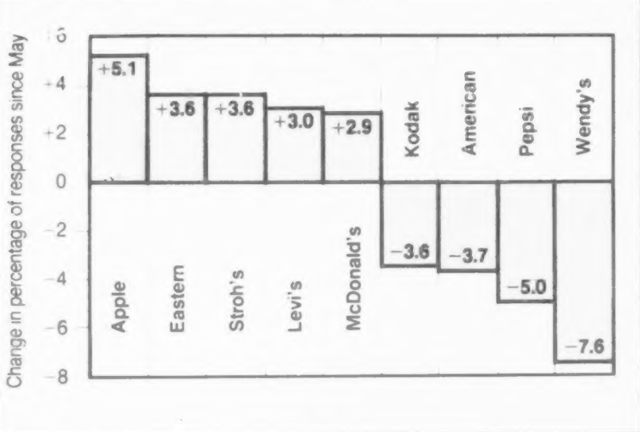
June winners and losers

Question: Of all the advertising for (product category) you have seen, heard or read in the past 30 days, which ad first comes to mind? Note: A change of plus or minus 2.8 points is considered statistically significant. ***Source: SRI Research Center Inc., Lincoln, Neb.***



Pepsi ads top list in ad awareness

By SCOTT HUME

It finally happened. Michael Jackson, together with the soda-pop-drinking inhabitants of a spaceship and an estimated $40 million budget for the campaign, have made Pepsi-Cola No. 1 in unaided advertising awareness.

Of course, it probably helped that lovable ol' Clara Peller has been getting a rest.

But the fact remains that of the 1,250 adults surveyed last month for ADVERTISING AGE's monthly adWatch survey, 103 (8.2%) said that advertising for Pepsi was the first that came to mind from all the advertising they'd seen, heard or read in the past 30 days.

Since its February launch, Pepsi's "Choice of a new generation" campaign consistently has registered impressive advertising awareness scores. But just as consistently it has been overshadowed by Wendy's near legendary "Where's the beef?" commercials with Clara Peller.

adWatch

While Wendy's has put Ms. Peller on hiatus, Pepsi has continued its campaign, mixing Michael Jackson spots with others, such as one in which a spaceship beams up a Pepsi vending machine after taste-testing both it and Coke.

Wendy's, however, received enough first-place mentions (45) to keep it in the No. 2 spot for June. Chalk it up to memories of Clara or the impact of the sexy salad bar spots Wendy's introduced last month.

In addition to falling back in over-all awareness, Wendy's last month took some lumps in the fast-food category, where there appears to be no catching McDonald's. At the height of the "Where's the beef?" frenzy in April, Wendy's was less than four percentage points behind the leader (28.7% of first mentions vs. 32.5% for McDonald's).

Last month, the percentage of respondents saying Wendy's adver-

(Continued on Page 58)

Cuts in Olympics fees will be passed on: ABC

By DIANE MERMIGAS

Roone Arledge, president of ABC Sports, says the network is prepared to pass on to advertisers "every dime of any reduction made" in its $225 million tv rights fees for the Summer Olympics because of the Soviet-led boycott.

"It's been difficult to place a value on unknown damages that you never may incur in the form of ratings falloff. But we're still negotiating with the Los Angeles Olympic Organizing Committee on what is perceived by both parties as a fair reduction in our rights fees," he said.

"We've told the committee that whatever we get, it will immediately be passed on to advertisers. ABC doesn't want any part of it," Mr. Arledge said last week.

Mr. Arledge said the committee had been anxious to settle on a specific monetary reduction by the time the summer games began July 28. He said he did not expect the rebate to be more than $30 million. He called published reports of a $60 million-to-$90 million rebate "out of line."

Such a rebate would assure that ABC would not have to provide actual airtime make-goods to advertisers if the network fails to reach its target audience during the Olympics. To compensate for lower than anticipated ratings averages during the summer games, ABC simply would reduce the amount advertisers owe the network for commercial airtime purchased during the events.

Under such a plan, the $30 million from the LAOOC would offset any reduction in advertiser payments offered by ABC.

However, John Severino, president of ABC Television, said that if the network fell very short of the 20 rating it hopes to average in prime time coverage, it still would provide some on-air make-goods to advertisers in the interest of good business relations.

"What we wanted to do was to put the last few payments of our fees in escrow to cover any damages we'd have to sustain afterwards as a result of poor ratings and to negotiate the matter after the Olympics," Mr. Arledge said.

"But the organizing committee wants to button this up by coming up with some agreeable figure ahead of time because it goes out of business after the games."

A clause in ABC's contract for the games gives the network the right to negotiate lower rights fees in the event key countries don't participate. ABC also has a $200 million insurance package covering actual losses connected with the Olympic broadcasts.

ABC worked out a formula that assured nearly all of the 45 Winter Olympics advertisers some kind of compensation for ratings that de-

(Continued on Page 58)

Heavy ads on line for multifunction-software products

By BRIAN MORAN

Software marketers, propelled by the runaway popularity of Lotus Development Corp.'s 1-2-3 program, are flooding the market with similar integrated packages that can perform an array of different functions.

Lavish advertising and promotion budgets adorn the new products, with most marketers planning extensive print campaigns.

Lotus and Ashton-Tate, the two leading vendors of business software, this month began touting their programs on network tv. But most companies are going after the relatively limited market of sophisticated business users. They are trolling for these potential customers through ads in newspapers and in business and computer magazines.

Multifunction packages roll into one program several common functions, such as database management, financial analysis and word processing. Marketers claim that the souped-up programs do not sacrifice the speed or ease of use characteristic of single-function programs.

Most of these offerings, however, require relatively powerful and expensive personal computers (at least 256K of memory) to run and are priced in the $500-to-

(Continued on Page 70)

Steinberg spots a new vocation

By PAT SLOAN

NEW YORK—Think of David Steinberg and your first thoughts are stand-up comic, "Tonight Show" guest host and Atlantic City nightclub headliner. Those who caught the Burt Reynolds film "The End" might even think of him as an actor. And movie buffs who happened upon "Paternity" or "Going Beserk" might remember his credits as film director.

But David Steinberg as a director of tv commercials?

Yes. When Backer & Spielvogel rolls out new NCR Corp. computer commercials next month, they will star Dom DeLuise (AA, June 28) and his director will be Mr. Steinberg.

Working in tandem with Larkin Productions, Mr. Steinberg was in town last week to negotiate more stints as a commercials director. His talent agency, William Morris, was initially wary of this new medium for Mr. Steinberg, until he reminded agency executives that they "work for me. I think commercials are great art forms. I said, 'Fine. If you don't like it, don't take a percentage.' "

The kind of commercial work Mr. Steinberg

(Continued on Page 55)

BBDO's Brower dead at 82

By STEWART ALTER

Charles Brower, 82, a leading industry figure and major creative and business influence on Batten, Barton, Durstine & Osborne in his 42 years at the agency, died July 23 at his home in Brielle, N.J. The cause of death was not revealed.

Inducted into the Advertising Hall of Fame two years ago, Mr. Brower became president of BBDO in 1957 and chairman in 1964, a position he held until he retired in 1970. He rose through the creative ranks, first joining the agency in 1928 as a copywriter and becoming exec vp in charge of creative services in 1946. He is listed in Julian Watkins' book, "The Top 100 Copywriters."

CHARLES BROWER

When Mr. Brower joined the agency, it was called the George Batten Co. He was hired by William Benton, at that time the head of the trade and industrial section of the Batten copy department. Mr. Benton, however, was fired the Saturday before Mr. Brower was to start at Batten, leaving no written evidence that Mr. Brower had been hired.

Mr. Brower persuaded the agency to let him stay on anyway. He told Batten he had been promised $75 a week, $10 more than was actually the case. "And that was when I got my first raise," Mr. Brower would later tell Barton Cummings in the latter's series of interviews with leading ad agency executives called "The Benevolent Dictators" (AA, July 25, '83).

Interestingly, Mr. Benton, who did not think much of the Batten agency, was fired for "disloyalty" because he urged that the shop merge with the Barton, Durstine & Osborne agency, which had offices in the same building. Four months after firing Mr. Benton, Batten did indeed make the merger, creating BBDO. Mr. Benton, for his part, cofounded his own agency—Benton & Bowles.

Mr. Brower then spent eight years writing copy for Wonder bread while Ted Bates worked the account side. Mr. Bates would also later form his own agency.

Under Mr. Prower's stewardship, BBDO was transformed from predominantly an institutional agency handling banks, insurance companies and public utilities into

world news roundup

LONDON—The U.K.'s Department of Energy has picked Doyle Dane Bernbach to handle its $4 million account, previously handled by Young & Rubicam.

MADRID—The Spanish Tourist Secretariat is looking for an agency to handle a new $2.6 million international campaign. Tandem/-DDB, Young & Rubicam and three local shops are pitching.

LONDON—BAT Industries has named Foote, Cone & Belding to handle its $2.6 million worldwide account for State Express cigarets, formerly handled by Ted Bates Holdings here.

MELBOURNE—Grey Advertising last week acquired a 30% share in Hayes, Cowcher-Dailey, a local shop with $10 million in billings. With offices in Melbourne and Canberra, the agency is now known as Dalziel, Harper & Grey.

PARIS—Gruner & Jahr, Hamburg, plans to start publishing a French weekly women's magazine, called *Femme Actuelle*, Oct. 1 with a pressrun of 1 million. Cover price will be 60¢.

MADRID—Coca-Cola Co. is rolling out a noncarbonated version of Fanta in orange, apple and lime flavors with a $1 million campaign via Clarin.

RIO DE JANEIRO—R.J. Reynolds do Brasil launched Doral filter cigarets last week in southern Brazil through J. Walter

(Continued on Page 38)

AdWatch

(Continued from Page 3)

tising first came to mind from all the fast-food advertising they had seen fell 7.6 points, after dipping 5.9 points in May. The June rankings put McDonald's No. 1 with 32.1% of first mentions (a 2.9 point increase since May). Burger King back in its accustomed No. 2 spot with 20% and Wendy's was No. 3 with 15.2%.

Time to break the third "Where's the beef?" spot?

Despite Pepsi's over-all win, it lost some of its fizz in the soft-drink category. Its advertising's share of first mentions dipped five percentage points to 34.2%. Coke held the No. 2 spot with 21.1%, while 7UP was third with 7.3%.

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a nationally projectable sample of consumers to name the advertising that first comes to mind in a variety of product and service categories from all they have seen, heard or read in the previous 30 days.

Last month, 1,250 adults were questioned by phone. Under adWatch methodology an increase or decrease between monthly samplings of 2.8 percentage points is considered statistically significant and attributable to more than sample variation.

Wendy's "Where's the beef?" and Pepsi's "Choice of a new generation" are two of the most talked-about campaigns that have broken during the year's first half. But, of course, there have been many others that have "moved the needle" on advertising awareness during the past six months. Among these are Apple's teaser introduction campaign for its Macintosh computer, Stroh Brewery's "Alex the dog" spots and Burger King's latest round of "broiling vs. frying" commercials.

The abundance of especially memorable creative efforts launched in the year's first six months makes this a good time to take a cumulative look at adWatch advertising awareness results.

What follows are the top advertisers in over-all (unaided) awareness and six-month average shares of first mentions for the top three advertisers in each of the 22 product and service categories adWatch covered.

• **Top 10 over-all.** Wendy's; Pepsi; Coca-Cola; Lite beer from Miller; McDonald's; Burger King; Ford; Budweiser; Chevrolet; Stroh's.

In the past six months, Wendy's advertising came to mind first for more respondents than for the next three advertisers combined.

• **Airlines.** Eastern (13.8%); United (12.7%); American (10.3%).

With fare wars and flight expansions boosting advertising expenditures, this has been one of the first half's most changeable categories. Each of these three airlines has been No. 1 at least once during the period. In June, Eastern's share of first mentions rose 3.6 percentage points, moving it into the lead. American lost 3.7 points and dropped from No. 1 to No. 3.

• **Apparel.** Levi's (10.4%); Jordache (5.4%); Sears (4.6%).

Watch Sears. In the June survey it passed Jordache for the first time. Levi's top-of-mind awareness was up three points last month.

• **Beer.** Budweiser (14.2%); Miller (9.7%); Miller Lite (8.4%).

Coors, with a six-month average of 8.3%, is breathing down Lite's neck.

Stroh's, with expanded distribution and advertising presence, gained 3.6 points in the June survey, moving it up to No. 3.

Also worth noting in the June survey is the first appearance of Anheuser-Busch's LA, which in a short time received more mentions than such established brands as Molson, Heineken or Old Milwaukee.

• **Breakfast foods.** Cheerios (6.9%); Wheaties (6.3%); Kellogg (5.7%).

• **Cameras & photographic equipment.** Kodak (27.5%); Canon (16.3%); Polaroid (8.6%).

Kodak's share of first mentions dropped 3.6 percentage points in June.

• **Cars & trucks.** Ford (22.2%); Chevrolet (12.6%); Toyota (8.0%).

• **Coffee.** Maxwell House (23.7%); Folger's (21.2%); Sanka (6.8%).

• **Computers.** Apple (22.8%); IBM (13.0%); Commodore (6.2%).

Apple continued to strengthen its lead in June, jumping 5.1 percentage points.

Worth noting: Last month, only 35% of the adults surveyed were unable to recall any advertising for a computer company. That compares with 44% who could not name a specific laundry-product ad they'd seen.

• **Cosmetics.** Avon (5.2%); Maybelline (4.8%); Revlon (3.8%).

• **Financial institutions.** Merrill Lynch (6.4%); E.F. Hutton (4.5%); Dean Witter (1.7%).

Last month, 62% of respondents drew a blank when asked what advertising in this category first came to mind.

• **Fast-food.** McDonald's (34.3%); Wendy's (20.4%); Burger King (16.4%).

• **Frozen foods.** Birds Eye (14.5%); Swanson (7.2%); Stouffer (5.5%).

• **Home electronics.** General Electric (5.4%); RCA (3.1%); Sony (2.8%).

• **Laundry products.** Tide (24.6%); Cheer (4.4%); All (4.3%).

• **Liquor.** Jack Daniels (4.4%); Seagrams (2.1%); Black Velvet (1.7%).

Despite the relatively low shares for the top three, 91% of respondents last month were able to recall specific brand advertising (but most of the dozens of brands named received less than 1% of total mentions).

• **Medicine & drugs.** Tylenol (26.4%); Anacin (7.4%); Bayer (4.9%).

• **Pet food.** Purina (13.0%); Alpo (8.4%); Meow Mix (3.5%).

• **Soap & shampoo.** Ivory (8.2%); Head and Shoulders (6.2%); Prell (5.7%).

• **Soft drinks.** Pepsi-Cola (33.6%); Coca-Cola (21.6%); 7UP (7.2%).

• **Tea.** Lipton (46.9%); Nestea (4.2%); Tetley (3.4%).

• **Tobacco.** Marlboro (7.8%); Skoal (5.2%); Winston (4.0%).

• **Wine.** Gallo (11.3%); Riunite (9.1%); Paul Masson (3.6%).#

ABC to pass on cuts in Olympics fees

(Continued from Page 3)

clined across the board from the 1984 Winter Olympics (AA, March 12).

The 18.2 total households ratings average for this year's Winter Olympics coverage in prime time was off 24% from the 24 ratings average ABC projected.

Although ABC sells the Olympics on household ratings without guarantees, the network believes it is prudent business to compensate advertisers for ratings shortfalls. Sources say ABC estimates its Summer Olympics coverage will average a 20 rating.

ABC has nearly sold out $435 million of available network tv time for the summer games, which will be telecast in 180 hours of mostly live tv coverage through Aug. 13. Among the leading sponsors are Coca-Cola, AT&T, Anheuser-Busch, Atlantic Richfield, McDonald's, Levi Strauss, General Motors' Buick, Motorola, IBM and Xerox.

Aside from jeopardizing the impact of more than $1 billion being spent to promote advertisers' Olympic tie-ins, lower than anticipated ratings for the summer games undoubtably would affect the value and desirability of the 1988 Summer Olympics in Seoul, South Korea.

Mr. Arledge also could find himself a victim of a boycott-precipitated ratings dive in the summer games. Like Fred Silverman, who was president of NBC when that network owned the broadcast rights for the 1980 Moscow games, which the U.S. boycotted, Mr. Arledge could find himself a victim of unfortunate circumstances that could adversely affect his career.

However, such a prospect appeared to be the furthest thing from his mind last week as Mr. Arledge prepared to oversee most, if not all, of ABC's exclusive Summer Olympics coverage from a control center in Los Angeles.

In addition, Mr. Arledge underwent surgery several weeks ago to have a benign tumor removed from his thyroid gland, which was discovered during a routine physical. Most of his thyroid also was removed.

However, Mr. Arledge denied rumors surfacing last week that, for health reasons, he would be unable to maintain his unprecedented dual function at ABC as president of both the sports and news divisions, as he has since 1977.

"My health is fine. It's just that I went right from the operation to overseeing our coverage of the Democratic convention in San Francisco to overseeing our Olympics coverage here [in Los Angeles], and then we're on to Dallas for the Republican convention," he said.

ROONE ARLEDGE

Mr. Arledge, 53, who has the reputation of being an innovative broadcasting maverick, also denied renewed rumors about his stepping down from one or both ABC posts by year's end because of their extraordinary demands. Mr. Arledge said his current ABC contract runs through next year.

"I really don't know what I will do next, but a lot of that will depend on what shape things are in," he said.

Mr. Arledge admitted there was a point late last year when his superiors at ABC Inc. offered him the opportunity to move up the corporate ladder.

He did not elaborate on what broadcasting-related post he was offered.

"I immediately declined because I felt I owed it to people to see through this year's huge undertakings in news and sports, meaning the Olympics and the elections, through to the Super Bowl and the inauguration next January," Mr. Arledge said.

"I've put on hold any consideration of what I'll do in the future until next year," he said. "But I'm sure the day will come when I want to change."#

Bill may unpot honey ads

By STEVEN W. COLFORD

WASHINGTON—Stung by sagging honey sales, U.S. bee keepers are buzzing over the idea of a multi-million-dollar national advertising campaign to expand the market for their golden nectar.

The campaign would be commissioned by a national honey board—as yet unformed—and financed by an assessment of honey producers and importers, according to their volumes. Initial estimates have put the fund at about $3.2 million.

Although the board would decide the exact nature of the promotional campaign, a Department of Agriculture official said he believed the board "would have to rely on an agency" with the experience and expertise to conduct a national campaign.

The potential for these new tactics comes from a bill introduced last spring by Rep. E. (Kika) de la Garza (D., Tex.) and passed unanimously on July 24 by the full House.

Texas is one of the nation's leading honey-producing states, as is North Dakota, home of Republican Sen. Mark Andrews, who today will introduce his own version of the bill.

Sen. Andrews might try to push the bill directly to a Senate floor vote—perhaps as early as this week—or might first schedule committee hearings, an aide said. Either way, he added, the bill is expected to encounter no opposition.

Congress was lured into the sticky matter when the domestic honey-producing industry, led by the American Beekeeping Federation, lobbied for federal help against cheaper imported honey.

Annual U.S. honey consumption has been about 1 lb. per person for several years, says the Department of Agriculture, and imports have eaten away at the domestic share of the static sales, principally because of the federal price supports that keep domestic honey prices high.

The legislation would authorize USDA to conduct a national referendum of honey producers and importers on whether they would contribute to a national promotion fund.

If a prescribed number approved, the Secretary of Agriculture would appoint a national honey board to assess industry members and spend the money.

The legislation stipulates that only producers and importers of more than 6,000 lbs. of honey a year would be assessed, at an initial rate of 1¢ per 100 lbs.

Frank Grassberger, acting chief of USDA's specialty crops branch, said 205 million lbs. of honey were produced in the U.S. last year and another 110 million lbs. were imported.#

More Lights 100's

Reynolds does more for More

R.J. Reynolds Tobacco will support its revamped More Lights 100s brand, which gets a darker cigaret paper and new packaging next month (AA, Aug. 6), with this spread ad, via Leber Katz Partners, New York, scheduled to run in national magazines in October.

Seiko times big ad effort for holidays

By ROBERT RAISSMAN

New York—The battle for control of the watch market's middle range will intensify this fall when Seiko Time Corp. breaks the largest spot tv and consumer print campaign in its history.

A Seiko spokesman would say only that the campaign will entail multi-million-dollar spending. Leading National Advertisers puts Seiko's 1983 spending at $7.3 million. AC&R Advertising will handle the drive, which breaks in October.

The fall campaign is designed to give authorized Seiko dealers maximum support going into the holiday gift-giving season, said Seiko vp-advertising David Strousse.

From October until Christmas, Seiko commercials will air more than 1,000 times in major markets on cable, news and sports, prime time and spot tv.

Three different tv commercials will be used.

One will be devoted to high-fashion Seiko ladies' watches, another to men's timepieces and a third will emphasize the art of the Lasale Seiko model.

Seiko also has created its largest-ever newspaper campaign. Five dealer-listed page ads are scheduled to run in every major market.

Color page magazine ads in multiple insertions are scheduled for *Esquire*, *Forbes*, *Fortune*, *The New Yorker*, *Newsweek*, *People* and

Major net tv drive added for Adam

By BRIAN MORAN

West Hartford, Conn.—Coleco Industries' relaunch of its troubled Adam home computer shifts into high gear Aug. 15 when a new network tv campaign breaks via Ketchum Advertising, New York. The new $20 million-to-$25 million ad effort positions the overhauled Adam as more reliable.

The network tv commercials follow a spot radio and local newspaper campaign that began last June and will have hit 25 markets by summer's end. Coleco earlier introduced the new version of Adam at the Consumer Electronics Show (AA, June 7).

The Adam computer has been plagued with operating failures and returns since it hit the market last October, creating a massive image problem among retailers and consumers. Other problems included higher than expected manufacturing, overhead and research costs.#

Universal Wines & spirits picks Eisner

Baltimore—Universal Wines & Spirits, a Rockville, Md.-based liquor and food importer, has selected Eisner & Associates here to handle next year's national rollout of three lines. Universal will introduce Bavarian vodka, Cluster de France table wines and Pasta de Italia, a line of imported foods. National introductions for all three lines will be supported by separate broadcast and print campaigns. Ad spending for Pasta de Italia may hit $1.5 million. Budgets for the other items remain undisclosed. Eisner is the first agency of record for the new offerings.

Tiki Tan names Wolff Whitehill as agency

New York—Tiki Tan Sun Products, Ormand Beach, Fla., has named Wolff Whitehill, New York, as the first agency of record for its $500,000-plus account. The company is expanding from the Southeast into the Northeast (AA, July 12). No previous agency of record.

Olympic success breeds 'barn burner' idea

Wolper mulls road show

By DIANE MERMIGAS

David Wolper says the favorable response to the July 28 Olympics opening ceremonies he produced has engendered plans to take a similar flag-waving show on the road.

The hitch will be finding a sponsor—perhaps a national advertiser—to finance a cross-country tour of what Mr. Wolper envisions as "a patriotic barn burner that will touch the American soul.

"The idea has crossed my mind during the past week that I've been preparing for the closing ceremonies," he said in an Aug. 4 telephone interview from his Los Angeles production office.

The closing ceremonies at 7 p.m. (ET) Aug. 12, will be a somber, traditional affair at the outset, with appearances by past marathon greats plus the completion of this year's men's marathon and the awarding of its medals, Mr. Wolper said. Also featured will be a procession of all 7,500 Olympics athletes and the dousing of the Olympic torch.

However, he promises the final half hour will be "one big party" complete with a display of "space technology, laser lights and fireworks" and Lionel Ritchie singing his hit "All Night Long." About 4,000 performers will participate.

"What I'm shooting for in the closing ceremonies is a feeling of international friendship," said Mr. Wolper, who confessed his concern about producing a fitting Olympics encore.

Mr. Wolper said he has received

Brazilian election Amazonian ad task

By LAUREL WENTZ

Sao Paulo—If the U.S. presidential candidates think creating a winning image is tough, they should try running for the job in Brazil.

Many of the largest Brazilian-owned ad agencies are throwing themselves into the campaign. But it's no easy job for them either. Shops working for two of the presidential candidates don't want the public to know of their involvement. Many agencies would rather work for a third candidate, but he doesn't have the money to pay for their services.

On the eve of this country's political conventions this weekend, the field has narrowed to three *presidenciaveis*, or potential presidents.

This month, both candidates for the Government party started crash image-building campaigns, extolling their virtues in 30-second tv commercials. Only one of the party's candidates—Paulo Salim Maluf or Mario Andreazza—will survive this weekend's conven-

Showtime to make pitch on network tv

By SUSAN SPILLMAN

New York—Showtime, the nation's second-largest pay tv service, will break its first network tv commercials next month, part of an estimated $8 million ad campaign to run through November.

Showtime will run 30-second spots on ABC, CBS and NBC Sept. 10 through Oct. 7. Another flight begins Oct. 22 and runs through Nov. 18.

In total, Showtime will have bought about 637,700 gross ratings points.

The buy also reinforces ABC's recently revamped policy of accepting cable tv commercials.

After three years of discussions, Showtime rival Home Box Office convinced ABC to take its ads in June. Until then, the network had a strict policy banning all cable ads.

The Showtime commercial uses a jingle, "We Make Excitement," a takeoff on the Pointer Sisters' hit song "I'm So Excited."

The jingle is set to a fast-action montage of behind-the-scenes glimpses of Hollywood in action: Lights, cameras and sets being moved.

A rough version of the spot was shown to cable operators at the National Cable Television Assn. meeting in June.

The campaign is J. Walter Thompson USA's first effort since gaining the account from Benton & Bowles this year.

The fall campaign also includes ads in *TV Guide* and other cable guides, as well as network radio, outdoor spots on nine cable networks and on-air promotions.

According to Joanne Black, senior vp-marketing for Showtime/Movie Channel, "We're big enough now that it's time we step out and become a national brand."#

Cable security execs try for antipiracy net

By SUSAN SPILLMAN

New York—Three former Federal Bureau of Investigation agents now working in the cable tv industry are setting up a national organization to thwart cable piracy. Cable piracy costs the industry an estimated $500 million in revenues.

"We want to combat these pirates the same way they do business, through a well orchestrated network," says Robert Astarita, one of the organizers who recently was hired to direct corporate security for Cablevision Systems, Long Island.

Mr. Astarita and former FBI colleagues Ronald Putman, director of security for General Instrument Corp., and John Janson, corporate director of security for Oak Media, are attempting to set up their group through the National Cable Television Assn. "But if that fails we will do it independently," Mr. Astarita said.

The new group will set up "sting" operations and act as a clearinghouse for information about pirate operations.

"Most of the piracy in this country is controlled by 15 to 20 well organized pirate networks," says Mr. Astarita.#

ABC defends coverage

By DIANE MERMIGAS

Roone Arledge, president of ABC News and Sports, pondered the heavy American slant to the network's coverage of the Olympic Games early last week before it became a sore point with the International Olympic Committee.

"If our coverage has appeared one-sided it's because Americans are winning a lot of the medals," Mr. Arledge said during an interview last week. "We have to be cognizant of balancing out the picture, but we also are obliged to report what happens."

Mr. Arledge offered his remarks before the International Olympic Committee, which last weekend criticized ABC's Olympics coverage. The committee complained that the network's coverage was too heavily weighted toward American athletes.

Although ABC offered no official response, spokesmen for the network pointed out that the international committee's criticisms were based on ABC's domestic coverage, which the Los Angeles Olympic Organizing Committee chose to show on closed circuit in the Olympic Village. The 7,500 participating athletes inhabit the village.

Consequently, foreign athletes and staffers have been getting an Americanized view of the games that seemingly excludes a focus on foreign competitors. ABC also produces an international satellite feed that, in the past, was beamed into the Olympic Village.

The international satellite feed is a comprehensive, unedited version of all Olympics competition. It includes no subjective coverage—for example, sportscasters' commentary or profiles of individual athletes. Subscribing foreign broadcasters are free to select portions of the international feed for their own coverage.#

Wolper mulls road show

(Continued from Page 1)

more than 6,000 letters and telegrams from entertainment, advertising, political and sports luminaries congratulating him on the opening show.

He also said he has been inundated with requests to produce such tv events as the Academy Awards ceremony.

Mr. Wolper said the opening ceremonies—which, with a 29.5 rating and 55% share of the national tv audience so far outrank all Olympics competition coverage—was "the emotional, inspirational spectacle" he hoped for.

He was pleasantly surprised by such spontaneity as performers and spectators in the Los Angeles Coliseum joining hands during the music number "Reach Out and Touch Somebody's Hand" and by athletes who danced on the field at the end.

"I think the opening ceremonies provided the enormous surge of interest and patriotism which have contributed to the very high ratings the events have been getting," Mr. Wolper said.

National and overnight Olympics ratings remain strong. The first nine nights of ABC's Olympics coverage have averaged 23.8/45 nationally. However, the latest national statistics released Aug. 7 by A.C. Nielsen Co. showed prime time viewing of the Olympics peaked Aug. 5 with a 25.2/47. Daytime viewing also peaked Aug. 5 with 16.1/44 in Nielsen's eight overnight metered markets.

Mr. Wolper believes the opening ceremonies will have an impact on creative trends in future advertising and entertainment as well. "I think we'll see other producers and advertisers integrating more Americana and emotion into their work simply because they were reminded just how effective those elements can be," he said.

Mr. Wolper, a 35-year veteran of such tv productions as "Roots" and "The Thorn Birds," said he considers the opening and closing Olympics ceremonies "the most overpowering way I've ever been able to touch so many people at one time."

His future tv projects for ABC will include the 18-hour miniseries "The North and the South," and eight-hour versions of Homer's "Odyssey" and "Napoleon and Josephine."

Like others participating in the opening and closing ceremonies, which will cost $7 million, Mr. Wolper has volunteered his services and time.#

MenJ sets home diagnostic

By NANCY GIGES

Philadelphia—SmithKline Beckman Corp. hopes to establish a home diagnostics business through its Menley & James consumer products division.

The division is introducing its first home diagnostic, Hemoccult, which detects hidden blood in the stool that is often an early sign of serious colorectal diseases.

The product, which joins C.B. Fleet's Detecatest (AA, Sept. 12) on the over-the-counter shelves, will get consumer and medical advertising this fall.

According to SmithKline, the kit, which will retail for between $6.50 and $7.50, is a self-test version of Hemoccult II, another SmithKline product marketed only to medical professionals.

Consumer media will include magazines, Sunday supplements and cable tv, via BBDO. The company is handling trade and medical advertising internally.

A company spokeswoman said SmithKline hopes to expand in the home diagnostic area, but she was unaware of other new products.#

Seiko effort

Expanding customer base on shopping list

By Cecelia Reed

Recent headlines in newspapers and trade publications about the retail industry could have been printed in rosy ink, but black wasn't too far off the mark. Sales for most retail businesses this year have been strong as consumers continue to rediscover the art of shopping and spending.

The unvoiced question, of course, is how much longer will the good times last?

It wasn't that long ago when retailers were shaken to their bottom lines by the surge of off-price retailers. The uncertain economy was the impetus for bargain hunting, but the pursuit of good prices—coupled with good quality merchandise—is a consumer imperative that's here to stay, according to most industry observers.

The off-price threat caused many retailers to lose a lot of sleep last year, and much spleen was vented toward suppliers who sold to off-price establishments. But angry denunciations didn't change marketplace realities. Along with the deep discounters has come the growth of specialty stores, Toys 'R' Us and The Limited for example, which successfully have siphoned off traditional department store customers. Other retail forms membership warehouse stores and catalog showrooms, such as are also providing alternatives to consumers.

Survival of the smartest—the smartest marketers and merchandisers, that is—is the name of the retail game for now and the future. Those who understand how to best serve their customers and how to market themselves to appeal to even a broader buying segment, will maintain a toehold in the shifting retail firmament.

Retailers must become more aware of who their competition really is, and why their customers shop where they do.

"Up until the last five years, all retailers had to do was build another store," says Lynn Pregont, retail marketing manager with WLS-TV, the ABC-owned station in Chicago. Putting up another outlet, then, was considered growth. "But with the shift in the economy, the focus itself shifted from new site development to increased productivity in *existing* stores. It became necessary to maintain share of market.

"In 1984, productivity is the key," Ms. Pregont says. "Retailers are going to have to become more introspective, to examine their internal share of market as well. Is the customer who is buying your dresses also buying your shoes? And how are you getting them to spend more in your store?"

Retailers are using research techniques to get a better reading of who their customers are—and what kind of shopping environment they seek.

More and more stores are overhauling their merchandise mix and even their physical makeup to better target their desired market.

The mass merchandisers, in particular, aggressively are pursuing a more affluent shopper with upgraded private-label and name-brand products while weeding out the lines that recall their former, lower-end days.

Developing a competitive positioning strategy is vital to retailers. Raenette Stimmel, senior consulting associate, Management Horizons, Columbus, O., says, "Most retailers tend to react to all competitive pressures. They try to be all things to all people. They must develop a specific marketing strategy and merchandising strategy."

She stresses that identifying customers is half the puzzle for retailers; it's necessary to find out why they shop the competition as well.

The need to be different in an over-stored environment, to rekindle consumers' eroding store loyalty and, above all, to lay the groundwork for future growth, should be major preoccupations in retailers' minds today. Tomorrow comes all too quickly.

Cecelia Reed, a senior e[illegible] of ADVERTISING AGE, coordinated this Special Report.

Mass merchandisers moving up

By Belinda Hulin-Salkin

Retailing to the mass market isn't what it once was. For one thing, this market is trading up: It is better educated, more affluent and more discriminating than ever.

In an effort to capture its individual hearts, minds and wallets, mass merchandisers today are spending millions of dollars to overhaul their stores, product lines and personalities. According to industry observers, the sound and fury of these giants' efforts to keep up with the times is having a tremendous impact on the retail marketplace.

"The influence of the major chains is felt throughout the industry," says veteran retail analyst Walter Loeb. "And all of the major merchandisers have made great strides in revamping their merchandise and updating the look of their stores."

According to Mr. Loeb, the U.S. has a store excess of about 47% and mass merchandisers such as Sears, Roebuck & Co., J.C. Penney Co. and Montgomery Ward & Co. are responding by cutting poorly performing lines, upgrading store presentation and raising merchandise standards.

For Sears, the emphasis is on the future. In 1983, the company launched its "store of the future" concept and embarked on a five-year, $1.7 billion capital investment program to build 62 new stores and retrofit 600 existing stores on the new model. According to G. Joseph Reddington, vp-marketing, Sears Merchandising Group, the store of the future program is based on a fairly simple premise.

"When the merchandise is right and it is displayed properly, it sells better," he says. "To that end, the layout of the store has been changed so the merchandise is where the customer expects to find it."

Aside from arranging merchandise into logical groups, Sears also added national name-brand merchandise to its own portfolio of longstanding private labels. "We added those brands that we felt would help us attract customers who might not have stayed with us for those particular items," Mr. Reddington says.

In addition to physical plant improvements and merchandise line additions, Mr. Reddington says upgraded Sears stores will give more floor space to apparel and home fashion departments, customer transaction time will be cut in half through computer-register price programing, and store areas will be predesignated for different levels of customer service depending on merchandise categories. The goal of these and other improvements is not so much to get people into the stores as it is to get them to buy more once they've arrived.

Although the Sears store of the future gives more space emphasis to soft line product groups, the company still is maintaining a heavy presence in its traditionally strong hard lines. In contrast, J.C. Penney has given up its major appliance, hardware, lawn and garden, and automotive centers as part of its $1 billion modernization and repositioning program begun in January, 1983.

"We dropped those departments because they weren't doing that well," Duncan Muir, Penney's public relations manager, says. "We are mostly located in regional shopping malls, and when our customers go into a shopping mall, fixing the car is not on their mind."

What is on their mind, Mr. Muir says, is fashion—both for the home and the individual. In keeping with that premise, Penney's has restructured its soft-to-hard lines ratio from 60-40 to the current 75-25, adding a new mix of fashion-oriented merchandise including the much-touted Halston III line. To showcase its new fashion statement, about 550 of the company's medium and large store interiors are being revamped.

"Recent research has shown that the J.C. Penney customer and the department store customer are the same, but she is going into the department store 17 times a year and going into J.C. Penney nine times a year. We're out to get more of that department store traffic," Mr. Muir says.

This fall the company will show its international chic with a four-week "Salute to Italy" beginning Sept. 16. The storewide event will feature such promotional events as a personal appearance by Sophia Loren in several markets, a retrospective of her works, appearances by Italian chefs, goldsmiths and artisans, all eager to show and sell.

> **"We've become trendier and much more conscious of fashion to attract a more contemporary customer."**
>
> *—Charles Miller*
> *Montgomery Ward & Co.*

According to Mr. Muir, Penney's is spending $10 million on advertising and promotion for the event, more than half of which will be allocated to a national ad campaign. In 1983, the company's total advertising expenditure reached $381 million, up from $314 million in 1982, an increase largely attributable to repositioning support.

Although Sears and Penney's both have generated a lot of attention with their renovation efforts, some industry observers say they believe Montgomery Ward may be the real sleeper of the mass-merchandising marketplace.

Like its larger retail counterparts, Ward's has added national brand items when appropriate and has upgraded its presentation to attract an upscale, quality-conscious mall shopper. And, like Sears, it continues to retain a strong franchise in hard line merchandise. But Ward's has taken the idea of related merchandise groupings a step further then the competition with its seven "store" strategy.

According to Charles Miller, executive vp-marketing, the company identified seven merchandise groupings: Home, apparel, appliance, automotive, electronics, home care, and recreation and leisure. The units could be self-contained and when grouped together would equal a complete department store.

"We opened a prototype of our Home Store in the Colorado Springs Montgomery Ward at the end of May," Mr. Miller says. "We're testing these units individually to see if they are as exciting to shoppers as they are to us."

The prototype Ward Home Store is a 27,000-sq.-ft. section inside the 100,000-sq.-ft. Colorado Springs store. In Las Vegas, the company is testing its electronics store and its automotive store.

"This approach allows us to be much more focused in our offerings," Mr. Miller says. "We've become trendier and much more conscious of fashion to attract a more contemporary customer."

Depending on these test performances, Ward's may be fielding a full specialty-selling prototype store in 1985. In the meantime, the company is continuing to upgrade its existing 323 retail stores at a rate of 60 a year, with 100 renovations already completed. The company is undergoing what is by all reports considered a turnaround, with announced earnings of $40 million in 1983, a $133 million improvement over its 1982 loss of $93 million and its first profitable year since 1979.

With few exceptions, Sears, Penney and Montgomery Ward have dropped their regional advertising efforts for a more centralized, national approach. Executives with the major retail chains give various reasons for the switch, including the need for a unified advertising program and increased efficiency, but the end result has been what one advertising executive calls "a wholesale rush out of r.o.p. [run of paper] and into preprint."

B. Christopher Jackson, vp-chain store sales for the Newspaper Advertising Bureau in New York, attributes this preprint phenomenon to what he calls the five C's: Cost, coverage, conformity, control and color. But he doesn't expect mass retailers to stay out of r.o.p. forever.

"My own feeling is that the major multimarket retailers don't have any more dough to take out of r.o.p. and put into preprint," he says. "Some of the major stores are already starting to rediscover r.o.p. It's a trickle, but I think in a year or so, it will be a noticeable trend."

While the four-color preprint may be the most prominent advertising format development for mass merchandisers, it is the ad presentation that interests some observers, who say the stores have been very careful to follow their repositioning efforts through to the last item of promotional literature.

According to Alfred Eisenpreis, vp-retail marketing, Newspaper Advertising Bureau, the most impressive aspect of the entire repositioning trend in mass merchandising is that the individual retailers have approached the situation by playing to their own strengths and acknowledging their weaknesses.

"In the '60s and '70s there was a lot of marketing done that was based on the way retailers wanted people to see them, and not based on reality," he says. "Now it's clear that these companies have thought a lot about who they are and why customers shop their stores.

"They took a good look at their customers and where the market was heading, and they made changes that are very true to their basic identities.

"It seems to me, we're at the beginning of a major thrust in mass retailing."

Belinda Hulin-Salkin wrote an industry perspective for last year's retail marketing Special Report.

Wine line positioned especially for women

San Francisco—ISC Wines of California is introducing a new line of table wines under the Lejon label. The wines will be packaged, positioned and advertised specifically toward women. Color page ads breaking this fall in women's and food magazines, as well as *People*, are headlined "Lejon: The art of sharing." Foote, Cone & Belding handles.

Other late news

● Uniondale, N.Y.—**Avis** is entitled to injunctive relief and can seek corrective advertising for an ad claim made by Hertz Corp., a federal district court judge has ruled here. The decision came in a lawsuit filed by Avis, a Garden City, N.Y.-based car-rental company. The suit accuses New York-based Hertz of violating federal and state laws prohibiting false advertising. The suit challenged a national campaign—via Scali, McCabe, Sloves—in which Hertz claimed "Hertz has more new cars than Avis has cars." In his decision, Judge L.D. Wexler said that Hertz ads "had a tendency to and indeed did deceive the public."

● New York—**James Foster**, exec vp-general manager, Brouillard Communications, will succeed Joseph Brouillard as president-chief executive officer of the agency. The move takes effect on Jan. 1, 1985, when Mr. Brouillard retires.

● New Iberia, La.—**Bruce Foods Corp.** is mulling test-market results in preparation for rolling out Casa Fiesta Mexican food products. The new brand and packaging design replaces the Ashley's of Texas name, which is being discontinued. Unspecified test markets are supported by newspaper and tv, via DiIorio, Wergeles, New York.

● Chicago—**Beatrice Cos.** has announced the completion of its merger with Esmark. It completed the process by merging Esmark into a Beatrice subsidiary (AA, May 24), L.A. Acquisitions Corp. Beatrice now becomes the nation's largest food marketer, with annual sales of more than $13 billion.

● White Plains, N.Y.—**NYNEX Business Information Systems**, a subsidiary of NYNEX Corp., has awarded its sales-force ad campaign to Young & Rubicam. The campaign, a new advertising venture for NYNEX, will position its sales force for potential customers, medium and large-size business users of telecommunications products and services. The budget for the the rest of 1984 will be at least $1 million for the campaign. The print and tv campaign will break in September. Cabot Advertising, Boston, continues to handle advertising for the business systems unit of NYNEX Business Information Systems.

● Taylor, Mich.—**Masco Corp.** is halting production of its line of cordless telephones and selling its Electra Scanner radio line to Uniden Corp. Masco is shifting its efforts from personal-communication products to "other specialty consumer items," the company says. Despite a 58% sales decline in personal-communications products, Masco reported a record $33.9 million net profit in the second quarter, up 30% from the second quarter of 1983, on sales of $314 million.

● Houston—**Oshman's Sporting Goods** is bringing Abercrombie & Fitch back to New York this fall with a new store. The original Abercrombie & Fitch closed in late 1977, after which Oshman's bought the trademarks. There are now 16 Abercrombie stores in the U.S.

● New York—**Tri-State Cadillac Dealers Assn.**, New York, will break a new image campaign Aug. 22 on local tv stations in metro area markets. Spots by Avrett, Free & Ginsberg will stress the performance characteristics of 1985 Cadillacs.

● La Crosse, Wis.—**G. Heileman Brewing** is test-marketing its Rainier beer in Kansas City, Mo., with an eye to expanding the brand beyond its primary market in the northwestern states. Rainier L.A. has not been included in the test.

● Burbank, Cal.—**Irwin Jacobs**, who owns 6.3% of Walt Disney Productions, is trying to force the studio to call a special stockholders meeting to vote on the proposed acquisition of Gibson Greeting Cards. Mr. Jacobs opposes acquisition of Gibson by Disney. Observers see Mr. Jacobs' move as the first step in an effort to gain control of Disney.

● New York—**MTV: Music Television** has entered into an agreement with Asahi Broadcasting Corp. to broadcast several hours of MTV programing weekly on Japanese network and local tv. MTV will debut in Japan in October with the programing to be presented in the same format as in the U.S.; certain elements will use Japanese subtitles.

● San Antonio—**A personal-injury suit** against General Motors Corp., Detroit, was expected to begin late this week in Bexar County court here. The suit, which seeks $50 million in damages, alleges that advertising for Pontiac's Trans Am caused a driver to believe the car could perform stunts such as those in the film "Smokey and the Bandit." GM's attorneys have denied reports that they would subpoena actor Burt Reynolds, who appeared in the film and in videotape clips of the film used as advertising by some Pontiac dealers. Attorneys also denied that John DeLorean, who spearheaded research on the Trans Am while he was at GM, would be subpoenaed. The plaintiff is a Trans Am passenger who was paralyzed and suffered brain damage in the auto accident four years ago.

● **NEWSLINE: United Technologies Automotive Group**, Dearborn, Mich., and Grundig AG, Fuerth, West Germany, have formed a joint-venture company to develop and market automotive components in Europe, starting in 1985. . .**Chesebrough-Pond's**, Greenwich, Conn. is using radio for the first time in several years to advertise Ragu Homestyle spaghetti sauce. The company also is using the medium for the first time to promote Ragu Pizza Quick brands. Waring & LaRosa, New York, handles. . .**Nabisco Biscuits**, East Hanover, N.J., is introducing nationally Crunchy Trio snack thins and is testing Sunflower snack thins in Milwaukee and other undisclosed markets. Both are getting print and couponing support via Ohlmeyer Communications, New York. . .**Compath National**, San Francisco, a marketer of business telephones, has moved its account to **Scroggin & Fischer** from Mendelsohn & Adler. . .**Wallace Westphal** to the new post of director of retail marketing at Television Bureau of Advertising, New York, from president of Westphal's.

Projected performance for Fall programs

Share is the percentage of tv homes with sets in use during a given time period. These estimates were arrived at by Advertising Age, which averaged figures computed by various ad agencies. The agencies used their own estimates on how programs will fare in the Nielsen ratings in negotiating multi-million-dollar upfront buys for their accounts. All times are Eastern time. Shaded area indicates new program.

Newcomers to watch: 'V,' 'Lost Loves' and 'Murder'

New York—Winners and losers in this fall's prime time tv war have already been projected by the various ad agencies, but it remains to be seen if the viewers will agree with those educated guesses.

The agencies came up with their fourth-quarter audience share estimates weeks ago to support their bargaining positions while negotiating their best upfront prices with the three tv networks.

They anticipate a few promising new programs, but no real blockbusters. The accompanying chart represents an average for each program, for the fourth quarter only.

■ CBS once again is favored to overpower its rivals in the fourth quarter, when ABC again should finish as the runner-up. As more than one agency media expert said, the homes ratings gap between the No. 1 and No. 3 network is expected to be just under two ratings points, as opposed to 3.5 points three years ago.

Of the new series slated to appear in fall prime time, five proved to be the most promising in this agency share survey.

On CBS: "Murder She Wrote," whose 25 share average owed a good deal to its "60 Minutes" lead-in. On ABC: "Finder of Lost Loves," with its format and share outlook not too different from predecessor "Fantasy Island," and "Paper Dolls," a prime time soap opera with a projected 25 share average. On NBC: "V," its 24 share coming from a hardcore audience presold by two miniseries, and "Highway to Heaven," a 23 average for Michael Landon's latest venture.

When it came to individual shows' performances, not all the agencies agreed on the possible autumn outcome.

For instance, ABC's "Paper Dolls" went as high as a 27 share in some agencies' share reports; CBS' "Charles in Charge" ranged from a low of 21 to a 24 share peak by various agencies' reckoning, and NBC's "Bill Cosby Show" was seen as a 20 share show by at least one shop but a 24 by another.

■ Some of the most widely divergent estimates involved NBC's Friday and Sunday programing, reflecting how much or little the various agencies agreed with NBC's rationale for its programing moves on those nights ("V," "Hunter" and "Miami Vice" on Fridays and "Silver Spoons" and "Punky Brewster" leading off its Sunday lineup). "Silver Spoons" ranged from a 15 share low to a 21 high in various agencies' reports on the Sunday 7 p.m.-to-7:30 p.m. span, with "Punky Brewster" showing up at anywhere from a 20 share to an 18.#

Airwick's ad is no laughing matter to C&D

By NANCY GIGES

Church & Dwight is putting up a stink about a new campaign by Airwick that suggests C&D's rival Arm & Hammer product doesn't smell good.

The Piscataway, N.J., marketer of deodorizing products under the Arm & Hammer name has appealed to the Big 3 networks after failing to persuade Airwick to stop the ads for Carpet Fresh. A C&D official said the advertising is false, misleading and deceptive.

He noted that the company also objects to the photograph in a print ad—"the picture is uncalled for," he said—not to mention the claims suggesting that Airwick's Carpet Fresh is the preferred product.

The ad, with the headline "Nose bulletin. 93% of expert noses preferred Carpet Fresh," shows a man smiling as he smells Carpet Fresh, while another man is holding his nose while sniffing a box of Arm & Hammer. An accompanying chart lists several foul odors tested and lists Carpet Fresh as overwhelmingly preferred to Arm & Hammer as based on test results of a panel of trained professionals.

The C&D official said, "They do not have, nor could they

People Express, the Newark-based discount airline, touts its new Chicago-New York route with newspaper ads breaking today.

American joins United to blunt People fare cut

By SCOTT HUME and ROBERT RAISSMAN

United Airlines and American Airlines, engaged in a stare-down contest with People Express Airlines, are slicing fares and cooking up supporting advertising to beat back the upstart's upcoming foray into the Chicago market.

The actions come as People breaks ads today for discount fares for its Newark-to-Chicago route. The moves and countermoves are shaping up as the biggest domestic air-fare war so far this year.

The response by United, the principal carrier at Chicago's O'Hare International Airport, was quick but "measured," as one analyst put it. John Zeeman, senior vp-marketing of Chicago-based United, said that although his carrier was cutting fares, it would not match People's prices because United offers more comforts than the no-frills People.

American Airlines late Friday said it would match United fares for its five Newark-Chicago flights, and on selected flights from LaGuardia. Ad plans, via Bozell & Jacobs, were being formed.

The concerns of these airlines and others come after Newark-based People announced last week that it will launch five round-trip,

New complex makes first McStop in Minneapolis

Oak Brook, Ill.—McDonald's Corp. is planning a multibusiness project dubbed McStop in Lakeville, Minn., near Minneapolis, with construction possible in November. The complex would include a large McDonald's restaurant, a convenience store, a gas station with car wash and a motel, most likely a franchised Super 8, sources said. McDonald's will own the real estate and restaurant, and lease the remaining facilities to others. Also, McDonald's has been awarded an exclusive 10-year contract for restaurants at U.S. Navy installations. Forty units will be involved initially, but the Navy has the option to increase that number to 300.

Atari purchase may indicate new direction

Sunnyvale, Cal.—Atari has ordered $130 million in disc drives from Tandon Corp., Chatsworth, Cal. This is the first indication that new Atari

No Olympic make-goods, a relieved ABC declares

By DIANE MERMIGAS

ABC was able to deliver the jubilant declaration it had hoped to make as its exclusive coverage of the Summer Olympics roared to a close Aug. 12.

"There will be no make-goods. There will be no adjustment in the prices that were set. There is just no need because we have delivered the target audience as projected," said John Lazarus, vp-ABC sports sales.

The high ratings, which remained consistent or improved as American athletes racked up more gold, have provided ABC with less of a reason to pursue a reduction of its tv rights fees. Before the games, ABC and the Los Angeles Olympic Organizing Committee were discussing an equitable rebate to compensate the network for any ratings or financial fallout resulting from the Soviet-led boycott.

Roone Arledge, president of ABC News and Sports, told Advertising Age that the network would

Star Presenter Cleese taps U.S. funny bone

By SEAN MILMO

London—John Cleese's commercials are among the funniest around, but he takes them very seriously.

So does Advertising Age, which has selected the British comedian, known for his contributions to the irreverent "Monty Python's Flying Circus" British tv series, as its Star Presenter for 1984.

Mr. Cleese was chosen from among more than 60 celebrities who endorse nationally advertised products and was cited for his work on ad campaigns for American Express Co., Callard & Bowser, Compaq Computer Corp., Kronenbourg USA and Sony Corp. of America.

He is the second Englishman to receive the award. Actor Robert Morley was chosen in 1980 for his British Airways work.

Mr. Cleese went into commercials 12 years ago, intending to make them a way of life. Now 45 years old, his expertise is in such demand that he is regularly making commercials not only in the U.K. and the U.S., but also in Australia, Hong Kong, the Netherlands and Scandinavia (AA, Nov. 7).

As the thinking man's comic, he takes the intelligent approach to the job of a presenter.

To him, humor needs to be exactly on target to work. Even in the early days of his advertising career, Mr. Cleese rejected scripts he thought were slightly off—if only for the sake of his own reputation.

If he finds he likes an idea, he will write most of the commercial himself to get it into the shape he wants.

Mr. Cleese wrote large chunks of the crackpot "Monty Python" tv series and all of his tv sitcom, "Fawlty Towers," about a frenetically bumbling British hotel keeper.

So writing commercials has presented no problems.

Voice (off camera): I see you're taking your computer home.

John Cleese: Yes, Mr. Prince

Beck's and Molson join light beer arena

By GAY JERVEY

Latching onto the "less is more" trend mobilized by Van Munching & Co.'s Amstel Light beer—not to mention Miller Brewing's Lite—several importers soon will introduce new brews that are low in calories but high in panache.

In coming months, importers of Beck's from Germany and Molson from Canada will launch their first low-calorie brands in the U.S.

And that's not all: Carlton Imports is gearing for an early 1985 national launch of its Nordik Wolf Light, currently available in selected U.S. markets.

The Beck's entry, from Greenwich, Conn.-based Dribeck Importers, is quietly being paraded by distributors in various parts of the country. It will be called Roland, named for the medieval warrior who defended the Christians against the Saracens, according to the legends of Charlemagne. Like Miller Lite, Roland reportedly will weigh in at 96 calories, a tad above Amstel's 95.

Martlet Importing, Great Neck, N.Y., will opt for a simpler, less historic designation for its new entry,

(Continued on Page 68)

NORDIK WOLF LIGHT
THE BOLDEST

Carlton Importers is among the import beer marketers pursuing Amstel Light with a new light beer. Nordik Wolf Light is described in ads as "the boldest of light beers. . .A smooth, less filling beer with a rich, full-bodied flavor that's unmistakably imported." The beer, now available in limited U.S. markets, will be launched nationally next year. Agency for the brand is Henderson Advertising, Greenville, S.C.

Miller testing Sharp's L.A.

Milwaukee—Miller Brewing today is introducing its entry in the low-alcohol beer market.

Called Sharp's L.A., it will be test-marketed initially in Atlanta; Houston; San Diego; Columbus, O., and Springfield/Champaign, Ill.

Advertising, themed "It's smart to say Sharp's, the great-tasting beer that just happens to have half the alcohol," breaks Aug. 20 in those markets. A company spokesman said tv and radio spots will feature humorous tongue-twisters. Print ads will use humorous cartoons.

Leo Burnett USA, Chicago, handles.

Miller's suit against Anheuser-Busch, seeking a judgment that the L.A. initials are usable on any low-alcohol beer, is still in the early stages.#

FCC delay doesn't slow 12-12-12 foes

By MAURINE CHRISTOPHER and STEVEN W. COLFORD

Opponents of the Federal Communications Commission's new 12-12-12 rule are not satisfied with the commission's sudden decision last week to postpone the revamp of its key tv station ownership rule, and they vow a continued fight for sharp revisions.

The FCC rule change, adopted only weeks earlier (AA, July 30), would permit common ownership of 12 tv stations, 12 am and 12 fm radio stations and called for phasing out all FCC limits on the size of broadcast station groups by 1990. The existing rule limits broadcast group size with a 7-7-7 formula.

The sudden retreat reflected the growing political unhappiness with FCC chairman Mark Fowler's approach to tv ownership policy, and the commission's decision to delay changes for six months, until April 1, 1985, came almost immediately after the Senate voted for a similar postponement.

FCC opponents, including the Motion Picture Assn. of America and some key congressmen, are attempting to force a different ownership formula on FCC, one that might restrict the Big 3 tv networks.

Many opponents say they are not against expansion, but they want controls based on a percentage of tv household reach.

In a few weeks, MPAA will petition for formal reconsideration of the FCC action, though this was promised by the FCC.

Senate sources think FCC chairman Fowler, the architect of 12-12-12, now would be willing to replace his numerical limit with a market-reach formula in the case of tv.

Meanwhile, the anger in the House and Senate has not abated. The Senate last week passed an amendment to ban the use of FCC funds to implement the 12-12-12 rule for tv until June 30, 1985. Later in a House-Senate conference that was changed to April 1.

The FCC's stay order said it was putting on the brakes only for tv station ownership since "it is that portion of the decision that has raised the greatest concern and it is our belief that a temporary stay of the tv portion of the rule change will ultimately benefit the public interest."

Jack Valenti, president of the MPAA and a leader in the fight against allowing ABC, CBS and NBC in particular to each own 12 stations, welcomed the FCC moratorium. "The delay affords an opportunity to go back and explore the central issue that has been obscured in the original [12-12-12] order—that is concern over the concentration of national tv power in the hands of the three networks," Mr. Valenti told Advertising Age.

The antitrust aspects of the FCC's proposed expansion of tv ownership will be explored by the Senate judiciary committee at a Sept. 11 hearing. Other committee hearings also are to be held, most likely when the new Congress convenes next year.

Turner Broadcasting System and other outspoken opponents of the 1990 "sunset" provision lifting all restrictions were happy the FCC will let the public be heard on an issue of such vital concern to viewers. On the other hand, there was widespread disappointment among large group owners such as Metromedia, CapCities and Cox.

Gloom was thick at the tv networks, which have temporarily at least—as happened with domestic syndication—lost a crucial battle in Congress after having won at FCC.

Meanwhile, there was almost total official silence from this sector. ABC and NBC had no comment. A CBS spokesman hoped this reevaluation period would produce support for 12-12-12 as originally hammered out.#

Rusty Jones says hello to Beatrice

By JOANNE CLEAVER
Crain News Service

Chicago—Beatrice Cos. has acquired automobile rustproofer Rusty Jones.

The buyout occurred in June, but no announcement was made purportedly because of other pressing business—namely Beatrice's $2.8 billion takeover of Esmark.

The 16-year-old rustproofing company has enjoyed rapid expansion in recent years, racking up revenue growth of 20% in all but one of the last five years. Last year, sales hit $21 million.

Rusty Jones markets its rustproofing, paint protector and upholstery dirt and spot-guard services through automobile dealers in Florida, the Midwest and Northeast.

Company founder and president Michael Mater hopes Beatrice's marketing muscle will open the path to national distribution of Rusty Jones services.

"Beatrice has made public their intention to become a marketing-driven company," he noted. Given the tremendous success of his company's 8-year-old marketing program based on the animated Rusty Jones character, it's only logical that the company would catch

(Continued on Page 69)

Spirits industry beams over BATF review

By STEVEN W. COLFORD

WASHINGTON—It should be advertising as usual for the beer, liquor and wine industries now that the federal government has etched only minor changes into alcohol-promotion regulations.

It also has put off awhile longer any decision on more controversial issues.

The consensus was positive from the alcohol and advertising industries last week to the slow curtain being drawn by the Bureau of Alcohol, Tobacco & Firearms on the alcohol advertising review launched in 1978.

Comparative taste-test advertising was perhaps the only "hot" question that BATF tackled, and there the bureau retreated from its original proposal for specific testing criteria in favor of a broader regulation allowing "any scientifically accepted procedure."

The issue has roots in comparative ads that Taylor California Cellars, Gonzales, Cal., used in the late 1970s to put its brands up against competitors.

BATF's taste-test decision was "very useful" because it will allow advertisers to rely on the usual "false-or-deceptive" standard, said Dan Jaffe, senior vp-government affairs, American Advertising Federation.

Other controversial BATF proposals regarding athlete endorsements, voluntary industry codes and use of the terms "light" and "natural" will undergo yet another round of industry comments before 1985, said Roger Bowling, BATF coordinator for the regulatory review.

About the only sour notes came from advertising groups slightly annoyed at BATF's insistence on writing into its regulations a ban on subliminal advertising.

"There's nothing in there that is worrisome or that changes anything," said Chuck Adams, exec vp-Washington for the American Assn. of Advertising Agencies. "I don't think ads will change, but I was a little put off by their statement on subliminal advertising, almost implying that it was necessary to prohibit it even though it's not done."

If the bureau was going to revise its regulations to include a ban on subliminal advertising, then it might also have stated categorially that it found no evidence that such ads existed, AAF's Mr. Jaffe added.

The alcohol industry was even more sanguine about the BATF action that drops minimum type-size requirements for copy; relies on dictionary definitions for such terms as "false" and "disparaging," and allows use of the terms "pure," "double-distilled" and "triple-distilled" in "truthful distilled spirits ads."

The Distilled Spirits Council of the U.S. praised the final BATF regulations as being "part of the continuing evolution in the regulation of our industry toward what is appropriate."#

'Modern Healthcare' to expand

DENVER—Crain Communications Inc.'s *Modern Healthcare* will increase its frequency to 26 issues a year beginning Jan. 4, publisher Charles S. Lauer said last week at the American Hospital Assn. convention here.

"By publishing every other week," said Mr. Lauer, "we will be able to provide our readers with even more timely news and additional editorial coverage. In today's rapidly changing healthcare industry, the executives who run America's healthcare institutions need information earlier than ever before." In 1984, *Modern Healthcare* went to 16 issues a year from 12.

The new publishing schedule calls for the magazine to arrive on readers' desks every other Friday. Said editor Donald E.L. Johnson, "*Modern Healthcare* is expanding its editorial staff and will put increased emphasis on breaking news stories."

Crain Communications acquired *Modern Healthcare* in 1976 from McGraw-Hill. Crain also publishes ADVERTISING AGE and 18 other business news magazines.#

corrections & clarifications

- Lempert Design & Marketing, Belleville, N.J., remains the agency of record for Universal Wines & Spirits' Pasta D' Italia (AA, Aug. 9, P. 1).
- In the Hearst Corp. profile in the 100 Media Companies issue (AA, June 28, P. 55), it should have stated *Redbook* single-copy sales were at 653,735 on Dec. 31, 1983, when total *paid* was at 4,019,611.
- Due to an editing error, a story reported that Roone Arledge, president of ABC News and Sports, offered remarks before the International Olympic Committee (AA, Aug. 9, P. 2). In fact, Mr. Arledge has not recently appeared before the committee.#

Nestle's sales hurting from WHO's infant formula code

By VALERIE MACKIE

Nestle S.A. is losing global market share in its infant formula business largely because it is strictly following United Nations' guidelines and many of its competitors are not, Nestle sources say.

"Our sales have been fairly flat worldwide since we started applying the WHO [World Health Organization] code," said Francois Perroud, a Nestle spokesman in Vevey, Switzerland.

"We have strictly applied the WHO code and others [companies] haven't," Mr. Perroud said.

The WHO code, adopted by the United Nations unit in 1981, recommends that direct advertising of infant formulas be prohibited and that consumers be informed that breast-feeding is usually the best source of food for infants. Critics had charged that Nestle and other formula manufacturers were leading Third World mothers away from breast-feeding to a potentially unsafe consumer product.

There are about 30 major companies selling infant formula around the world, but by far Nestle is the market leader, with an estimated 50% worldwide share.

Three U.S.-based companies also rank in the top tier: American Home Products, Abbott Laboratories and Bristol-Myers. The extent of Nestle's losses are unknown because share figures in developing countries are uncertain.

But because of worldwide publicity aimed at Nestle's marketing tactics, the company not only adopted the WHO code, but a tougher UNICEF code as well.

U.S. companies have adopted the WHO code in developing countries, but none have adopted the UNICEF code, sources say.

The penalty within Nestle for not strictly following the code is "you can get fired," said one Nestle executive in the field.

In Singapore, the local code allows hospitals to receive and dispense infant formula samples supplied by manufacturers, but the WHO code prohibits it.

"It's killing us," said one of Nestle's marketing executives in Singapore. "Most of our competitors still give samples."

Bristol-Myers concedes it does not follow the WHO code in Singapore because "Singapore is a developed country in Asia," said Jerry Parrott, director of corporate public relations for Bristol-Myers.

"If Nestle is losing market share it is through normal marketing dynamics," claims David Jones, vp-pr at Abbott Labs.

The three U.S. infant formula marketers have hired pollster Lou Harris to audit how well they are complying with the WHO code. "We fully expect he'll find areas where we don't comply. We'll try to correct them," Mr. Jones said.#

Top brewer helps rival stay afloat

By MARY FARQUHARSON

CARACAS—The leading Venezuelan brewer, Polar, is directing and helping finance a rival beer's advertising, promotions and distribution to help the struggling brew remain competitive.

The reason that Polar is helping nearly bankrupt Nacional is to keep the government at bay. With a 1983 market share of more than 90%, Polar is anxious to avoid becoming a monopoly producer, a situation that could pave the way for a government takeover.

Another reason for keeping Nacional afloat is that its higher production costs strengthen Polar's periodic pleas to the government for price increases.

Last year, with only 4% of the market and the U.S.' Citibank moving in to protect a loan made to the company, Nacional's days appeared numbered.

But Polar came to the rescue with expertise and 70% of the funds needed to establish a new company, called Digecerca, to promote and distribute Nacional's beer. Most of Digecerca's staff is on loan from Polar.

Digecerca hired Venezuela's largest ad agency, ARS Publicidad, to handle Nacional's advertising. Polar does not advertise its own beer, though it does advertise a nonalcoholic malt drink called Maltin Polar. Beer advertising is banned on Venezuelan tv.

Nacional's campaign is directed at middle-aged men, an important segment of the beer market, said ARS account supervisor Guillermo Cardenas. The theme of print ads and posters is "De hombre a hombre" ("From man to man"), and $1.7 million has been spent on the campaign in the last seven months.

In addition, Digecerca is organizing beer-tasting sessions in small bars and using point-of-purchase merchandising in supermarkets.

With Polar's help, Nacional has captured 10% of the market and plans to intensify its promotional campaign, sources said.#

Chinese pay tv channel coming to U.S.

By SUE GIRDWOOD

A Hong Kong broadcasting company and a U.S. cable tv operator will introduce a Chinese-language pay tv channel by the end of the year in Southern California.

The new service, called the Jade Channel, will be ad supported and will seek subscribers from about 12,000 Chinese-speaking households in three Los Angeles County communities.

Falcon Cable Television, Pasadena, has signed an agreement with Hong Kong Television Broadcasts Ltd. to introduce the new channel, said John Kobara, Falcon's director of public affairs.

The Jade Channel will serve communities where about 40% of the population speaks Chinese as a first language, Mr. Kobara said. Subscription costs will range from $15 to $20 a month.

The three communities are about 10 miles from Los Angeles. Falcon reaches more than 150,000 households in 65 communities throughout California with a variety of cable and pay tv services.

Unlike most pay tv services, the Jade Channel will be open to advertisers and will offer four minutes of advertising per hour.

The channel will seek local advertisers whose only current outlet to the Chinese community is through the area's large number of Chinese-language newspapers.

The new channel will offer tv programs produced in Hong Kong and Taiwan—shows already familiar to Chinese immigrants—and will feature five hours a day of news and current affairs. The programs will be shipped to Southern California for transmission.

The Jade Channel will offer programing in Cantonese and Mandarin, the two dominant dialects among Chinese in the targeted area. Plans call for one dialect to be transmitted via the tv set while the other will be simulcast on fm radio, Mr. Kobara said. If that plan does not work, both dialects will be transmitted via radio.

Falcon plans to promote the new channel through a series of public relations events in Southern California. Direct mail and newspaper ads also will be used, and initial plans call for advertising to be handled in-house.#

Merger sidetracks major newspaper war in Singapore

By JACK BURTON

SINGAPORE—The old adage, "If you can't beat 'em, join 'em," holds especially true in Singapore's newspaper industry.

For the past several months, Singapore had been expecting one of the fiercest newspaper wars in Asia to break out when the afternoon *Monitor* announced plans to introduce a morning edition next year that would compete head-on with the *Straits Times*.

A new, broadsheet version of the tabloid *Monitor* was supposed to be unveiled Aug. 5 to provide a first glimpse of the morning edition that would take on the the 139-year-old *Straits Times*, the country's most influential publication and the leading English-language newspaper in the Far East.

But before that could happen, the parent companies of the two rival papers made the surprise announcement that they were merging, thus cutting short the extensive preparations being made for the anticipated clash.

In an official announcement, the Associated Straits Times Cos.—Straits Times Press Ltd. and Times Publishing—and Singapore News and Publishing Ltd., owners of the *Monitor*, said the merger was designed to avoid excessive competition that could financially cripple one or both companies, which are comfortably in the black.

They estimated that if the newspaper war proceeded it would cost them $23 million in duplicated plants and equipment and another $9 million to $14 million to wage the circulation battle itself.

"The feeling was that in a competitive situation we would be fighting each other to death and one of us would lose," said John Orr, chief executive of the *Monitor*. "To avoid that, they decided the merger was the best solution. Although I agree the merger makes sense from a financial point of view, I am disappointed that it will eliminate much of the competition."

Mr. Orr and his *Monitor* colleagues were not the only ones who were disappointed. A day after the announcement, about 80 journalists from the *Straits Times* held a demonstration to protest the decision, and *Straits Times* editor-in-chief Peter Lim was quoted as saying, "Now the question arises again whether there will be further constraints on the press."

Mr. Lim's remarks reflect the prevalent opinion within Singapore that it was not financial considerations alone that forced the merger, but government intervention as well.

"The government thought that expanding the number of newspapers in the morning probably was too much to control, hampering its management of the news," said one industry source.

Although the Singapore press is basically free, it practices some self-censorship to avoid offending the government of Prime Minister Lee Kuan Yew, who runs what sometimes has been described as a "benevolent dictatorship."

One member of parliament told the press, "The way things are going, our newspapers will end up like "Pravda" [of the Soviet Union] and *Renmin Ribao* [the Communist Chinese party daily]."

The merger also comes as bad news to Singapore's advertisers. Ad

research beat / BY JACK HONOMICHL

Employe confidentiality on line in lawsuit

CHICAGO—A suit due to be heard here Aug. 27 could be of special interest to research company employes who sign confidentiality agreements with their employers or to any employer that has insisted on such agreements.

The legal considerations being aired in this case, which already is being touted by lawyers as creating "a new rule of law" pertaining to such agreements, are bound to become more commonplace as advanced technology and systems are employed in data collection and processing and research companies feel the need to protect trade secrets from potential competitors.

The wrangle is between Information Resources Inc., the Chicago-based test-marketing company best known for its eight minimarket BehaviorScan system, and a former employe of the company, David Disher.

The main issue is whether, under Illinois law, an employe confidentiality agreement can be invalidated for being too broad. Since almost all of IRI's salaried employes have signed the same agreement as Mr. Disher, the stakes are high. Mr. Disher's attorneys are arguing that the IRI confidentiality agreement was so broadly worded that it was tantamount to a "noncompete" employe contract, which had the effect of tying employes to IRI, even after discharge, in an unreasonable manner.

Noncompete contracts usually have a time or geographical limit and specify subject matter. The intent [illegible] balance the employer's right to protect what are truly "trade secrets" with the right of the ex-employe to earn a living commensurate with his general professional skills.

The IRI confidentiality agreement, said Mr. Disher's counsel, was not limited by time or geography and implied that almost anything an employe learned while at IRI was considered a "trade secret."

For instance, in court testimony, John Malec, chairman of IRI, contended IRI's client list was a "trade secret."

In August, 1981, IRI offered Mr. Disher a job, and he liquidated his market-research business in Cincinnati (a store-audit company called Market Inputs), sold his home, moved his wife and three children and bought a home in suburban Naperville, Ill. At the outset, Mr. Disher was made vp-operations in charge of all market operations of the BehaviorScan system, including market fieldwork, data input and in-market quality control. Salary: $50,000 plus bonus.

In January, 1982, Mr. Disher—along with 300 other IRI employes—was asked to sign IRI's Employe Confidentiality Agreement, which he was told was a non-negotiable condition of employment. Mr. Disher claims he objected, but was afraid not to sign, lest he lose his job. The agreement included this statement: "This Agreement of Confidentiality will survive my employment at IRI."

On April 6, 1983, IRI fired Mr. Disher, who had been promoted to senior vp-market operations and had received a 12.5% salary increase just three months before.

IRI told Mr. Disher he could use the company's offices for 90 days while seeking new employment, but they preferred that he not seek employment at Burke Marketing Services. (Before starting Market Inputs, Mr. Disher was employed by Burke's Market Audits, which among other things handled the fieldwork for AdTel system, a competitor of BehaviorScan.) Later, this restriction was expanded to A.C. Nielsen Co., which has been talking for some time about launching a new test-marketing system that would compete directly with BehaviorScan.

These stipulations were made to Mr. Disher in a letter dated June 22, 1983. Mr. Disher refused to agree, then was told he could no longer use the IRI offices.

Subsequently, Mr. Disher had interviews with Nielsen, which offered him a job as a field operations manager at $75,000 per year. IRI wrote to Nielsen's lawyer about the confidentiality agreements they believed were binding on Mr. Disher, and Nielsen officials considered this a threat to sue if they hired Mr. Disher. Nielsen withdrew the job offer—unless Mr. Disher could get relief in the courts.

Mr. Disher sued in county court, claiming "interference with prospective economic advantage" and asked for damages. However, the damage claim subsequently was withdrawn and has been included in a federal court suit due to start in early 1985. In that suit—under antitrust law—Mr. Disher raises other questions related to IRI stock he acquired while an employe but which he is not free to dispose of. Should Mr. Disher prevail, lawyers close to the case say the settlement—triple damages plus punitive awards and legal fees—could amount to between $4 million and $5 million.

IRI filed a counterclaim to Mr. Disher's county suit. In the original hearing on that claim, IRI won. Mr. Disher appealed, and a merit opinion on May 1 reversed the decision. It called the IRI agreement "palpably unfair" and noted "the probability that plaintiff [Mr. Disher] is entitled to have the agreement declared null and void."

IRI promptly launched an appeal to the Illinois supreme court that is pending.

In the interim, Mr. Disher's suit against IRI starts Aug. 27. Its outcome probably will influence the success of the antitrust suit he has filed in federal court.

IRI president Gian Fulgoni said the probable consequence of the suits, countersuits and appeals is that "if Disher wins, probably 90% of the confidentiality agreements in Illinois will be void." And, he could have added, so will all those signed by IRI employes.

Mr. Disher, 40, has moved back to Cincinnati, and he is now employed by Marketing Research Services. Despite all his troubles, he recently told me, "You know, it may sound funny, but I kinda wish I was still back at IRI."#

The Book on Teen-agers.

That's what TRU's syndicated study of the vital — but volatile — youth market is already being called.

Why?

It's comprehensive. It correlates teen buying and media habits, attitudes and interests. It provides incisive insights and reliable data.

It's continuous. The major report — containing 500 pages of tables and interpretation — is released annually. A six-month update provides semi-annual tracking.

It communicates. TRU's study is uniquely readable. It features a life-style segmentation analysis, which describes *your* best teen-age prospects, and a summary of findings, which presents a clear, current overview of the market. It also makes fast references easy with a subject index and a complete table index.

TRU's study is for understanding and marketing. It's for monitoring and segmenting — and for fielding your custom questions.

So, if teens are important to you — either for what they buy today or for what they'll purchase as adults tomorrow — then TRU's study is a must.

Used by major advertisers, agencies and media, it is *the* book on teen-agers.

For details, phone: Peter Zollo (312) 295-6650

Singapore newspapers

(Continued from Page 38)

agencies were particularly interested in the expected competition between the two papers since newspapers received 68% of the $135 million spent on advertising in major media in 1983.

Advertisers were hoping that the newspaper war would force reductions in the rates charged by the *Straits Times*, which grabs a large share of print advertising due to its dominance in a market where those reading the English-language press constitute the most well-educated and affluent segment of Singapore's predominantly Chinese population.

With a circulation of 246,000 on weekdays and 265,000 on Sundays, an estimated 37% of Singapore adults read the *Straits Times*, a figure matching the combined readership of the city's Chinese-language press.

Backed by these impressive numbers, the *Straits Times* charges $5,330 for a b&w page ad, and it frequently jacks up the base rate by charging premiums for particularly desirable ad space and the use of color.

In comparison, the *Monitor*, with a circulation of 50,000 on weekdays and 90,000 on Sundays, charges about one-quarter as much for a tabloid-size ad and one-third for a broadsheet Sunday ad.

One ad executive said that he was looking forward to the competition as one way "to humble the *Straits Times*, which had become arrogant due to its tradition, reach and reader loyalty."

Dennis Khoo, president of the Singapore Advertisers Assn., said that "because of competition between the two newspaper groups, the *Straits Times* has not arbitrarily increased its ad rates. Now the situation may be different."

It was to capture those ad dollars as well as to escape from the stagnating afternoon market that the *Monitor* wanted to publish a morning edition.

Although it still is unclear what the outcome of the merger will be, Mr. Orr predicted that the *Monitor* "will remain in the afternoon and on Sundays, but we won't go into the morning unless it's some type of specialized publication." Plans also call for each newspaper to retain separate editorial and ad sales staffs.

In addition to the *Monitor* and the *Straits Times*, Singapore has one other English-language newspaper, which covers financial issues, one Malay-language newspaper and one Chinese-language publication. All are published by the Straits Times Group.

SNPL also publishes two other newspapers in Chinese.#

Ad-to-sales ratios listed by industry

EVANSTON, ILL.—The eighth annual study of advertising and promotion expenditures of U.S. corporations and industry sectors has been issued by Schonfeld & Associates.

The study covers advertising and promotion expenditures of more than 5,000 individual companies in 258 Standard Industrial Classification industry sectors. It includes ratios of ad spending to net sales and ad spending to gross margin (sales minus cost of goods sold).

The accompanying table from the study contains average 1983 industry ratios. These are commonly used for ad budgeting, but Schonfeld & Associates cautions that within many of the industry sectors individual companies may spend significantly more or significantly less than the average shown here.

The raw data for the study were compiled from 10K reports filed by publicly owned companies with the Securities & Exchange Commission. Therefore, advertising and promotion expenditures often include media and nonmedia spending such as collateral literature, production, etc.

For this reason, consulting companies' figures are often substantially larger than figures from media auditing services such as Leading National Advertisers.

"In some categories, such as alcoholic beverages, there is substantial point-of-purchase advertising. By subtracting media-spending estimates, it is interesting to see how much nonmedia spending there is," said company chairman Eugene Schonfeld.

The study is particularly useful to industrial and business-to-business advertisers, because these companies are not well covered by other reference works. For example, the Schonfeld study contains data on more than 50 electronic computing companies in SIC 3681 alone, plus many related industries such as computer software.

Although data for the study were compiled from published financial statements rather than from surveys, cautious interpretation is required for several reasons.

First, companies may vary in what they include under advertising and promotion expenditures. Second, many large companies are in several fields, yet are listed only in their primary industry sector. Distortion may result because a large subsidiary may not be included in the industry in which it competes. Third, a few large companies are privately held and their figures are not included.

Besides ratios, the complete study forecasts 1984 and 1985 expenditures for each company, including its advertising growth rate, a measure of ad spending stability and Schonfeld's rating of ad effectiveness.

Many of the new high-technology companies that went public during the past two years are covered.

A copy of the 173-page study is available for $275 (or $250 prepaid) from Schonfeld & Associates, 2550 Crawford Ave., 60201.#

C-E revs up team for racing clients

WARREN, MICH.—Motor racing interest is back and Campbell-Ewald is revving up its engines.

CECO Communications, a C-E subsidiary, has formed a motor-sports performance marketing group to serve clients with racing interests, including Chevrolet, AC Delco, PPG Industries and Kelly Services.

CECO also will use the group to seek new business from companies with active or potential motor-sports marketing programs, said Larry Giancio, CECO vp-sales and head of the new group.

Mr. Giancio predicted that the CECO group will attract enough business to overtake a similar motor-sports marketing group at J. Walter Thompson Co., Detroit (AA, Dec. 26), which curently bills an estimated $1.5 million a year.

Mr. Giancio's group will draw on Campbell-Ewald for advertising creative services and CECO for pr services.#

Fashion lines rock to Prince, Jackson beat

By PAT SLOAN

NEW YORK—New fashion lines keying on hot rock stars Michael Jackson and Prince are creating billion-dollar visions for those modern impressarios—fashion licensors—hoping to make clothing the new gold mine for pop music artists and retailers.

But for that gold rush talk to come true, these licensors need to overcome a less-than-total embrace by retailers. The volatility of linking products with personalities, the retailers say, could quickly cool off what's hot today.

That doesn't quell the unabashed enthusiasm that comes from Bob Michaelson, director of licensing for Stadium Management, the primary Jackson fashion licensor. If Mr. Michaelson has his way, Jackson fans will have to throw out half their wardrobes next year.

At the same time, Licensing Corp. of America is negotiating with potential clothing licensees for the Prince/"Purple Rain" label, pouncing on the unexpected popularity this summer of the autobiographical movie "Purple Rain."

Mr. Michaelson, whose company holds rights to all Jackson clothing except belts, buttons, sweatshirts and t-shirts, soon will announce at least 12 new licensees (AA, Aug. 13).

Their designs, to come out in 1985, will set a whole

Did Czar Nicholas quibble with Carl Faberge over the price of eggs?
When you are dealing with something quite extraordinary, price somehow seems irrelevant or even irreverent. Indeed, for those who appreciate fine Scotch, Johnnie Walker Black is priceless.

Paying the price

The latest addition to Somerset Importers' campaign for Johnny Walker Black depicts the brand as expensive but worth the price. The new series breaks in September in consumer magazines. Smith/Greenland, New York, is the agency.

Marketers and athletes make golden match

By ROBERT RAISSMAN

Riding the wave of public interest in the Olympic gold medal winners who graced its channels for the last two weeks, ABC-TV is on the verge of signing a multi-fight contract with champs on the U.S. boxing team, including widely acclaimed welterweight Mark Breland.

Separately, ABC said it will tape an International Medalists Gymnastics Tour that McDonald's Corp. will take to four U.S. cities next month. A one-hour special based on the tour would air later. McDonald's has lined up not only U.S. medalists and team members, but medal winners from Romania and Japan and has invitations pending with Chinese medalists.

U.S. medalists already are touring the U.S. this week on a trip sponsored by Southland Corp., Dallas (AA, Aug. 6).

The ABC deal with young Mr. Breland, expected to be the first Olympic boxer to turn a gold medal into cash, reportedly would be worth as much as $1 million.

As talks took place, two other popular gold medalists, gymnast Mary Lou Retton and marathoner Joan Benoit, also made news.

Ms. Retton, the teen-age pixie from Fairmont, W. Va., signed up to be represented by a gymnastics and sports marketing company. It said she has yet to cut a deal with an advertiser but has had "an unbelievable number of offers."

Ms. Benoit, the women's marathon gold medalist, will be featured in a coupon promotion for Dole pineapple juice and fresh bananas in October, supported by ads

Record crowd due at AA Workshop

NEW YORK—A record 1,000-plus attendees are expected when ADVERTISING AGE kicks off its 27th annual Creative Workshop here on Aug. 19.

Participants represent 46 states and 37 countries—including a delegation of 50 representatives from Finland.

The Aug. 19 to 22 workshop here will open with Robert Pittman, exec vp-chief operating officer for Warner Amex Satellite Entertainment Co., discussing the impact of video music on today's youth market. Buttons, posters, balloons and a live performance by jazz-pop band Chicago will be included.

The three days following the opening session will be filled with more than 40 sessions on a variety of subjects addressing all phases of advertising and marketing.#

U.S. probes soda pricing

By NANCY GIGES

At least six soft-drink executives and an unidentified "mystery" witness have testified in Baltimore before a federal grand jury investigating possible soft-drink industry antitrust violations.

Convened last March, the grand jury has heard testimony from at least three current and former Dr Pepper executives. Questions pertained to the Dr Pepper and Coca-Cola pricing policies.

Witnesses also were asked about the Coca-Cola link of William Schermerhorn, the former Dr Pepper vp-marketing who joined Coca-Cola USA in April as an assistant to Sergio Zyman, senior vp-marketing.

Even if the investigation goes nowhere, its timing could add to the difficulties already faced by Mr. Zyman, whose domestic soft-drink division has been involved in a struggle with the corporate marketing department headed by Ira Herbert (AA, Aug. 6).

Anthony Nanni, chief of the trial section, Justice Department antitrust division, Washington, confirmed investigations of this type normally come about in two ways, via "studies of our own and from complaints." He would not specify how this one began.

Coca-Cola, Pepsi-Cola and Dr Pepper all said they were aware the investigation was taking place. A spokesman at Atlanta-based Coca-Cola said, "We clearly do not think that Coca-Cola or any employes have done anything illegal." Pepsi-Cola said it was asked for information relating to the investigation earlier in the year, cooperated and was assured it was not a grand jury target. Pepsi has not heard any more from the authorities, a spokeswoman added.

At Dr Pepper, an official was asked about speculation executives of the two companies may have shared confidential information. He said, "Who needs to have a secret rendezvous? We all know what each other is

Today to test on-air taboo

By RUTH STROUD

It's a sensitive subject for advertising, but that isn't stopping VLI Corp. from joining the pioneering effort to air birth-control ads on radio and tv.

Irvine, Cal.-based VLI said it is preparing broadcast ads for its year-old Today contraceptive sponge, beginning with radio commercials scheduled to break at the end of the month.

The company and its ad agency, Keye/Donna/Pearlstein, also are working on tv spots—to be produced this month—that will run on cable outlets and independent stations, with a goal of eventual network airing.

VLI's bold strike joins the effort of Thompson Medical Co. in the movement to give contraceptives broader advertising exposure. Thompson began airing spots for its Encare vaginal contraceptive last spring on cable and college radio stations (AA, March 19). It later added six independent tv stations and expects to begin pursuing network acceptance "shortly," a spokesman said.

Marty Johnson, account supervisor for Keye/Donna/Pearlstein, compared the struggle to persuade radio stations to run Today spots to the past experiences of marketers of hemorrhoidal suppositories, feminine protection products and vaginal hygiene sprays. "Some radio stations are open and accepting," she said. "Others say, 'You've got to be kidding!' "

VLI's strategy for Today is to position the product as a breakthrough comparable to the birth-control pill. "In 1960, the pill gave women a new freedom," a woman

Suntory seeks share of California winery

NEW YORK—Suntory International, the U.S. arm of Suntory Ltd., Japan's giant spirits marketer, plans to acquire a major interest in Chateau St. Jean, a premium northern California winery, sources say. The move is seen as a major effort to exploit the growing Japanese wine market. Suntory, which also owns a share of Firestone Vineyard, a central California winery, refused comment.

Thomson closes book on 'Broadcast Week'

NEW YORK—International Thomson Business Press is folding *Broadcast Week* after 21 months of publication and estimated multi-million-dollar losses. The current issue of the tabloid trade weekly, dated Aug. 13, is its last, publisher Anita Gold said. The tabloid was published by Thomson subsidiary Titsch Communications.

Mondale campaign taps McCaffrey & McCall

NEW YORK—McCaffrey & McCall has been retained by the Mondale-Ferraro campaign to handle an undisclosed media project, a campaign spokesman said. Sources indicated that M&M would be involved in crea-

(Continued on Page 67)

‘Where’s the beef III’ starts from scratch

By SCOTT HUME

Wendy's International is betting that, as McDonald's discovered during the Olympics, there's beef to be found in scratch-card games tied to televised sports.

Beginning the week of Aug. 27, Wendy's will kick off a promotion tied to ABC's "Monday Night Football" telecasts. Game cards distributed in Wendy's will reveal the names of National Football League teams. Customers who have cards bearing the name of the winning team from that Monday's game mail their cards to Wendy's.

Contest winners will be chosen (from among cards sent in) during advertising time on the following Monday night's telecast, drawn by Clara "Where's the beef?" Peller and former Chicago Bears linebacker (and current Miller Lite pitchman) Dick Butkus. Top prize during each of the six weeks the game is scheduled to run will be $20,000 in cash.

On the "Monday Night Football" game of Sept. 17, Wendy's also will break its new two-spot set of "Where's the beef?" commercials.

Wendy's says it will spend about $30 million on the new campaign (AA, Aug. 13), giving "WTB III" the largest ad budget in the chain's history. Wendy's spent only $31 million on tv advertising in all of 1982 (and $50 million last year). The chain's tv spending this year could come close to $100 million.

Wendy's also is betting the payback on the new campaign will approach results of the first and second rounds of "beef" commercials. Wendy's systemwide sales during the first six months of 1984 were $1.16 billion, 32% better than the $875.3 million taken in during 1983's first half.

The $30 million budget for the fall campaign

(Continued on Page 67)

news summary

Thursday, August 16, 1984

The blood, sweat and tears that resulted in gold medals for U.S. Olympic athletes is paying off again. Boxer Mark Breland and his champion companions are on the verge of signing top-dollar fight contracts with ABC, and gymnast Mary Lou Retton has hired an agent. *See Page 1.*

It's a sensitive subject in advertising, but VLI Corp. is joining the pioneering effort to air ads for birth-control products on radio and tv. The company is preparing broadcast ads for its year-old Today contraceptive sponge. *See Page 1.*

FINALLY.
A METHOD
WITHOUT
THE MADNESS.
Today

Wendy's will precede its third "Where's the beef?" campaign with a scratch-card game promotion tied to ABC's "Monday Night Football." *See Page 2.*

The Four A's is fighting efforts on two fronts to regulate bank advertising. Both the Federal Reserve Board and the U.S. House are looking to standardize interest-rate information in ads. *See Page 3.*

Miller Brewing is introducing two new brands in an effort to reduce its dependence on the slumping High Life premium brand. The brewer has brought out a low-alcohol brand, Sharp's LA, in five markets, and is breaking a light extension of Meister Brau. *See Page 3.*

A.C. Nielsen Co. will introduce a new market research service next year in Japan. *See Page 3.*

Ford Motor Co. thinks selling cars by computer may be a better idea than simply using salespeople. The company is testing a computerized "selection center" in four of its dealerships. *See Page 5.*

U.S. probe

(Continued from Page 1)

doing because of the bottler setup in the normal course of business," a reference to the fact that franchised bottlers frequently handle brands of different companies. About 200 Dr Pepper bottlers handle Coke and another 200 sell Pepsi.

The Dr Pepper spokesman said Mr. Schermerhorn's departure was in no way related to the investigation and that his move was a loss to the company.

Steve Lindbloom, who worked at Dr Pepper until January, 1983, testified for about 20 minutes before the grand jury in April. Mr. Lindbloom now is a brand manager at General Foods' Oscar Mayer subsidiary in Madison, Wis.

Mr. Lindbloom identified one former and one present Pepper exec who he said also appeared before the grand jury, but their appearances could not be independently verified.

Mr. Lindbloom, who believes there is nothing to the investigation, said that while he was waiting to testify, an individual whose identity was unknown to him spent at least six hours on the witness stand. This person left the stand from time to time to seek an attorney's advice and departed after a friendly goodby and handshake with the federal attorneys. Mr. Lindbloom said this suggested to him that the government felt it had grounds to continue the probe.

He said that when asked how pricing changes were made at Dr Pepper and by whom, he testified that such major decisions in relatively small companies like Dr Pepper usually were made at the presidential level. But recommendations came from below.

He said the Coca-Cola name came up in questions about other companies that distributed soft-drink concentrate, but he couldn't recall the other companies identified.

When asked to name all with whom he worked, he said he did so, but he found it interesting that many of those in whom the grand jury seemed interested were not involved in pricing even though that subject dominated the questioning.

Mr. Lindbloom said while at Dr Pepper, he never encountered anyone who was deviously engaged in gathering information in order to preempt a competitor. Dr Pepper could do little with normal gossip in the industry because its moves were so guided by its franchised bottlers. As for price-related industry activity, he said such news normally was circulated among all companies within 24 hours.#

Agency financial results

With all agencies except Ally & Gargano reporting, shops reported lucrative second-quarter and first-half periods of 1984. Only FCB reported a decline in income. Source: *Advertising Age.*

Shops’ 2nd quarter strong, but ‘goofy’

By STEWART ALTER

While 1984 is continuing, as expected, to be a very strong year financially for public ad agencies, second-quarter results weren't without some surprises in the loss column.

"It basically continues to be a terrific year," commented Alan Gottesman, a vp who tracks the ad industry at L.F. Rothschild, Unterberg, Towbin, New York, "but there are enough goofy goings-on to keep it from being boring."

The "goofy" things to which Mr. Gottesman referred are decreased second-quarter earnings figures for JWT Group and Foote, Cone & Belding Communications, agencies that otherwise had a strong first half. Meanwhile, as the accompanying chart indicates, most other public shops had strong, consistent second quarters.

JWT's second-quarter revenues rose only 9% to $128.1 million while earnings were up only 2% to $6.2 million; however, earnings per share declined in the second quarter to $1.01, compared to $1.08 per share in the similar period of 1983, when there were fewer shares outstanding. FCB's second-quarter revenues were up a healthy 17.5% to $70.2 million, but earnings dropped 3% to $4.5 million. Earnings per share dropped from $1.40 per share to $1.29 per share.

In JWT's case, the explanation seems to be client shifting of spending from the second quarter to the first and third, noted Mary Vandeventer, a vp who follows ad agencies at Widmann, Blee & Co., Narbeth, Pa. For this reason, which relates to FCB as well, she noted, "I think the six-month figures are more indicative than the quarter, and the theme here is that the year looks very strong."

FCB's situation is a bit more complex and involves its merger with NCK Organization last year, which added a substantial $150 million in international billings, and a decline in the value of its stock port-

Sugar industry stirs not-so-sweet fight

By GAY JERVEY
and STEVEN W. COLFORD

The sugar industry, in the midst of preparing a pro-sugar ad campaign, unleashed an attack this week on its nemesis, G.D. Searle & Co.'s aspartame sweetener.

The Washington-based Sugar Assn. asked the Federal Trade Commission to curb Skokie, Ill.-based Searle advertising for NutraSweet and Equal, claiming it is "deceptive."

Meanwhile, the association this month will begin a campaign to promote the positive aspects of sugar.

The campaign will break on radio and in magazines dated October.

North Castle Partners, Greenwich, Conn., is the agency.

The organization's dual actions come as aspartame especially has breathed new life into the low-calorie beverage business.

According to U.S. Department of Agriculture statistics, U.S. consumption of aspartame doubled to 2 lbs. per capita last year alone.

In addition, Searle and producers of NutraSweet products spent about $120 million on ad and related promotional campaigns during the last three quarters of 1983, with 1984 spending likely to double, the association said in its petition to the FTC.

The petition, filed Aug. 14, contends Searle's ads "are misleading in several aspects," Sugar Assn. president J.R. O'Connell said. The petition referred to calorie claims, weight-control claims, dental health and other issues.

G.D. Searle officials were not available for comment.

■ The association is particularly concerned that G.D. Searle's ads falsely imply that NutraSweet and Equal are "low calorie" products, said Norris Bolinback, the association's vp-scientic affairs.

He said the products are not low-calorie items, but rather "high-intensity sweeteners."#

world news wire

JOHANNESBURG—McCann-Erickson Worldwide has bought 100% interest in G. de Villiers & Co., South Africa's ninth-largest agency, with 1983 billings of $29 million.

PARIS—The United Nations Educational, Scientific & Cultural Organization has picked Wagner & Baroody, a public relations company in Washington, to improve the organization's image in the U.S. No budget figures available.

MELBOURNE—Mars Confectionery plans to roll out M&M's candies in Australia later this year following lengthy tests in Brisbane. George Patterson Pty. is handling the test, using the traditional theme "Melts in your mouth, not in your hand."

SYDNEY—Leigh-Mardon moved its $2 million consumer products account to Campaign Palace from Forbes, Macfie, Hansen.

LONDON—Robert Maxwell, new owner of Mirror Group Newspapers, has postponed the launch of a new London evening newspaper until next spring. A fall launch had been planned.

HELSINKI—The Finnish government failed to include a proposed ad tax in next year's budget, but many advertisers and agencies will continue lobbying against the proposal, fearing the issue will resurface.

PARMA, ITALY—Europe's largest dairy company, Parmalat, plans to launch Bouquet wines in Tetrapak cartons instead of bottles this September in Italy and then the U.S. Advertising is handled in-house in Italy and by Wellington & Messina in the U.S.

TORONTO—Cantel Ltd. has picked Young & Rubicam to handle the $1 million launch of Canada's first cellular radio-telephone service.

SAO PAULO—Gustavo Cubas, president of Publicidade Siboney agency, plans to start a weekly Portuguese-language news magazine called *Afinal* (Finally) in September. The publication will be Brazil's fifth news magazine and as such is considered a high risk.

SYDNEY—Keywest Investments has picked Foote, Cone & Belding to handle its $1 million Yomix yogurt account, previously handled by J. Walter Thompson Co.

MADRID—Tabacalera, the Spanish government cigaret monopoly, will launch two new low-tar cigarets in late September. Lucky Strike Lights and Royal Crown Lights will be introduced with $530,000 and $470,000 ad campaigns via Carvis Needham.

Paramount Television Domestic Distribution, Hollywood, is developing a magazine based on "Entertainment Tonight," its syndicated tv series. The publication would focus on entertainment.

Olympics win record tv viewing audience

By DIANE MERMIGAS

To the surprise of some ABC executives, the Summer Olympics emerged as the most-watched tv event ever presented by a single network.

An estimated 180 million people in the U.S. watched all or part of ABC's 180 hours of exclusive Olympics coverage from Los Angeles July 28 through Aug. 12 in all dayparts.

National ratings available from A.C. Nielsen Co. this week showed ABC's nighttime coverage of the games (beginning at 7 p.m. and extending into late night) averaged a 23.5 rating/45 share over the 16 days. Prime time coverage of the games for the two weeks averaged 25/45—meeting ABC's earlier projections that the Olympic Games would sustain a 25 rating in prime time.

The network also is likely to meet its national projection of a 10 rating in daytime for the games, although final daytime statistics won't be available until later this week.

Viewing levels for the summer games beat previous records set by major tv events such as ABC's "The Winds of War" miniseries (viewed by 140 million persons) and the original "Roots" (135 million persons).

They also exceed the 140 million persons who watched all or part of ABC's 76½ hours of exclusive coverage of the 1976 Summer Olympics in Montreal, which nationally averaged a 24.8/28 in prime time and a 16.2/49 in daytime. However, one ratings point is worth more today (838,000 tv households) than in 1976 (696,000 tv households).

Abnormally high summertime tune-in prompted by the summer games pumped up homes-using-tv levels 9% over the same two weeks in 1983.

Among the three networks, ABC's Olympics viewership gave it a 15 ratings point lead over NBC, its nearest prime time competitor, for the weeks ending Aug. 12 and Aug. 5.

For the week ending Aug. 12, ABC averaged 24.9/44.9 in prime time, compared with 9.6/16.9 for NBC and 8.9/15.8 for CBS.

ABC officials reiterated this week that high ratings for the games eliminate the need for ABC to provide advertisers with make-goods, as it did when it did not deliver the promised number of viewers during the Winter Olympics (AA, Aug. 13). ABC will reap $435 million from the sale of national ad time during the summer games.

The Aug. 12 closing ceremonies, which included coverage of the men's marathon, ranked as the highest single-night coverage with a 28.9/53. An estimated 97 million people watched all or some of the telecast.

Aug. 12 also yielded 17.7/46, the highest overnight daytime average for the games generated by the eight metered markets.

A beneficiary of the Olympics was ABC's "World News Tonight," which for the second consecutive week finished first in the evening news race. "World News Tonight," which usually ran outside its normal time period and was not carried by 33 ABC affiliates during the Olympics, averaged 10.4/24 for the week ending Aug. 12. "The CBS Evening News" averaged 9.5/20 and "The NBC Nightly News" 7.6/16.#

Marketers, athletes in golden match

(Continued from Page 1)

in women's service magazines.

The ads continue the Freeport, Me., runner's year-old relationship with the food unit of Castle & Cooke, San Francisco. She has been a Dole presenter in pre-Olympic tv spots via J. Walter Thompson, USA, San Francisco. Dole is putting together a new comprehensive, corporate-type campaign featuring Ms. Benoit as a health and fitness spokeswoman.

In Mr. Breland's case, his adviser, Shelly Finkel, said only that the boxer is involved in serious discussions with the network. The pact also involves other, unidentified gold medalists, he said.

Advertisers generally reacted positively to a possible Breland-ABC deal because of Mr. Breland's Olympic success and audience exposure. While Anheuser-Busch has beer exclusivity on ABC's "Wide World of Sports," events airing outside the anthology format could attract other beer marketers.

"We're interested in competitive fights," said David Martin, exec vp, Stroh Brewery, Detroit. "But we would want to take a look at who [Mr.] Breland and any other Olympians would be up against."

Steve Leff, exec vp, Backer & Spielvogel, which handles Miller Brewing Co., Milwaukee, said that even without knowing the details, "It still sounds like something worth talking about."

Mr. Finkel indicated that only one fight in any package deal would be held in 1984, tentatively in November.

"We have had discussions and we are interested," said Bob Iger, ABC Sports' director of program planning. But he said no agreement has been reached.

Another network sports executive, though, said he believed the deal had been consummated. "If Shelly didn't have ABC signed up lock, stock and barrel, he would have been banging down my door," he said.

One scenario under discussion is reported to be a four-fight deal featuring Mr. Breland in two six-round and two eight-round bouts. ABC would pay him $250,000 per fight. Dates, sites and opponents have not been determined.

"ABC's ride is predicated on the fact that [Mr.] Breland now has the audience following, can move into 10-rounders and by the end of 1985 be in title contention," said a network executive who declined to be identified. ABC followed a similar strategy with 1976 Olympic gold medalist Sugar Ray Leonard.

Ms. Retton's new agent is National Media Group, New York, and a tv packaging company, High Bar Productions. The company is the tv representative of the U.S. Gymnastics Federation, Indianapolis.#

Prince, Jackson fashions due

(Continued from Page 1)

new look for the Peter Pan of rock, he said.

But the lag up to the time products hit stores—coupled with the absence of official licensed designs right now—is prompting some skepticism among retailers.

"Anything coming out after the next few months might be late," said Rick Conti, associate buyer for J.C. Penney Co. "It all depends on how long he [Mr. Jackson] is in the limelight."

So far, the singer has made all the right moves in keeping his awareness level at top of mind. There was the "Thriller" video in late 1983 and the Victory Tour this year. Next on tap is the movie that fans have awaited for two years.

"I can only tell you that Michael is planning one of the biggest movies ever to come out of Hollywood with George Lucas and Steven Spielberg," Mr. Michaelson said. "The projections are staggering."

But fashion is fickle and doesn't always see eye to eye with artistic longevity. "We already see it on the wane in some of our stores," said a men's and boys' wear executive with Belk Stores, Charlotte, N.C., of the unofficial Michael Jackson clothes now in stores.

Skepticism over the line's potential riches also stem from the financial arrangements with Mr. Jackson.

Mr. Michaelson called "plausible" reports that Stadium is paying the performer about $22 million to use his name. There's an unusually high 15% royalty on the apparel—usually they're no more than 7%.

The main body of the Jackson clothes, some of which will be designed by Alvin Bell, will be preceded this fall by caps and sleepwear. Although the first licensing agreements will go to boys' and men's apparel marketers, Mr. Michaelson wants to offer a women's line with unisex appeal. "I was surprised, but his look does appeal to girls," he said.

Competition could come from the Prince/"Purple Rain" label, though plans for those are more tentative. "Purple Rain" already has licensees for buttons, t-shirts and the usual promotional hoopla. LCA marketing director Len Reiter said, "We're looking at full fashion clothing and sportswear."#

Shops' 2nd quarter strong

(Continued from Page 2)

folio, NCK left FCB much more heavily exposed to the vagaries of international currencies. The dollar proved to be stronger than FCB anticipated.

Moreover, FCB's stock portfolio declined, yielding a $1.3 million pretax market valuation loss by the end of the quarter, $540,000 of which was recouped by Aug. 8 as the stock market rallied.

"These factors, together with higher costs than we expected in office consolidation related to our international acquisitions, caused our net income for the first half of the year to be lower than we anticipated," said FCB president Norman Brown.

Not included in the chart is Ally & Gargano, which finished its fiscal year June 30 and has not yet reported yearend figures. Also not included is Saatchi & Saatchi Compton Worldwide, which does not report quarterly figures, but which had a very strong last half for its April-to-March fiscal year. Reflecting other agencies' upward trend, Saatchi's last-half net income for the six months ended March 31, 1984, more than doubled to $8 million from 1983.#

Today on-air spots readied

(Continued from Page 1)

announcer says in the radio spot. "In 1984, the sponge gives you a new choice. . .Now you can have spontaneity and protection. Without the worry of hormonal side effects."

In playing up health concerns about contraceptive devices, the company is attempting to appeal to women dissatisfied with their current method of birth control.

Radio spots have been accepted by stations in Boston, Chicago, Cleveland, Dallas, Los Angeles, New York, Sacramento, San Diego, San Francisco and Seattle. In addition, ads are to be run on Turner Broadcasting System's WTBS superstation, USA Cable Network, Lifetime, other cable operations and independent tv stations.

The company also is expanding its use of print ads, running coupons in newspapers and scheduling ads in women's and health magazines to begin in October. One magazine that has refused ads is Time Inc.'s *People*.#

Sassoon first to cut deal?

Keeping up with Mary Lou

By ROBERT RAISSMAN

The day before the Summer Olympics ended, women's over-all gymnastics champion Mary Lou Retton was in Houston trying to come to grips with what Reggie Jackson had once called "the magnitude of me."

"John," said the diminutive Ms. Retton to her agent, John Traetta, "wherever I go, people recognize me, and I have to be concerned. I've got to learn how to deal with this."

The tiny 16-year-old's statement was music to Mr. Traetta's ears. He had quietly pursued Ms. Retton through her coach, Bela Karolyi, for about two years, but did not become her agent until that Saturday in Houston.

While winning the gold had forever changed Ms.

Ad cameras ready to roll at GOP party

By SARAH STIANSEN

DALLAS—The Tuesday Team marches into town this week, armed with cameras and film to help create the 100 commercials planned by the Reagan-Bush '84 campaign.

With the Republican national convention expected to generate little excitement, this team of high-powered admen could turn the gathering into one big commercial shooting, with an army of ready extras on hand in the form of 2,235 delegates.

How the commercials will be used is a matter of speculation, but details of the $40.6 million campaign are beginning to gel as the convention opens here today.

Doug Watts, campaign media director, while holding elements of the media strategy close to the vest, provided some specifics on how the campaign is shaping up.

Sources said the Tuesday Team will have the best vantage point on the convention floor to film new regional tv spots that will include testimonials and crowd footage. These spots, along with national advertising, will break sometime after Labor Day, Mr. Watts said.

"All the significant principals" of the Tuesday Team will be in attendance, said Mr. Watts. The group consists of four teams of creative "all-stars," including one headed by Hal Riney, exec vp-managing director of Ogilvy & Mather, San Francisco. Additionally, Philip Dusenberry, vice-chairman-executive creative director of BBDO, New York, who produced a documentary film for the convention, also will produce spots.

Tv spots will use the president "intensively and extensively" and focus on "Ronald Reagan's leadership," said Mr. Watts. Sixty-second and 30-second ads for the Reagan-Bush team, which ran in May, included no footage of the president other than a photograph at the end. Mr. Watts said those spots "may reappear."

As for specific media plans, Mr. Watts indicated that after tv, radio would be the campaign's "second most important medium." The team also will use outdoor in selected markets, though Mr. Watts would not elaborate on possible strategies.

But the media strategist reportedly told members of a local ad group here last week that the outdoor effort would cost $80,000 and

Chevy punts on college game

By ROBERT RAISSMAN

Chevrolet is making several strategic moves affecting its tv ad spending that will shift more funds into prime time and at the same time load up buys in ABC's "Monday Night Football." The loser in the new plan is college football, where Chevy is giving up much of its long-standing dominant position.

The General Motors Corp. division is cutting in half its sponsorship in ABC's telecasts of the College Football Assn., said Louis Schultz, exec vp-media director at Warren, Mich.-based Campbell-Ewald, Chevy's ad agency.

Chevy's buy on CBS' college football coverage will remain at four 30-second units and a half-game billboard sponsorship. However, the dollar amount at CBS actually will decrease because the price of college football ad time has dropped by more than 50% from last season.

In cable coverage of college football, Chevy's exposure will be half what it was over the last three years, when it held the domestic automotive exclusivity on WTBS' games.

This fall, the Entertainment & Sports Programming Network will carry CFA cable games.

(The CFA games replace, in part, games formerly sold by the National Collegiate Athletic Assn The U.S. Supreme Court found NCAA guilty of anticompetitive practices in the sale of those rights.)

Chevy's diminished interest in college football on cable this fall is a marked departure from its commitment three years ago. At that time, it assured WTBS that it would commit to a $17 million ad schedule on the station (although not all of that time would run in football), if the superstation could secure the NCAA rights. WTBS won the rights with a $17 million bid.

The cutback in college football spending, Mr. Schultz explained, is just one "strategic move" in a num-

CREATIVE WORKSHOP

GF exec: Leader is creative key

NEW YORK—The difference between organizations that know how to develop creativity and those that don't boils down to leadership, Philip Smith, president, General Foods, told more than 1,000 attendees at the ADVERTISING AGE 27th annual Creative Workshop today.

"Leadership is the catalyst needed to transform talent into results," said Mr. Smith, delivering the keynote address that leads off three days of sessions on all phases of advertising and marketing.

The record attendance at the New York Hilton for the Creative Workshop includes participants from 46 states and 37 countries.

To illustrate "the fundamental importance of leadership," he cited Chrysler Corp. "Lee Iacocca has turned this company around. Few environmental factors have changed significantly since Chrysler was on the brink of bankruptcy. . .But what they have now is the vision and the commitment of one man—the leader at the top."

Mr. Smith said he disagrees with those who believe leadership is an innate quality. As in athletics, some have more innate abilities, he said, but, like athletic prowess, leadership can be taught. He recalled when he went through leadership training in the Marines, "The

Eager People Express now taking on Eastern

By SCOTT HUME

Having flapped its wings at United and American Airlines, feisty People Express last week turned its sights on another giant carrier—Eastern Air Lines.

The cut-rate carrier announced that, beginning Sept. 5, it will fly four nonstop round trips daily between its Newark base and Miami. It set fares at $79 off-peak and $99 for peak midday flights.

In addition, the airline announced on the same day that it was launching seven daily nonstops from Newark to Detroit, priced at $45 off-peak, $65 peak.

The Miami link moves People into Eastern's headquarters city, from which Eastern flies four daily nonstops to Newark and six to New York's LaGuardia Airport. An Eastern spokesman said the company had no immediate comment on People's plans and nothing to announce, but observers speculated that Eastern would match—with restrictions—People's fares on some of its Newark-bound flights.

A spokesman for Trans World Airlines said it has no immediate plans to lower fares on its one daily trip between Miami and New York's Kennedy Airport.

United, meanwhile, announced additional cuts in response to People's Chicago-to-Newark route, set to begin this week (AA, Aug. 13). The Chicago-based carrier said that beginning Aug. 22 it will implement lower fares between Chicago and Baltimore; Boston; Buffalo; Burlington, Vt.; Hartford; Norfolk, Va.; Portland, Me.; Syracuse, N.Y., and Washington.

Both United and American Airlines broke print and radio campaigns in Chicago and the New York area last week aimed at countering People's inaugural flights between Chicago and Newark. The ads stressed the carriers' level of service.

Advertising announcing People's addition of the Miami and Detroit routes breaks today in Chicago and the airline's "out markets" (cities such as Boston, Baltimore and Washington now linked to Detroit and Miami with Newark stopovers). Introductory advertising broke Aug. 17 in Detroit and Miami. Plapler & Associates, New York, is People's agency.#

New IBM entry wrings market

By BRIAN MORAN

IBM's bold new moves in the personal-computer market have put a squeeze on the company's two bread-and-butter offerings, the PC and the PC XT, casting those popular machines into limbo.

The company's introduction last week of the multi-user PC AT and the unveiling of a greatly upgraded PCjr (AA, Aug. 2) threaten to cannibalize sales of both the industry-leading PC and the high-powered PC XT, analysts say.

These market adjustments came as reports surfaced that IBM is preparing to run a sweepstakes promotion with the IBM of the consumer products industry—Procter & Gamble. The promotion reportedly will center on a giveaway of 750 PCjr and 250 PC machines.

Whatever effect this sweepstakes has on sales, there can be no denying that IBM's latest moves will have a strong impact on the market, as well as its own products.

For instance, the newest entry could boost sales of the PCjr, but hardware enhancements on that model have made it more attractive to the business market, until now the domain of the higher-price PC. Some analysts suggest IBM may have gone too far in its effort to beef up the troubled PCjr.

And the added memory storage capacity and multi-user features of the top-of-the-line AT threaten the XT with extinction. While analysts and dealers generally have applauded the improvements, they are wondering what, if anything, IBM will do with its present mainstays.

PC and XT "will probably fade from sight within a year or two,"

Talk of shakeout clutters insert field

By WILLIAM GLOEDE

Producers of coupon-bearing, freestanding inserts are agonizing that the five-year boom they've been riding is beginning to strangle on its own success.

The inserts that tumble from Sunday newspapers every week—testimony to the medium's popularity with advertisers—have created their own nightmare: Clutter.

"It's getting staggering," said Jim Widmann, president of George F. Valassis & Co., Farmington Hills, Mich., producer of Impact Inserts, the largest of the three Sunday fsi companies. "There are, in fact, too many suppliers offering too many dates."

Over-all coupon redemption rates are showing the first signs of a falling off, say experts at such major coupon users as General Foods Corp. and Ralston-Purina Co.

Advertisers still seem to be hesitant to hang that problem on the freestanding-insert segment of the coupon-delivery network. But the fsi executives have the jitters.

That breeds "shakeout" talk—if not in the number of fsi producers, then in the number of couponing dates being offered.

"Fsis, in general, could get to the point where they overpopulate

CTAM told: Expand cable-vcr marketing

By SUSAN SPILLMAN

NEW YORK—Attention owners of videocassette recorders: Don't you know there's more for you to record on cable tv?

That message should become the cornerstone of cable operators' marketing and services strategy, according to a group of entertainment and cable industry executives speaking at the Cable Television Administration & Marketing Society's annual conference here last week.

The 1,200 cable officials attending CTAM were urged to promote the far greater amount of programing available for home taping, as well as to provide home delivery of prerecorded videocassette rentals and to offer vcr-related subscription promotions.

"You're not in the cable business, you're in the home entertainment business. And unless you find every way to satisfy all your subscribers' needs, they'll leave you for greener pastures," said Robert Klingensmith, senior vp-video distribution for Paramount Pictures, Los Angeles.

Mr. Klingensmith encouraged cable operators to use their installation trucks to deliver videocassettes at night when the trucks aren't otherwise in use. He also suggested that systems tie-in with local video retailers and promote each other's products.

Charlie Townsend, vp-marketing at United Cable, Denver, added that cable systems should advertise that they offer vcr owners a wealth of programing to tape.

"There are 80 movies and specials on Showtime and Home Box Office in a given month," said Mr. Townsend. "A person with a vcr has access to all of it because he can tape it and play it later. Anybody

AGENCY PEOPLE

O'Connor new Marschalk chairman

WARREN, MICH.—Richard O'Connor will succeed Thomas Adams as chairman of Marschalk Campbell-Ewald Worldwide.

Mr. O'Connor currently is vice-chairman and chief executive officer at the agency, a subsidiary of Interpublic Group of Cos., New York. Mr. Adams, who will be 65 next month, retires on Sept. 28, and Mr. O'Connor takes the helm on Oct. 1. He will retain his chief executive officer title.

Paul John, vice-chairman-chief executive officer at the agency's Campbell-Ewald subsidiary, will assume Mr. Adams' other title as chairman of that shop. Mr. John's new assignment also takes effect Oct. 1. He will report to Mr. O'Connor.

The agency will retain Mr. Adams as a consultant for its General Motors accounts. His retirement ends a 39-year career at the agency, including more than 25 years as president or chairman of Campbell-Ewald.

Although closely associated with GM's Chevrolet division, the world's largest single account, Mr. Adams was instrumental in diversifying C-E.

He is a past chairman of the American Assn. of Advertising Agencies and the Advertising Council and past president of Detroit's Adcraft Club, the world's largest advertising club.

Interpublic chairman Philip H. Geier Jr., in praising Mr. Adams, noted, "Not so incidentally, the Campbell-Ewald agency was billing $81 million when Mr. Adams became president in 1958. In 1983, the billings for C-E alone were over $420 million and Marschalk Campbell-Ewald Worldwide's were almost $900 million."

Besides C-E, Marschalk Campbell-Ewald Worldwide also consists of the Marschalk Co. division, New York, and the Clinton E. Frank Advertising subsidiary, Chicago.

Other people moving:

Thomas Heiby to president, Byer & Bowman Advertising, Columbus, O., from exec vp-secretary/treasurer. He succeeds **John Bowman**, who retired but will remain a board member and consultant to the agency.

Robert Aurin to senior vp-creative director for the Amoco Oil account, a new post at D'Arcy MacManus Masius, Chicago, from president, Robert Aurin Associates.

Mitchell Sherman to vp-management director, Foote, Cone & Belding, New York, from vp-account supervisor, Cunningham & Walsh. Also, **James Bernegger** to vp-management director, from management director, FCB/-Los Angeles.

Edward Agne to vp-corporate relations, a new post at Manning, Selvage & Lee, New York, from a similar post at Booke Communications.

Norman Kosarin to design director, Kosarin Design Group, a newly formed subsidiary of Grey Advertising, New York, from president, Norman Kosarin Associates.

Susan Radden to vp-program exchange, a new post at Dancer Fitzgerald Sample, New York, from program exchange director.

Al Gerstein to senior vp-copy/creative planning, Lavey/Wolff/Swift, New York, from senior vp, Kallir, Philips, Ross. He replaces **Robert Levine**, who left.

Beth Baynum to account exec-hotel, travel and resort division, Spiro & Associates, Philadelphia, from account exec, Lewis, Gilman & Kynett.

Phil LaBorie to senior vp-creative director, Davidoff & Partners, Fairfield, Conn., from vp-group creative director, J. Walter Thompson Co., Toronto. Also at D&P: **John Maxim** to senior vp-marketing and business development from vp-marketing services.

Richard Goldman to vp-media/marketing services, Ryder & Schild Advertising, Miami, from media director. Also at the agency: **Pam Pujals** to assistant vp-media director fr associate media director, a **Gloria Schmall** to assistant vp-p duction director from product manager.

Skip Hurley to senior vp-graphic services, MED Communications, Woodbridge, N.J., from vp-graphic services. Also at MED: **Martha Cox** and **Susan Cathcart** to associate creative directors from copy supervisors-creative services; **Michael Seife** to associate creative director from creative director, Thomas G. Ferguson Inc., Parsippany, N.J.; **George Schmidt** to associate creative director from executive art director; **Warren McLeod** to associate creative director from president-owner, Mountain Grafix, Summit, N.J., and **Patricia Plonski** to account supervisor from senior product manager, Chicopee division, Johnson & Johnson Products, New Brunswick, N.J.#

Newspaper ads jump since 1983

NEW YORK—Advertiser investments in daily newspapers increased in 10 of 16 measured categories in May, compared with May, 1983, according to the ADVERTISING AGE Flash Report of newspaper spending.

The soaps, cleansers & polishes category led in percentage increase, with a jump of 173.6% to $182,728. The department store category led in dollar volume increase, with a 5.5% jump to $74.5 million.

Other categories with substantial increases include food stores, up 7.1% to $24.6 million; alcoholic beverages, up 24.2% to $3.3 million; radio-tv-phonographs and records, up 18.8% to nearly $13.5 million, and publishing and media, up 27.9% to $14.5 million.

Ad spending by airlines increased 5.8% to $13.1 million, and new car ad spending increased 8.6% to nearly $11.3 million.

Losing categories included cigarets, down 30.8% to $4.5 million; sporting and leisure time equipment, down 54.6% to $706,239; headache remedies and sedatives, down 94.3% to $4,471; cameras, photo supplies and services, down 18.3% to $868,435, and cosmetics, makeup and manicure products, down 46.8% to $111,593.

There were mixed results in the beverage category, with coffee and tea up 84.7% to $264,185, and soft drinks, diet and nondiet, down 17.7% to $597,821.

The ADVERTISING AGE Flash Report is based on reports from Media Records, based on linage measurements in major market newspapers.#

FLASH REPORT: Newspaper advertising investment for May

GOP turns on the heat

Nets pressured on Reagan film

By DIANE MERMIGAS

Network news executives went down to the wire this week before deciding whether to air an 18-minute film that will introduce President Reagan during tonight's closing session of the Republican national convention in Dallas.

The Republican National Committee spent much of this week's uneventful convention pressuring the tv networks to air the film.

RNC chairman Frank Fahrenkopf Jr. sent a letter to the presidents of the three network news divisions Aug. 18 at the same time copies of the film were released to CBS, ABC and NBC under restricted, embargoed conditions.

The two-page letter urged the tv news officials to broadcast the film live and in its entirety in the interest of fairness since the networks provided live coverage of Sen. Edward Kennedy's 22-minute speech introducing presidential nominee Walter Mondale during last month's Democratic convention.

84 Marketing the CANDIDATES

"Objective journalism and a sense of balance should be guidelines in yôur decision," Mr. Fahrenkopf wrote.

Throughout the week, the tv networks have held meetings with and received telephone calls from the RNC regarding the film. Late last week, Charles Manatt, chairman of the Democratic National Committee, fired off letters to the network news presidents arguing that the Republicans had no right to have their film shown since the networks last month refused to air a film the Democrats had prepared profiling Mr. Mondale.

Network news officials say they are not particularly bothered by the flap since such pressure tactics are common during election years.

The three commercial networks are postponing a decision on whether to air all or only portions of the film until airtime tonight. "If there is something more important to cover at the time, we'll do that. It's a news

Wirthlin details research plans

By JACK J. HONOMICHL

Republican strategists in Dallas for the GOP convention already have begun tracking the shifting moods of the U.S. electorate.

"We started national tracking studies Aug. 1," said Richard Wirthlin, President Reagan's personal pollster and director of polling-planning in the Reagan-Bush '84 campaign organization. "That's further ahead than we started in '80," he added, referring to the nightly telephone surveys of public opinion that are used to sharpen Republican campaign tactics.

Data from this national tracking study and others being done for President Reagan's political advisers provide the Republican leadership with almost instant reaction to developments in the campaign, such as the selection of Geraldine Ferraro as Democratic presidential candidate Walter Mondale's running mate. And, usually, drafts of major speeches to be made by President Reagan are routed through Mr. Wirthlin and others to make sure that any comments regarding the aspirations of the American people square with vox populi, as measured by the surveys.

President Reagan's marketing budget will be larger than in 1980, according to Mr. Wirthlin, but about the same proportion will be devoted to survey research at both the national and, later, the key-states levels, similar to what was done in 1980.

"In addition to watching how the President's constituency is building, or eroding, we'll be using survey data as inputs in simulation models and for perceptual mapping—like in previous campaigns, but more sophisticated." Mr. Wirthlin added, "We'll be using a broader array of research techniques to develop and assess paid advertising."

When asked about a recent *New York Times* story devoted to the apparent variance in national political-poll results published by Gallup, Harris, NBC and ABC News and the *New York Times*/CBS News during

General Foods president Philip Smith (r.), a keynote speaker at the Advertising Age Creative Workshop in New York, talks with Morio Nishikawa (l.), a group manager of S.C. Johnson & Son's Japanese affiliate, and Ronald Giglio, ad-promotion manager for Safeway Stores, Oakland. Some 1,200 people from around the world attended the meeting.

JWT exec cites visual revolution

By STEWART ALTER

CREATIVE WORKSHOP

New York—The success of visually based advertising has led Burton Manning, chairman and chief executive officer of J. Walter Thompson USA, to rethink his standards for creating effective messages.

"There is a revolution going on in our understanding of how people, our customers, can be moved," Mr. Manning told the 27th annual Advertising Age Creative Workshop Aug. 20 at the New York Hilton here. "They can be persuaded primarily through the visual sense with incredible effectiveness. They want to see intensity of movement and actions and can grasp images with astonishing speed."

The importance of thinking visually was also emphasized in a presentation made by another agency creative exec, Hal Riney, exec vp-managing director, Ogilvy & Mather, San Francisco.

Advertising has to become more visually communicative in order to reach consumers who are becoming more visually sophisticated, observed Mr. Manning. "We are finding the eye is a glutton for visual stimulation," he said, "and has been that way since earliest man crawled out of the mud." What the so-called "visual revolution" is about, he said, "is to understand how much the human eye and mind want visually."

Among the suggestions Mr. Manning offered to those wanting to think visually were: "Immerse yourselves in images. . .make it play without words. . .bring the unexpected together. . .bring figures of speech to life. . .bring feelings to life. . .[show] familiar things from unfamiliar views. . .fantasize.

"My training has been to approach problems logically," Mr. Manning said, "and probably to extend the logical process too far into the selling process." He noted that visual images "go directly into the perceptual or intuitive area of the brain, and the intuitive sale is a much more profound and intense sale than the logical one." To Mr. Manning's thinking, the growth of music video, with its fantasies set to music, reflects this trend.

Mr. Riney indicated, at another

McDonald's tests Cheddar Melt in Midwest

Oak Brook, Ill.—McDonald's Corp. is test-marketing a ⅓-lb. hamburger dubbed Cheddar Melt in Kokomo, Ind., and Milwaukee. The new sandwich, priced at $1.59, is topped with cheddar cheese and grilled onions, and is served on a toasted rye bun. Print and tv ads, via Leo Burnett USA, Chicago, support. Burger King Corp. earlier tested a ⅓-lb. burger in Miami (AA, April 30). Separately, McDonald's has announced a 3-for-2 stock split, its second split in two years.

K mart tags Jaclyn Smith for sportswear line

Troy, Mich.—K mart will design a new line of women's sportswear and dresses bearing the name of actress Jaclyn Smith. It is the company's first effort at marketing a personality line of clothes. Ross Roy Inc., Detroit, handles K mart's advertising.

Ingalls gets its first Ground Round tasks

North Quincy, Mass.—Ground Round Restaurants has given several initial creative tasks to Ingalls Associates, Boston, the new agency for its $5 million account. They include a spot radio campaign and a November

No cheers for USFL fall plan

By SUSAN SPILLMAN

The U.S. Football League is considering this week in Chicago whether to move its spring schedule to the fall in 1986, despite a lack of enthusiasm from advertisers and syndicators.

"We're not encouraging them to make the move," said Duane Kell, senior vp-director of broadcast media at Campbell-Ewald, the agency for USFL sponsor Chevrolet. "It's not like there is an underabundance of sports programing to buy between September and December with the NFL and college football games."

"From a purely selfish point of view I hope they don't move," said Steve Leff, exec vp-director of media services at Backer & Spiel-

Harlequin romances JWT

By BRIAN MORAN

Looking to consolidate marketing activities in its Toronto home, Harlequin Books has moved its $4 million North American advertising account to J. Walter Thompson Ltd., Toronto, from Rosenfeld, Sirowitz & Lawson, New York.

Harlequin, the world's largest publisher of romance paperbacks, said JWT's Chicago office will handle media placement. JWT's first creative work is not expected to appear until next year, but the media team is coordinating a $1 million-plus

P&G rushes Folger's to perky decaf field

By GAY JERVEY

The speed with which Procter & Gamble is introducing nationally Folger's decaffeinated instant coffee reflects the company's pressing need to do better in the decaffeinated arena.

In launching the new entry this week without any test-marketing, P&G is responding to competitive pressure in a segment that, unlike the generally listless coffee market, is alive and growing due to consumer health concerns.

The record launch time is further evidence of P&G's new tendency to move more quickly with new products than ever before, even foregoing test markets altogether, an almost unheard-of tactic among leading consumer goods companies. The fast rollouts of several P&G brands earlier this year, including Ivory conditioner, Always sanitary napkins and unscented Tide, provided evidence that the company is becoming increasingly aware that "time is of the essence," although those products did spend some time in test.

No one will be watching the new Folger's product more carefully than those who forced P&G's hand—rivals General Foods Corp. and its White Plains, N.Y., neighbor, Nestle Co. After a nearly three-year hiatus, both companies' coffee operations have spruced up 1984 product lines with several new items and reformulations (AA, Nov. 7, *et seq.*).

Most notably, General Foods introduced decaffeinated variations of both its Maxwell House and Yuban lines. Nestle christened a new Nescafe custom-blended instant line that includes a decaffeinated entry.

Nestle also revamped the advertising for its Taster's

Treasure Isle hopes to end 'limp shrimp'

By NANCY GIGES

Treasure Isle, one of the nation's leading producers of shrimp, has developed a new process for frozen breaded shrimp it hopes will turn around the declining category.

Dover, Fla.-based Treasure Isle is introducing nationally what it says is the first frozen breaded shrimp that can be prepared in a microwave oven without becoming soggy. The company calls it "the end of the limp shrimp."

Sold under the name Rik-Sha microwavable breaded fantail shrimp in Oriental-style or large-crumb breading, the product is getting a $1 million national media campaign. Word Works division of Zachary & Front, New York, is the agency.

Charles Johnson, vp-retail sales, said shrimp long has been sold at retail as a commodity item. The frozen breaded category, although the largest retail segment at $100 million, has declined about 9% a year because of the inconvenience of preparation (it must be deep-fried) and messy cleanup.

Treasure Isle is the second-largest entry in this segment with about 12%; Buffalo-based Rich Products SeaPak is No. 1 at about 15%, and Omaha-based ConAgra's Singleton is No. 3 with about 8%, Mr. Johnson said. The executive said the fastest-growing retail segment is frozen cooked and peeled shrimp, but it is only about $35 million; sales of uncooked shrimp are static at about $45 million.#

JWT exec

(Continued from Page 1)

session, that he tries to think visually from the outset of creating an ad. He gave as an example a commercial for Henry Weinhard beer, which "started with a visual idea which said more about purity and natural quality than could have been said in words."

Mr. Riney observed that the fault of too many creative strategies is that they "depend too heavily on rational appeals. . .are too explicit. . .focus too much on words. . .are unrealistic. . .are simply headlines, or tv copy, in disguise."

One question Mr. Riney said should be asked about a commercial is "Does this approach incorporate a strong or appealing visual element?"#

in-store promotion. Ingalls this week picked up the $5 million Ground Round business, previously at Ross Roy/Colarossi Griswold, New York.

Other late news

● New York—**MTV Networks**, parent of MTV: Music Television, will launch a second advertiser-supported cable music video channel on Jan. 1. The new channel will be targeted to contemporary music's 25-to-49-year-old audience. MTV's decision to go ahead with the as-yet-unnamed channel was "obviously affected" by Ted Turner's recent announcement that his Turner Broadcasting System, Atlanta, would start a counter-MTV service (AA, Aug. 13), said MTV Networks exec vp Robert Pittman.

● New York—**Ally & Gargano** reported a loss in its fiscal fourth quarter, ending June 30, and a 62% decrease in net income for the fiscal year. The agency tied the losses to a $408,000 after-tax writeoff of a client receivable after that client, Franklin Computer, filed for Chapter 11 bankruptcy. The fourth-quarter net loss was $20,000, compared with net earnings of $899,000 a year ago. For the year, net earnings fell to $851,000.

● Statesville, N.C.—**Thorneburg Hosiery Co.** has signed tennis star Martina Navratilova as spokeswoman for its line of Thor-lo sports socks. Rubin Walter Advertising, New York, handles.

● Dallas—**Fund for a Conservative Majority** has rolled out three test tv spots here during the Republican national convention. The move was a prelude to a nationwide $800,000 campaign to support the Reagan/Bush reelection effort. The spots were prepared by Edmonds Associates, Washington.

● Peterborough, N.H.—The computer magazine shakeout continues with CW Communications/Peterborough's decision to fold *jr*, its monthly for IBM PCjr users. The magazine, which was only five months old, is being shuttered because of limited advertising and circulation.

● Glenview, Ill.—**Zenith Electronics Corp.** unveiled a national ad campaign on Aug. 22. The fall campaign includes six tv spots, a record number of commercials for a Zenith campaign. They tout the company's "smart" new high-tech video products. The first two tv spots begin this month. Zenith also is increasing its ad spending on cable tv by 50% beginning this fall. Foote, Cone & Belding, Chicago, created the campaign.

● **NEWSLINE: New York** is expected to name today a successor to Brian McCabe, who resigned as advertising director earlier this month after holding the post only since February. . .**Christopher Sinclair**, *Newsweek's* vp-marketing director, is leaving to become vp-marketing, PepsiCo's Pepsi-Cola Bottling Group, Purchase, N.Y. . . .**Lady Marlene Sales Corp.**, New York, a marketer of high-fashion intimate apparel for women, to **De Krig Advertising** for its $250,000 account. No recent agency of record.

N.C. dailies promote creative ad pricing

By WILLIAM GLOEDE

The *Winston-Salem Journal* and *Sentinel* have found that it's better to make a "fast nickel over a slow dime" with a new "creative pricing" structure that has increased revenues while contributing to a spectacular sales increase at a local J.C. Penney store.

Winston-Salem, N.C., is only one example in which dailies, faced with increased competition from direct mail, weekly newspapers and free-distribution "shoppers," have felt pressure to give advertisers more exposure for their money.

"Newspapers have for years been acting on the theory that if you raise rates, volume will fall off a little but revenues will increase," explained James Fowler, marketing director for the newspaper. "We've been willing to talk about rate elasticity—if you spend more with us, we'll lower our rates."

Faced with a further erosion of run-of-press advertising from the Penney's store, the paper began a program last January under which any retail advertiser running $3,500 on any combination of r.o.p. and preprint advertising in the Wednesday paper would qualify for a 50% discount on r.o.p. space in the Thursday and Friday papers.

Similarly, if an advertiser spent at least $2,000 in the Sunday paper, r.o.p. space in Monday and Tuesday editions would qualify for the 50% discount.

The Penney store made extensive use of the creative pricing structure, running ads in six daily editions of the newspaper in addition to its midweek preprint.

According to the store manager, the increased exposure gained from "heavying up" his newspaper advertising was "directly responsible" for 20% of an over-all 60% increase in sales through the first half of this year. The increased advertising did cause the store to increase its ad spending, but the increase amounted to a mere 0.2% of total sales.

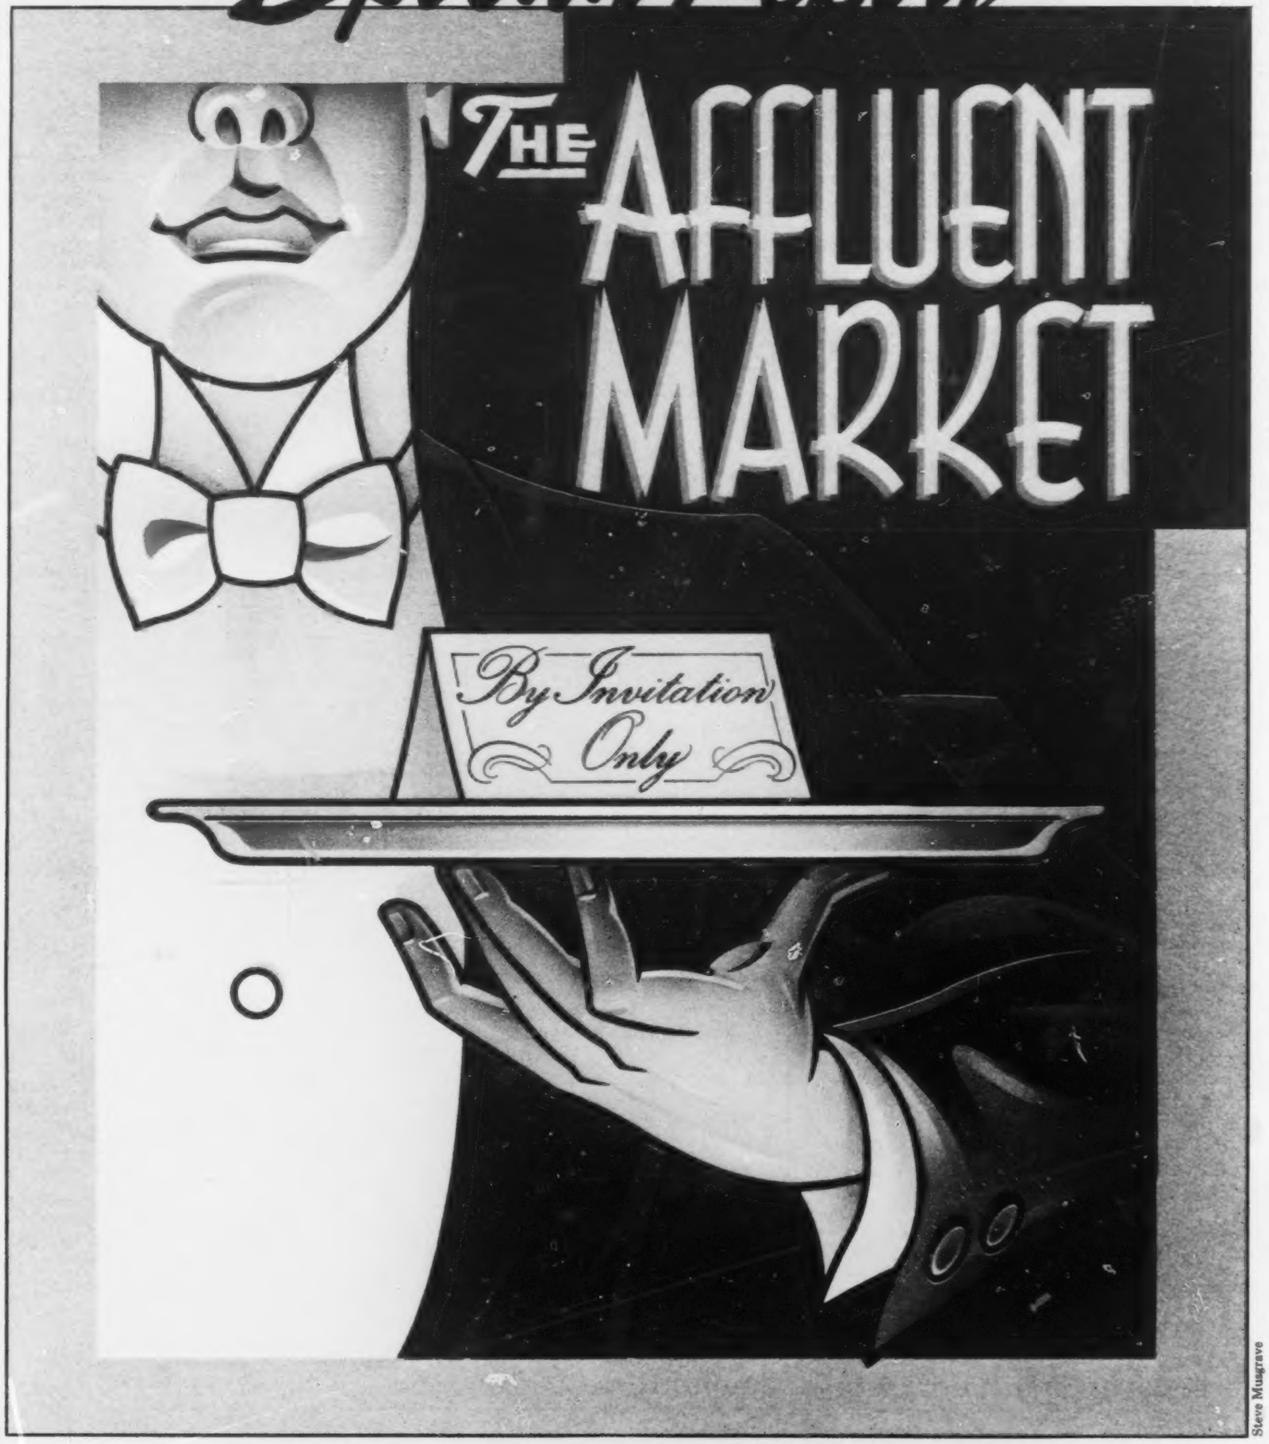
Creative pricing has been gaining favor in the newspaper industry, where for years the rule of thumb has been that retail and national advertisers could only get a break on advertising space if they ran a certain volume of space—specified on the newspaper rate card—within a particular category (AA, July 19).

In 1979, the industry introduced volume discounts for national advertisers in a program called NEWSPLAN. The program was welcomed by national advertisers and their agencies, but in the opinion of many it did not go far enough toward reducing the difference between what national advertisers and retail advertisers pay for the same space.

In Philadelphia, the *Daily News* and *Inquirer* have been running programs similar to the one in Winston-Salem for retailers, and they have created a rate structure under which a national advertiser can get substantial discounts by running the same ad three times in one week in both newspapers, with up to 50% off the rate for the third insertion. If an advertiser takes full advantage of the program, the net rate, minus agency commission, actually becomes a little less than the local retail rate.#

Special Report

THE AFFLUENT MARKET



Steve Musgrave

Group offers a wealth of opportunities

By Len Strazewski

Affluent consumers are a growing target for marketers, according to a study by FIND/SVP, a New York-based market research company.

But delivering an invitation to buy is not easy. The affluent are an elusive bunch, too busy to sit still and be sold.

Though many marketers set their affluence benchmark at an annual family income level of $50,000 or more, in a recently released study, FIND/SVP set its lower affluence limit at an annual income of $40,000 and discovered that level is growing rapidly among American consumers.

In fact, the number of households with annual incomes of $40,000 or more increased from 6.2 million in 1970 to 8.9 million in 1980 and is forecast to increase to 16.6 million by 1990.

Of those households:

- About half have annual incomes between $40,000 and $50,0000.
- About one-fourth fall into each of three age brackets—35 to 44, 45 to 54 and 55 to 64.
- About three-quarters are married couples in which there are no children younger than 6.
- About half are married couples in which both adults work outside the home.
- About half of the heads of the households have completed college and 60% are employed in managerial or professional positions.
- More than half are in the suburbs and one-fourth in inner cities.

The media that reach the affluent are varied and effectiveness depends upon the interest of the consumer. No one medium does it all.

"Generally speaking, the affluent are among the most difficult of any consumer group to reach," the FIND/SVP study says. "They spend more time working, traveling and entertaining. They have larger families. When they have some spare time, they are more likely than the average consumer to go to the health club, read a book or talk.

"Even when they sit down to be entertained in their homes, they are more likely than the average consumer to watch cable tv or a video record."

Affluent consumers watch relatively little commercial tv, according to the study.

However, cable tv programing such as Entertainment & Sports Programming Network and Financial News Network were singled out by the study as delivering a high percentage of affluent men, based upon viewership studies.

Radio, according to the study, is a relatively good medium to reach the affluent.

Radio is cheaper than tv, portable and therefore more accessible to affluent consumers on the go, and diverse in programing choice.

Magazines also offer a lot of diversity, the study says, and marketers can match their products with magazines that cater to virtually any interest. However, the study cautions that magazines do not deliver all or even a major portion of the affluent market.

Of 31 magazines studied, none delivers as much as 10% of the affluent market and only five magazines deliver as much as 5% of that market.

The magazine options, however, continue to grow. Besides such traditional choices of the wealthy as *Town & Country, Golf Digest* and the *Robb Report*, a variety of regional and specialized magazines are appearing, targeting the affluent.

Len Strazewski is the ADVERTISING AGE *associate editor who coordinated this Special Report.*

For the rich, home is where the heart is

By B.G. Yovovich

Affluence is where you find it, and you can find it in the strangest places.

Consider, for example, the Census Bureau's finding in 1979 that some 11,000 U.S. households with annual incomes exceeding $75,000 ($100,000 in 1984 dollars) resided in mobile homes.

Or how about the homes of the wealthy that can be found in the midst of the most abject of rural poverty.

"It's kind of like a peasant-king phenomenon," says geodemographer Jonathan Robbin, chairman of the board of Claritas Corp. and founder of PRIZM research service. "Plains, Ga., is an example. You have one rich peanut farmer and everyone else works for him."

Thomas Stanley, a Georgia State University marketing professor whose work has focused on the affluent, says: "When I drive from Atlanta to the Georgia coast, I typically take the back roads because it is a better way to go and it is very interesting because you go through every little town down there and there will be one big house with a satellite dish in front."

Mr. Stanley has researched affluence for such clients as Chase Manhattan Bank, Citicorp, American Express and the American Bankers Assn.

"There is money wherever you go. In some of the banking studies we have done, we found people who had million-dollar jumbo CDs [certificates of deposit] living in neighborhoods you wouldn't believe," Mr. Stanley says. "They were people who maybe started a cash business—restaurants, whatever—and never moved out of the neighborhood."

Even when the affluent flock together, several very distinct types emerge.

"Within the affluent market, you have different pockets of wealth, different types of neighborhoods, that relate to different types of consumer behavior," Mr. Stanley says. "All of the people may be affluent, but they are distinctly different in their patterns of behavior."

In the neighborhood classification scheme developed for PRIZM, for example, suburban affluent communities are divided into three prime clusters: "Blue Blood Estates," "Money & Brains" and "Furs & Station Wagons."

"Blue Blood Estates is the most compact part of the affluent market and those communities are the most visible," Mr. Robbin says. "These are the Bel Airs, the Lake Forests, the Scarsdales, the Wellesleys."

Blue Blood Estates communities are the wealthiest of PRIZM's neighborhood classifications, and a household in such a community is more than eight times likelier to have an annual income greater than $50,000 than a U.S. household chosen at random.

The communities are populated by "super-upper established managers, professionals and heirs in old money, accustomed to privilege and living in luxury surroundings," Mr. Robbin says.

One in ten millionaires can be found in this classification, and there is a considerable drop from these heights to the next level of affluence.

In contrast, Furs & Station Wagons neighborhoods are typified by "new money" and are populated by "mobile professionals and managers with the nation's highest incidence of teen age children," Mr. Robbin says.

Atlanta illustrates some of the differences between the older and newer affluent communities, Mr. Stanley says.

"We recently did a study of the old-money neighborhoods, areas like Buckhead in which the houses were built in the 1920s and 1930s—marvelous mansions," Mr. Stanley says. Much of the wealth in the area is "fifth and sixth-generation, some of it going back to pre-Civil War."

Just outside the Atlanta city limits about five miles from the central business district, Buckhead residents "are white, Anglo-Saxon Protestant, conservative in their life styles, have trust funds, belong to a particular type of country club."

But in newer Atlanta communities such as the Dunwoody area, which has the highest income of any of the Atlanta neighborhoods, according to Mr. Stanley, residents are generally "hard charging younger executives who live in very nice homes and who were not born here.

"They are 80% first-generation wealth, are very innovative in terms of changing styles, are more interested in having cable tv, are more likely to have videotex in their house or have a

Neighborhoods tell life style

The marriage of computerized census information and sophisticated statistical techniques has provided a powerful new tool for studying the affluent: Geodemographics.

It may sound complicated, but the basic idea is quite simple.

"Neighborhoods are the result of the choices that people have made, the choice to live there," says Keith Wardell, manager of the marketing support group of Arlington, Va.-based CACI Inc. "The decision factors that a person considers in choosing where to live—including such things as the person's age, their income, where they work—are very indicative of a person's life style."

And, the theory goes, knowledge of which neighborhood a person lives in can yield a great deal of information about that person's behavior.

"When people choose a house, they seem to have a feel for the house, the neighborhood, the life style. There is a homogeneity of neighborhoods in America that is really surprising," says Georgia State University marketing professor Thomas Stanley, a geodemographic researcher.

CACI's "A Classification of Residential Neighborhoods" (ACORN) geodemographic service took 300,000 block groups—each consisting of about 300 households—and cross-classified them using a multitude of demographic, socioeconomic and housing characteristics collected by the Census Bureau, including such variables as age, sex, household income, number of children in the household, value of the housing, housing type, car ownership, educational level and ethnicity.

Using sophisticated statistical techniques, ACORN came up with 44 neighborhood classifications into which the 300,000 could be divided, which, in turn, would be used to predict the behavior of individuals residing in those communities.

The information obtained from geodemographic analyses can be linked with information from other sources that have address information, such as magazine subscription lists, warranty cards and direct mail lists.

Claritas Corp.'s PRIZM also has put together what it calls its PRIZM Interlock that allows cli-

Note: These areas are combinations of contiguous census tracts of downtown-oriented central city neighborhoods. To exclude suburban oriented neighborhoods on the periphery of cities, only areas where unrelated individuals outnumber families were included.

home [computer] terminal," he says.

Dunwoody houses were built in the 1960s and, even though the community's households boast higher incomes than Buckhead's, "the houses in Dunwoody are not in the league of the old mansions," Mr. Stanley says. "Dunwoody households are slightly lower in net worth [than are those in Buckhead]. There are a lot of millionaires there, but they haven't had that big hit yet."

Another significant difference between the old money and the new money is its source.

"Dunwoody people [who live about 15 miles from the center of Atlanta] are much less likely to work in Atlanta's central business district than are Buckhead residents," Mr. Stanley says. Dunwoody residents also are more likely to have sales positions, which has a significant impact on their life styles. They tend to be travelers and to frequent resources common to travelers.

"They do a lot of travel on the personal side as well as the business side because they build up travel coupons and they tend to have a regional or international interest. They want access to the airport, which is a key element in their life styles."

Buckhead residents are much more likely to be part of "the infrastructure of old wealth," Mr. Stanley says. "It started with the original major corporation that exploded in terms of growth, and what you have [in Buckhead is the families of] those key executives, many of whom were major stockholders; the enlightened lawyers who had latched onto that group, and the enlightened bankers who got part of the action."

Money & Brains, PRIZM's third affluent suburban classification, "is typified by swank, shipshape townhouses, apartments and condos, with relatively few children," Mr. Robbin says. These neighborhoods often are located near universities and contain large populations of upscale singles. He cited areas such as Washington, D.C.'s Georgetown neighborhood and Brooklyn Heights, in New York, as typical of the Money & Brains characterization.

"It is a combination of intellectual people—generally empty-nested or childless couples—and professionals, lawyers, doctors and so forth," Mr. Robbin says. "This is the sort of neighborhood that consists of people who want to absorb the culture and ambiance around a major university.

"There is no middle class in this place. You are either really up there [in income], or you are a student. There are not many children here."

In addition to these affluent suburban areas, pockets of urban affluence have grown in recent years. According to Chicago sociologist Pierre De Vise of Roosevelt University, Chicago's Gold Coast, located just north of the city's downtown Loop, has surpassed the very affluent suburbs just north of the city in terms of per capita household income.

Source: *Census Bureau, 1980 census*

Perhaps the archetypical affluent central city areas are the upscale portions of Manhattan, called Urban Gold Coasts in the PRIZM classicication, characterized by densely populated, multi-unit high-rises and low incidences of auto ownership.

Similarareas also are found in a handful of other metropolitan areas—Washington, Chicago, Boston and San Francisco—that are heavily white-collar, professional and childless.

The growth of these kinds of neighborhoods in Manhattan in recent years has pushed other kinds of affluent households out of the city, experts say.

"It used to be that the west side, just west of Central Park, in New York was where the affluent raised their families," says John Maier, author of a recent report from Find/SVP, a New York-based market research company, on the affluent.

With the sharply higher housing prices caused by increased demand for Manhattan housing from childless affluent couples and career singles, "it is getting difficult to do that."

There also are predictions that the growth of Urban Gold Coasts may be starting to wane.

"Some of the older baby boomers seem to be moving out of New York," says Lillian Deitch, vp at the Glastonbury, Conn.-based Futures Group.

"The affluent might not be as concentrated in the future as they are now," she says. "It used to be that there were one or two affluent suburbs and that, if you had money, that's where you lived. You were known by your suburb. It seems to me that, particularly with the younger affluent, people are spreading out more, living in different kinds of suburbs. They might be living in a gentrified area, or they could be living in an exurban area where they previously might not have lived.

"There is a greater variety of life styles. The younger people have grown up with a diversity of life styles." ■

---

ents to use the PRIZM classification in combination with information collected by such companies as A.C. Nielsen Co.; R.L. Polk & Co.; Simmons Market Research Bureau; SRI International, and Roper Associates.

Though such cross-correlations on occasion can go awry, they do make it possible to make a variety of predictions that would be difficult to obtain otherwise, such as projecting that a household in a Blue Blood Estates neighborhood is 232 times more likely to have a Rolls-Royce in its garage; is 1.4 times more likely to use much cat litter, and is twice as likely to consume pumpernickel bread than the typical U.S. household.

Jonathan Robbin, founder of Claritas Corp., says geodemographics is particularly suited for use in studying the affluent.

"The extreme types of neighborhoods are the most homogeneous, and it [geodemographics] works best in areas that have the kind of striking extremity that you find in Blue Blood Estates, which is three standard deviations from the mean in everything," Mr. Robbin says. "Neighborhoods tend to be homogeneous among one or more variables, but these [extreme] areas tend to be homogeneous along a whole host of variables.

"The same is true with the very downscale. If you walk through a ghetto, it is pretty uniformly dismal."

"So, when you look at the geographic dimension of the affluent, they tend to be pretty organized in a way that makes it possible for us to tell an awful lot about their life styles and to get a very accurate picture of their neighborhoods . . . and to predict their individual behavior." —*B.G.Y.*

Town & Country goes beyond club image

By Ed Fitch

"The person from the Bronx who recently won some $20 million in the lottery probably won't subscribe to our magazine," says Charles Kennedy, the 49-year-old publisher of New York-based Hearst Corp.'s *Town & Country.*

This does not mean that the publication, whose bloodline reaches back 138 years to 1846, is ignoring the *nouveau riche.* But Mr. Kennedy says it takes more than merely money to become a qualified member of *Town & Country's* constituency.

"Of course you need selective income to be affluent," he says, "but you also need education to appreciate culture and an understanding of life style."

Fortunately for *Town & Country* the number of people possessing that cultured life style—and the bankroll necessary to support it—is growing in the magazine's favor. Mr. Kennedy says he enjoys repeating the following statistic: More than 1 million millionaires currently live in the U.S.

This leaves the magazine, which has 388,500 subscribers as of June, according to the Audit Bureau of Circulations, plenty of potential to enlarge its coffers.

Mr. Kennedy, the former publisher of *Newsweek,* attributes the increase in prospective subscribers to the growing number of highly paid middle managers. Old-guard money still rests quite comfortably in the vaults of the Vanderbilts and Mellons, Mr. Kennedy says, but more and more personal wealth is concentrated in the hands of those who control property, not those who own it.

Mr. Kennedy characterizes the new affluent as someone who responds not to class distinction, but accomplishment. "It's no longer so much a case of who you are," he says, "but what you're about."

Town & Country, therefore, might seem to need to address two audiences: The old money—Mr. Kennedy says *Town & Country* is almost a house organ to some families—and the new aristocracy, who may respond to the publication as a "handbook for living" their new life, he says. However, according to Mr. Kennedy, the difference between the two groups is not distinct or critical.

Affluence no longer solely means having a house on the hill, servants and Thoroughbreds. "I asked one of our editors to define affluence," Mr. Kennedy says, "and she wrote: Affluence is the abundant flow of material goods, property and wealth, which carries with it the implication of not only acquisitiveness but also spending. And I want to emphasize the word flow."

This quality of reinvesting—and not just collecting—wealth differentiates today's affluent from previous Nob Hill inhabitants.

"The rich feel responsible to sustain the society that has allowed them to leave a mark," he says, also acknowledging the tax reward for reinvesting in business and charitable interests. "I doubt that there ever really was a class of the idle rich, but there certainly is not one now. The new affluent are emancipated and want to make a statement."

Town & Country *has become more serious, its publisher says.*

As the affluent society has become more complex and socially concerned, *Town & Country* has become more serious, Mr. Kennedy says. The magazine now features articles on such issues as South African apartheid and the quality of today's doctors and lawyers.

"*Town & Country* is not solely concerned with showing attractive people doing attractive things in attractive places," Mr. Kennedy says. "It is concerned with cultural, human, social and philanthropic matters. It is a magazine for doers."

He says the editorial direction proves that the publication is not a club book. *Town & Country* is not "a list of the rich," Mr. Kennedy says. He does acknowledge, however, that the loyalty of the magazine's audience is a large part of its success, saying that once readers subscribe they rarely discontinue. "It's like they're giving a gift subscription to themselves."

Not that the readers' favor isn't actively cultivated; printing a picture of someone in the pages of a magazine certainly can help endear a publication to that reader. "Many of our readers don't want to miss an issue because they will find themselves, their friends and acquaintances featured in it."

According to Mr. Kennedy, *Town & Country* is the only upscale journal to feature the women and men behind the money, both the new and the old guard. "Some affluent media, such as *The New Yorker* and *Vanity Fair,* are intellect oriented," he says. "Others are thing oriented, like *Architectural Digest.*

"Our intent is to provide insight into the lives of our subjects and readers; we don't prescribe a life style, we portray one," Mr. Kennedy says. "When

U.S. gymnasts face endorsement flap

By ROBERT RAISSMAN

The financial future of the U.S. Men's Olympic gymnastics team reaches a crossroads in Chicago Aug. 28 when the U.S. Gymnastics Federation will impart its rules and regulations concerning endorsement and appearance fees.

The situation for the USGF, the governing body of gymnastics in this country, is unprecedented. The gold medal-winning men's gymnastic team has become a hot commercial property following the Olympics, with advertisers reportedly seeking big-ticket endorsement packages from individual team members and producers trying to sign up the team for tv movie deals.

The rush of commercial attention for the men's team has led the USGF to become alarmed at how the six team members are being handled by their agents and attorneys.

At the heart of the issue is what the USGF perceives as individual greed versus the good of the team and the sport. If the athletes decide to go individually into endorsements and forsake the team, they will lose their eligibility to compete in amateur gymnastics.

On the other hand, the team members, through their agents, maintain that the chance to cash in on the glory of the gold medals may never come again—and may not last forever. For advertisers interested in the athletes' endorsement services, the issue is whether the gymnasts emerge from the controversy perceived as money-grubbing opportunists, a decidedly less valuable property than the well scrubbed image the athletes had before and during the games.

"In these kind of circumstances you find out how people really are and what kind of harmony they have," said Rich Kenney, USGF director of sponsorships. Mr. Kenney said that originally the USGF wanted only the athletes to attend the Chicago meeting, but they insisted on bringing their agents and lawyers. Sources added that representatives of the Assn. of Representatives of Professional Athletes may be asked to attend the meeting.

The USGF rules may have become secondary to some gymnasts,

Reagan strategy set

By MARK LIFF

Dallas—As President Reagan triumphantly accepted a ringing mandate from the Republican party last week, his powerhouse team of image makers cranked out "uplifting" tv commercials designed to take him back to the White House.

The new spots, to be aired in the fall campaign, fit in squarely with what seems to be emerging as the master plan of the Reagan-Bush '84 reelection drive: Leave the trashing to others, while stressing the positive yourself.

The commercials will focus on "individual issues, one at a time," and stress what the President's policies have done to strengthen the nation, said James Weller, a member of the Tuesday Team, the ad hoc agency creating ads for the presidential ticket.

"There is a general warmth throughout the campaign," added Ronald Travisano, another team member.

The two men, both high-ranking executives at Della Femina, Travisano & Partners, New York, and other members of the Tuesday Team were at the Republican national convention last week filming footage for later use in commercials. The team manned two skybooths high above the convention floor, from which they aimed their cameras and observed the proceedings.

No matter how the footage will be used, it probably won't contain some of the harsh rhetoric aimed at the President's Democratic opponents.

"Our campaign will not be negative," said James Travis, president and chief executive officer of Della Femina and director of the Tuesday Team. "At no time will you see the President be negative."

The strategy apparently is to ac-

Last Minute News

Beatrice gives Nestle Quik advertising relief

New York—Nestle Co. in an out-of-court settlement has gotten assurances that Beatrice Cos. ads will stop making direct claims about the sugar content of Nestle's Quik instant flavored drink mix. The settlement came in a lawsuit that Nestle, White Plains, filed in federal court here over advertising for Chicago-based Beatrice's Swiss Miss brand. Beatrice also has withdrawn a series of print and broadcast ads featuring actor Judd Hirsch. Those ads identified Quik as "80% sugar" (AA, April 30). Beatrice, through its advertising agency, Bozell & Jacobs, Minneapolis, is creating a new ad effort for fall.

Dusenberry takes film fuss in stride

By SARAH STIANSEN

Dallas—Philip Dusenberry must be used to having his quasi-ordinary projects explode into media events. It happened earlier this year, when Michael Jackson's hair caught fire during the filming of Mr. Jackson's Pepsi spots. It happened again when an 18-minute film for President Reagan escalated into a network news issue at the Republican national convention.

It's obvious that the quiet BBDO vice-chairman and executive creative director doesn't mind the attention.

Mr. Dusenberry thinks all the fuss is, well, "absolutely fascinating." On the evening before the film was aired by Cable News Network and NBC, Mr. Dusenberry, 48, predicted that the film itself would probably be the "most exciting thing on the air," and might

Line of fresh entrees to get Campbell test

By NANCY GIGES

Campbell Soup is reinforcing its reputation as an innovator in the food industry with the testing this fall of Today's Taste, a broad selection of cooked, refrigerated items prepared daily by local caterers.

The company also will add an international line to its Chunky soup brand next month and is working on a frozen gourmet soup in a ready-to-serve container.

Although all the details of Today's Taste have not been completed, Campbell is hoping to test the line in several stores in Washington, displayed in their own refrigerated kiosk filled with juices, soups, salads, entrees, desserts, sauces, spices and condiments that can be mixed and matched.

Several entrees in the works are grilled chicken with lemon, red snapper Vera Cruz and chicken with sunflower and pumpkin seed sauce. Initially, the line will probably receive little advertising because of the limited test.

The frozen soup line, as yet unnamed although Chunky has not been ruled out, is expected to be a heavily garnished soup in a thin broth. It may not be ready for test until next year. The agency is unknown, though Leber Katz Partners, New York, has been working on new products for Campbell.

The first on the market in this latest wave of new products will be the Chunky international soups, going into most western markets in September. Separate advertising from the regular Chunky campaign but with the Chunky theme, "Soups that eat like a meal," will break Oct. 15. The first three flavors are imperial won ton, tortilla filled with squares of real corn tortilla and beef ravioli romano. BBDO is the Chunky agency.

In another move, Campbell is negotiating with General Foods for the use of a GF-patented batter that might be appropriate for Campbell's Mrs. Paul's fish products. Those discussions may have prompted reports the two companies were talking merger, which both have denied.#

Charged with monopolistic practices

Nielsen sued by IRI

By DAVID SNYDER
Crain News Service

A.C. Nielsen Co. is the target of a major antitrust suit alleging that the market research giant is using monopolistic tactics to stamp out competition from a local rival.

Information Resources Inc. filed the antitrust action in U.S. district court in Chicago earlier this month, alleging that Northbrook, Ill.-based Nielsen is actively working to corner a burgeoning segment of the market-research business that uses sales data generated from the computerized scanning devices found at grocery store checkouts.

Court documents indicate that Chicago-based IRI's action stems from Nielsen's announcement last May that it would offer its audits on retail grocery store sales—the Nielsen Food Index—only if its several hundred subscribers agree to purchase its separate scanning data report. That report competes directly with a scanning service introduced by IRI in 1981.

In addition to unspecified monetary damages, IRI is seeking a court order permanently barring Nielsen from selling the audit index and scanning data as a single

'USA Today' promo rides on Kellogg packs

By WILLIAM GLOEDE

Gannett Co. and Kellogg Co. have cut a deal that is bringing newspaper promotion to the nation's breakfast tables.

In what is thought to be the first marriage of package-goods marketing and newspaper promotion, Kellogg is providing the back panels of its Nutri-Grain, Product 19 and Kellogg's Raisin Bran cereals free to Gannett to promote a cut-rate deal on home and office delivery of *USA Today*.

"It's part of our over-all, blue-chip program of looking for non-traditional ways to both expose *USA Today*, as well as solicit subscriptions and sales," said Carolyn Vesper, director of national-circulation sales for the Washington-based national newspaper. "It is the first time that I know of a newspaper doing an offer on package-goods products, particularly cereal."

Gannett approached Kellogg, Battle Creek, Mich., in February with the idea. "We gave them a feature-function-benefit presentation of the fact that we thought our demographics matched the same kind of people they were trying to sell those cereals to," Ms. Vesper said. "We came to an agreement based on that."

What Kellogg gets from the deal is added value for consumers on its packages. The subscription discounts range from more than $7 for three months to more than $25 for a year.

The promotion offers a one-third discount from *USA Today's* three, six and 12-month subscription rates for both home and office delivery by carrier or same-day mail.

The promotion-carrying packages began hitting the distribution pipeline two weeks ago, and are beginning to show up on supermarket shelves in various markets

NH&S/NY names McCann's Kuras

By STEWART ALTER

NEW YORK—Needham, Harper & Steers/USA, working to strengthen its operations here since Keith Reinhard took over as chairman-chief executive officer two years ago, has picked Jim Kuras of McCann-Erickson/New York to be president of its New York office.

Mr. Kuras, 44, was exec vp-general manager of McCann's office here since 1981. His previous employers include Marschalk Co., where he also had been exec vp-general manager of the New York office, and Procter & Gamble, where he started his career in 1962.

Bob James, president-chief operating officer, McCann-Erickson Worldwide, will add Mr. Kuras' responsibilities and have the New York department heads report to him.

The hiring of Mr. Kuras, which takes effect Sept. 4, comes only a week after the announcement that Peter Nelson, 52, had resigned as president-chief operating officer, NH&S/USA (AA, Aug. 20). Mr. Reinhard said the two events were unrelated.

The search for an NH&S/New York president has gone on since March, 1983, when Joel Baumwoll moved up to vice-chairman of the agency and Mr. Reinhard, who became chairman the previous July, took on the additional post as acting president of New York.

At that time, the office was billing about $110 million. New-business gains will bring New York's billings this year to between $155 and $170 million, compared with

CORPORATE CLOSEUP

Brunswick pins success on reorganization

Staff photo by Mary Herlehy

Brunswick Corp. top executive Jack Reichert has two aims: To keep Brunswick profitable, and to make bowling an Olympic sport.

By LAURIE FREEMAN

Skokie, Ill.—The 1984 Summer Olympics finished with a flourish, but at least one man keeps the torch lit for a new Olympic sport.

For Jack Reichert, chairman and chief executive officer of Brunswick Corp., the "crusade" to elevate bowling to Olympic status continues.

"Nothing can compare to the thrill of being an Olympic athlete," said the 53-year-old Mr. Reichert, whose support for the sport leads him so far as to narrate bowling image commercials. "There are at least 100 million bowlers around the world, and to deny the top amateurs the chance to compete in the Olympics is a shame."

That Brunswick's chief executive officer now has time to lobby for his favorite sport speaks well of a company that many Wall Street analysts had written off only two years before. Today, this marketer of marine power engines, bowling equipment, fishing gear, camouflage for the defense industry, door systems for buses, filters and valves is riding high on increased sales of products from all its divisions.

The result is paying off on Wall Street. "Brunswick smells so sweet right now," said analyst Stanley Fishman of Fahnestock & Co., New York. "It's making money, and it's one of the best buys on the market. The company cut its costs and it's selling products. You just can't beat that combination."

Such an assessment is welcome news to Brunswick executives. After K. Brooks Abernathy, Mr. Reichert's predecessor, sold Brunswick's Sherwood Medical Industries unit two years ago, the company lost its "highly regarded luster with investors," said Mr. Fishman. Faced with a hostile merger offer from Los Angeles-based Whittaker Corp., Mr. Abernathy, who since has retired but remains on the Brunswick board, sold off the division. In its last year of operation, the medical unit added $24.4 million in earnings to the company.

Mr. Reichert then was advised to sell off the company's recreational businesses, including bowling, fishing, billiards and even its profitable marine unit. Top investment bankers and analysts had told company officials Brunswick could not survive without the medical business.

"They told us to sell the recreational, marine and defense units and expand our technical and defense work," said Ross Stemer, a company spokesman. "We just didn't want to do that."

Mr. Reichert said he is glad he did not pay attention to the doomsayers. Brunswick is enjoying what may turn out to be its most profitable year in the company's 140-year history. For the first six months of fiscal 1984, sales are up 26% over the same period last year, to $766.4 million. Earnings increased at an even greater pace, rising 66% to $51.1 million.

Sales last year were $1.22 billion, up 14%, while earnings reached $66.1 million, compared with a $19.8 million loss from continuing operations in 1982.

Coupled with the recession of 1982, the earnings loss sparked major changes in the company's management structure, including the dismissal of 60% of its corporate and upper-management staff.

The company's 11 divisions, encompassing the technical-defense, recreation and marine power units, were consolidated into eight. Mr. Reichert then gave his top managers more power to run their units. "Decentralizing the company was crucial," said Mr. Reichert. "Under the old structure, it took too long for decisions to be made, and we couldn't react quickly to the demands of the marketplace."

On the heels of the decentralization, two-thirds of Brunswick's corporate headquarters here was rented out, saving $2.5 million yearly.

Under Mr. Reichert's guidance, the company also put $9 million last year into a new venture-capital program. The money backed projects ranging from oil-recovery improvements to powdered metals, all of which he said have long-term potential.

Business remains brisk at all the company's divisions, particularly at Mercury Marine, Fond du Lac, Wis., the maker of Mercury outboard engines. The division contributes 56% of Brunswick's sales.

Mercury's earnings were up 27% last year,

Time to unlink Pioneer chain

By LEWIS LAZARE
Crain News Service

New York-based Time Inc. wants to immediately sell Pioneer Press, its only newspaper holding.

Time apparently has given itself 90 days to discard the Wilmette, Ill.-based chain of nearly 30 weekly newspapers in suburban Chicago.

The asking price for Pioneer is believed to be in the $25 million range.

Although Time does not break out revenues for individual publications, Advertising Age recently estimated Pioneer's 1983 revenues at about $32 million. The chain is believed to be a solid profit maker.

In recent years, it has grown via the acquisition of Pickwick Papers, another suburban Chicago chain.

A Time spokesman refused to confirm or deny that Pioneer is on the block. Dave Simonson, Pioneer president and publisher, also refused to comment.

But sources at Pioneer say Time's decision to sell apparently is part of the company's plan to focus primarily on its large book publishing, cable tv and consumer magazine operations.

Although rumors have surfaced in the past regarding a sale, Time apparently now is quite serious about finding a buyer quickly.

It should have no problem unloading Pioneer, newspaper analysts said. Several large and medium-size newspaper chains could be interested, they noted, including Hearst Corp., New York, and Media General, Richmond, Va.#

July winners & losers

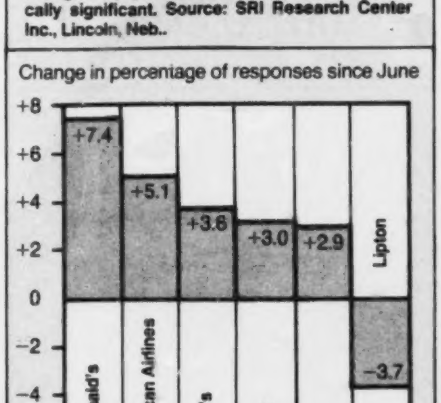
Change in percentage of responses since June



While others broil or beef, Big Mac stays on the top

By SCOTT HUME

adWatch

Wendy's grabbed consumers' attention—and national headlines—from February through April with its "Where's the beef?" campaign. Burger King in May moved back into the spotlight with Mr. Rodney, a caveman cookout and a reprise of its "broiling vs. frying" advertising.

Now it's McDonald's turn.

In July, 39.5% of the 1,254 adults polled for the Advertising Age adWatch survey named McDonald's as the first fast-food advertiser that came to mind. That share represented a hefty 7.4 percentage-point increase over the 32.1% share of top-of-mind awareness McDonald's commanded in June.

The chain was last month's single largest gainer in advertising awareness.

The July survey also shows McDonald's with a nearly 20 percentage-point lead over No. 2 Burger King (39.5%

High-tech magazines cool off

New York—The high-tech magazines' circulation boom was too hot not to cool down, according to the latest figures from the Audit Bureau of Circulations.

The per-issue averages for the six months ending June 30 show titles in the technology/computer field still growing over-all.

But the percentages of increase are starting to decline. In some cases, individual books lost circulation, a previously rare development.

In many cases, of course, a slowdown was not unexpected after several periods of double and triple-digit percentage gains.

For example, the percentage gains in this six-month period compared with the gains made in the six months ending June 30, 1983, are as follows: *Byte*, 12.3% vs. 38.2%; *Personal Computing*, 39.2% vs. 154.6%; *Popular Computing*, 24.3% vs. 110.3%; *Video*, 30.7% vs. 67.5%, and *Video Review*, 37.3% vs. 59.5%.

These high-tech titles lost circulation: *80 Micro*, 4.4%: *Electronic Games*, 4.1%, and *Microcomputing*, 22.1%.

In other areas, recent readership trends continued for the most part, though there seemed to be a few more magazines showing circulation drops than before.

For instance, among the top 10, only two, *TV Guide* (No. 2) and *Modern Maturity* (4) reported higher circulations, by 0.4% and 12.1%, respectively. In the six months ending June 30, 1983, five magazines showed gains. The remaining eight this time suffered declines: *Reader's Digest* (1), down 1.6%; *National Geographic* (3), down 1.5%; *Better Homes & Gardens* (5), down 0.2%; *Family Circle* (6), down 4.1%; *Woman's Day* (7), down 1.3%; *McCall's* (8), down 0.8%; *Good Housekeeping* (9), down 2.3%, and *Ladies' Home Journal* (10), down 1.5%. The ABC data do not include as magazines the major Sunday newspaper supplements, *Parade* and *Family Weekly*.

All six of the Seven Sisters in the top 10—*Better Homes & Gardens*, *Family Circle*, *Woman's Day*, *McCall's*, *Good Housekeeping* and *Ladies' Home Journal*—lost circulation. The seventh, *Redbook*, was the only gainer, up 1.5%.

Among business books, gains ranged from 1.1% for *Forbes* and 1.4% for *Fortune* to 15.4% for *Venture* and *Inc.'s* 25%. *Barron's* and *Business Week* declined by, respectively, 2.6% and 0.4%.

Of the newsweeklies, the largest, *Time*, showed a decline of 1.9% while the next largest, *Newsweek*, was up 0.5% and the third-largest, *U.S. News & World Report*, rose 0.1%.

Almost all the men's sophisticates continued to lose circulation, with *Playboy* down 1.1% and *Penthouse* down 7.3%.

Among magazines that were reporting their circulations for the first time to ABC: *Family Computing*, 315,830, and *Vanity Fair*, 281,519.#

Largest magazines by circulation

Modern Maturity's gain of more than 1 million readers was one of only two increases tallied by the top ten magazines. The 0.4% jump by *TV Guide* was the only other increase. *Family Circle* registered the largest loss – nearly 300,000 readers. Figures represent the per-issue average for the six months ending June 30 of each year. *Source: Audit Bureau of Circulations*

Rank					Per cent
'84	'83	Name	6/30/84	6/30/83	change

AdWatch

(Continued from Page 4)

vs. 20%), a margin McDonald's hasn't enjoyed since the January survey (41.8% vs. 21.5%), before the latest skirmishes in the burger battles had broken out.

McDonald's effective counterpunch was its new campaign, themed "It's a good time for the great taste of McDonald's," which broke June 18 (AA, April 16). It appears also to have been a great time for new advertising. The chain's previous theme "Together, McDonald's & you," launched in January, 1983, generated consistently strong awareness: McDonald's has never finished other than first in the 28 months adWatch has been conducted. But competitors have come close in recent months to knocking it from its perch.

Burger King's sharply focused comparative campaigns and Wendy's new-product and "beef" commercials tightened the struggle for top-of-mind awareness. In May, the Big 3 chains' awareness shares were tightly bunched: McDonald's, 29.2%; Wendy's, 22.8%, and Burger King, 18.3%.

"Great taste" has put McDonald's comfortably ahead again. For now. "If we needed improvement in any area it was in the area of being a little younger, a little more contemporary, a little more with it," said McDonald's exec vp and chief marketing officer Paul Schrage of the campaign.

As a result, the original 15-spot pool of "Great taste" commercials (new spots, including several promoting Chicken McNuggets, since have been added) included a few with break-dancers, two with pop group Menudo and one featuring the DeBarge group and dozens of smiling teen-age faces.

The result: Target market identified and captured.

The "Great taste" campaign generated higher awareness for McDonald's among respondents in the 18-to-34 age group than had "McDonald's & you" the previous month. In June, for example, 35% of respondents aged 25 to 34 said McDonald's advertising first came to mind. Its share of that group rose to 43% in July.

But McDonald's biggest gain last month came in the 45-to-54 age group. Its share of first mentions in this important market jumped from 31% in June to 45% last month, proving that even if you're too old to break-dance and aren't interested in owning a DeBarge album, you can still hum a good jingle when you hear one.

It should be noted that last month's adWatch survey was conducted between July 1 and July 20. The national attention focused on McDonald's following the July 18 shootings at its San Ysidro, Cal., store (AA, July 23) had little or no impact on advertising-awareness survey results.

The adWatch survey is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb. Advertising awareness is measured by asking a nationally projectable sample of consumers to name the advertising that first comes to mind in 22 product and service categories from all they have seen or read in the previous 30 days.

Last month, 1,254 adults were questioned by phone. Under adWatch methodology, an increase or decrease between monthly samplings of 2.8 percentage points is considered statistically significant and attributable to more than sampling variation.

There's more to life and advertising than fast-food. Among noteworthy developments in other product categories last month:

- Speaking of good timing, Procter & Gamble's got it. P&G is rolling out decaffeinated Folger's just as regular Folger's has surged in advertising awareness. With a 3.6 percentage-point increase to 22.5% of first mentions last month, Folger's returned to the No. 1 spot in the **coffee** category. Maxwell House was a close No. 2 in July with a 21.7% awareness share; Hills Bros. was No. 3 with 6.3%.
- The **airline** advertising category has been almost—but not quite—as unpredictable as the airline industry lately. American Airlines, Eastern Air Lines and United Airlines have traded stints in the No. 1 spot for several months. In July, American registered a 5.1 percentage-point gain in first mentions. Its 14.4% of the total tied it with Eastern for the top spot. United was No. 3 with 10.9%.

Don't be surprised next month if budget-carrier People Express, which received only 2% of total first mentions (most of them from respondents in the Northeast) in July, makes a bid for one of the top five spots.

- Americans may not be able to pronounce or spell ibuprofen, but American Home Products' advertising for its new Advil pain-reliever has made its mark in the **medicine and drugs** category. Advil didn't even show up in the June survey (although it may have received fewer than 1% of mentions and have been lumped in the "other" category), but last month it came to mind first for 3.9% of those polled. That put it in the No. 4 spot, behind Tylenol (28.3%), Anacin (6.5%) and Bayer (4.9%), but ahead of Excedrin (2.6%).

Bristol-Myers' ibuprofen-based Nuprin did not show up in July, but that, too, could change.

- Kodak, whose ad awareness dropped in June, last month made up some of the ground lost in the **cameras and equipment** category. Kodak's share of first mentions rose 3 points to 27.1% to increase its lead over No. 2 Canon (16.8%). Polaroid remained No. 3 with 8.3%.
- What happened to Lipton? It still had a stranglehold on top-of-mind awareness in the **tea** category last month with 42.7% of mentions (compared with 7.9% for No. 2 Nestea), but that share represented a 3.7% decline. Chris Evert-Lloyd—and her dad—may have returned just in time (during the Olympics). Tetley held the No. 3 spot with 4.4% of first mentions.

Worth noting is the tea marketer in last month's No. 4 position: It was Luzianne tea, marketed by New Orleans-based Luzianne-Blue Plate Foods Co. Luzianne received 1.8% of first mentions over-all (putting it ahead of Salada), but 5% of first mentions in the South Central region where it is sold.

- Shearson Lehman/American Express' stark new advertising in the **financial services** category shows no faces, no rampaging bulls, no heads turning to listen. Instead, its tv spots use only white type on a black background ("Now may not be a good time to 'play the market'. . .However it may be a very good time to invest in the market"), soberly read by an off-camera announcer. However stark the advertising may be, it has gained Shearson Lehman some surprisingly fast awareness.

After receiving fewer than 1% of first mentions in June, Shearson's advertising came to mind first for 3.4% of respondents, enough to dislodge Smith Barney in the No. 3 spot. Merrill Lynch's bull continued as No. 1 with a 6% share of first mentions and E.F. Hutton held the No. 2 spot with 3.7%.

- Nissan's advertising efforts to persuade consumers to stop calling its cars Datsuns are bearing some fruit in the **cars and trucks** category. Last month, 37 respondents said Datsun, 19 said Nissan, for a total of 56 first mentions (4.5%). Of course, the car maker's real problem is that 281 adults named Ford first (22.4%), 157 said Chevrolet (12.5%) and 123 said Toyota (9.8).#

For additional information or data, contact: Gary Gabelhouse, SRI Research Center, 301 S. 68th St., Lincoln, Neb. 68506. Phone: (402) 489-0351.

Stroh run seen as step toward national position

DETROIT—Stroh Brewery Co.'s Oct. 13 run for the Statue of Liberty drives home the company's efforts to move from a regional to a national brewer.

The company expects 400,000 runners in 123 cities to participate in the Stroh's Run for Liberty. Stroh is billing the nationwide happening as the biggest running event in history.

The run also is a merchandising tie-in to Stroh's $3 million sponsorship of the Statue of Liberty-Ellis Island restoration. The $8 runner's entry fee will go to the Statue of Liberty-Ellis Island fund.

The brewery will be supported in the event by Brooks Shoe, an athletic shoe and sportswear subsidiary of Wolverine Worldwide, Rockford, Mich.

Stroh also is enlisting local radio stations as promotional partners. Promotional announcements, pre-race activities and Brooks merchandise giveaways start Sept. 17, followed by race-day remote broadcasts and live coverage.

Promotion for the 8-kilometer (5-mile) run is through Hobson, Barnes & Associates, an Atlanta marketing service agency.

Stroh and Brooks will provide merchandise prizes and medallions for top finishers in each of the cities. Race sites were chosen to ensure that each state has at least one race, with heavier participation in states where Stroh is making a marketing push.

The brewery is backing the run with 30-second network tv awareness commercials, entry forms in sports and consumer magazines, radio spots and point-of-purchase materials. Marschalk Co., New York, is handling the print ads.#

Disney seeks spark via Hasbro

By CLEVELAND HORTON and JAMES P. FORKAN

Walt Disney Productions and Hasbro Industries tantalized the volatile toy licensing marketplace this week with the outlines of a potentially significant tv production and merchandise spinoff alliance.

Disney, long the premier U.S. animation house, and Hasbro, a toy marketing powerhouse, revealed they have collaborated on a new set of animated characters for both television shows and subsequent merchandise and licensing agreements.

Execs in the toy and licensing fields say the joint venture sounds "promising" and "aggressive." Most, though, declined to say more until further details of the new property become available. Network executives also expressed interest in the programing.

The characters, as yet not revealed, were developed jointly by the two companies, the first time in recent history that Burbank, Cal.-based Disney has split such a chore, according to Barton (Bo) Boyd, Disney exec vp-consumer products. Disney is now in the storyboard phase of creating the tv shows and won't approach the networks for 30 to 60 days, Mr. Boyd said. He added that the tv series and the character merchandising probably will be released at the same time.

Disney has long been a magic name in animation and licensing, though mainly for its pre-1960s theatrical cartoons. It has lately had a tough time scoring in movies and network tv. And while Disney has had prime time series on all three networks, it has stayed away from Saturday morning cartoons.

By linking with Hasbro—which in the past two years has become very aggressive in licensing its own toys to other companies and to tv syndication—Disney apparently is out to capture a share of the licensing revenues, that have been generated by such relatively new properties as American Greetings' Strawberry Shortcake and Care Bears and Hallmark Properties' Rainbow Brite.

The agreement calls for Pawtucket, R.I.-based Hasbro and Disney to share licensing in the U.S. while Disney has exclusive rights overseas. The tv release is expected in early 1985.

Although Disney has created a number of animated characters for theatrical release, this is the first time it has created entirely new characters specifically for tv. "We had considered creating new characters for some time," Mr. Boyd said. He added that the idea of collaborating with another company "sparked both of us [Disney and Hasbro]." Hasbro has licensed characters from Disney in the past.

Network representatives say they have

OLYMPIA LIGHT
OLYMPIA
STAY WHERE YOU ARE.
WE'LL SEND THE BEER.

Sending in the Oly

Pabst Brewing, Milwaukee, is backing expanded distribution of its Olympia and Olympia Light beers with new ads themed "Stay where you are. We'll send the beer." The humorous tv spots are airing in Texas and in the East and Southeast. The spots, via Young & Rubicam, reassure consumers that they needn't brave the Northwest to find Oly.

Hills attacks GF's Yuban via Gold Blend

By JENNIFER PENDLETON

San Francisco—Hills Bros., taking a lesson from the success of General Foods' Yuban, has entered the premium coffee market with a new product, Hills Bros. Gold Blend, now in test in Green Bay, Wis.

The coffee marketer, which Nestle Co. is in the process of acquiring (AA, April 16), is presenting the ground high-extract coffee as a slightly higher-price, upmarket alternative to mainstream coffee brands in ads on tv and in free-standing inserts.

"Imagine the taste of coffee fresh from the grinder," the commercial announcer says, spotlighting the product's gold and brown can. "That's the taste captured in new Gold Blend."

Gold Blend's introduction is Hills Bros.' first entry into the premium coffee market that Yuban dominates. Yuban is the only product in the premium category marketed nationally; other popular brands are marketed regionally.

Last year GF introduced a decaffeinated version of Yuban on the West Coast, far and away Yuban's strongest selling area. GF earlier this year launched Le Cafe, a flavored line of ground-roast coffees, under the heretofore instant-only International Coffees label.

Like almost all coffee marketers

K/D/P wins $6.5 million Cal. pitch

Sacramento—California's newly formed Department of Commerce here named Keye/Donna/Pearlstein, Los Angeles, to handle a $6.5 million advertising campaign for tourism and business development starting early next year.

The agency, which earlier completed a $300,000 market-research project for the department, was chosen over review finalists N W Ayer, Los Angeles and Ogilvy & Mather, San Francisco.

About $5 million of the department's $6.5 million advertising budget will be devoted to stimulating tourism; the remaining $1.5 million will apply to attracting business and industrial investment in the state. Tv and print ads in the western U.S. will start in January or February.#

Seeking network for fall schedule

New USFL ratings study

By ROBERT RAISSMAN

The U.S. Football League is moving ahead with a game plan designed to gets its fall, 1986, games on one of the networks.

The young USFL commissioned Yankelovich, Skelly and White to perform a study projecting television audience ratings for its 1986 shift to a fall schedule.

However, there is no guarantee the USFL owners will use the Yankelovich numbers. Earlier, they decided to move from spring to fall football despite statistical pitfalls presented in another league-commissioned study by McKinsey & Co. (AA, Aug. 20).

But Doug Kelly, a USFL spokesman, said the results of the new study will be used in negotiations with the networks. CBS and NBC currently carry National Football League games on Sundays, leaving only ABC without weekend professional football. At ABC, which has been carrying USFL's spring-summer games (along with ESPN), an official said that network is not interested in pitting the USFL head-to-head with the NFL. The NFL network contract expires before the 1986 season.

A highly placed USFL source who has been briefed on Yankelovich's initial findings said the research company had "an excellent"

Marschalk pins Diaparene; Pamprin line to Doner

New York—Sterling Drug's Glenbrook Laboratories has moved its Diaparene baby products line to Marschalk Co., New York, from N W Ayer. Billings are estimated at $1.5 million. Also, Chattem, Chattanooga, has moved an estimated $2 million in billings for Maximum Cramp Pamprin to W.B. Doner & Co., Baltimore, from Marschalk, which continues to handle regular Pamprin and other Chattem products.

California Cooler may pull cork on McCann

Stockton, Cal.—California Cooler, following months of reported dissatisfaction with marketing efforts for its wine cooler, is reviewing agencies for the estimated $7 million-to-$7.5 million account. McCann-Erickson, San Francisco, appointed earlier this year, is expected to compete against Chiat/Day; Ketchum Advertising; J. Walter Thompson USA, and Young & Rubicam, all San Francisco; Della Femina, Travisano & Partners, Los Angeles; Michael-Stewart Advertising, San Mateo, and Girvin, Conrad & Girvin, Sacramento.

O&M checks out from Marriott account

Washington—Marriott Hotels & Resorts and Ogilvy & Mather have agreed to end their relationship. Marriott cited its shift toward local, regional and direct marketing as the reason. The company spent $4 million a year through O&M, 24% of the hotel chain's national advertising budget.

Midway move may hatch new airline

By SCOTT HUME

Midway Airlines is contemplating creation of a new low-cost airline by buying out bankrupt, low-fare carrier Air Florida.

That airline initially will carry the Air Florida name, but a spokeswoman for Chicago-based Midway said it has formed a new subsidiary called Midway Express through which this week's buyout negotiations have been implemented.

The spokeswoman declined to speculate about what name Air Florida's planes eventually would carry if a buyout can be arranged. The name Midway Express is similar to Midwest Express, the business class airline operated by Kimberly-Clark Corp., Neenah, Wis.

Even if Air Florida's operations are absorbed into the existing Midway system, they would provide important added muscle. In addition to gaining Florida routes and more arrival and departure slots at New York's LaGuardia and Washington's National airports, Midway would gain operating rights into Westchester County Airport in New York for its Midway Metrolink business-class service.

The Westchester and LaGuardia slots would lessen the importance to Midway of its flights between Chicago and Newark. Low-fare carrier People Express, Newark, last week began flying that route (AA, Aug. 20), and fare cuts on the route by major carriers followed.

Midway on Aug. 27 presented a preliminary buyout proposal to a U.S. bankruptcy court judge in Miami, who gave Midway until Sept. 14 to present a detailed, final plan for absorbing Air Florida.

Under Midway's preliminary proposal, Miami-based Air Florida next month would resume flying (as an independent carrier) between Westchester, Washington, and several Florida cities. Service between Chicago and Westchester would be started.

That first phase would be in effect until November, after which time Air Florida could be folded into Midway.

A Midway buyout of Air Florida would require approval from the Civil Aeronautics Board, Air Florida's creditors and the U.S. bankruptcy court in Miami.

Meanwhile, Midway this week moved to strengthen its frequent-flier program by announcing an updated version of its FlyersFirst system, originally begun March 1.

The revamped FlyersFirst II still offers reward packages based on number of round-trips flown rather than miles flown (a measurement used by other carriers).

Print ads for the new program break Sept. 4, backed by a direct-mail campaign. Ally & Gargano, New York, is Midway's consumer agency. Zwiren & Wagner, Chicago, handles trade advertising.#

Underwear success leads to sale of Klein division

By PAT SLOAN

New York—In one year Calvin Klein's masculine-styled underwear for women has become a classic, with sales topping $48 million. That success, which the designer says "no one would have expected," may have required Calvin Klein Industries to sell its women's underwear division to Kayser-Roth Corp.

As demand for Klein's gender-bender underwear has grown, so has the competition from a handful of companies that might not have as toney a name as Calvin Klein, but are well muscled on the manufacturing side.

Kenosha, Wis.-based Jockey International's Jockey For Her, which began rolling out in fall, 1982, now is sold nationally, while Murjani International announced just a few weeks ago it is introducing a collection of Gloria Vanderbilt women's underwear with mannish lines (AA, Aug. 2). Then, too, there have been a slew of similarly fashioned products from knock-off artists that have copied the look but not the high price of these department-store labels.

For several months Klein's competitors have been saying the rapid growth of that company's own sales and the profusion of competitors it has engendered have put pressure on the designer's manufacturing plants. To continue to grow in women's underwear and withstand the onslaught of those companies with greater manufacturing capabilities, Calvin Klein Industries opted to sell the division to Kayser-Roth, they say. The sale was announced Aug. 27.

Reached at his office, Mr. Klein wouldn't couch the reasons for the sale—terms of which were undisclosed—in exactly those words. But when asked about reported manufacturing difficulties, he noted, "No one gears up for that kind of production in the first six months of a business. When we started out, no one would have expected this to be the success it has become. At one point Bloomingdale's couldn't run an ad for the line because every time it came in, it sold out the first day on the floor." The store

A recent survey of retailers showed they thought direct mail was the medium that best served their needs. *See Page 8.*

Home Box Office is leading a cable-industry direct-marketing program that aims to reach 25 million households this fall. *See Page 9.*

SPECIAL REPORT

Spending an estimated $38.6 billion on projects in 1984, the growing battalion of do-it-yourselfers has contributed to the growth of the home-improvement market, and hardware stores, mass retailers, home centers, specialty retailers and even product manufacturers have altered the way they do business to keep up with the changing marketplace. *See Page 11.*

The warehouse retailer is a growing phenomenon in the d-i-y home-improvement market; an example is Atlanta-based Home Depot, which has captured about 20% of the local home-improvement market with only four stores, by stocking everything to build a house and providing the service to explain how to do it all. *See Page 12.*

Host of tv's "This Old House," Bob Vila talks about how the proliferation of do-it-yourselfers is affecting the business of home-improvement contractors. *See Page 14.*

REGIONAL REPORT

With the National Football League season about to begin, many teams are marketing themselves aggressively to lure fans into their stadiums. *See Page 26.*

Video Theater is one of a number of companies setting up video retail outlets in unexpected locations—this one in a grocery store.

Videocassette rental sites in darndest spots

By SUSAN SPILLMAN

From a train station in the nation's capital to bookstores, grocery stores, movie theaters and even U-Haul outlets, videocassette rental facilities are sprouting just about everywhere.

The 12,000 traditional video retail stores specializing in renting and selling videocassettes and videocassette recorder hardware face growing competition from an estimated 2,000 unrelated businesses that have found shelf space to "moonlight" in videocassettes.

The nontraditional video retailers offer customers convenience and generally bargain prices. Prices for a one-night rental average about $2 in these stores, compared with as much as $4 from a video dealer.

Traditional dealers, on the other hand, offer greater selection. Therefore, such store owners claim they are not threatened by their new competitors.

"We offer bigger selections and experienced salespeople. You wouldn't buy records at K mart, would you? Then why should people want to rent cassettes at the supermarket," said a spokesman for the Video Software Dealers Assn.

"Record stores were the first of the new breed [of nontraditional video dealers], but now just about any type of business that has space and customer traffic is discovering that getting into the videocassette act can be very profitable," said Dave Butterfield, president of Butterfield Communications, a Cambridge, Mass., research company.

The reason is simple—startup costs are low and profits can be high. Setting up a video shop inside a store can cost less than $35,000, while first-year profits can exceed $50,000, Mr. Butterfield said.

For some companies such as Publix Super Markets, Lakeland, Fla., there is no upfront investment at all.

Video Theater, a video products distributor, supplies the grocery chain with several hundred tapes, as well as videocassette players, to rent. The two companies then split the revenues. Publix currently has video outlets in 32% of its 125 stores and is looking to add more, said Dean Ramus, assistant director of store operations for the company's division in Lakeland.

Publix isn't the only grocery store operation getting into video. Since March, six San Francisco area stores owned by Safeway Stores, Oakland, Cal., have been renting and selling videocassettes.

"A grocery store is the perfect place to rent videos. You can pick up a steak for dinner and get a movie to watch with it all at the same time," said John Saltners, a spokesman for That's Entertainment, which supplies Safeway with its video inventory.

In Manhattan, an outlet of the Food Emporium chain also is selling and renting videocassettes, but store officials declined to comment.

Renting videos also can help a store sell more of its staple prod-

(Continued on Page 5)

Polled retailers stamp approval on direct mail

SCARSDALE, N.Y.—Direct mail beat out newspapers as the most responsive medium to retailers' needs as advertisers, according to a recent survey.

Of the retailers surveyed, 38% found direct mail to be the most responsive ad medium to their needs; 34% cited newspapers; 7%, television, and 6%, radio. In the subcategory of food retailers, 48% found direct mail to be most responsive.

The survey, conducted by Aaron Cohen Marketing Services, was commissioned last year by Advo-System, Hartford, Conn., the nation's largest direct mailer.

Top executives in nearly 400 retail stores were interviewed. Food and food-related retailers comprised 45% of the sample. Most of the rest were from automotive, department, discount, drug, furniture, hardware or home improvement stores.

The sample's median annual retail sales volume was about $237 million, and the average number of retail outlets was about 32 stores.

The survey found that 87.6% of the retailers interviewed were satisfied with the results of their direct or shared-mail advertising.

It also discovered that 91.5% of the retailers planned to use direct-mail advertising again, and that more than 46% also planned to increase their 1984 budget for direct mail. Another 46% intended to keep their budgets the same. Only 6.8% said they would decrease their direct-mail budgets this year.

In contrast, the survey found that 39.3% of the newspaper and 28.1% of the magazine advertisers planned increases; 39.3% of the newspaper and 56.3% of the magazine advertisers planned to keep their budgets the same, and 22.3% of the newspaper and 12.5% of the magazine advertisers anticipated decreases.

Nearly half of the responding retailers said that direct mail was the best way to avoid duplication of an advertising message (for example, the duplication that occurs when ads appear in competing newspapers). Over-all, 49% of the retailers said this was so, but among food retailers, in particular, 55% said direct mail avoided duplication, four times as many as favored newspapers.

The survey also found that retailers believe direct mail most effectively keeps advertising expenses in line. Direct mail was so judged by 32% of the respondents, newspapers by 25%, radio by 10%, tv by 6% and magazines by 1%.#

Retailers on direct mail

Direct mail was selected most often by leading retailers as the medium which best pinpoints their advertising message to a specific trading area.

CMG Telemarketing to add inbound unit

Bruce McBrearty, president of CMG Telemarketing, says his company is launching inbound telemarketing capability to capitalize on a large potential for new business.

ALEXANDRIA, VA.—CMG Telemarketing is launching an inbound telemarketing center on Oct. 1 in Pasadena, Cal.

CMG, which has been providing outbound telemarketing services for five years, will now provide full-service inbound capabilities, too, including computer-assisted scripting, call monitoring and reporting and fulfillment, said Bruce McBrearty, president.

A new division, CMG Inbound Telemarketing, will be headed by an as-yet-unnamed executive with considerable experience in the telemarketing field, Mr. McBrearty said.

Generally, in outbound telemarketing an agency calls customers on behalf of a client, such as a retailer, to spur business with such strategies as special offers. In inbound telemarketing, customers call the agency, via a toll free 800 number, responding to the client's advertising or requests.

The bulk of CMG's outbound telemarketing business has been for clients active in fund-raising and development, such as charitable associations, political groups and television ministries.

Current clients include the American Medical Assn., tv evangelists Rex Humbard and Oral Roberts and the Republican Senatorial Committee.

CMG has not yet actively pursued customers for its inbound services, Mr. McBrearty said. He expects some existing outbound clients will use the new inbound services.

"Many of our clients came to us and said that they needed this," he said. "We will also be developing a lot of new business, particularly in tv direct response and the business-to-business area."

Mr. McBrearty said that CMG has developed many telemarketing skills through its outbound service that should make it attractive to inbound customers, too.

"Because of the expertise that we've developed in outbound telemarketing, we'll be able to do much more for our inbound clients than simply take orders on the phone," he said. "By working closely with our clients, we'll be able to talk about the companies and products that we represent, even sell."

Marketers are at the threshold of a new era in direct response, he said, explaining, "The vast potential of the 800 number has hardly been tapped. It is our hope that the formation of CMG Inbound Telemarketing will stimulate large numbers of organizations to explore more fully what can be accomplished with inbound telemarketing."

CMG currently is installing in its Pasadena facility 75 computerized work stations that will give it the capacity to handle from 20,000 to 30,000 inbound calls a day. Charges for the service have not been set yet but will be based on the number of calls handled.#

Essence, Hanover House unveil catalog for blacks

NEW YORK—Hanover House and Essence Communications, publisher of *Essence*, have teamed up to produce a mail-order catalog, Essence By Mail, aimed at black women aged 20 to 50.

Acting through their subsidiaries, Hanover House's Leavitt Advertising and Essence's Essence Direct Mail Marketing, the companies are planning a joint venture to produce five catalogs a year: Spring, summer, summer sale, fall and holiday.

The first catalog, 32 pages, is due the first week of September, with a distribution of 500,000. The catalog, which features black models exclusively, displays a range of moderately priced merchandise, including fashions, accessories, home-decorating items and the Essence line of intimate apparel.

The product mix, said James Forsythe, assistant managing agent and president of Essence Direct Mail Marketing, is 60% fashion and 40% home goods. "We're targeting the catalog toward the *Essence* audience," said Mr. Forsythe, "but to make it viable, we have to reach well beyond that."

The magazine has a circulation of 800,000, 650,000 of which are subscriptions, he said. The September catalog will test 50,000 of those subscribers matched against the Hanover House list of mail-order buyers. In addition, he said, Essence will test purchased lists of mail-order buyers selected on the basis of predominantly black Zip codes. "We'll be looking at both Zips and census tracts."

Essence Communications, founded in 1970, is a privately held communications company with interests in publishing, tv and merchandising. Ed Lewis, publisher-chief executive officer, said, "This joint venture with Hanover House marks a significant step forward in our plans to diversify ECI's operations. Essence By Mail is a natural extension of our success in magazine publishing, and will capitalize on the credibility we've established with black consumers."

For Hanover House, this is the first time it has teamed up with a publication to produce a catalog, said president Harold Schwartz.#

Senior editor Paul L. Edwards, New York, is the editorial director of the ADVERTISING AGE *Direct Marketing section.*

MacDantz signs fourth agency link

McLEAN, VA.—MacDantz Direct, a national direct-marketing agency, has formed its fourth affiliation with a general advertising agency since opening its doors 15 months ago. This latest is with Mel Richman Inc., Philadelphia.

Under the agreement, MacDantz will establish an office in MRI's headquarters building and provide its services in the Delaware Valley exclusively through Richman.

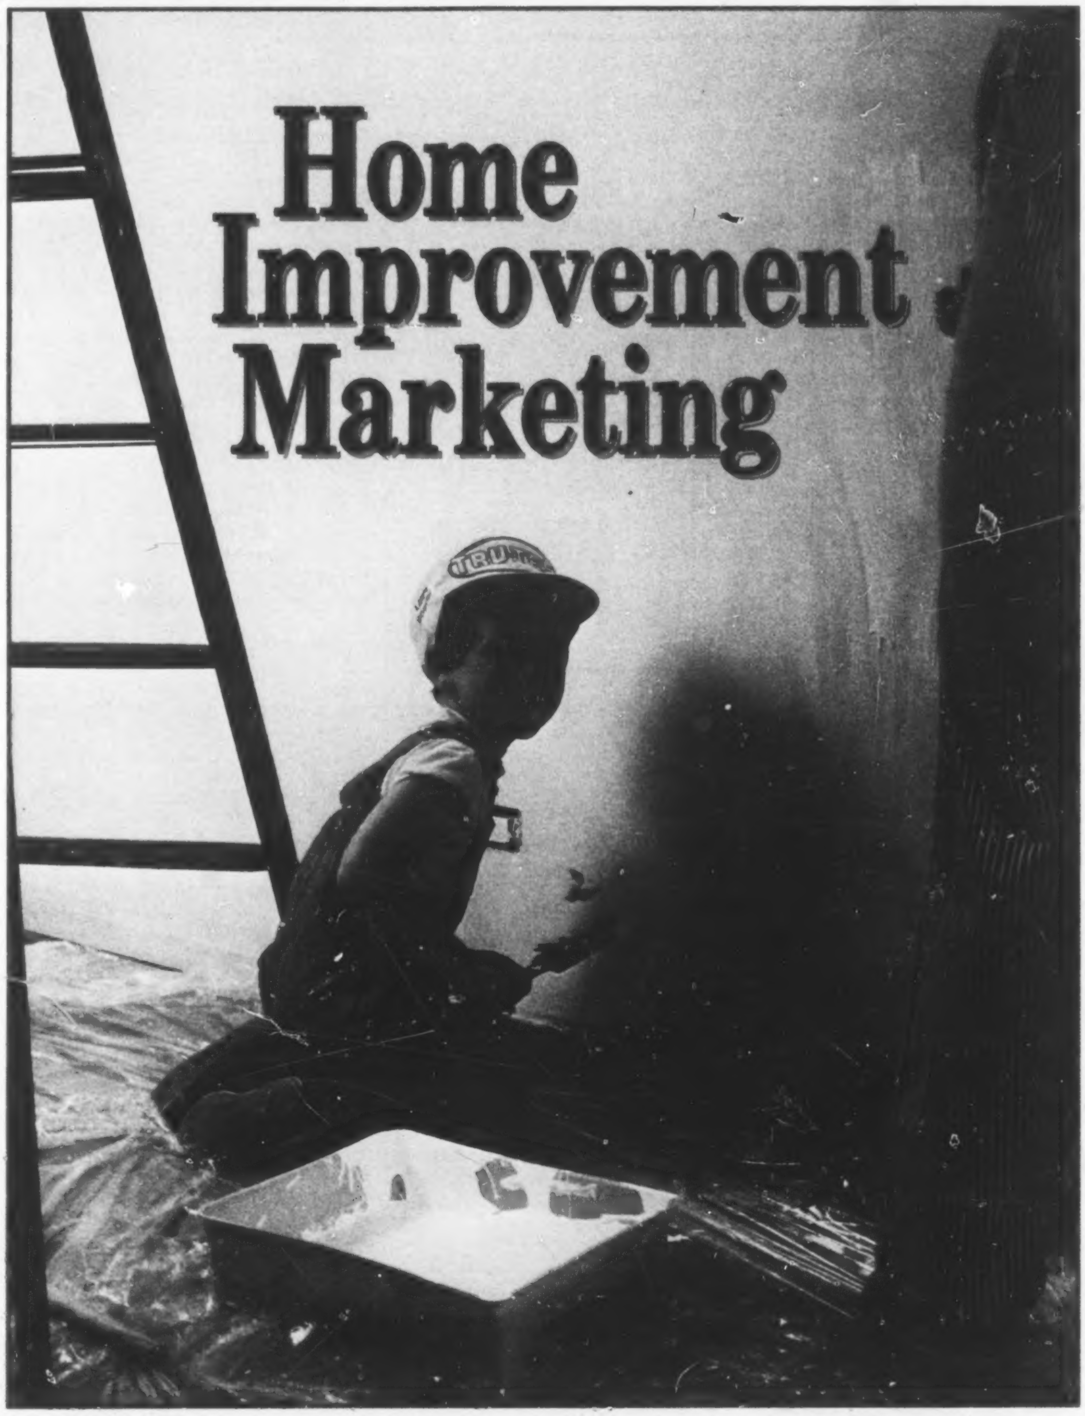
"We will have access to their direct-marketing expertise in the Philadelphia area," said MRI pr director Robert Ehlinger. "They will have access to our creative services here. We'll split the revenue from mutual projects."

Mr. Ehlinger said the Richman shop traditionally has been strong in creative, graphics and copy but had limited resources in direct marketing, an area that has become important to the agency.

"Rather than go out and try to develop our resources internally, we decided to go outside for more horsepower," Mr. Ehlinger said.

The MacDantz office in Philadelphia will be managed by William Ball, vp. Before joining MacDantz, Mr. Ball was vp of new-business development for Credit Card Service Corp., working on direct-marketing programs with financial institutions, retailers and oil companies. The other general agencies with which MacDantz is affiliated are Tucker Wayne Co., Atlanta; Needham, Harper & Steers/USA, Washington, and Lawler Ballard Advertising, Norfolk, Va.#

Home Improvement Marketing



Neal Vance

Do-it-yourselfers painting new face on industry

Just when you thought it was safe to buy an 8 ft. length of 2-by-4.

Unsuspectingly, you drive to your local home center. Inside, hordes of home improvement shoppers, armed with checklists and charge cards, hover around high racks of hardware and decorating products. After covering about 2½ miles of aisles, you come upon a huge doorway that opens into a yawning cavern of wood, stacked to the rafters.

You get the funny feeling you may be involved in something much bigger than buying a board. And, as a member of the booming battalion of do-it-yourselfers, you are.

In 1984, says Brad Farnsworth, executive director, Do-It-Yourself Research Institute, Indianapolis, about 75% of U.S. households will be involved in a d-i-y project. He estimates homeowners will spend about $38.6 billion this year on d-i-y projects. To put this figure in perspective, d-i-y expenditures (in 1984 dollars) totaled $26.5 billion in 1980, and annual spending is expected to hit $75 billion by 1990.

Mr. Farnsworth attributes much of the growth in the market to the baby boomers' recent rise to homeowner status. Their hands-on approach to life, coupled with their general disdain for paying a plumber $40 an hour to install a new faucet, makes these boomers the prime targets of d-i-y marketers.

"If you want to know what triggered the do-it-yourself movement," says Patricia Coleman, editor of *Building Supply & Home Centers*, Des Plaines, Ill., "just take a look at how much contractors are getting paid an hour."

While cost savings may be the initial motivation, Mr. Farnsworth indicates that an emotional factor counts more than the money. "When you can bring someone into your home and say 'I put up that track lighting,' . . . there's a great sense of satisfaction that transcends the economic side."

Ralph Dillon, president of Plano, Tex.-based Bowater, a home improvement warehouse center, condenses the motivation behind the movement into its most basic terms. "This is a *need* business," he says. "Everyone has the basic needs of food, clothing and shelter—we're talking about providing and upgrading shelter."

The entrance of warehouse retailers such as Bowater has started a race for market share. "More and more traditional building supply outlets are . . . developing a specific market strategy to position themselves in a niche from which they can compete with the new wave of retailers," says *BS&HC* publisher Joseph Modaff.

Once the domain of lumberyards and corner hardware stores, the industry is now a prime example of retailing dynamics, pulling Sears, Roebuck & Co. into direct competition with old-line local lumberyards. One of the building supply industry's earliest players, North Wilkesboro, N.C.-based Lowe's Cos.' stock meetings formerly were attended by building supply analysts, says Wyatt Kash, editor, *National Home Center News*, New York. "Now when they talk to analysts, half of the people in the crowd are retail specialists," he says.

"It hasn't been easy for a lot of these [building supply] people, who were accustomed to taking $3,000 sales orders from contractors, to shift to selling 59 cent washers," Mr. Kash says. "Many of the building supply centers just didn't have a retail mentality or capability."

But survival in this market means that hardware stores, mass retailers, home centers, specialty retailers and even product manufacturers must drill that mentality and capability into their staffs. Consumers are now driving what once was a trade-driven business.

Warehouses stack the deck

By Jim Auchmutey

Saturday morning in Atlanta. At one large hardware store on the east side of town, six cars, including employes' vehicles, sit in the lot. A couple of miles away at a supermarket-size home center, a young woman yawns at the only open cash register and files her nails

But down the road at Home Depot, a home improvement warehouse, the parking lot is crawling with cars, many bearing out-of-county license plates. Inside, a dozen checkout lines are open. Customers wander wide-eyed through canyons of stock shelved 20 ft. high, dodging forklifts that ferry everything from flooring to roofing to the kitchen sink.

It's like Six Flags Over Gypsum.

Although it is nowhere near the largest chain of home centers in the nation, Atlanta-based Home Depot Inc. is the hottest thing in home improvement since the hammer, according to many analysts and competitors. It was the only home improvement company—and one of very few retailers—to make the *Inc.* 100, that magazine's ranking of the fastest growing small public companies of 1984.

Since opening its first store in Atlanta five years ago, Home Depot has captured an estimated 20% of the local home improvement market with just four stores. Outlets are now in Louisiana, Florida and Arizona —21 in all. Plans call for almost twice that number by the end of 1985, after Texas and California are invaded.

Oddly, many people in the industry say they believe Home Depot and other warehouse operations have not wrested business away from competitors such as lumberyards, hardware stores and smaller home centers. As Home Depot chairman Bernard Marcus is fond of saying, his big sell makes the pie fatter for the whole home improvement industry.

"I agree with him," says Leonard Herring, president of the North Wilkesboro, N.C.-based Lowe's Cos., a much larger chain of much smaller home centers. "Sales at our Atlanta stores have increased above the company average. The warehouses seem to be increasing the business as well as setting standards others are looking to."

The warehouse concept pioneered by Home Depot is the third stage in the evolution of home improvement retailing.

In the 1950s, the hapless handyman had to visit six or more suppliers if he wanted to renovate a house. The business was so tailored toward professionals that the do-it-yourselfer often was too intimidated to ask for something as piddling as five furring strips. Change started slowly three decades ago as lumberyards set up cash-and-carry operations to accommodate nonprofessional customers.

> **"The warehouses seem to be increasing the business as well as setting standards others are looking to."**
>
> *—Leonard Herring*
> *Lowe's Cos.*

But the real revolution in the home center evolution occurred in the 1960s with the birth of home centers, pioneered by the Handy City and Handy Dan chains, now owned by W.R. Grace & Co., New York. Home centers offered a little of almost everything needed for the house.

The warehouse idea hinges on offering a lot of everything. "We wanted the customer to be able to literally build a house out of a Home Depot," says Mr. Marcus, a former Handy Dan executive. "So we came up with a store that's basically a warehouse with cash registers up front."

Home Depot is industrial-strength retailing. The stores are bigger—80,000 sq. ft., more than twice the size of most home centers—the selection wider—25,000 units stocked, about double home center inventory—and usually cheaper—the average pricing margin is rock bottom by industry standards, 28%. And that's "too damn high," Mr. Marcus says.

The most surprising thing is that Home Depot forged this formula and made it work during the worst U.S. recession in 50 years.

Not surprisingly, the concept has been imitated. Many conventional home centers have added space to their stores and increased their inventories. And several warehouse chains have been started, including Plano, Tex.-based Bowater, Los Angeles-based Home Club, Margate, Fla.-based HomeOwners Warehouse, San Antonio-based Home-Pro Warehouse and New Orleans-based HouseWorks.

Still, the warehouse trend is in its infancy. "We need to put this thing in perspective," says Harry Franta, editor of *Home Center Magazine*, a Vance publication based in Lincolnshire, Ill. "There are perhaps 50 warehouse stores operating in the U.S. If each did $15 million in annual sales—and that would be a very good average—that totals $750 million."

Last year, Lowe's rang up almost twice that amount, resulting in total sales of about $1.4 billion. And *Building Supply & Home Centers* reports that the 322 largest home improvement retailers' 1983 sales reached $25.5 billion. Only a handful of those 322 companies were warehouse operations, although Home Depot's sales of $256 million topped the average of $79 million.

Mr. Franta says he does not want to "belittle the trend. Warehouses are growing. Some of the better thinkers in this industry say they will capture 7% to 10% of the industry."

That would be remarkable. Home improvement is a very fragmented business dominated by local and regional chains. None of the big boys—Lowe's; Payless Cashways Inc., Kansas City, Mo.; Wickes Cos., Santa Monica, Cal.; W.R. Grace—commands more than 3% of the national market. Smaller home centers as a group account for more than a third of it.

Increasingly, the market is the province of the home handyman. This year, the Do-It-Yourself Research Institute, Indianapolis, estimates that almost three-fifths of the $68 billion Americans will spend on home improvement will come from the hip pockets of nonprofessionals. A primary reason: The rising cost of buying and maintaining a home.

"Do-it-yourselfing has become

Jim Auchmutey, a writer with the Atlanta Constitution, *is renovating his home. He reports being on a first-name basis with every clerk in every Atlanta-area home center and hardware store.*

Lowe's renovates its image

When Robert Swanson talks about the strategy of Lowe's Cos., you'd think he was selling Diane Von Furstenberg blouses instead of sheet rock. Lowe's, the second largest home center chain in the nation, takes design very seriously.

"When you walk into a Lowe's, each corner of the store makes a fashion statement," says Mr. Swanson, senior vp-advertising. If a Lowe's executive had said something like that 20 years ago, he might have been sent back to the sawmill to get his mind back on the right plane.

Obviously, things have changed at the North Wilkesboro, N.C., company. Years ago it was known for running lumberyards in slumbering small towns down the East Coast and across the South. No frills, no fashion statements—just lots of wood, sold to professional contractors for the most part.

During the home center revolution of the 1960s and 1970s, Lowe's gravitated toward do-it-yourself retailing, but contractor sales remained the backbone of its business. Increasingly, though, company leadership realized that every time home building slumped, Lowe's was whapped with a 2-by-4 on its corporate keister. When housing starts almost stopped in the late 1970s, the company decided to court the common consumer carpenter in a big way.

It launched a plan called RSVP (Retail Sales, Volume and Profits), aimed at standardizing the company's 241 stores. A consultant was hired to make the showrooms more appealing to retail customers by improving traffic flow and lighting. The product line was shored up, store hours extended, advertising increased.

The result: After a flat sales tally of $1 billion in 1982, Lowe's recorded $1.43 billion in 1983. It was the first good housing year in which the chain made more money selling to consumers rather than professionals.

"That clearly is the future trend," Mr. Swanson says.

In today's home center industry, Lowe's plays a boutique compared with Atlanta-based Home Depot's warehouse. Although Lowe's is constructing larger stores, its typical outlet is 12,000 sq. ft., one-sixth the size of an average Home Depot. And it stocks one-third as many items.

The biggest difference, though, is store appearance. In stark contrast to Home Depot's two-story industrial shelving, the aisles of which are prowled by forklifts, Lowe's has traditional retail displays and pipes in music. "We present merchandise in a way you can envision it in a finished house," Mr. Swanson says. "We don't just show you kitchen cabinets in a row; we show you the wallpaper and countertop. We try to provide the sizzle along with the steak."

As for price, Lowe's beats Home Depot on some things, but it can't meet it item for item. "But price isn't the only thing that matters," Mr. Swanson says. "There's color, pattern, wood tone. The customer wants to know that something's fashion-right."

And, as a typical consumer, I certainly want my 2-by-4s to be fashion-right. *—J.A.*

Nailing down the home improvement market

a very important part of our life style today," Mr. Marcus says. "When money is tight, you can give up a vacation, put off buying a dress or a new car; but you need a roof over your head. Your house is the only damn thing that's worth anything in this world. Fixing it up is a good investment."

Home Depot takes the fixup philosophy to heart. Many of its outlets are located in converted Woolco or Treasure Island stores, and its headquarters is a renovated A&P grocery store on the banks of the Chattahoochee River. Sitting in his office there, Mr. Marcus sounds almost evangelical while explaining do-it-yourselfing. It can get to be an addiction, like jogging.

"We have one interview on tape where a guy says Home Depot is his life," he says. "People laugh when they hear it, but they don't realize that for him, a Saturday without Home Depot is almost like passing up sex."

But for the average homeowner, who'd rather hold a spouse than a hammer, that first do-it-yourself project can be intimidating. That's where service, the other element of the Home Depot formula, comes in. Each store employs more than 120 people, most of them fulltime. It's not unusual to see a sales clerk diagramming a project for a customer.

Finding trained staff is one of Home Depot's biggest potential problems as it expands, industry observers say. One way the store found staff in New Orleans was to raid the competition. In the time-honored tradition of free enterprise, Home Depot hired away employes from Harry's Ace Hardware, a six-store chain whose vp, Don Shellist, calls warehouse stores "the beasts."

Today, a year later, he assesses the warehouses' effect on Harry's: "They had no effect at all—other than making us change our entire operation.

"We had to get better," Mr. Shellist says. "We pushed training very hard. We restructured our ads. We had to attack the high-price image of the hardware store in general, so we ran specials on high-profile items like Black & Decker tools. We almost doubled our advertising the first year just to maintain market share. We used to say 'Harry's Ace Makes Hardware Easy'—very laid-back southern-style ads. Then we went to a guy banging a board on tv and screaming about prices.

"The warehouses," he says, "really shook up the marketplace."

Indeed, when Home Depot invades a city, it's a frontal assault, with advertising as its artillery. In Orlando, for example, they asked customers to bring in the catalog of Scotty's Inc., a 110-store home center chain that's been based in Winter Haven, Fla., almost as long as pink flamingos. Home Depot said it would knock 20% off Scotty's prices. They needed two police officers to direct traffic at one store.

Home Depot's ads are a mirror of the company: Big, no-nonsense and sometimes brash. Newspaper spreads, a monthly

Sears, K mart building on homes

By B.G. Yovovich

The far-reaching changes under way in the home improvement market have spurred mass market retailers to embark on some major remodeling projects of their own.

At K mart Corp., Troy, Mich., not only have in-store home improvement product offerings been expanded dramatically and reorganized into mini-home center modules, but this summer K mart acquired Home Centers of America, San Antonio, Tex. Soon after the acquisition, K mart announced plans to aggressively expand HCA operations and move into new markets.

> **"... when people want to make an improvement in a given area of their home, they want to prepare for it in one shopping trip."**
>
> *—Barbara Palazzolo*
> *K mart Corp.*

Giant retailer Sears, Roebuck & Co., Chicago, also has revamped its home improvement retailing operations and is testing a new breed of stand-alone home improvement stores.

Moving in the other direction, J.C. Penney Co., New York, has abandoned the market and removed home improvement products from its stores.

HOMECARE CENTER
CONTEMPORARY LIVING

K mart Corp. has reorganized its expanded home improvement offerings into home center modules.

More generally, the whole industry is abuzz with speculation about the fast-growing warehouse home centers and the impact these changes will exert on existing retail channels. "The whole scenario is changing rapidly," says Barbara Alexander, a vp-building and construction analyst with Salomon Brothers, New York.

B.G. Yovovich is a frequent contributor to Advertising Age *Special Report.*

Sears, Roebuck & Co. is attempting to build a solid reputation in home improvement through its in-house brand names, such as Craftsman tools and Weatherbeater paints.

The changes at K mart illustrate some of the impending fundamental shifts in home improvement retailing. Guided by customer surveys and market research, K mart efforts began with restructuring the chain's in-store home improvement operations.

"We found that not only were people getting more involved in do-it-yourself [activities], but that when people want to make an improvement in a given area of their home, they want to prepare for it in one shopping trip," says Barbara Palazzolo, assistant to the vp for public relations.

"They want to go to one place to purchase the entire package and go home and complete the job on a given day or weekend. We . . . make sure that the merchandise we have complements that one-day project," she says.

In particular, K mart brought together hardware, plumbing and other products that previously might have been located in different departments. Inventories of building materials—roofing, insulation and dimensional lumber, for example—were expanded, and, in many cases, relocated from storage areas. In combination, these moves essentially turned the home improvement modules into 8,000 to 12,000 sq. ft. mini-home centers within the K mart store.

Product packaging also has been changed. "We found that people wanted instructions, so our buyers worked very closely with merchandisers" to provide more detailed information on packaging, Ms. Palazzolo says.

A decade ago, products such as door locks and kitchen faucets generally were placed in plain brown boxes marked with little more than a stock number. Today's hardware box is likely to be "a consumer package, with step-by-step instructions," says Harry Franta, editor of *Home Center Magazine*, a Vance Publication, Lincolnshire, Ill.

"There is better packaging, better presentation, better instructions, and the product has been improved. Even siding and paneling have been improved" and made easier for the do-it-yourselfer to install, he says.

"If you look in a K mart, you will see a lot of stuff that is packaged and ready to go," Mr. Franta says. "It's geared to self-service." The success of the in-store expansion prompted the K mart task force that engineered the effort to examine other possibilities.

"As [the task force members] studied the [home center] warehouse retailing operations, they realized that this was an area that had some real promise," Salomon Brothers' Ms. Alexander says. "And, because it was somewhat capital-intensive, it could give a company like K mart a leg up.

> **"There is better packaging, better presentation, better instructions, and the product has been improved."**
>
> *—Harry Franta*
> **Home Center Magazine**

"It would, for example, be really expensive to put up 10 or 20 [warehouse-size] stores in Chicago," she says. "There is so much in the way of preopening costs, so much in first-year advertising costs, that almost no one could afford it. But for K mart, it would be [on the order of] a penny a share. They could take the hit and not even notice it."

K mart officials also became convinced new warehouse stores would not cannibalize existing K mart home improvement sales.

"Our free-standing home centers will cater to a completely different market," Ms. Palazzolo says.

"In the K mart stores, we are catering to the one-day or weekender projects, whereas our Builder's Square stores, though they will have those one-day things, also will feature products for more extensive, more elaborate projects," she says.

Based on these conclusions, K mart acquired the nine-unit Home Centers of America warehouse chain this summer and announced plans to add two more HCA units in Texas. It also revealed plans to open three Builder's Square warehouses in the Chicago area by the end of 1984. Ten new units are planned for 1985; locations have not been indicated.

At Sears, officials say they probably will not parallel the moves made at K mart. For one thing, although the retail giant rearranged and remerchandised the home improvement areas in its "stores of the future," Sears is limited in how extensively it can tie in with do-it-yourself consumer trends.

For example, its stores, many of which are located in shopping malls, run into logistical problems with items such as plywood sheets and dimensional lumber, making it difficult for Sears to take the "everything you need for your weekend project" approach.

Similarly, stores located in shopping malls often are prohibited from carrying growing goods, products that have been increasingly successful at traditional home centers, in their lawn and garden sections.

Even Sears' experiments with stand-alone home improvement units take a different approach, a Sears official says, attempting to build on its basic marketing

(Continued on Page 14)

Homeowners won't leave contractors out in cold

Special Report: Commentary

Nearly everyone involved in the home improvement market is drumming up images of a dynamic do-it-yourself army. This group of hammer-happy homeowners reportedly is learning how to nail down the intricacies of increasingly complex projects, revolting against the ravages of professional contractors' hourly rates.

To determine whether the legions of professionals are doomed, and to obtain a contractor's opinion of the home improvement movement, we called Bob Vila, host of "This Old House," a Public Broadcasting System tv program. The show, which brings together contractors who transform the homeliest hovel into a majestic mansion, is sponsored by Owens-Corning Fiberglas Corp. and entering its sixth season October.

By Bob Vila

The economics of the mid-1970s were what brought the home improvement market to the forefront.

I pick the Arab oil embargo as the point that really highlighted the economic times; people realized that inflation was getting out of hand and by the end of the '70s they did not want to pay for anything they could do themselves.

What really helped the home improvement industry is that it's simple for most people to become involved in it. Do-it-yourself auto repair hasn't caught on to the same degree because it's much easier for someone to replace the sash cord on a window than a fan belt on a car engine.

This phenomenon—well, I don't know if I can refer to it as a phenomenon because it's always been here—never will let up. As the population increases and more new homes are built and more are rehabilitated, the do-it-yourself aspect of the industry can only spiral upward. Probably the most popular home purchase is the 50-to-100-year-old home. And more people are realizing that nothing is more rewarding than face lifting an old house.

Not to mention the fact that more and more people are making their living rehabilitating and renovating dwellings. Activity in home improvement is happening on so many different levels, all of which support its existence.

No one has lost out by the growth in do-it-yourself projects. Larger contractors work on big jobs, so they haven't been affected. The small home improvement contractor probably has suffered a bit in the short term, but not over-all. The contractor and do-it-yourselfer have a symbiotic relationship.

"Take an accountant who's a real crackerjack carpenter. If he decides to build an addition or totally revamp his house, he can probably handle all the carpentry. But he'll most likely have to call in an expert to handle the plumbing or the electrical or the roofing. You see, the do-it-yourself movement has really built business for everyone because people wouldn't have thought of doing half of the things they're undertaking today. They would have moved to another house or just not bothered before.

Besides the fact that in building very few people are a jack-of-all-trades, another factor supporting contractors is that most people don't have the time to do projects themselves. In our new show, we're attempting to show that the best approach is a blend between contractor work and do-it-yourself projects. Homeowners just don't have the time or the expertise to handle everything.

Contractors also will function as home improvement consultants for do-it-yourselfers. They won't do this as a mainstay of their business; maybe about 20% of the time. On one hand, they are slightly incredulous that they can charge for their services as consultants. But on the other, they feel they have valuable knowledge and skills that they shouldn't give away for free. It's similar to the way that architects' fees and service are structured.

There's also a lot more advice on the retail side. I've watched lumberyards evolve into home centers, and the major change has been in the personnel who staff the home center of today. Before, you had professionals selling to professionals; the staff didn't have to deal with consumers or do much in the way of traditional sales and service.

Now, one of the most important things for salespeople is that they know how to help people get going on a project without intimidating them, explaining as simply as possible what's needed to undertake and complete a job. The home improvement retailer—along with books, magazines and shows such as "This Old House"—increasingly will be the most important source of information. ■

strengths: Our good name, our in-house brand names of Craftsman [tools] and Weatherbeater paints.

"There is plenty of room in this industry for different types of retailers, and the most critical thing is to develop a personality in the consumer's mind, something that you stand for."

In particular, the five free-standing units it has been testing during the past year are intended to be essentially convenience stores, offering little more than the full line of Sears paint and hardware. "We sell more paint to the consumer than does any other retailer," a Sears spokesperson says.

When company projections showed that industrywide paint sales would become increasingly competitive and only grow at a 4% rate, "we recognized that we could not just sit there and expect to keep our business."

In contrast to Sears and K mart, J.C. Penney has backed away from the home improvement market. "We eliminated those product lines in order to provide additional space for more fashionable lines of merchandise, which our research shows customers expected to find in department store settings in regional shopping malls where we have most of our stores," says Henry J. Rusman, public affairs field manager.

"We felt that we needed to position ourselves to compete with the traditional department stores for the fashion and home furnishing purchases of the regional shopping center customer," he says. "That was the foundation of our business. We were not essentially a hard lines merchant, and home improvement was a very small part of our merchandise offerings in these large traditional full-line department stores. "We felt that selling hammers and tools next to designer sheets and pillowcases is the wrong mix."

By dropping its home improvement products, J.C. Penney will avoid some of the challenges that will confront retailers that remain in the market. For one thing, efforts to put together an in-store home improvement center require the retailer to develop new skills.

"Just what is the right selection to have in structural panels? How much waferboard to have against plywood? What grades of plywood? How much of each? There is a lot to be learned there," Mr. Franta says.

The extensive advice and services offered by warehouse stores also are likely to put pressure on other home improvement retailers to upgrade their service offerings.

"An important part of the reason that warehouse stores have grown is that they can help the people who don't know anything more than 'I've got this piece of pipe in my hand. It broke off and I need to replace it.' This has been one of the things that has been lacking in mass merchandisers," Mr. Franta says. ■

Warehouse

(Continued from Page 13)

mailed catalog, and tv and radio spots—with spokesman Al Carrell, the syndicated radio "Super Handyman" whose voice must register 10 on the nasal scale—present the Depot's products. The print ads are distinguished by such punnish headlines as "Talk about Cheap!" (for telephones) and "Air to the Throne" (for bathroom fans).

The ad fusillade isn't necessarily bad for competitors, though. Home Depot's advertising "brings attention to home improvement in the whole area," Mr. Shellist of Harry's Ace Hardware says. "Sales were up for our whole operation in 1983." For that matter, Scotty's reports no sales losses in cities where it competes with Home Depot.

So far, then, the do-it-yourself market seems to be growing steadily enough to keep everyone happy. The economy is robust, the grown-up baby boomers are sawing and sanding, and the computerized cash registers are beeping and blipping.

"It'a a race for markets," *Home Center Magazine's* Mr. Franta says. "We have yet to see a warehouse casualty, but I think we will soon. These stores depend on tremendous management talent."

And Home Depot?

"There are limits to management, and somehow they will need to train enough people for this enormous expansion," he says. "But they haven't shown any weaknesses yet." ■

Confidence to fuel growth

At the same time that the home improvement market will present problems and challenges to the myriad retailers jumping into the hammer and nail business, it also is likely to offer some very attractive opportunities.

The cost of hiring home improvement contractors continues to rise, and, says Barbara Alexander, a vp and building and construction analyst with Salomon Brothers, New York, "There are 90 million households out there, including 40 million that are more than 20 years old and are owner-occupied. I have never seen a 20-year-old house that couldn't use some work."

The home improvement industry also has the unusual ability to increase the market for its goods and services. In the food industry, for example, "you can take the number of stomachs in the country and that is the governing factor: How many cubic inches of stomach you have to fill," says Harry Franta, of *Home Center Magazine*, Lincolnshire, Ill.

"Our business has an ability to feed on its own success. If someone comes into the store and does that typical first project—say painting—and goes to the store, gets the right kind of tools and the right paint and gets the job done, it gives them a lot of satisfaction, a sense of accomplishment," he says.

"When that happens, it gives them that all-important confidence to say, 'Hey, the light switch broke, and I don't want to spend $50 to get an electrician over here. I'm going to see if I can do it.'

"What happens with do-it-yourselfers is that the confidence factor keeps growing and the [home improvement industry] pie gets bigger."

Says Ms. Alexander: "One of the things that these companies are trying to do is to get people to feel comfortable about doing larger and larger projects, because, ultimately, that is the way they are going to increase their business." *—B.G.Y.*

Nestle ups ante for food mergers

By NANCY GIGES
and GAY JERVEY

Nestle S.A.'s willingness to pay $3 billion to buy Carnation Co. (AA, Sept. 6) is a clear indication that consolidation in the food industry is likely to be slowed by the high ante required to purchase a quality U.S. company.

Signaling growing interest among foreign companies in the huge U.S. food business, a cash-rich Nestle is determined to enhance its presence in the U.S. by paying top dollar—the most involving any non-oil-company acquisition—for Carnation's dairy, pet-food and tomato-products businesses.

In return, it will double its business in the U.S. and will benefit from being able to expand Carnation's products overseas through its established Nestle network. Less than 20% of Carnation's sales come from abroad.

Last year, Nestle obtained about 25% of its $13.4 billion in total sales from North America. But over the past several years, top executives at the company's Vevey, Switzerland, headquarters have bemoaned poor profitability in the U.S.—a condition they clearly wish to correct.

Most analysts put their stamp of approval on the match, despite the high price tag. "It's certainly a great idea for Carnation stockholders," said Ronald Morrow of Smith Barney, Harris Upham & Co.

"It's a good fit," said Robert Cummins of Wertheim & Co. "Both companies are major factors in the U.S. grocery market. The attractiveness for Nestle lies in the fact that the company can broaden its product lines, as well as increase its clout in grocery stores, by having more products."

A spokesman in Vevey said it's too early to know which Carnation brands will be marketed in Europe, but he pointed out that Carnation already is selling in several European countries. "They have their own European network. It will be a question of integrating it with our own," he said.

In the U.S., a spokesman at Nestle Enterprises, which oversees 10 U.S. Nestle subsidiaries, including most food operations, said Carnation would report directly to Switzerland and not to James Biggar, president of Nestle Enterprises.

For its part, the Carnation acquisition will give Nestle new opportunities in an array of product lines, most of which Nestle's U.S. operations have never touched.

Although best known for its evaporated-milk products—for years made famous by Carnation's "contented cows"—Carnation also has strong footing with its Friskies and Mighty Dog pet foods, Coffee-mate and Instant Breakfast dairy products and Contadina tomato products, as well as other items in the 200-plus Carnation product line.

Particularly interesting for Nestle—with its highly successful Lean Cuisine frozen foods from its Stouffer's subsidiary—is Carnation's move into the health-and-fitness area. Two years ago, the company christened Carnation Health & Nutrition Centers and,

Court lassos Chiat on work for Pizza Hut

By RUTH STROUD

Los Angeles—Godfather's Pizza won a preliminary injunction against Chiat/Day last week that restricts 10 of the ad agency's staffers from working on or helping those handling the Pizza Hut account.

"Justice has prevailed," noted Julian Pollok, an attorney with Hahn & Cazier, the law firm here representing Costa Mesa-based Godfather's. "We got everything we wanted."

Although the decision may appear novel in advertising circles, where sharing of proprietary information during an agency review apparently is taken for granted, similar suits are common in other industries, Mr. Pollok said.

"This just shows that the advertising business is subject to the same rules as other businesses," he said.

The Godfather's lawsuit, filed on June 29 (AA, July 16, *et seq.*) in superior court here, asked that those agency employes who had been party to a Godfather's review and had access to the company's proprietary marketing information not be allowed to work on the Pizza Hut account. Chiat/Day acquired the account soon after dropping out of the Godfather's review.

The suit, filed before the agency was awarded the $20 million account by Wichita-based Pizza Hut, charged that Chiat/Day would be in an "irreconcilable conflict position" if it won the account and "necessarily be obligated to make use of the confidential" materials it

No anti-takeover plan, execs say

ABC's stock puzzle

By DIANE MERMIGAS

Officials of American Broadcasting Cos., while maintaining they do not know who or what is behind last week's ABC stock-buying spree, say they will not take any immediate action against possible takeover attempts.

Executives at Capital Cities Communications and Gulf & Western issued denials of rumors their companies were behind the ABC stock run.

Federal officials say such a merger could pose antitrust and other questions relating to cross ownership of over-the-air broadcast properties, cable tv systems and services and publishing interests.

However, ABC executives and Wall Street analysts agree that the mystery involving ABC stock activity may start unraveling this week.

Any possible tender offer would have to be made soon because a continuation of last week's stock activity would only drive up the price. ABC stock jumped 6 points Sept. 5 and another 2 points Sept. 6. However, at close Sept. 7 trading was down 3⅛ to $74 a share, a price ABC officials say more accurately reflects the company's true worth. Volume also declined, from a high of 1.2 million shares Sept. 6 to 347,900 on Sept. 7.

PediaCare cough/cold remedy goes national

Fort Washington, Pa.—Johnson & Johnson's McNeil Consumer Products Co. subsidiary is introducing nationally PediaCare children's cough/cold remedy in three forms. PediaCare 1 is a cough suppressant, PediaCare 2 is a decongestant/antihistamine and PediaCare 3 is a combination of those two formulas. All come in liquid form; PediaCare 3 also comes in chewable tablets. The company plans to launch a $3.6 million multimedia campaign. It was not known at press time what ad agency would handle the effort.

Casualties mount in computer book shakeout

New York—The computer magazine shakeout rumbles on with the folding of *K-Power* and *Compute!'s PC* and *PCjr*. Scholastic says *K-Power*, the 9-month-old magazine that just absorbed rival *Microkids* (AA, June 11), will become a section of its *Family Computing* as of the January issue. Editorial material from *Compute!'s PC* and *PCjr*, which debuted last March from Compute! Publications, Greensboro, N.C., will appear in *Compute!*, with the November issue.

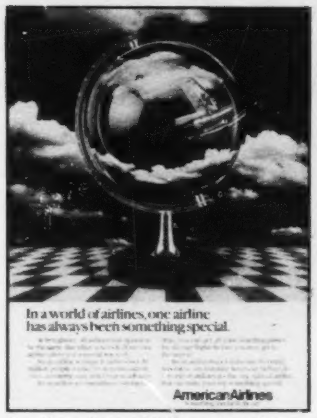
Air-war ads draw battle lines

By TOM BAYER

Airlines headed into the sagging travel season are unleashing ad campaigns that reflect how the survival-of-the-fittest market is shaking out: Struggling carriers are firing themselves up with hard-hitting, fare-based messages, while the superpowers unveil ads that come from cool heads.

Four airlines, each with new ads appearing last week or being launched today, show how the airline industry is evolving:

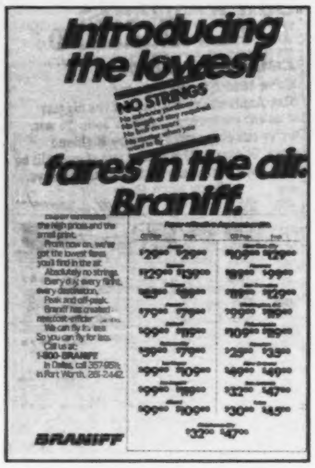
- Frontier Airlines, which lost nearly $16 million in the first six months, says its fares are low and lower, "fares you can use."
- Braniff Airlines, shifting its marketing strategy in midstream, says its fares are the lowest.
- Continental Airlines, continuing to fight its way back from bankruptcy, portrays passengers on other airlines slapping their foreheads and exclaiming they could have flown Continental instead of United Airlines or others.



In a world of airlines, one airline has always been something special.
American Airlines

"Continental would have Federal Expressed my ticket to my desk overnight. Free! Why did I fool around with United?"
CONTINENTAL

As American Airlines breaks a new "special" campaign theme, the "second-tier" carriers fire off hard-hitting messages.



Introducing the lowest fares in the air.
NO STRINGS
Braniff.
1-800-BRANIFF
BRANIFF

- Meanwhile, relatively prosperous American Airlines portrays itself simply as "Something special in the air." And, unlike the weaker carriers, American and Chicago-based United are raising unrestricted fares $10 over current levels.

The new ads, besides mirroring the so-called "two-tier" system developing in the airline industry, also reflect particular conditions that face each company.

In Frontier's case, the Denver-based airline is staving off mounting losses by shifting to the low-fare, no-restriction, peak and off-peak strategy pioneered by Southwest Airlines and Pacific Southwest Airlines 12 years ago. Frontier's chief target, however, is Continental, which adopted the low-fare approach as part of its reorganization through bankruptcy proceedings.

Frontier also is changing its routes and schedules effective Oct. 1, in order to increase traffic to popular destinations and eliminate marginal or unprofitable runs to 22 cities.

"What we're doing will lower our cost of doing business," said Ron Thornton, general manager of sales for the airline. "Handling 74 different fares was highly inefficient."

Mr. Thornton said the decision was based on market research indicating the carrier was putting its emphasis on the wrong areas, such as meal service.

The tag line for the campaign

Time venture faces a rival

By STUART J. ELLIOTT

New York—A battle of new investment magazines could begin early next year with Time Inc.'s expected weekly title competing against a new publication from Plaza Communications.

Details about the Time Inc. project, under consideration by the company's magazine development group (AA, April 23, *et seq.*), continue to emerge, despite corporate disclaimers. Latest word from industry sources is that the magazine, likely to be named *Investor's Weekly*, will debut in March.

Plaza's strategy is to attack the market with a monthly, *Personal Investor*, that would stalk the same readers and advertisers as the Time Inc. publication. Its publication would debut in January or February.

Plaza already publishes *Registered Representative*, a magazine for stockbrokers.

The Plaza magazine would face a Time Inc. property that would be the same size as *Time* and on slick paper, sources say. Its content would be oriented toward coverage of big breaking news stories, done by a national network of 60 staffers. Frank Lalli, ex-*New York Daily News* business editor, is expected to be editor; other top editors, it is said, will include Richard Stern, formerly of *Forbes*, and

NFL tv ad rates sacked by glut

By VERNE GAY

New York—National Football League games on network tv are wallowing in a severe buyer's market, with ad prices down 25% to 30% from last year.

At least one network was forced to ask advertisers to "front-load" their football schedules to keep unsold time from deflating the market further.

The situation for the networks has worsened due to major sports advertisers shifting big sports dollars into prime time, the confusion and depressed state of college football on network and syndicated tv and the uncertainty of sports advertisers in their plans for the Major League Baseball playoffs and World Series.

There also are reports that major sports advertisers, worried by the skyrocketing prices being paid by networks and syndicators for sports broadcast rights, are sending a message to the broadcasters that the days of carte blanche sponsorships are over.

ABC's "Monday Night Football," coming off a poor ratings performance in 1983, is experiencing the greatest difficulty, according to sources. Instead of getting its rate-card base of $180,000 per 30-second spot, ABC reportedly is selling spots in "Monday Night Football" for as little as $125,000. CBS and NBC, which telecast NFL games on Sundays, are getting between $60,000 and $75,000 per 30 seconds for spots that normally fetch $90,000.

ABC's sports sales corps reportedly is encouraging clients with football ad schedules in October and November to move their spots into September, a front-loading process the networks employ when demand is especially soft. By increasing commercial time in September, ABC would have inventory available later in the season as a hedge against the possibility of

(Continued on Page 102)

Nestle

(Continued from Page 1)

additionally, has experimented with other "healthy" products that may benefit from the heavy advertising and promotional support Nestle is expected to give selected Carnation products.

Although the centers' performance to date has been disappointing—the chain has only 54 locations, as opposed to the 100-plus projected—Carnation, under Nestle's auspices, likely will build its efforts in the weight-loss business by accelerating tests of those "less is more" products that fare well with health-conscious consumers.

Through a spokesman, Carnation denied any major changes would take place under Nestle management. And at least one of the Carnation agencies, SSC&B, was visited by top Carnation executives last week and told the acquisition would not affect their relationship.

Period of no changes

One analyst said that, at least for now, this should be the case. "I think there will be a period of consolidation with no major changes," said Alan Greditor of Drexel Burnham Lambert, New York. "It would be far more pragmatic to keep business as usual and let the companies get to know each other before making any earth-shattering changes." (Carnation declined comment on its future plans for its products.)

However, industry speculation appears to contradict the company line. Many suggest that Everett Olson, Carnation's conservative 77-year-old chairman and chief executive officer, will retire in the near future.

For his part, Merrill Lynch's Bill Maguire predicted Nestle will change management after six to nine months and will put its own people aboard to infuse Carnation with more aggressiveness.

And aggressiveness, particularly in new-product development, is what industry observers have said Carnation needs. The company certainly is a well oiled money machine—it has posted 31 consecutive profitable years—but it also has maintained an old-fashioned and, in some instances, parochial modus operandi.

"It's been my impression that Carnation has not really been going anywhere," said one analyst. "They seem to have been milking some of their key product lines, and have been slow to develop a strong new-product track record."

Such is the company Nestle has hooked, but the lure of strengthening its U.S. interests proved too powerful to resist. It was not until recently that top Nestle management in Switzerland recognized that its U.S. operations would not generate enough cash independently to fund long-term growth, either through new-product development or acquisition. That became apparent late last year when Nestle acquired Ward-Johnson Co. At that time, the acquisition was heralded as only the first in a round of purchases designed to give the company a firmer position in the U.S.

Spree may continue

Nestle's buying spree is not likely to stop with Carnation. Indeed, Nestle has said that it will continue to woo smaller companies with product lines in targeted, preferably growing and profitable, business categories, including pharmaceuticals and some food areas.

"We always have about 30 to 40 projects going, and I'm sure in the next few months more things will pop up," said Helmut Maucher, managing director, earlier this year.

In the Ward-Johnson deal, Nestle Co., the White Plains, N.Y., subsidiary, acquired such all-American brand names as Chunky, Bit-O-Honey, Raisinets, Oh Henry! and Sno-Caps, all of which fit nicely with Nestle's Crunch and regular chocolate bars, as well as Toll House morsels.

In an in-depth interview with Advertising Age (AA, July 5, 12), Mr. Maucher addressed questions about the company's over-all strategic blueprint and the Ward-Johnson acquisition, in particular: "I think our opportunities for growth [in the U.S.]—with all the resources we have—are better than in the rest of the world for the next few years. . .

"First, we look for acquisitions that are complementary to something we have already in our product line, so through the acquisition we can strengthen our position, strengthen our business, be better positioned in the consumer's eyes, improve our corporate image, etc. Ward-Johnson is exactly that type of acquisition because we have a nice chocolate image. . .

"Second, we are interested in businesses where somebody else was creative, innovative and has developed the nucleus of a new business. But he has neither the financial nor international possibilities to expand. Here Nestle has a natural partner, of course, because with our financial capacity we can develop this business, and we have the international contacts and organizations already in place."

Mr. Maucher's words explain well Nestle's acquisition of San Francisco-based Hills Bros., first announced last April. It will enable Nestle to realize a long-contemplated dream of entering the ground-roast arena in this country —a dream deemed necessary if Nestle is to shore up its listless U.S. coffee operations.

"Our opportunities for growth (in the U.S.) are better. . .in the next few years" — Helmut Maucher

Instant-coffee share off

Nestle's share of the instant-coffee business has been declining since it peaked in 1979 at 33.5%, according to figures compiled by beverage analyst John Maxwell Jr. According to longtime Nestle watchers, the company was seduced during the middle-to-late 1970s by soluble coffee's growth rates and badly misjudged that category's momentum, which has slowed consistently since that time.

Equally important, Hills Bros. fits Nestle's bill in terms of what *it* is looking for in a partner. Not only has Hills Bros., long known as a quintessential regional roaster, suffered from eroding U.S. coffee consumption, but it has lacked the financial, distributional and marketing clout to cross swords successfully with such giants as Procter & Gamble and General Foods, which command 24.9% and 34.6% of the ground-roast business, respectively.

Interestingly enough, Nestle's commitment to the U.S. market has been reflected in not just acquisitions and new products—the company earlier this summer introduced Nestle Custom Blended coffees, a line of four instant brews with varying beans and tastes—but also through its depth of understanding of the particular problems and opportunities endemic to this country.

As such, after years of shuttling Swiss executives from Vevey to White Plains, Nestle appointed Mr. Biggar as head of most of Nestle's U.S. subsidiaries.

In describing his philosophy, Mr. Maucher told Advertising Age: "There was always a big misunderstanding for Europeans when they entered business in the U.S., as well as a misunderstanding by Americans who enter European business, that Europeans and Americans are the same people, that they apply the same rules, the same approach, the same marketing. But if one goes a little deeper, one finds that there are a lot of differences—in mentalities, in consumer approach, in consumer behavior—[all of which] need a completely different approach. And who can do it better than people who have lived in this country, were born in this country and know the country very well."

Whether or not companies know this country well, food-industry analysts see little prospect of further consolidation of this magnitude—unless it comes from foreign companies. These organizations, like Nestle, have to be so set on entering the U.S. food market in a big way that they will pay a premium to acquire.

Mr. Morrow of Smith Barney, said Nestle paid more than any domestic company would pay.

U.S. food companies have expressed continuing interest in good buys, but they emphasized that they must make sense economically. Another deal reportedly in the talking stages is PepsiCo/Kellogg, two companies that have been linked as possible partners in past years. A PepsiCo spokesman said the company does not comment on the subject of acquisitions and divestitures. At Kellogg, there was likewise no response to the possibility of a PepsiCo combination.

Another company on the acquisition trail, General Foods, said it is always looking at companies that "fit with our strategic plan," but that generally means smaller, less diversified companies with a limited line of food products. The Rye Brook, N.Y.-based food company has made several acquisitions within recent years, including Oscar Mayer processed meats, Entenmann's baked goods and Ronzoni Italian foods. But none has been of the magnitude of the Nestle-Carnation deal.

Analysts also cited Campbell Soup and Quaker Oats as plums in the U.S. food business, but they quickly add that it would take a lot of money to get them.

Campbell president R. Gordon McGovern has stated repeatedly that Campbell is not for sale and is not interested in merger. What the Camden, N.J.-based company wants is to grow through acquisition itself.

"It's like a funnel out there," said a Campbell spokesman, "and when you get to the quality companies, the funnel narrows dramatically." He said Campbell has looked at large companies for possible acquisition, but so far none of the large ones has fit. "We must have something that we can fit our hands around and manage well," he added.

Earlier this year, Mr. McGovern said Campbell could easily digest about $200 million in acquisitions every two years. Pillsbury and ConAgra executives also have stated publicly they are on the lookout for consumer foods companies.

One analyst who doesn't think all the big candidates have been gobbled up is Ronald Strauss of William Blair & Co., Chicago. "Kellogg, for instance, would be a pure play and a fine candidate to my mind," he noted.

Certainly, there cannot be many more of the likes of Nestle-Carnation and the Beatrice Cos.-Esmark Inc. deal that rang up a $2.8 billion tab in May. Other food buys have been more limited in scope, like Ralston Purina's bid several weeks ago for Continental Baking, a $475 million deal.

Other recent combinations have been Dart & Kraft's purchases of Celestial Seasonings and Lender's Bagel Bakery, and Quaker Oats' acquisition of Stokely Van Camp.

New relationships bloom

Meanwhile, the consolidations that have taken place since Nabisco joined up with the old Standard Brands company in the early 1980s have been establishing new types of relationships between manufacturers and suppliers. Bill Bishop, president of Willard Bishop Consulting Economists, Barrington, Ill., predicts manufacturers will gain more and more clout.

"You'll see manufacturers intruding into the business of their retail and wholesale customers, more actively involved in the details of inventory levels and marketing plans, things that were once the sole province of the retail and wholesale companies," he said.

Some see benefits for the wholesale and retail segments of the business as well, since those in the segments may be able to negotiate better, bigger buys by dealing with fewer, larger companies. But at least one marketing executive from a major grocery chain disagreed. "This merger is a ho-hum thing for us. We don't think such mergers will drastically affect the way we do our business."#

Both big spenders

Chicago—Both Nestle Enterprises and Carnation Co. are among U.S. companies in the Advertising Age 100 Leading National Advertisers issue to be published Sept. 14.

As the 61st-largest advertiser, Nestle invested $115 million in advertising in 1983, including $95 million in measured media. The biggest dollars went into the company's coffee, chocolate and Stouffer's frozen foods. Taster's Choice soluble coffee received $19.5 million in measured media; Stouffer's frozen foods, $23 million, including $8 million for Lean Cuisine; Nestle morsels, $15 million; Nestle Crunch, $8 million, and Nestle Quik, $6 million.

Nestle's roster of agencies for food products includes Leo Burnett USA, Chicago; J. Walter Thompson USA, New York; Jordan, Case & McGrath, New York; McCann-Erickson, New York; HBM/Creamer, Pittsburgh, and Sherwood & Schneider, New York.

In 1983, Carnation was the 99th-largest U.S. national advertiser, with ad spending of $54.3 million, including $39.3 million in measured media.

Its biggest dollars went to support New Breed dry dog food ($7.6 million) and Friskies cat food ($7.2 million). Another $4 million was invested in Fancy Feast cat food and $5 million in Come 'N Get It dog and puppy food.

The company's major agencies are SSC&B, New York; Foote, Cone & Belding, Los Angeles, and Dailey & Associates, Los Angeles.#

Will FTC remember CooperVision case?

By STEVEN W. COLFORD

Washington—If Nestle expects the Federal Trade Commission to consider favorably its proposed acquisition of Carnation, the Swiss conglomerate better show a little more respect than in July, when its negative attitude toward the government agency killed its proposed $513 million purchase of CooperVision.

The FTC nixed the deal for CooperVision, the Palo Alto, Cal., contact lens-care company, after Nestle officials refused a commission request to sell about 25% of the business that competed directly with Alcon Laboratories, Fort Worth, a Nestle subsidiary.

"The key this time will be how cooperative Nestle is," an FTC official said. "If they have the same sort of 'we-want-all-or-nothing' attitude, there will be the same end result."

The FTC and the Department of Justice must decide which agency will investigate the proposed $3 billion acquisition, but FTC chairman James Miller last week said he expected to get the case, largely because of the commission's history of reviewing cases involving consumer-product companies.

Besides the CooperVision case, FTC in 1979 approved Nestle's acquisition of Stouffer. But Nestle remains subject to a 1979 commission order requiring the FTC approval of any acquisition of a company involved in frozen prepared foods, a category in which Carnation has minor interests.

The products likely to draw the most FTC attention are ice cream, cocoa and dairy products as the commission considers the potential anticompetitive effects of Nestle's buyout.

In Germany, Nestle must get the blessing of the Cartel Office to acquire Carnation's subsidiary, Glueckslee, which has annual sales estimated at $100 million. Both companies market canned milk and yogurt in Germany. Nestle's subsidiary, Allgauer Alpenmilch, is already the market leader in branded goods.

German observers at this point think the Cartel Office will allow the acquisition there.#

Daytime sold out; it's billion $ baby

By VERNE GAY

NEW YORK—Daytime on network tv has become the first daypart to reach a virtual sellout through the rest of the year. The development is the result of a rush of new advertisers and hefty budget increases this season from traditional daytime spenders.

Including upfront, scatter and barter-syndicated programing such as the "Donahue" show, sources estimate the total daytime market this year should exceed the $1 billion mark for the first time.

The daytime market was extremely brisk in the upfront season last May through June. The scatter market has been helped by the general belief among advertisers that demand would remain strong through Christmas and no price drops could be anticipated.

Network sources report last spring's upfront buying spree had consumed 90% of NBC's daytime inventory for $265 million; roughly 80% at CBS for $330 million, and about 75% at ABC for $265 million.

The strong daytime sales also reflect a growing attitude among big advertisers that the cost-per-thousand efficiencies in daytime are more attractive than in prime time, sources say. As a result, the new daytime dollars are coming out of prime time budgets. The three-network average cpm on homes in daytime in the upfront market was $2.50, or a $6.50 cpm against women 18 to 49. Prime time cpm averages are about double the rates for daytime.

"I noticed that our biggest prime time spender last year increased its daytime spending 75% and prime was cut a degree," said Gary Carr, vp-associate director, network programing, SSC&B, New York. "For

Tells retailers beware direct marketers

Zale in 'direct' assault

By TOM BAYER

DALLAS—A prominent retailer blasted direct marketing this week, calling the growing industry "public enemy No. 1" to retailers and shopping centers and a threat to their existence.

Speaking at the International Council of Shopping Centers meeting here, Donald Zale, chairman of Zale Corp., described direct marketers as "a new breed of competition" who have taken "a lesson" from retailers.

"They're trying to beat us at our own game by giving consumers what they want, and doing it in a time and money-saving fashion," he said. "They are in existence to take customers out of the malls and out of our stores."

Mr. Zale sounded a battle cry urging retailers and shopping center owners to unite. "We can't remain passive about this issue, only thinking of the short term," he said. "Retailers and shopping center owners and operators must band together. It will take all of us, working together with the experts in related key areas, to begin formulating the kinds of strategies that will ensure our survival."

To create a blueprint for addressing the challenge, Mr. Zale suggested the ICSC conduct a forum with a leading university that would be "a watershed event where major retailers, shopping center owners and operators, banking officials, futurists, economists and market researchers could begin formulating pragmatic strategies.

"Consumers are waiting for ideas to shape their lives," Mr. Zale said. "Let us be pro-active and make that happen."

Mr. Zale, whose $939.8 million company does 90% of its business in shopping centers, sized up the "enemy" by noting that it has been growing at twice the rate of retailing. Direct marketing was a $150 billion industry

Lorimar hunts for a top shop

By BOB MARICH

CULVER CITY, CAL.—Lorimar, the public company best known as producer of CBS-TV's "Dallas," is poised to go on another agency acquisition spree, this time looking to take over one of the 20 largest shops in the U.S.

Sources report that Lorimar, flush with the prospect of huge profits from syndication sales of its off-network tv series, wants an agency with a strong international presence, primarily to serve as a network for the international sale of its syndicated programing. Sources also said the target shop, not identified by Lorimar, will be larger than Kenyon & Ecknardt, the 23rd-largest U.S. agency, which Lorimar acquired in August, 1983.

Heading the list of takeover candidates are publicly traded agencies, sources said.

Officials at Lorimar have declined comment on the reports.

Leo-Arthur Kelmenson, chairman of K&E Holdings, said there

Ericsson's $10 million account lands at B&B

GREENWICH, CONN.—Ericsson Inc., the U.S. subsidiary of the Swedish-based communications giant of the same name, has selected Benton & Bowles, New York, after a three-month review. The 1985 budget for the marketer of corporate telecommunications equipment will be $10 million, a source said. That is said to be dramatically higher than the current budget at David Deutsch Associates, Ericsson's former agency.

DMA chooses Gitlitz as president-ceo

NEW YORK—Direct Marketing Assn. has named Jonah Gitlitz president-chief executive officer. Mr. Gitlitz, currently DMA's senior vp-public affairs and head of its Washington office, will succeed Robert DeLay, who will become a board vice-chairman. Postmaster General William Bolger earlier withdrew from consideration for the post (AA, Sept. 10).

Chiat/Day switches lawyers after ruling

LOS ANGELES—Chiat/Day president Guy Day said the ad agency has hired new legal counsel after being "stunned" by the preliminary injunction granted to Godfather's Pizza last week (AA, Sept. 10). Stroock & Stroock & Lavan, Los Angeles, replaces Lillick McHose & Charles as the agency's law firm. Also, Chiat/Day has reassigned several people barred from working on the $20 million Pizza Hut account, in light of the ruling, and plans further legal action.

Aziza tries nail polish in a pen

By PAT SLOAN

NEW YORK—For 50 years, Chesebrough-Pond's Prince Matchabelli executives say, women have been polishing their nails with color that comes out of a bottle and is applied with a brush. Now, Greenwich, Conn.-based Matchabelli is about to offer an alternative with the Aziza Polishing Pen, a gadget that resembles a felt-tip marker.

The nail-enamel category is a $216 million retail business in drug, food and mass-merchandise outlets, according to T.H. Augenbraun, vp-marketing of cosmetic products. In drugstores, which account for 60% of all sales, Revlon remains the market leader, posting about a 21.1% share so far this year, up from 17% in 1983. Second-place L'Oreal has fallen back to a 15.1% share as it deemphasized nail color for eye-makeup advertising and promotion, according to industry sources.

In 1985, Cosmair Inc.'s L'Oreal plans to go further afield in makeup with the introduction of foundations and blushers. But with the debut of Polishing Pen in December, L'Oreal most likely will not be able to slack off on nail enamel again. Mr. Augenbraun estimates that Polishing Pen will earn an 8% market share in its first three months.

Polishing Pen will receive about $2.8 million in network tv and national print advertising from Waring & LaRosa Advertising during its introductory period, a sum that is competitive with the market leaders. Baltimore-based Noxell Corp.'s Cover Girl ranked third with an estimated 13% share this year, spending about $6 million in 1983.

With a patented delivery system and formula, Matchabelli president Ed Rabin believes Polishing Pen may be the only product of its kind for two years. A spillproof metal canister whose outside color is coded to the shade inside features a contoured fiber tip that applies the enamel neatly and evenly. The enamel, which dries in less than half the time of traditional products, allows bare nails to be completely manicured in less than five minutes.

Polishing Pen will sell for about $3.50 compared to around $2.35 to $2.75 for

Video on menu at McDonald's

By SCOTT HUME

McDonald's wants its message to reach the video generation through a new blend of broadcast and point-of-purchase advertising.

At selected stores, the burger giant has installed videomonitors in overhead menu boards, the first fast-food company to do so. Customers waiting to place their orders not only can peruse the traditional list of products and prices but also can watch continuously shown food photography culled from tv commercials or, in some cases, full-length commercials.

One site for the test is McDonald's recently opened restaurant in New York's Times Square. That location has the potential to be one of McDonald's busiest stores, as well as provide a broad cross section of consumers for the test. At least one store in Washington also has gone electronic.

A McDonald's spokesman said the chain will be monitoring customers' reactions to the videoscreen's presence and testing whether it increases sales of featured products.

"We have some great product photography and we thought we might as well use it," a McDonald's spokesman said. "[The video-

Close to a homogeneous market, study says

Hispanics: All for one?

By SUSAN SPILLMAN

NEW YORK—A new Yankelovich, Skelly and White study has revealed that Hispanic Americans are less concerned than before with regional differences among the 17 million Spanish-speaking Americans and can be marketed to as a homogeneous group.

The report, an updating of a 1981 study, which, like the new study, was commissioned by SIN Television Network, also found Hispanic Americans less open to trying new products but still more likely than the U.S. population at large to search out and stay loyal to big-name brands.

The study also found that Hispanics, while still strong in their desire for more Spanish media, are using Hispanic radio and print less now than in 1981.

These findings, good news to SIN because it markets itself on a national level, are significant in several respects. First, marketers had presumed that Hispanics were good targets for new-product launches since they were more likely than the general population to try new brands. While they remain more likely to experiment with new brands, they are less likely than three years ago.

The report also questions claims by Hispanic media and Hispanic advertising agencies and consultants that different Hispanic groups required specialized handling and media.

Yankelovich surveyed 775 Hispanics in personal interviews.

A distinct change from the 1981 study was a "blurring of differences" between U.S. Hispanics of varying national origins. This finding led Yankelovich to conclude that now "the marketer can consider all Hispanics in aggregate as one consumer segment."

Regional patterns of speech, for example, no longer are considered a significant barrier between nationalities, the study said. In 1981 it reported that 42% of U.S. Hispanics said there were "meaningful differences between the way we speak," compared with 34% who said there was today. In 1981, 30% mentioned differences in food and drink preferences as a point of differentiation between themselves and other Hispanics; only 21% now

Despite continued losses for *USA Today*, chairman Allen Neuharth maintains that "we're operating with the long haul in mind."

Hopes on rise at 'USA Today'

By WILLIAM GLOEDE

ROSLYN, VA.—*USA Today* will celebrate its second anniversary this week, steeped in red ink but buoyed by the kind of encouragement that only new advertising contracts can bring.

Gannett Co.'s national newspaper, which began publication on Sept. 15, 1982, will cost Gannett $100 million in pretax earnings this year, analysts estimate.

But Gannett clearly is enthusiastic about the brisk pace of recent ad sales, and the word from chairman Allen Neuharth's office is that *USA Today* is here to stay "unless we run into something totally unexpected."

"We're operating with the long haul in mind, even more so than we were two years ago," Mr. Neuharth told ADVERTISING AGE in an interview last week. "We have every reason to think that we can reach the break-even point by the middle of '87 or by the end of '87."

The newspaper's ad pages have been on the rise since the Audit Bureau of Circulations released the results of its *USA Today* circulation audit in June. The paper started

RADIO

Medium is alive and well in the age of video

By J. Fred MacDonald

It seemed so clear to so many in the late 1940s that, just as surely as the horse and buggy had given way to the automobile, radio was doomed to extinction now that tv had arrived.

Many industry cognoscenti held views similar to that of one CBS vp, who reported in 1948, "Television is about to do to radio what the Sioux did to Custer."

One year later, a Gallup poll substantiated the dire prophecy. Although at that time only 4% of the U.S. population owned a tv set, 25% of Gallup's survey respondents felt sure that radio would be rendered obsolete by tv. And among those who had experienced tv, one-third of them were certain that video would destroy audio.

For decades radio had served as the American public's principal entertainment and information channel. It had served U.S. business, too, as an electronic billboard on which advertisers spent $425.4 million in 1949—about 10% of all U.S. advertising expenditures that year.

But as the U.S. moved into the tv age, radio's commercial future was in doubt. "Five years from now, when am broadcasting feels the heavy impact of television," warned Federal Communications Commission chairman Wayne McCoy in May, 1949, "the financial returns will undoubtedly be considerably less. These risks should be very carefully weighed by anyone contemplating entering am broadcasting."

Needless to say, the obituary notices were premature. Not only did radio survive the emergence of video, it soon thrived.

Although growth was slow initially, by 1955 industry ad revenues topped $456 million. Five years later the figure hit $622 million, and by 1968 radio billings had surpassed $1 billion.

With renaissance came a revision in prophecy. A 1953 study praised radio's "universal listenership," and the president of the National Assn. of Radio and Television Broadcasters that year hailed the medium as "an essential part of American living," as basic to life as refrigerators, automobiles and "other modern conveniences which have taken on the character of necessities."

More ebullient still was the NBC vp who in 1958 denied the industry ever had a problem. "Radio didn't die," he declared. "It wasn't even sick. The public

J. Fred MacDonald is professor of history at Northeastern Illinois University and author of three books, including "Don't Touch That Dial!" a history of American radio. His latest book, "The Video Road to Vietnam," will appear next February. He has contributed regularly to past Special Reports on radio.

Medium is alive and well

(Continued from Page 11)

didn't stop loving radio despite tv."

Radio overcame the tv threat because it was versatile, adaptable and well appreciated by American business as an effective means of advertising.

But not all radio enterprises fared equally well. Although local and non-network national billings rose an average of 8.1% annually from 1948 to 1957, network radio, withering under competition from tv, watched billings decline an average of 8.7% annually over the same period.

> **Radio overcame the tv threat because it was versatile, adaptable and well appreciated by American business as an effective means of advertising.**

Station sales offices and ad agencies employed new marketing strategies in their effort to sell radio time, stressing multiple-sponsor and cooperative arrangements, spot advertising and increased sponsorship by local businesses.

Their selling strategies also emphasized those qualities that continued to attract listeners to radio—its portability, relative inexpensiveness, instant companionship and the "multiple attention factor"—meaning people could do other things while listening.

The proliferation of stations and receivers also enhanced the commercial potential of radio. From 1945 to 1955 the number of commercial am and fm radio stations more than tripled, increasing from 929 to 3,196; by 1965 there were 5,289.

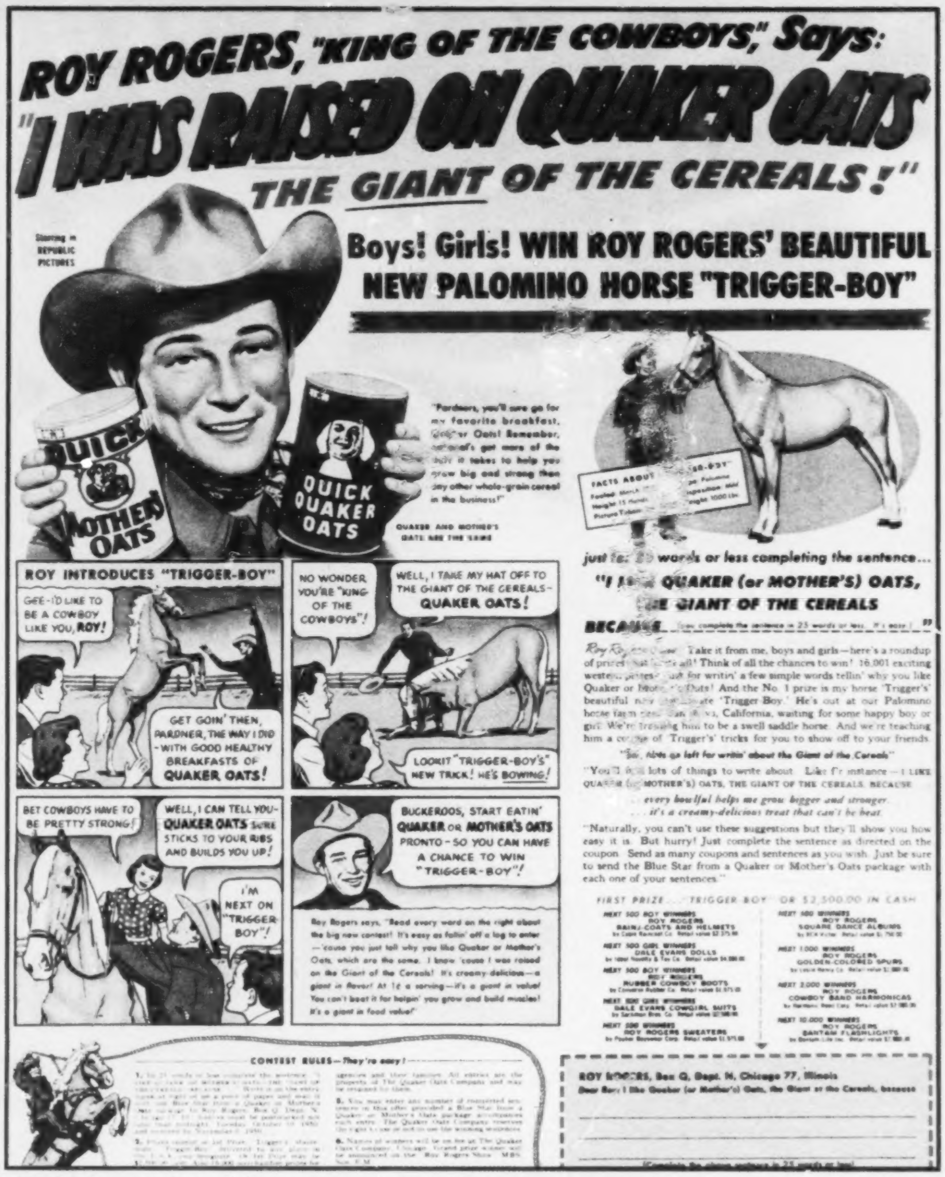
In similar fashion, the number of radios increased rapidly in the early 1950s, as inexpensive extra radios—not only table models, but clock radios, am/fm car receivers and portable transistors for every room in the house—became standard equipment for many households.

Fm broadcasting's meteoric rise in the 1960s and 1970s, radio's quick saturation of U.S. households—98% of which possessed a radio by 1955—and radio's ability to narrowcast its increasingly formatted programming also presented strong selling points.

Narrowcasting offered advertisers an opportunity to target formerly overlooked social groups. Blacks, for example, found new prominence in broadcasting. Radio now offered black news and talk shows, soap operas and music—programs often heard on the expanding number of black-owned-and-operated stations.

In this transitional age, radio triumphed also because sponsors improved their messages. Better commercials made better radio. New talent, new directions, new audiences and new approaches to the consumer made the medium an even more powerful advertising tool. But to improve upon the past was a formidable challenge.

During its pre-tv golden age, radio intrigued the nation with its mix of fascinating programs and advertisements. From "Pepsi-Cola hits the spot/12 full ounces that's a lot," to "Cream of Wheat is so good to eat/That we have it every day," sponsors effectively crooned catchy commercials to the mass audience.



ROY ROGERS, "KING OF THE COWBOYS," Says:

"I WAS RAISED ON QUAKER OATS THE GIANT OF THE CEREALS!"

Starring in REPUBLIC PICTURES

Boys! Girls! WIN ROY ROGERS' BEAUTIFUL NEW PALOMINO HORSE "TRIGGER-BOY"

"Pardners, you'll sure go for my favorite breakfast, [illegible] Oats! Remember, oatmeal's got more of the [illegible] it takes to help you grow big and strong than any other whole-grain cereal in the business!"

QUAKER AND MOTHER'S OATS ARE THE SAME

QUICK MOTHER'S OATS
QUICK QUAKER OATS
FACTS ABOUT "TRIGGER-BOY"
ROY INTRODUCES "TRIGGER-BOY"
GEE-I'D LIKE TO BE A COWBOY LIKE YOU, ROY!
GET GOIN' THEN, PARDNER, THE WAY I DID - WITH GOOD HEALTHY BREAKFASTS OF QUAKER OATS!
NO WONDER YOU'RE "KING OF THE COWBOYS"!
WELL, I TAKE MY HAT OFF TO THE GIANT OF THE CEREALS- QUAKER OATS!
LOOKIT "TRIGGER-BOY'S" NEW TRICK! HE'S BOWING!
BET COWBOYS HAVE TO BE PRETTY STRONG!
WELL, I CAN TELL YOU- QUAKER OATS SURE STICKS TO YOUR RIBS AND BUILDS YOU UP!
I'M NEXT ON "TRIGGER-BOY"!
BUCKEROOS, START EATIN' QUAKER OR MOTHER'S OATS PRONTO - SO YOU CAN HAVE A CHANCE TO WIN "TRIGGER-BOY"!

Roy Rogers says, "Read every word on the right about the big new contest! It's easy as fallin' off a log to enter—'cause you just tell why you like Quaker or Mother's Oats, which are the same. I know 'cause I was raised on the Giant of the Cereals! It's creamy-delicious—a giant in flavor! At 1¢ a serving—it's a giant in value! You can't beat it for helpin' you grow and build muscles! It's a giant in food value!"

just for 25 words or less completing the sentence...

"I [illegible] QUAKER (or MOTHER'S) OATS, [illegible] GIANT OF THE CEREALS BECAUSE ______ (you complete the sentence in 25 words or less... it's easy!)"

Roy Rogers [illegible]: Take it from me, boys and girls—here's a roundup of prizes [illegible] all! Think of all the chances to win! 16,001 exciting western prizes [illegible] for writin' a few simple words tellin' why you like Quaker or Mother's Oats! And the No. 1 prize is my horse 'Trigger's' beautiful [illegible] 'Trigger Boy.' He's out at our Palomino horse farm [illegible], California, waiting for some happy boy or girl. We're training him to be a swell saddle horse. And we're teaching him a couple of 'Trigger's' tricks for you to show off to your friends.

"[illegible], hints go left for writin' about the Giant of the Cereals"

"You'll [illegible] lots of things to write about. Like for instance—I LIKE QUAKER (or MOTHER'S) OATS, THE GIANT OF THE CEREALS, BECAUSE

. . . every bowlful helps me grow bigger and stronger.

. . . it's a creamy-delicious treat that can't be beat.

"Naturally, you can't use these suggestions but they'll show you how easy it is. But hurry! Just complete the sentence as directed on the coupon. Send as many coupons and sentences as you wish. Just be sure to send the Blue Star from a Quaker or Mother's Oats package with each one of your sentences."

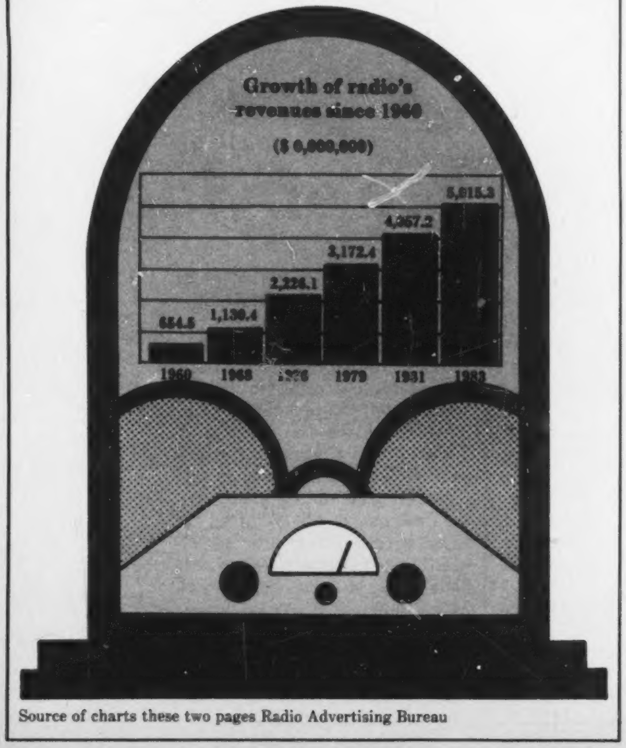
FIRST PRIZE . . . "TRIGGER BOY" OR $2,500.00 IN CASH

CONTEST RULES—They're easy!

ROY ROGERS, Box Q, Dept. N, Chicago 77, Illinois

Dear Roy: I like Quaker (or Mother's) Oats, the Giant of the Cereals, because

Roy Rogers, "king of the cowboys," took his endorsement of Quaker Oats cereal to the radio during that medium's golden age.



Source of charts these two pages Radio Advertising Bureau

Children coming of age in this era of audio-induced imagination had their psyches indelibly etched by commercials for Smiling Ed McConnell's preferred shoes (Buster Brown), Sky King's beloved peanut butter (Peter Pan), the chocolate drink endorsed by Little Orphan Annie and Captain Midnight (Ovaltine), and the favorite breakfast cereals of stalwarts such as Roy Rogers (Quaker Oats), Superman (Pep), the Lone Ranger (Wheaties and later Cheerios), and Jack Armstrong (Wheaties).

But for all its inventiveness, the selling of products in the golden age of radio was no laughing matter. To maintain this tradition of memorable advertising—and compete with the multisensory advantages of tv spots—agency creatives turned to humor.

The person generally credited with introducing levity to radio commercials is Stan Freberg. A satirist and entertainer with credits including tv, phonograph records and radio, Mr. Freberg in 1956 revolutionized advertising with one phrase: "Who puts eight great tomatoes in that little bitty can?" That catchy question catapulted Contadina tomato paste and Mr. Freberg's consulting company, Freberg Ltd. (but not very), into national prominence.

What followed for Mr. Freberg was a veritable hit parade of memorable and successful audio spots—"Omaha Moon" sung in praise of Butter-Nut coffee, the adventures of Tom Swift and his Electric Milky Way Machine, the mass-marketing of Chung King frozen Chinese foods, and his most solemn assignment, selling church attendance for the United Presbyterian Church as a chorus sang:

Where'd you get the idea
You could make it all alone?
Doesn't it get a little lonely
sometimes,
Out on that limb,
Without Him?
It's a great life,
But it could be greater.
Why try to go it alone?
The blessings you lose
May be your own.

The path Mr. Freberg pioneered has been followed creatively by others. Comedy team Bob and Ray sold Piel's beer with their customary dry wit. In the mid-1960s, "the beloved herring maven" and his mother sold Vita pickled herring with the phrase, "make your day a little bit brighter, eat a little pickled herring by Vita," and Mother's gefilte fish with the slogan, "When you eat it, you hear a symphony."

In the 1970s and early 1980s, the marriage of mirth and radio salesmanship was realized most successfully by pairs performing clever, though carefully staged dialog: Jerry Stiller and Anne Meara (as spokesmen for United Van Lines, On-Cor frozen foods, Blue Nun wine) and Dick Orkin and Bert Bertis (Radio Advertising Bureau, West Bend humidifiers, *Time* ["I'm up here in a big airplane"] magazine).

That genre of commercials in turn has spawned what Radio Advertising Bureau vp Dan Flamberg calls today's "lifestyle" ads: Spots featuring "real," as opposed to staged, dialog. Actors speak their lines as though they were part of normal conversation, where responses and questions overlap and where sentences—not always complete *or* perfectly phrased—hang in the air.

Molson Golden's yuppie-oriented spots are the most talked-about example of this genre. The Molson spots, an engaging series of boy-meets-girl-meets-beer commercials, have helped their Canadian product become the second most popular imported brew in the U.S.

That American radio today is booming commercially is apparent from a few 1983 statistics:

- Almost 479 million radios were in use in the U.S.—more than two per person.
- Almost half of all rooms in American homes had radios.
- 70 million *new* receivers were sold.
- 88% of the public listened to radio sometime during any week.
- About 8,260 am and fm stations were on the air.
- Advertising revenues topped $5 billion.

With revitalized network programing, the FCC's deregulatory philosophy, technological advances in transmission and reception, and an improving economy, radio's future as both a programing and a commercial medium seems bright. But many industry insiders remain critical of radio advertising.

Miles David, a 25-year RAB veteran and former chief executive officer, is dissatisfied with ad agencies' failure to understand and exploit radio.

"Ad agencies have been very remiss in their obligation to their clients," Mr. David says, "in not having developed the talents of the current generation of radio writers to make the most effective use of radio sound.

"Tv is consuming most of the creative talent—and yet tv actually demands less from a writer." Agencies, he says, must learn "to write with sound as well as words"—and not just sound, "but also contexts, interactions, and projections of human contact."

Similarly, Mr. Freberg, the doyen of advertising wit, is critical of many of the commercials he hears on radio.

"There are a lot of good agency people working in tv," he says, but ad agencies are not training people for radio. Agencies' mistake, Mr. Freberg says, is that most do not realize that "radio is visual, but you have to approach it through the ear."

The most successful radio promotions, he says, use clever words and sound effects, engaging contexts and memorable music. When they genuinely are humorous, Mr. Freberg says, chances are great they were composed by a professional comedy writer. For example, John Cleese, of Monty Python's Flying Circus fame, contributes much, if not all, of the copy for radio spots he's done for Kronenbourg beer and Callard & Bowser candies.

Radio advertising began in August, 1922, with an 8½-minute, $100 commercial for a housing development in New York.

Despite refinements in sales methods and creative approaches since that maiden commercial, one question remains: If radio advertising has been so successful—especially in the 36 years since tv became a popular commercial rival—how much more profitable might the medium become with a fuller use of radio's inherent audio capabilities—and more aggressive promotion of those capabilities?

A famous radio writer once called the medium a "theater of the mind." Should radio not also be understood as a "billboard of the mind" with still-unexploited implications for imaginative and stimulating salesmanship?

Tv tests tried and true spots

By Marie Spadoni

You're jogging through the park, listening to the music of a favorite radio station piped through your headphones. Suddenly you hear that throaty, sultry chuckle and you stop in your tracks. Where is she? Overcome by the moment, you search for the tall, wheat-blond beauty with the soulful brown eyes. Alas, it is merely an illusion, a voice over the airwaves—the Molson Golden woman.

Such strong imagery in radio is one of advertisers' most tangible commodities. Aided by creative copy, charismatic characters and scintillating sound effects, radio advertising entertains the consumer and, at the same time, instills brand awareness—qualities advertisers seek when creating ads for various media, including tv.

One of radio's attributes is its mystique—its ability to stretch the listener's imagination near the snapping point.

However, advertisers have tried to bring to tv, a visual medium, what they consider good radio advertising.

"I knew it could be done," says Rennie Solomito, referring to Molson Golden's recent tv spots. The advertising manager for Martlet Importing Co., Molson's Great Neck, N.Y.-based distributor, says he was a longtime advocate of putting the radio spots—featuring the voices of Garrett Brown and Anne Winn as the bantering duo who end up sharing a Molson Golden beer—on tv.

Incidentally, both Mr. Brown and Ms. Winn are creators and producers of all Molson radio and tv advertising. Dancer Fitzgerald Sample, New York—as of April 1—oversees over-all objectives for the importing company. Rumrill-Hoyt, New York, was Martlet's former agency.

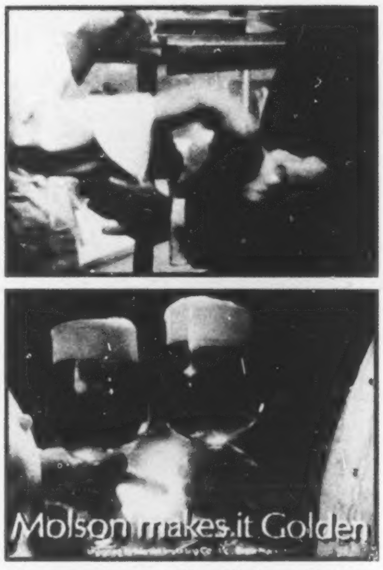
Maintaining the mystique of the spots was a key concern, Mr. Solomito says.

The magic of radio is the listener's ability to fantasize, so the company was unsure about what type of visual aid to offer tv viewers.

The answer was a series of commercials shot on location featuring both radio characters—from their chins down.

In this instance, according to Mr. Solomito, the mystery continues—with tv communicating the same message as radio.

However, while the message may remain constant, the cost more than doubles from one medium to the next. "People get a little frightened when they start adding up the sums," Mr. Solomito says, pointing out that the Molson tv spots cost more than $100,000 each.



The mystique of the Molson Golden radio spots lives on in tv spots such as this one in a steamy kitchen.

The tv spots, such as this one shot in Malta, feature the characters from their chins down.

Often a company will sacrifice one medium for the other, failing to reinforce the translated tv campaign with the original radio spots. But Martlet continues running Molson radio ads in markets where the tv ads run, Mr. Solomito says.

"The move to tv was dictated by our change in marketing strategy," Mr. Solomito says. "As effective as radio was, we wanted to broaden our reach."

The extension of the campaign added a new dimension, he says.

The tv spots supplement the radio ads and increase brand awareness. And, although radio is still Martlet's primary medium—in 1983, the company spent $10.9 million in spot radio—tv has "expanded our market and is fulfilling our over-all objectives," Mr. Solomito says.

More difficult to portray visually than a couple drinking beer, perhaps, is a hungrily growling stomach. But that's what Wendy's International agency Dancer Fitzgerald Sample, New York, did with its recent radio campaign advertising the fast-food chain's new late-night hours.

The cost for the same spot on tv was much more than double its radio cost, says Robert Reed, senior vp for DFS and management supervisor for the Wendy's account. But, he says, "The spot was such good radio, we thought, 'Maybe we can translate it to tv.'"

After weighing the pros and cons, the company decided to bring the radio spot to tv. "There were two reasons why we did it," Mr. Reed says. "First, it was a piece of good creative advertising and we didn't want to limit it to a radio audience. And second, because it would help reinforce the already existing radio spots."

The Wendy's spot was DFS' first attempt at bringing an existing radio ad to tv. Mr. Reed credits a "gut feeling" rather than "a formula" with providing the motivation behind this effort.

"Something like this [radio ad translation] has to be looked at on an individual commercial-by-commercial look," Mr. Reed says. Both Wendy's spots—radio and tv—are running in some local markets. Despite the companies' positive reactions to a radio-to-tv ad transition, the concept has its detractors.

"If it's created for one medium that usually means it will not work as smoothly in another medium as a direct lift," says Joel Hochberg, executive vp-creative, Needham, Harper & Steers/USA, Chicago.

"If the situation is such that the audio device that works well in radio carries unscathed to tv, it will work," Mr. Reed says.

He suggests the Wendy's growling stomach spot works, perhaps, because the key radio element—the talking stomach—remains an audio element on tv.

A brief list of advantages supporting a radio-to-tv ad translation includes a similar target audience and increased brand awareness. However, according to many agency people, ads for different media should be created with the characteristics of each in mind.

"To exactly duplicate an ad would not be right.

"Sometimes [when this is done] I think it's laziness and lack of creativity," says Mr. Hochberg.

MALE: *(Shouts) Hold the peanuts!*

Broadcast medium fills voids in advertising

By Karrie Jacobs

Lord only knows what time it is: The bars are closed, the street outside is quiet, the tv sits dormant—but the radio is still on.

The radio's on and Henry Morgan, game show guest emeritus, is making a pitch. "A picture is worth a thousand words," he declares as if it had just occurred to him. Then he says something about Polaroids and snapshots.

> **"Because of the nature of the brand, it's more responsive to radio. You say 'jock itch' on the radio and people's ears perk up."**
>
> ***—Dave Hurwitz***
> ***Pennwalt Drugs***

"Cameras," you think wearily, "He's selling cameras."

But no. Mr. Morgan goes on to explain that a single word can evoke an image—"France," he says to give an example, "Raquel." And, he reasons, if one word carries so much weight, just think about the cumulative effect of all the words in a radio commercial and what that could do for your product.

The spoken word *does* give radio a certain edge, a personal touch, especially when it's late night and you and the voice on the radio are the only wide-awake souls in a sleeping world.

While tv offers a mass audience, and while it trades heavily in pretty faces and glamorous images, radio gets down to the nitty gritty.

Sure, tv commercials remind us about unsavory hygiene problems such as dandruff and bad breath and address viewers suffering from hemorrhoids and those dirty rings. But more often tv ads feature beautiful people doing beautiful things. Without the distraction of gorgeous models, radio can speak one-to-one with listeners about their unfashionable, unsightly and dreary maladies—and radio advertisers can sidestep the problem of graphically portraying both the malady and the cure.

"It does take time, but your brown spots will fade," says a wise, matronly voice. This frank and well-adjusted woman says she can bear some of the symptoms of aging—the glasses perched on her nose and the gray streaks in her hair—but is miffed that her skin's pigmentation has gone haywire, mottling her complexion with liver spots. To clear up this blight, she uses Porcelana face cream, gradually bleaching those brown spots into obscurity.

Actually, Porcelana, part of a stable of esoteric health and beauty aids developed by Jeffrey Martin Inc., is itself a little on the obscure side unless you listen to talk radio.

Jeffrey Martin Inc., Union, N.J., has the distinction of being the nation's top spender in network radio advertising, devoting $21.7 million last year to promote products that clean tobacco-stained teeth, relieve backaches and banish brown spots. And that represented a substantial decrease from the company's $32.8 million 1982 radio budget.

Jeffrey Martin relies heavily on network radio because its products are targeted to two groups of regular radio listeners: Insomniacs and housewives, particularly elderly women, who spend time alone with the radio, day and night.

Tom Herzberg

Late-night commercial breaks are a mixed bag filled with public service spots and stars such as McGruff the police dog (offering crime-stopping hints) and Carlton Fredricks (hyping Special Stress vitamins and mineral ice in a voice reminiscent of the Queen of England).

The Jeffrey Martin ads, however, are the most compelling of the lot.

"D-R-O-W-Z-Y," spells a hypnotic male voice during a commercial break from Mutual Radio's Larry King show.

Moments ago, Mr. King's guest, a noted sportscaster, was comparing baseball to a beautiful woman. Now a man is inquiring ever so gently, "Can't cope with occasional sleepless nights?"

He assures listeners that "simple nervous tension" will float away as easily as D-R-O-W-Z-Y is transformed into C—O—M—P—O—Z. Jeffrey Martin spent $754,000 on Compoz network radio spots in 1983.

Jeffrey Martin chief executive officer Martin Himmel—who believes that tv is a "medium of the emotions" and radio "a medium of the mind"—stresses the importance of creativity in the radio ads done by JM's in-house agency.

"We try to have word pictures so you can see a picture of what's happening," Mr. Himmel says.

Late night is an obvious time to sell Compoz, but Mr. Himmel also says it is a prime time for Doans pills ($2.7 million in 1983 radio spots). He pictures back-pain sufferers, listening to late-night Doans spots as they try desperately to fall asleep, rushing out the next morning to purchase the product.

Radio spots for other JM products—Ayds weight loss candies ($2.5 million in 1983 network radio spots), Topol tooth polish ($6.5 million) and Bantron smoking deterrent ($1.6 million)—are aired during daytime talk shows. Bantron, for instance, co-sponsors New York Mayor Ed Koch's call-in show on WOE-AM.

"You can break—*SNAP*—the smoking habit," insist the ads, following up the claim with testimonials. Mr. Himmel says Jeffrey Martin has been doing fewer "slice of life" ads and more spots with comments from satisfied customers—in some cases using actual consumers' voices.

During the past 20 years, JM has grown from a company forced to advertise on radio because tv was too expensive to one that invests 50% to 60% of its ad budget in tv—network, spot and cable.

Topol, Jeffrey Martin's largest selling product, is heavily advertised on tv as is the company's newest concern, Lavoris mouthwash. Although he praises tv's ability to reach an enormous audience, Mr. Himmel says, "I'll never move away from network radio."

When Jeffrey Martin bought its 100-year-old Cuticura brand from Purex in 1982, the soap's appeal seemed limited to customers as old as the brand itself. The demand for Cuticura was, in a word, dying.

After discovering that Cuticura was an effective cleanser for part dry/part oily complexions, Jeffrey Martin repositioned the product with advertising on youth-oriented networks such as The Source, RadioRadio and ABC-FM network. The result? Cuticura's "combination skin" has become part of young people's vocabulary.

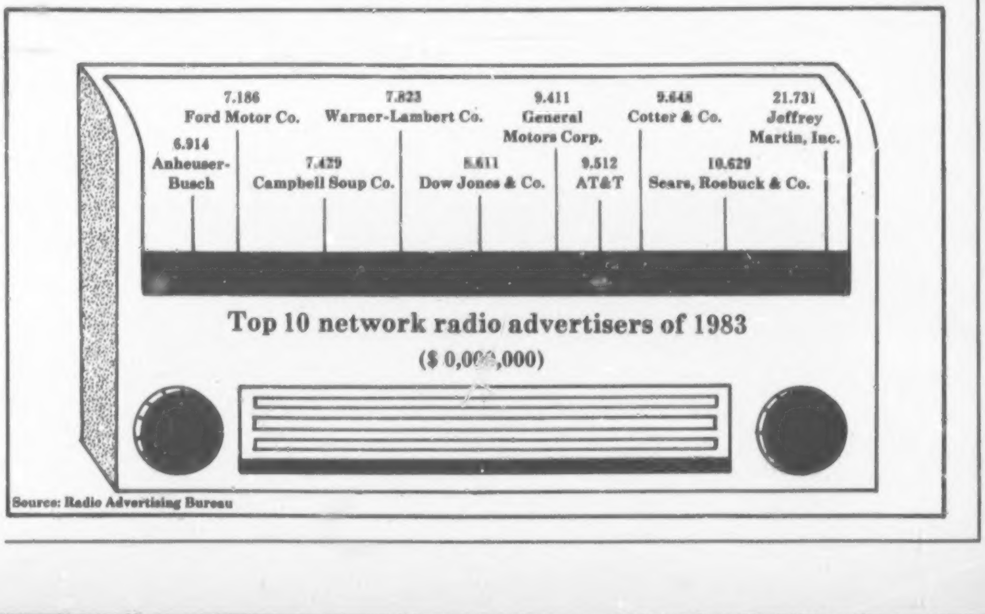
And then there are things that itch, such as feet and . . . . er, jock itch. Pennwalt Drugs, Rochester, N.Y., produces Desenex and Cruex powders to cope with those difficulties.

Product manager Dave Hurwitz says last year's successful two-market radio test makes a 1985 national radio campaign for Cruex seem probable.

Cruex has been advertised on outdoor signs ("Jock itch is no laughing matter"), but Mr. Hurwitz says he believes that the radio ads have achieved better results. "Because of the nature of the brand, it's more responsive to radio," he says.

"You say 'jock itch' on the radio and people's ears perk up."

Free lance writer Karrie Jacobs joined the ranks of late-night radio listeners while working on this story.



Top 10 network radio advertisers of 1983

($ 0,000,000)

A TEXAS STATE NETWORK GIVES YOU...

America's Team
The Ag Team
The Spanish Team
The News Team

Nowhere but Texas can you find a state network that offers four different lineups of stations providing a variety of programming on 229 stations in 195 markets in 10 states.

Action of America's Team—The Dallas Cowboys Football Network—is broadcast in English and Spanish on 182 stations in 174 markets in 10 states...more than any NFL team.

The Texas State Network feeds news, sports and information to 129 affiliates in 108 Texas markets. TSN Agribusiness Network supplies seven hours of farm and ranch news weekly to 54 stations in 47 Texas markets. And, the TSN Spanish Information Service keeps Hispanics in Texas informed through our 22 stations in 19 markets.

It's the biggest state network, of course. Biggest Ag network, of course. Biggest state Hispanic network, of course. Biggest NFL network, of course. Satellite fed...of course.

Leaders rebuild sales, hike advertising 10.5%

Copyright ©1984 by Crain Communications. Quotation or reproduction in whole or in part without written permission is expressly prohibited.

By R. CRAIG ENDICOTT

The nation's 100 leading advertisers monitored by Advertising Age accumulated U.S. advertising expenditures of $18.89 billion in 1983 to rebuild aggregate worldwide sales to $901.8 billion.

Leading the surge which helped push sales of the 100 leaders out of their one-year decline suffered in 1982, was Procter & Gamble, the perennial "leader." Sears, Roebuck & Co., however, came closer than ever to usurping the throne.

The 10.5% increase in advertising on a year-to-year basis for the 100 leaders cooled off a blistering pace in 1982 when advertisers, faced with increasing recessionary pressures, primed the consumer pump with a 15.2% increase in an attempt to rejuvenate sales, which slumped to $765.3 million, a drop of 0.9% from 1981.

The 100 leaders' U.S. sales of an estimated $643.75 billion were 72% of the worldwide total and represented an advertising-to-sales ratio of 2.9. Many of the leaders registering poor performances in 1982 reported better results in 1983. As a whole, the 100 leaders' earnings of $38.7 billion were 4.4% of worldwide sales. (Return on sales omits figures for private companies.)

Most leaders pressed forward feeding the marketing mix withstepped up advertising, reworked marketing strategies that attracted broader clientele, divestiture programs that brought focus to conglomerate holdings, product-specific acquisitions, new product category development, heavy line extension movement and product reformulations.

Ad expenditures in the eight measured media tracked in this issue were $11.67 billion for the 100 leaders in 1983, an increase of 10.5%. Unmeasured ad totals pulled an additional $7.2 billion for a similar year-to-year increase. Unmeasured advertising includes cable, direct mail, collateral materials, co-op advertising, trade show promotions, point-of-purchase and transit advertising. Neither measured nor unmeasured advertising in this case includes national retail advertising or local newspaper expenditures.

100
LEADING
NATIONAL
ADVERTISERS

P&G again led the spenders with $773.6 million in total advertising. U.S. sales of $9.55 billion gave P&G an ad-to-sales ratio of 8.1. Experts predict P&G will surpass the $1 billion mark by 1985 as it continues to push new product development. P&G spent nearly $100 million each in introducing Always feminine hygiene product and Citrus Hill Select orange juice in 1983.

Sears played bridesmaid with an expenditure of $732.5 million. If local newspaper advertising were included in the measured advertising—the criterion that places a company on the 100 leader list—then Sears would leave P&G in its wake.

The most dramatic shift among the top 10 advertisers was made by Beatrice Cos., which bought its way into third place from a rank of 16th in 1982. The Beatrice of the 1983 list is a composite of three 100 leaders appearing on the 1982 chart. The company purchased Esmark Inc. in August, 1984, a company that already had consumed Norton Simon Inc. in late 1983. Esmark was the 32nd largest national advertiser in 1982 and Norton Simon Inc. the 33rd.

Newcomers to the 100 leaders this year include Tandy Corp. (No. 40), Texas Instruments (No. 51), IC Industries (No. 64), Sony Corp. of America (No. 70), GTE Corp. (No. 85), Cosmair Inc. (No. 87), Adolph Coors Co. (No. 93), Goodyear Tire & Rubber Co. (No. 96), Coleco Industries (No. 98) and Carnation Co. (No. 99).

Joining the two Beatrice units in leaving the chart were North American Philips Corp. (No. 67 in 1982), SmithKline Beckman Co. (No. 68), Pan American World Airways (No. 80), 20th Century-Fox Film Corp. (No. 86), Royal Crown Cos. (No. 92), Polaroid Corp. (No. 95), Hiram Walker Resources Ltd. (No. 98) and E&J Gallo Winery (No. 99).

Major changes already are beginning to rejuggle the rankings for next year's leaders. Just as Beatrice "acquired" its position in this year's 100 leaders rankings, Nestle is poised to do the same in 1984 through a pending merger with Carnation announced last week. Nestle will purchase Carnation for an estimated $3 billion. A consolidated measured ad spending for the

Figures are a composite of measured and unmeasured advertising.

Where AA got its data

For the 29th consecutive year, ADVERTISING AGE unfolds the marketing operations of the nation's 100 advertising giants. What they spend on advertising, where they spend it, how their leading product lines and brands rank nationally, what share of market they hold and scores of other details are analyzed in 100 profiles and 13 charts.

The profiles include listings of each company's marketing executives, its agency lineup and a rundown of account personnel.

Much of the material is not published elsewhere, including estimates of total advertising and promotion expenditures for the advertisers covered, sales figures for privately owned companies and scoops on future marketing strategies.

Advertising figures listed for each of the 100 leading national advertisers include measured media expenditures published by various statistical bureaus and associations.

The sources used include Leading National Advertisers, Agricultural Marketing Information Service (AGRICOM), Radio Advertising Bureau, Media Records (newspapers), Broadcast Advertisers Reports, Institute of Outdoor Advertisers and Outdoor Advertising Assn. of America.

100
LEADING
NATIONAL
ADVERTISERS

In the eight measured media—newspapers, magazines (business and consumer), farm publications, spot and network tv, spot and network radio, and outdoor—the 100 leaders dominate, accounting for 55.1% of all advertising dollars invested in those media. *(See chart on Page 144.)*

This year, for the first time, cable ad spending is reported in a ranking of the 25 top cable advertisers (not necessarily a 100 leader), courtesy of Broadcast Advertisers Reports. *(See chart on Page 136.)*

In addition to the measured media figure, an unmeasured spending figure is added to arrive at the company's total ad expenditures. These unmeasured expenditures include point-of-purchase advertising, couponing, direct mail, premiums, trade shows, special events, catalogs and other forms of sales promotion.

Many leaders provided ADVERTISING AGE with estimates of ad spending as well as breakdowns on their measured spending. In most cases, these listings were printed along with AA's estimates.

Although the final ranking is based on the combined total of our measured and unmeasured figures, ADVERTISING AGE stresses that the selection of the 100 leading national advertisers is based on measured media expenditures only.

If other criteria were used, advertisers not now on the list would be included. Among them would be those companies that spend millions annually in local retail advertising, which is not measured, and relatively little in national advertising. Such companies include many large retailers.#

American Brands

	1983	1982
Sales*	$7,093,392,000	$6,504,961,000
Earnings*	390,298,000	381,240,000
U.S. Advertising	75,590,100	72,272,000

*Worldwide

American Brands, New York, the 79th largest national advertiser, spent an estimated $75.6 million on advertising in 1983, down 4% from 1982's $72.3 million level and continued the slide from the $82.2 million registered in 1981.

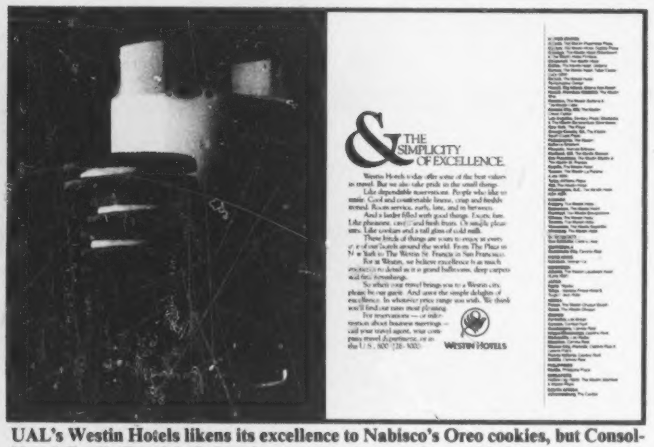
Halting a two-year decline, net sales rose 9% in 1983 to a record $7.1 billion. Big contributors were the domestic tobacco product sales, which were up 18%, and the hardware and security segment, with an increase of 166% in sales. American Brands is a security, food, office products,

Leaders rebuild sales

(Continued from Page 1)

two of $169.2 million in this issue would have moved Nestle from 61st to 39th in the rankings had the purchase been concluded before publishing.

The 100 leaders continued to dominate national spending among all advertisers in measured media. This is most evident in the leaders' dominance of network tv. They commanded 75.9% of network tv's total advertising of $7.04 billion, down from a 77.7% share in 1982.



THE
SIMPLICITY
OF EXCELLENCE
WESTIN HOTELS

UAL's Westin Hotels likens its excellence to Nabisco's Oreo cookies, but Consolidated Food's Popsicle Industries went one better—it crumbled the morsels into its ice cream.

In decreasing influence, the leaders provided 65% of total network radio expenditures of $263.3 million, up from a 50% share in 1982; 54.3% of total outdoor expenditures of $549.7 million, up from 36.9%; 49.6% of total magazine expenditures of $3.94 billion, down from 50.2%; 44.6% of total spot tv spending of $5.56 billion, up from 44.5%; 39.8% of total spot radio spending of $1.11 billion, down from 47.3%, and 38.3% of total national newspaper spending of $2.57 billion, down from a 39.3% share.

Only in outdoor did the 100 leaders fail to show an across-the-board increase. Outdoor drew $298.3 million in advertising from the leaders, down 0.2% from their contribution in 1982. Batus Inc., ranked fourth among the nation's advertisers in outdoor, registered the most dramatic drop among the leaders in that medium, plunging from $42.5 million in 1982 to $22.4 million in 1983.

The media segment showing the largest percentage increase in 100 leaders' spending was the smallest medium—farm publications—which received $28.6 million in advertising from the leaders, up 20.8%. The first 100 leader company to break into the nation's top 25 advertisers in farm publications was Du Pont, ranked sixth nationally. American Cyanamid and Ford Motor Co. were other 100 leaders among the top 10 advertisers in farm journals.

Spot tv spending among leaders of $2.48 billion increased 13.8% from 1982. The nation's top 25 spot radio spenders were all 100 leaders with Procter & Gamble the pace setter by a long shot with $229.2 million in spending, up 28.1% from 1982, and close to doubling spot tv expenditures of No. 2 PepsiCo.

Magazine spending of $1.95 billion for the leaders increased 13.6% over the previous year. The 100 leaders again did not permit a nonleader company to crack the top 25 national spenders in magazines. The No. 1 spender remained R.J. Reynolds Industries with an expenditure of $155.1 million, up 40% from 1982, and a comfortable $15 million lead over runnerup and head-to-head competitor Philip Morris Inc.

Toyota is actually attempting to "overturn" its Japanese brethren—Mazda, Nissan and Isuzu—in the hotly contested U.S. small truck market.

Network tv drew $5.35 billion in spending from the 100 leaders, up 10.5% from the previous year. Procter & Gamble again was far out in front in spending honors for the nation's top 25 advertisers in network tv with $366.7 million, down 6% from 1982, and far ahead of No. 2 General Motors Corp.

Network radio spending of $141.2 million among leaders was up 7.5%. Sears paced the 100 leaders among all advertisers in the medium with a No. 2 rank, spending $10.6 million, down 4.5%, compared with the top network radio spender, Jeffrey Martin Inc., which supported such products as Doan's pills, Cuticura medicated soap and Topol tooth polish with $21.7 million, down 35% from 1982. Cotter & Co. (TrueValue Hardware), Dow Jones & Co., Hartz Mountain Industries and Purex Industries were the only other nonleaders among the top 25 in this medium.

Spot radio spending of $440.8 million by 100 leaders was an increase of 5.5%. Anheuser-Busch Cos., with an expenditure of $40.7 million, up 10.6%, kept a firm grip on first place among the nation's top spot radio spenders.

Newspapers attracted $984.1 million in advertising from the 100 leaders, up 2.3%, with R.J. Reynolds Industries pacing the nation's top 25 list with $112.3 million in spending, down 8.8%. Texas Air Corp. and Republic Airlines were the only nonleaders among the top 25 newspaper advertisers.

Cable tv, which is not a monitored medium in this issue, is beginning to attract sizable spending as more networks become advertiser-supported. The medium, dominated by 100 leaders companies, is led by Anheuser-Busch, with an expenditure of $15.8 million, up 72%, but only a notch ahead of Procter & Gamble's $15.2 million, up 124%, according to Broadcast Advertisers Reports.

Among the industries represented by the leaders, the airline industry is perhaps one of the most ad-driven. In 1983, the airlines attempted to prop up sluggish revenues and sagging profits with sizable advertising increases. Of the five 100 leaders in the category, Eastern Air Lines, Delta Air Lines and Trans World Airlines suffered losses during 1983, yet advertising at the three increased 22%, 30% and 10%, respectively.

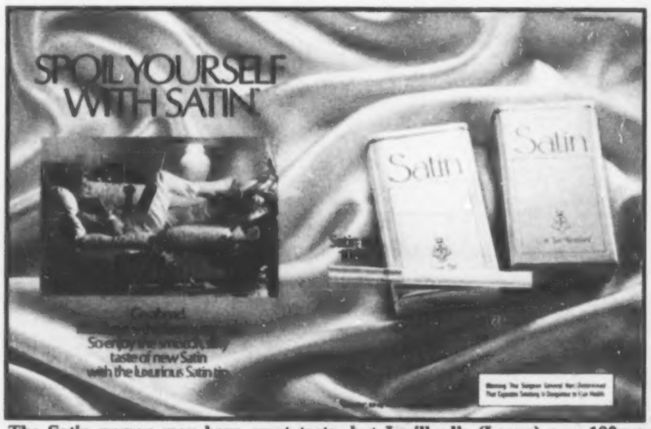
While the market was hostile to airlines in general—a year marked by a soft economy in the first half followed by severe discounting and stiff competition in the second—it turned the beer spigot to a trickle. Barrelage industrywide for the nation's brewers was up 1% as several large brewers lost barrelage volume on a year-to-year basis.

Adolph Coors Co. was one big exception as it boosted advertising 63% to back a barrelage increase of 15% that helped it push eastward and southward into virgin territory.

The shadow of your smile.

Kodak frames its film ad featuring this lipsmacking baboon with mixed lyrics. But is "a kiss just a kiss . . . when you were gone?"

Anheuser-Busch attempted to stop the erosion in superpremiums—Michelob dropped from 7.4 million to 7 million bbls.—by increasing advertising of Michelob 29% and Michelob Light 13%, and switching agencies for both.



The Satin woman may have great taste, but Lorillard's (Loews) new 100mm smoke did not stimulate heavy use, as advertising might have warranted. It has since embossed the pack in gold leaf to build greater awareness.

A-B also launched the low-alcohol category with its LA brew in May, 1984. It got a jump on the competition by sprinting through test market in one month. Schaefer (Stroh Brewery Co.) and Blatz, Old Style, Old Style and Rainier (G. Heileman Brewing Co.), and Sharps (Miller Brewing Co.) were quick to follow and entangled the industry in a legal dispute when some opted for an LA (for low-alcohol) on their labels. Litigation regarding whether LA is proprietary or generic continues.

The distilled spirits industry, the beer industry's beverage cousin, felt a similar erosion of consumer interest as sales remained stagnant at Jos. E. Seagram & Sons, Brown-Forman Distillers and Heublein, a subsidiary of R.J. Reynolds Industries. The industry is caught in a vice between public concern over alcohol and moderation, and a shift in public tastes toward lighter and whiter products.

In contrast to ad spending trends among the nation's brewers, the distilled spirits market leaders (including the 100 leaders among them) have elected to pare advertising an average of 11% from 1982.

New product development, which is likely to garner increased ad outlays, captured the interest of several industry leaders such as Seagram, which cut ad spending 21.8% as sales dropped 6.4%. Seagram is moving into new categories including creams, rums, liqueurs and wines. It shored up wine holdings in 1983 by acquiring Coca-Cola Co.'s Wine Spectrum (Taylor California Cellars).

Heublein, a subsidiary of R.J. Reynolds, fought the shift in consumer tastes by introducing lighter cocktails, by doubling its advertising for Jose Cuervo tequila, the nation's best-selling tequila, and by funneling $9.5 million—its largest liquor brand support—into Smirnoff vodka, the No. 2 liquor brand behind Bacardi rum.

Brown-Forman, which had a decline in earnings of 23% largely because of the purchase of Lenox Inc. on a sales increase of 29%, cut advertising 4.7%. It seemed to play ostrich by keeping out of the new product race and carving advertising from its leading brands, which are mostly dark whisky types. The company lost its ad agency, McCann-Erickson, which resigned the account earlier this year to pick up Heublein's growing Smirnoff business. B-F has yet to sign on another agency.

Seagram took an industry advocacy role by advertising drinking with moderation in a print campaign. One ad that drew wide attention featured a picture of four jiggers of whisky, four tobacco and hardware company.

The sales increase recorded in the tobacco products line, however, reflected the higher selling prices resulting from last year's doubling of the cigaret excise tax. The U.S. smoking public smoked 4.6% fewer cigarets last year, according to *Business Week's* annual cigaret industry score card. That score card also shows that American Brands' cigaret sales (by volume) declined 8% in the 1981-83 period and that its top sellers—Pall Mall, Carlton and Tareyton—have suffered declining market shares. International tobacco sales also declined slightly in dollars.

The January, 1983, acquisition of Pinkerton's Inc. accounted for the big sales jump shown for the hardware and security segment.

The company continues to diversify, a process started in 1966. Earlier this year, its Franklin Life subsidiary, which specialized in life insurance, acquired the Southland Life Insurance Co., a specialist in group life and health and universal life policies.

American Tobacco, which together with American Cigar constitutes the domestic tobacco division, had record sales in 1983. Late in the year, it completed the national rollout of Lucky Strike Filters, while also introducing Lucky Strike Lights in test markets. The Lucky Strike Filters rollout was followed early in 1984 by national rollout of Lucky Strike 100's. All three are low-tar [illegible].

Lucky Strike Filters was backed with nearly $13 million in measured media spending, tripling its 1982 spending when it was introduced. Of that, $8.4 million went to magazines. Promotions also have included heavy sponsorship of sporting events, which are not included in the measured totals.

Carlton continues as the industry's best selling ultra low-tar brand and accounts for about 20% of that market. Measured media spending for the Carlton brand was $16.5 million, down from the previous year's $23.3 million. Carlton Filters was the big loser, as its measured spending fell from $10 million to $2.2 million. Multiproduct advertising, meanwhile, was $11.4 million, about the same as the previous year.

American Tobacco's low-tar lineup also includes Tareyton and Tareyton Lights, which are the industry's leading charcoal filter brands, plus Pall Mall Lights 100's and Silva Thins. Pall Mall Lights led the way in measured media spending, with $7.5 million last year.

Unadvertised in major media, nonfilter Pall Mall Kings continues to be the fifth best selling cigaret in the U.S.

American Brands measured media spending shows that newspapers continue to get a declining slice of the ad budget. Last year, newspaper spending was $5.8 million, down from 1982's $8.9 million, and even further away from 1981's $13.2 million.

In the smoking tobacco category, the company markets Half and Half, Paladin, Blackcherry and Bourbon Blend.

At the American Cigar unit, Antonio y Cleopatra is the leading brand and received about the same measured media support in 1983 as in 1982 ($500,000). La Corona Whiffs, a Continental-style cigar, increased in unit volume and is now second to Antonio

---

glasses of beer and four of wine, with the headline "Surprised?" Copy noted the alcohol level of the groups were equivalent, concluding: "Even if it looks light, it shouldn't be taken lightly.

Cigaret marketers, facing similar erosion in public confidence, found an industry advocate in R.J. Reynolds, which spent $7 million on a controversial corporate campaign that called for "an open debate about smoking." The advertising—more than any outlay for an RJR brand in 1983—created a public flap, drawing heavy criticism from the heart, lung and cancer associations. RJR also pulled its media buying inhouse, an action that could have a farreaching effect on Madison Avenue if it becomes a trend.

The biggest growth category among 100 leaders was electronics and office equipment, attracting four of the newcomers to the 100 leaders' list—Tandy Corp., Texas Instruments, Sony Corp. of America and Coleco Industries.

The category, however, is as volatile as its growth potential. At least one of the newcomers, TI, is likely to fade from the chart next year because the consumer product that put TI into the 1984 rankings—the TI 99/4A home computer—was dropped in October, 1983. Coleco spending would have been greater had its new Adam computer been delivered at intended volumes in 1983, but production snags rendered the introductory hype useless as Coleco pulled advertising until it got the Adam to market in early 1984.

Sony's most heavily advertised unit, the Betamax videocassette recorder ($6.2 million in measured spending) continued to lose market share to rival VHS-format systems, but it won a U.S. Supreme Court decision against moviedom when the court ruled that recording tv programs for private use did not violate federal copyright law.

Even Tandy Corp., which backed its popular TRS-80 line with $15.5 million, or 42% of its total measured spending, was beginning to feel the heat from industrywide price cutting at year's end. In its fourth quarter, Tandy net income dropped 21.6% from the year-earlier period from reduced sales of the TRS-80 affected by industrywide price-cutting.

Soft drinks attracted considerable attention as marketers rushed to retail shelves "lighter" products, extracting just about everything from the drinks but the cola underpinnings.

Aspartame/saccharin sweetener substitute got good play as Coca-Cola infused the blend into diet Sprite; Consolidated Foods reintroduced Diet Shasta with the new sweetening blend and continues testing 100% d'Lite with 100% aspartame in three markets; Philip Morris introduced aspartame into both Diet 7UP and Sugar Free Like, and PepsiCo injected aspartame into Diet Pepsi.

The successful G.D. Searle & Co. product also found its way into General Mill's Trix cereal, General Food's Alpha Bits, Carnation's low-cal hot cocoa, Heinz Superman hot cocoa mix, Lipton iced-tea mix and Wrigley's Extra gum.

UAL gets you there and American Express pays the bill in this All-American vacation tie-in.

Coca-Cola upset the soft drink market share rankings in propelling diet Coke into third place past 7UP, and even bumped off Coca-Cola's TAB as the leading U.S. diet cola. The diet Coke product made the surge with $21 million in advertising in its first full year of national distribution. Coca-Cola sought to minimize any cannibalization of TAB by introducing diet Coke as a unisex drink unlike TAB's feminine image, but it proved a tradeoff as TAB's share dropped as the diet category share increased.

The collective catch phrase among mass retailers in 1983 was "a store within a store," characterized by the introduction of boutiques within the body of the store.

Sears, in adopting its equivalent "store of the future" design, outfitted existing units with the boutiques and refined its merchandising. J.C. Penney Co., which tried the boutique concept about 10 years ago but scuttled the idea after finding its traditional blue-collar customers not enamored by fashion, followed the Sears' lead by upgrading merchandise, adding a distinct Italian *haute* to its apparel offerings, and shelved low-return auto service, major appliances, hardware and garden products.

Montgomery Ward & Co., the biggest ad spender among Mobil Corp. subsidiaries, is introducing a new merchandising plan that establishes seven specialty stores in one store. Likewise, K mart Corp. credited its improved sales, the earnings to its remodeling program and addition of designer labels to its merchandise, and the touting of such shifts with heavy advertising spending ($40 million alone in 1984 Olympic Games advertising and promotion).

Euphoria returned to the auto industry in 1983 evidenced by Ford Motor Co. earnings of $1.9 billion, a turnaround from a loss of $657.8 million in 1982, and General Motors Corp.'s earnings increase from $962.7 million, to $3.73 billion. The year closed with American Motors Corp. recording its first quarter in the black in years. The year was marked by Jeep downsized for the first time in 20 years and Ford Motor pitching tractors to women.

The year was not a particularly dramatic one for agency shifts, although several 100 leaders gave pink slips to their agencies of longstanding: SSC&B's headlock on the Carnation account was loosened when the company for the first time gave products (from three divisions) to Foote, Cone & Belding; J.C. Penney dropped McCaffrey & McCall after 14 years and picked up N W Ayer; Colgate-Palmolive sought coordination in its worldwide business by picking Young & Rubicam to handle business worldwide previously directed by Kenyon & Eckhardt stateside and D'Arcy MacManus Masius abroad.

A major battle is shaping up for the 1985 Leader's issue. If the top two spenders maintain their current rate of spending, Sears will supplant P&G.

y Cleopatra Grenadiers in company sales.

Internationally, American Brands tobacco business consists almost entirely of U.K.-based Gallaher Ltd., where results were flat last year in dollars, at $2.97 billion, though they were up 16% in sterling, to £1.94 billion. On the bright side, however, the company's share of the U.K. cigaret market during the year rose to more than 32%.

Gallaher's Benson and Hedges Special Filter continues to be the leading brand in the U.K. and its standing was enhanced by the national rollout of Benson & Hedges Longer Length. Silk Cut, meanwhile, is the top-selling, low-tar brand.

Gallaher has sizable shares of the cigar, smoking tobacco and roll-your-own markets in the U.K. Its Condor brand is the pipe tobacco market leader and now has a 48% share of that market. Hamlet is the top-selling cigar and its share of market increased to more than 46%. In the roll-your-own category, Old Holbron is the No. 2 brand in the U.K. but rose to a 43% market share.

Gallaher also includes the Dollond & Atchison Group, Europe's largest optical company.

American Brands distilled beverages division had a 6% sales gain in 1983. Liquor consumption, however, continues to decline in the U.S.

Jim Beam countered the industry trend and increased sales in 1983. Over the past three years, its sales are up 27%, to $241.2 million, and it has strengthened its ranking as the world's top bourbon. Measured media spending was nearly $2.5 million, the bulk in magazines. Ad support also includes sponsorship of the "Jim Beam Spiral Thoroughbred Stakes."

Other bourbon brands include Beam's Black Label and Beam's Choice. In the whisky category, Beam's 8-Star blended whisky had an 8% sales gain.

The Beam Import Co. division added several products to its lineup. In September, 1983, it introduced Trenais Nouvelle liqueur to the U.S. The introduction was backed by $1 million in measured media support. Trenais combines yogurt and cognac. Another new entry is Canadian Silk, which is a Canadian whisky, and Gammel Dansk bitters, an import from Denmark.

Kamora, which is imported from Denmark, meanwhile, continues as the No. 3 leading coffee liqueur in the U.S.

Beam's Taylor Foods division had record sales, and distribution for its Mr. and Mrs. T cocktails scored a big gain when K mart Corp. began carrying the line in late 1983.

American Brands' food products division posted a 9% sales gain. Sunshine Biscuits is the major performer and invested nearly $1 million in measured media ad support for Hydrox cookies last year, nearly triple the previous year's measured spending. The cookie industry was particularly active in 1983 with many new entries appearing and precipitating an industry cookie war.

Sunshine continued its "Great cookies don't have to be expensive" campaign, unfurled in 1982 when it introduced smaller, low-price packages of its Hydrox, Vienna fingers and other sandwich cookie lines.

New entries included Chip A Roos and Hi Ho crackers, which were reformulated and repackaged, and Sunshine bite-size shredded wheat cookies, which were introduced. The snacks division, meanwhile, introduced Compadres tortilla chips.

The Andrew Jergens Co., American Brands' personal care products unit, which posted a 5% sales increase last year, substantially increased its ad and marketing support in the face of stiffer competition, according to the company. The increased money went mostly to support established lineups, which include Jergens lotion and Jergens Aloe & Lanolin lotion. The Jergens lotion line was backed with $3 million in measured spending in 1983.

Fiesta deodorant soap, a 1982 entry, got full-fledged ad support—$2.5 million in measured spending.

Squeek, a shampoo-conditioner which was introduced in 1982, went national last year. Gee Your Hair Smells Terrific, another shampoo-conditioner, meanwhile, has faded and received nothing in measured media spending in 1983.

The Acushnet Co. division, which makes Titleist and Pinnacle brand golf balls and golf accessories, had a 22% sales gain. Measured media spending for its golf balls was kept at $3 million. Its golf clubs ad spending was doubled to $1.4 million, the boost backing its new Pinnacle golf clubs.

American Brands' other major subsidiaries include Master Lock Co., the world's leading padlock manufacturer; Swingline Inc., which makes staplers and staples, and Wilson Jones Co., an office products manufacturer.

$18.9 million, up 35.9% over 1982. Of this, $18.2 million went to magazines.

The next major spender was ABC Movie of the Week with $3.4 million, all placed in magazines. WABC (am) Radio, New York, which spent more than $1.1 million in 1982, reduced its spending to $658,300. Other radio stations increased ad spending, including WLS (am, fm), Chicago, with $723,000, up from $706,300 and WRIF (fm), Detroit, with $421,500 down from $396,300.

In 1983, ABC reported record revenues of $2.95 billion, up 10% from 1982. Net earnings, however, dropped to $159 million, a 0.1% decline.

ABC got a quick start out of the blocks for fiscal 1984 in gaining net earnings for the first quarter ending April 30, 1984, of $23.9 million, a 72% increase, on revenues of $836.7 million, up 26% over the first quarter in fiscal 1983. Momentum was expected to continue with ABC's coverage of the Olympic Games attracting a wide audience, with the residual benefit of exposing those tv viewers to ABC's fall lineup promos. The tv coverage was the most comprehensive and extensive ever for a modern athletic event.

The year also marked the company's increased involvement in cable sports programing with the purchase of Entertainment & Sports Programming Network, the cable sports network in which the company already had a 15% stake. The purchase of the remaining 85% of ESPN from Texaco cost the company an estimated $202 million.

In June, the company announced an agreement to sell WXYZ Radio, Detroit, to Fritz Broadcasting for an undisclosed sum.

The company said broadcasting operations, which have provided 86% of the total revenues of the company over the past several years, were the major contributor to both revenues and profits. Revenues increased 12% in 1983, to $2.61 billion, as earnings increased 16%, to $365.3 million.

ABC Television Network had increases in revenues and earnings in 1983. However, news costs increased as a result of reformatting the late-night news programing and the coverage of the crises in Lebanon and Grenada. Costs of sports programing also increased because of a return to a full National Football League schedule after the strike the previous year and the coverage of Major League Baseball's World Series.

The ABC-owned tv stations reported increased revenues and earnings primarily as the result of a strong advertising marketplace. Similarly, ABC Radio showed good revenues and earnings growth.

ABC Publishing experienced a 10% increase in revenues, compared with a 70% decline between 1981 and 1982. Earnings rose 22% to a record $29.2 million. COMPUTE! Publications, acquired in May, 1983, was a significant contributor to the improved revenues and earnings for the company.

ABC Video Enterprises revenues declined 10.6%, to $13.4 million in 1983. The division's share of profits and losses from its joint cable ventures showed a loss of $47.3 million in 1983, compared with a loss of $32.4 million in 1982. One of the major costs was the development of TeleFirst, an in-home entertainment recording service, which the company decided to discontinue after only a few months in operation.

In late 1983, the two Hearst/ABC Video Services cable programing services, ARTS and Daytime, merged with additional equity partners to form two new services. Daytime merged with Viacom's Cable Health Network to form Lifetime. ARTS merged with the Entertainment Channel to form the Arts & Entertainment Services.

ABC Motion Pictures, which released its third film, "Silkwood," at the end of 1983, reported increased revenues for the year, as well as a reduced operating loss.

In the early morning daypart, ABC's "Good Morning America" dominated its network competition for the fourth year in a row.

In daytime programing, ABC continued its dominance of the three networks, a position it has occupied since 1977. The network added a new series, "Loving," to its lineup of "All My Children," "General Hospital" and "One Life to Live."

In 1983, established ABC series such as "Dynasty" and "The Love Boat" were joined by three successful newcomers: "Hotel," "Webster" and "Hardcastle and McCormick." In addition, three theatrical presentations—"Something About Amelia," "Who Will Love My Children?" and "The Day After"—all received high audience recognition and critical acclaim. "The Day After" was the most-watched made-for-tv movie ever.

This year saw the cancellation of the popular "Hart to Hart" series, an announcement that was received with a considerable degree of disappointment by many viewers.

ABC finished the 1983-84 season with a 17.2 rating, nine-tenths of a rating point behind CBS. However, with the coverage of the Olympic Games being a focus of the network's coverage in the months of July and August, it is confident that it will return to the top of the ratings charts.

ABC pulled more viewers during the two-week Olympic coverage than the other two networks combined. It got a 24.9 rating and a 44 share of audience compared with a 9.6 rating and 16.9 share of audience for NBC, and an 8.9 rating and 15.8 share of audience for CBS. (A rating point equals 1% of the nation's 83.8 million homes with tv sets, and a share is the percentage of tv sets being watched.)

The ABC Owned Television Stations continue to lead all tv station groups in reaching young adults. Its performance in the five tv markets—where revenues rose about 13%—was roughly comparable to the increase. The company expects its stations to outperform the others in the markets in 1984, primarily because of to the incremental revenues that are expected to result from the Olympic Games coverage.

ABC Radio got part of the increased market share being enjoyed by the networks, which moved from 48% of the market in 1982 to 53% in 1983. While radio industry revenues increased more than 12% in 1983 over 1982, the division performed considerably better than the industry segment.

ABC Publishing continued to show strong revenues through the performance of its Chilton Co., which is a diversified publisher of magazines and how-to books serving automotive, industrial, merchandising, transportation and international markets. In 1983, it added a new line of computer books for small businesses.

Outthink.

If you've been frustrated by the status quo results of trying to outspend your competition maybe it's time to outthink them.

PDC can help you do the thinking that will produce a strategy to move your product or service — move it by giving it extra value, move it by making it more desirable than the competition, move it by giving the trade more reason to push it.

We'll put this strategy into action with creative flair you don't ordinarily expect in consumer and business directed promotion campaigns, audio-visual presentations, collateral material, and direct response programs.

We'll also do it with a dedication to on-budget, on-time performance that you don't ordinarily get.

It takes that rare combination of top-notch creative preceded by sound strategy to win any sales war and nobody knows it better than our clients. Sophisticated marketing organizations like General Foods, Menley & James, Schenley Imports, Western Union and General Electric come to PDC for smart thinking. And smart looking programs.

You can learn about the Five Phase development process we use to outthink the competition in the PDC brochure. A phone call to Marty Abbott, our President, will bring you a copy. And you can also arrange to see the case history success stories which have resulted from the PDC Phased Approach.

If you'd like to outthink your competition, start thinking of PDC as your agency.

We help you outthink
the competition.

PDC
212 Post Road West
Westport, Conn. 06880
203 226 7515

Yes, I would like to outthink my competition. Please send me your PDC brochure so I can find out how PDC can help me do it.

*Worldwide

American Cyanamid, Wayne, N.J., is the 45th largest advertiser in the U.S. with $142.4 million spent in advertising in 1983, up 7% from the previous year.

Worldwide sales were up 2.6% in 1983, to $3.54 billion, from 1982. Net earnings rose to $166.4 million, up 26% over the previous year, which had been down 33% from 1981.

The company cited internal cost reduction and improved management programs as reasons for its improved earnings. In addition, the company's divestiture of unprofitable product lines proved helpful in raising profit margins.

The consumer products group, one of American Cyanamid's five operating groups, had a 1.6% increase in worldwide sales to $508 million in 1983. This total, as it has over the past six years, accounts for 14% of company sales. Worldwide earnings in the division rose 56%, to $25 million, from $16 million in 1982. The 1982 figure had been a 47% decline from 1981.

U.S. sales of Shulton toiletries continued to gain. In fragrances, deodorants, antiperspirants and haircare products, market share also increased.

In its first full year, Lady's Choice antiperspirant progressively grew in sales. Ad spending in 1983 was $5.4 million, with $5 million concentrated on network tv. In 1982, the company spent $5.7 million advertising Lady's Choice.

The Old Spice line of products chalked up good sales gains with the stick deodorant and solid antiperspirant. On the stick deodorant, spending was down from $4.3 million in 1982 to $1.1 million in 1983. Most of the money was spent on network tv. For the solid dry antiperspirant, $103,000 was spent solely on spot tv. Money spent to advertise the two products together hit $5.4 million, with most concentrated in network tv.

The Old Spice fragrance, which the company spent $6 million to advertise in 1983, strengthened its No. 1 position in the total mass fragrance market. It showed its best sales and market share gains in recent years. A new tv ad campaign, heavily concentrated on network buys, began and Old Spice conditioning aftershave lotion was introduced.

Declines in Breck Hair Care products were reversed as the company spent $685,000 to advertise the Miss Breck and Breck Basic hair sprays, as well as Breck shampoo.

Pine Sol liquid cleaner retained its No. 1 position and continued to increase sales. Ad spending for the Pine Sol line reached $7.3 million, up from $6.4 million in 1982. In 1983, Pine Sol shifted agencies, moving from BBDO to Carrafiello, Diehl & Associates, Irvington, N.Y.

U.S. sales of prestige fragrances were down slightly, due to flat real growth and increased competition. The Jacqueline Cochran subsidiary showed an over-all sales increase, with the acquisition of Swiss La Prairie skincare line contributing to the gain. Ad spending for the line was $103,700 and was concentrated in national magazines.

Media advertising for the prestige fragrances totaled $6.5 million, up 4% from 1982. Among the perfume lines, L'Air du Temps was the biggest spender with $2.5 million, up 38% from 1982; Cie got $990,400; down 45%; Fleur de Fleur dropped substantially, to $119,900, down 82%. Pierre Cardin for women was not advertised.

Pierre Cardin cologne gained ad support with $1.9 million in 1983, up 60%. Grey Flannel got $899,600, up 56% from 1982.

In an unusual move termed "an investment for the ad-supported future," Shulton USA took an equity position in a syndicated tv program, "Stars," with David Steinberg interviewing celebrities, put together by the Paramount TV Group. Shulton also developed an advertising campaign tied into the 1984 Olympics.

Media buying for Shulton, Jacqueline Cochran and Lederle Labs in the medical group—which represents $35 million in spending—was switched from BBDO to Dancer Fitzgerald Sample in 1983.

Worldwide sales for the Formica-brand unit declined 9.1% in 1983, but showed improved first quarter earnings in 1984. While U.S. sales were up, sales in Latin America declined more than 40% due to over-all poor economic conditions. That factor, along with reduced sales in Europe, led to lower results for the group. By midyear of 1984, American Cyanamid was looking for a buyer for the unit because, as a company spokesman said, the group's cyclical business nature did not mesh with the company's current strategies.

During 1983, the division successfully launched the Colorcore brand of surfacing material in several key U.S. markets where the product demonstrated excellent sales growth. Ad spending was $868,000 on Formica, $443,300 on Colorcore, with heavy concentration for both in magazines.

In the medical group, sales made up 27% of the corporate total with figures up 9.5% from $884 million in 1982 to $968 million worldwide. Earnings, up an impressive 145%, represented 50% of the corporate total.

The company's increased commitment to research and development, which has taken on large expenditures over the past five years—up 13%, to $215 million, in 1983 compared with 1982—has begun to show results.

In the medical group, the company credited a more up-to-date product mix with helping over-all sales. In this area, Lederle Labs and Davis & Geck cover nonprescription and prescription business to consumers and hospitals. In addition, the company maintains an equity interest in Cytogen Corp., with which it signed a research agreement in 1983 to develop a new anticancer drug delivery system.

Pipracil brand of pipricillin, a semisynthetic penicillin launched in 1982, continued to lead the division in sales.

The Lederle Labs division recorded dynamic sales growth—up 35% for both adult and Jr. Centrum multivitamin. In 1983, after just four years on the market, the product became a market leader. Centrum was American Cyanamid's single most heavily advertised product with $8 million spent in 1983, down 14% from 1982. Centrum Jr. products for children received $1.3 million in ad spending, mostly in network tv and magazines. Total advertising spending on the Centrum line reached $9.4 million, 17% of the company's ad budget, as spending for all vitamins reached $16 million.

Spartus, a nutritional supplement introduced in 1983, received $2.1 million in advertising, including $1 million in network tv and $390,000 in spot tv. Ad spending for Stresstabs reached $3.6 million, 74% of it in network tv.

In early 1984, another supplement, Caltrate 600, a high-potency calcium supplement for women, was introduced with a multi-million-dollar, multimedia campaign breaking in February. During the first four months of 1984, it had gleaned a 10.2% share of the combined food and drug market.

In 1983 separate research and operating divisions were created for Davis & Geck surgical sutures.

In the agricultural group, worldwide sales in 1983 rose 2.1%, to $747 million, from $731 million in 1982. While sales from this group comprise 21% of the corporate total, earnings were only 12% of the total. Reduced plantings spurred by the federal government's Payment In-Kind (PIK) program resulted in lower sales of crop protection chemicals. Due to a worldwide industry overcapacity, lower prices for fertilizers had an impact on earnings.

Building on the basic strengths of the business by introducing new products in the animal industry area, Cyanamid introduced two new products for cattle in 1983: Tramisol gel dewormer and Guardian insecticide ear tags. Another product, Maxforce roach control system, was introduced and sales figures, although unavailable, reportedly exceeded expectations.

The company spent $749,000 on spot tv advertising for herbicides and insecticides. Three herbicides from a new chemical class began field trials. Cygro, a potent agent to protect poultry from a debilitating disease, will be introduced overseas in 1984 with an eye toward 1986 for a U.S. market tryout.

The chemical group increased sales to $973 million in 1983 from $866 million in 1982. Operating earnings were significantly higher, $72 million in 1983 from $38 million in 1982, up 90%. The company attributed lower raw material costs, an improved product mix and effective cost reduction programs to the earnings boom. Elimination of general product lines helped the totals.

American Express Co.

	1983	1982
Sales*........	$9,770,000,000	$8,093,000,000
Earnings*.....	515,000,000	581,000,000
U.S. Advertising	107,571,000	95,458,000

*Worldwide

American Express Co., New York, the 66th largest national advertiser, increased advertising expenditures 12.5% in 1983, to an estimated $107.6 million, from 1982. Total worldwide spending for advertising and promotion increased 22.5%, to $384 million in 1983.

For the first time in 36 years, the company failed to post earnings gains over the previous year, thanks largely to a dismal year at the company's Fireman's Fund Insurance Cos. unit, where net income plummeted 88% from 1982, to $30 million in 1983, and to a $99 million loss, half of which was borne by American Express, at the company's cable tv venture with Warner Communications, Warner Amex Cable Communications.

The earnings drop did not keep American Express off the acquisition trail, however, as the company completed the acquisition in January, 1984, of Investors Diversified Services, now IDS/American Express, and bought Lehman Brothers Kuhn Loeb for $360 million in June. Lehman was merged into the company's Shearson/American Express unit, which became Shearson Lehman/American Express. By mid-1984, American Express was gaining fast on Merrill Lynch, Pierce, Fenner & Smith for the leadership spot in the brokerage industry.

The news was bright in 1983 for three of the company's main business units. At Travel Related Services, net income was up 22%, to $301 million, as the number of American Express Cards in use rose to 17.3 million from 16 million in 1982. Shearson/American Express posted one of the best profit records on Wall Street, with $175 million in earnings growth representing a 41% rise over 1982. And American Express International Banking Corp., which was combined in 1983 with certain non-U.S. banking subsidiaries of Trade Development Bank Holding S.A., posted a 126% growth in net income to $136 million, primarily because of the combination.

Warner Amex Cable Communications had an active year, albeit unprofitable. Former U.S. Transportation Secretary Drew Lewis was named chairman-ceo in February. The unit implemented several new strategies aimed at streamlining operations, including the layoff of more than 200 employes.

The merger of Warner Amex's The Movie Channel with Viacom's Showtime, both pay tv services, was consummated in September, creating a subsciber base of more than 7 million homes. Warner Amex retained a 19% stake in the merged operation.

Warner Amex also folded its Pittsburgh regional pay tv sports service and agreed to sell its Pittsburgh cable system to Denver-based Tele-Communications Inc. The sale awaits approval from the city. Warner Amex also reportedly is trying to unload its systems in St. Louis and suburban Chicago.

In programing, MTV:Music Television began generating revenues from cable system operators as Warner Amex began charging operators for the service, and Nickelodeon, its cable channel for children, began accepting advertising. Warner Amex, at press time, was planning a public offering of MTV and Nickelodeon.

American Express advertising spending in 1983 for network and spot tv fell to $36.1 million, an 8.6% drop from 1982's $39.5 million. The "Do You Know Me" campaign, via Ogilvy & Mather, New York, continued through 1983 and some new spots, including a spot featuring John Cleese, ADVERTISING AGE's Star Presenter for 1984 were added. Ads for American Express Travelers Cheques retained spokesman Karl Malden and the tag line, "Don't leave home without them," through 1983, a record-breaking year in sales. Boosted by the 1983 performance, the 1984 ad budget for the cheques will be 40% greater than in 1983.

O&M also broke a new campaign for the American Express Card directed toward women. The tv spots featured the tag line, "It's part of a lot of interesting lives." And a radio campaign featuring Ann Winn and Garrett Brown promoted the use of the card for retail purchasing.

McCann-Erickson, New York, continued its "Minds over Money" campaign for Shearson/American Express through 1983, with the equivalent of long copy ads on tv. In June, 1984, the agency began a new campaign, with the same general theme, adding the Lehman name. The agency also continued ads for the Gold Card, which use only print media and don't use a consistent theme line.

In August, American Express planned to begin rolling out its new Platinum Card to the top 5% of its card holders. Solicitation will be by direct mail. There will be no media advertising.

American Home Products Corp., New York, the 14th largest national advertiser, increased its advertising to an estimated $333.5 million in 1983, a 3%, boost from the previous year. It was the drug, food and household product marketer's 31st consecutive year of increased sales and earnings.

Total sales rose to $4.857 billion in 1983 6% over 1982. Each segment of the business reported a gain in U.S. sales, although foreign sales, measured in U.S. dollars, showed a decline because of the strong dollar. Net income for the corporation increased 12%, to $627.2 million.

That growth pace continued into 1984 with first-quarter sales reported at $1.3 billion, a 5% gain over the similar period in 1983, and net income registered at $172.9 million, a 10% increase over the year-earlier period.

Prescription drugs and medical supplies, the largest portion of American Home's operations, inched even further upward in importance, accounting for 48% of total sales and 63% of pretax income in 1983, a 1% increase in both cases from the previous year.

The product areas where American Home is focusing its medical growth are in cardiovascular drugs, anti-arthritics and analgesics, oral contraceptives, tranquilizers and infant nutritionals. The company filed 11 new drug applications with the Food & Drug Administration last year.

But the drug development that had the most impact on the company's advertising budget had to do with the FDA giving approval to Upjohn Co. and American Home to market the popular anti-arthritis prescription drug ibuprofen as a nonprescription pain reliever. As a prescription drug, American Home's Whitehall Laboratories' brand, Advil, had about $220 million in sales.

That approval came in May, 1984, and the next month American Home launched a $50 million ad campaign through Young & Rubicam to introduce Advil as an over-the-counter drug. However, by mid-July, American Home was adjusting its campaign in response to a suit filed by Upjohn alleging that the Advil advertising was "misleading and deceptive."

With brands such as Anacin and Dristan, packaged medicines are a major business area for American Home. Packaged medicines, which accounted for 13% of sales and 13% of profits in 1983, rose 5% in sales and 17% in pretax income last year. Whitehall Laboratories is the division that markets such industry-leading packaged medicines as Anacin, Dristan, Preparation H and Primatene, along with Advil.

Whitehall, which spent $135 million in advertising last year, sought to expand its franchise in the 18 product markets in which it competes. It added to the Anacin-3 line by introducing Regular Strength Anacin-3 and Anacin-3 for children. In the specialty analgesics field, it extended the Arthritis Pain Formula line with the introduction of Safety-Coated Arthritis Pain Formula. In measured media, Whitehall spent a six-media total of $25.3 million on Anacin, $27 million on Anacin-3, $26.1 million on Dristan, $5.5 million on Denorex medicated shampoo, $5.2 million on Arthritis Pain Formula, $13 million on Preparation H and $7.3 million on Primatene.

But Whitehall also entered a new major business area with the introduction of Youth Garde lotion into the skincare treatment market. In advertising prepared by Kornhauser & Calene, Youth Garde used Catherine Deneuve as spokeswoman as it took aim against Richardson-Vicks' Oil of Olay, the major force in the estimated $400 million facial moisturizing category. Launched in July, Youth Garde received $8.2 million in advertising support in measured media figures in 1983.

Another AHP otc product, Riopan, which is marketed by Ayerst Laboratories, received $6.8 million in measured six-media advertising. Its share grew to 12% of the $200 million liquid antacid market, but late in the year the product ran into some controversy. William H. Rorer Inc., the marketer of category leader Maalox (40% share), sued AHP, charging misleading claims for Riopan Plus in comparative ads aimed at Maalox. Rorer alleged Riopan Plus advertising claimed it was more effective than Maalox, although it had only lab tests to support its claims and no tests involving humans. The case has been settled to the satisfaction of both companies.

Besides Riopan Plus, Ayerst moved further to build its otc line, its third year of activity in this direction. One step was to expand the Riopan line with a tablet product to compete in the large roll-pack market. Except for Riopan, other Ayerst otc products did not receive very heavy advertising, with $617,300 spent on Beminal Stress Plus Vitamins and $892,000 on Dermoplast.

Food and household products sales in the U.S. were up 6% in 1983, with about a third of that increase the result of Ranch Style Inc., a processor and marketer of bean products in the Southwest. While household and candy operations both were up in sales and profits, heavy price competition depressed profits for food products.

In 1982, there were a number of product reassignments to ad agencies in the household products area. Last year, none were reported. But in 1984, there were some food reassignments related to Young & Rubicam adding Ronzoni macaroni when General Foods purchased that company. Cunningham & Walsh, another American Home Foods agency, picked up about $15 million in Chef Boy-Ar-Dee pizza mixes, dinners and spaghetti sauces, and Kornhauser & Calene had about $2 million in Dennison's chili billings.

Y&R retained Chef Boy-Ar-Dee canned pastas, the industry leader in the $400 million retail canned pasta market, and the largest AHF assignment the agency was handling. All Chef Boy-Ar-Dee products received a total of $16.5 million in six-media measured advertising in 1983. New product introductions under this label were concentrated in the children's lunch market with the launches of such products as Zooroni, animal shaped macaroni in tomato sauce; Cosmic Kids, chicken flavored pasta in sauce, and Pac-Man, a new pasta introduced under license. Chicken-flavored ravioli also was introduced.

In soups, Chef Boy-Ar-Dee Soup di Pasta and Luck's Country Style soups, both introduced in 1982, added a combination of 10 varieties last year. Other foods, such as Gulden's mustard, received $1.4 million in advertising in 1983 while Franklin Crunch 'N Munch, which has been growing at 30% a year, added new flavors and introduced new sizes.

Led by its Pick-a-Mix products, the company's Brach's candy increased sales by 7% last year. Following a successful test market, Hula Chews, a chocolate-covered coconut candy, was rolled into national distribution. Another product, Peanut Butter Putters, was launched into test. Gum Dinger, a bubble gum and candy lollipop, was expanded to the western sales region. Measured advertising for the various Brach's products was $4.9 million last year.

With strong gains posted by Woolite, Pam and Sani-Flush, the company's Boyle Midway household products division increased sales by 7% last year. Generally the division has been profiting from increased consumer demand for convenience products that save time and effort. Sani-Flush Tank II bowl cleaner, which was introduced at the end of 1982, received $5.3 million in advertising last year and became Boyle-Midway's most successful first-year sales achiever in terms of volume.

The Easy-Off line, which received $9 million in advertising, was expanded with the national introductions of Easy-Off Ovens and More, and Easy-Off Oven Pad. There were 11 new fresheners added to the Wizard air freshener line last year, which received $1.1 million in advertising. Other major brands receiving top-dollar ad support were Woolite ($14.8 million) and Black Flag ($5.3 million).

In the cardiovascular group, Ayerst Laboratories' Inderal became the most prescribed drug in the U.S.; it also received FDA approval for use by patients who have survived a heart attack, and it was being tested for treatment of acute heart attacks. Plans also were made to introduce Betacor in 1987, a drug considered significantly more potent than Inderal.

In the oral contraceptive area, Wyeth Laboratories filed a new drug application for Triphasil. In the infant nutritional market, it is expanding distribution of Nursoy, a soya base formula for infants allergic to cow's milk, and internationally, Promil, a milk food to enrich the diet of older babies.

The company also announced it was seeking a buyer for its Ekco Group of housewares and related operations because that group's return on investment did not meet AHP standards over the long term. In mid-1984, letters of intent were executed with a division of Tenneco Inc. for the sale of Ekco Products and with a group organized by Gibbons, Greene, von Amerongen, Ltd. for the sale of Ekco Housewares and E-Z for corporation.

Earnings*.....	409,301,000	303,721,000
U.S. Advertising	115,182,300	94,891,800

*Worldwide, fiscal years 1984 and 1983 ended February

American Honda Motor Co., Gardena, Cal., the 60th largest national advertiser and the third largest auto importer in the U.S., increased its total ad spending in 1983 to an estimated $115.2 million, up 22% in from the previous year.

American Honda is the country's motorcycle sales leader and accounts for 14.7% of all imports and a 4.5% share of the total market. It is a wholly owned subsidiary of Honda Motor Co. Ltd., Tokyo.

The company, which is celebrating its 25th anniversary in the U.S. this year, also plans to become a major force in the power equipment industries through its lawn mower and snow thrower products.

The parent company posted an 8.4% gain in worldwide sales for fiscal 1984 ended February of this year over fiscal 1983, with overseas (outside Japan) sales accounting for 63% of the year's consolidated total and 10% of motorcycle revenues. Autos accounted for 57% of the parent's sales, motorcycles for 21%, consumer power products for 7% and parts and other revenues for 15%.

The company's last fiscal year recorded worldwide car sales of 1.1 million units, up 1% over the previous year, and the third straight year that Honda auto sales have exceeded the million-unit level. U.S. spending accounted for 350,670 units in 1983, down from 365,865 the previous year because of import quota restrictions. Sales are expected to increase to 480,000 in calendar 1984 through increased U.S. production.

Honda, Japan's third largest producer of passenger cars, is offering in 1984 a new line of Civic small cars, the two-seat CRX and an expanded Accord series, all refined and carrying new high-technology equipment.

Honda retired the six-year-old "We keep it simple" slogan in the U.S. for an even simpler: "Honda." Media sales also was simplified, with magazine buys being made upfront for a year, resulting in stable rates and better positioning. Also, magazines received 10% less of the budget than in 1982.

Tv picked up what magazines lost. Both tv and magazine ads promoted the Civic CRX, a two-seat coupe that gets 51 miles per gallon in city driving and is priced at $6,149 for the 1.3-liter engine and $6,599 for the 1.5-liter model. The CRX was billed as "the new car" and touted for high gas mileage and performance. The U.S. Environmental Protection Agency gave it the highest rating for fuel economy.

Network and spot tv represented the major expenditure in the company's support of its 1984 car and motorcycle models, while youth-oriented consumer magazines accounted for about 80% of the advertising support in the major push behind Honda's motorized scooters. The new Aero models received particular emphasis, but the Honda Elite, said to be the most technologically advanced scooter ever built, also had solid support.

Once again the popular Honda Accord auto led the company's sales in the U.S., selling 171,736 units. Lower import quotas also reduced sales of the Civic model to 127,856 units, but the new Honda CRX, selected as the 1984 *Motor Trend* Import Car of the Year, tallied 10,287 units in its first year. While the Accord is Honda's strongest model in the U.S., the top-of-the-line Prelude, priced at more than $9,900, is coming on strong. During the year, 41,188 Preludes were sold. The *Motor Trend* selections found the Prelude and the Civic Hatchback as the first and second runners up, the first time one auto maker has taken the top three spots in the annual balloting.

Worldwide sales of Honda motorcycles during the past fiscal year declined 7% to $2.1 billion. Minimizing the impact were big gains recorded in the U.S. market—507,000 units sold in North America, a dramatic increase of 37%—which accounts for 25% of total overseas unit sales.

An increasing number of U.S. purchases will be of U.S.-produced cycles made in the Marysville, O., plant, which will reach a full annual capacity of 150,000 units by next spring.

Honda is planning to produce motorcycle engines in Ohio and is studying the possibility of manufacturing auto engines there. The company already has decided to double the plant's automobile production capacity, with construction expected to be completed early in 1986. Since Honda has an import quota of about 350,000 units, compared with 500,000 for Toyota and 450,000 for Nissan, expansion of its U.S. capacity is the only way for it to expand sales. (Domestically produced cars are free of the quota.)

Honda introduced a variety of new motorcycle models in 1983, backed by $35.6 million in media purchases from six mediums. The over-all campaign for the fifth year remained "Follow the Leader."

The gains recorded by Honda motorcycles in the U.S. were enhanced by booming sales in the three-wheel, all-terrain vehicle market where Honda continues to hold a dominating 70% share of the market, followed by Yamaha with 15%, Suzuki with 10% and Kawasaki with 5%.

Honda continued to showcase its motorcycles and all-terrain vehicles on selected prime time network series such as "The A Team." It was also key sponsor of National Basketball Assn. and National Collegiate Athletic Assn. basketball games.

Major new product introductions in the U.S. included a redesigned top-of-the-line 1200cc Gold Wing, a new entry in the touring segment of the market, of which Honda holds an 80% share. The company also introduced new models in the Interceptor family, 1000cc and 500cc models, which quickly became the dominant motorcycles in their respective classes.

Power products, the third major group in Honda's worldwide operations, encompass some 40 different products built around Honda's small, high-efficiency engines. Currently receiving advertising support estimated at nearly $5 million annually are Honda lawn mowers, snow throwers and the EX800 electric generator. Honda's share of the U.S. lawn mower market is only about 1%, but the company plans to boost that share by building a $10 million lawn mower manufacturing plant in North Carolina.

*Worldwide **Revised

American Motors Corp., Southfield, Mich., the 69th largest national advertiser, increased its 1983 advertising budget to an estimated $100.8 million, up 28% from 1982.

AMC, which reported a profit of $7.4 million in the fourth quarter of 1983—the first following 14 consecutive quarterly losses—couldn't get over the hump for the full year, reporting a net loss of $146.7 million, compared with a loss of $153.5 million in 1982. Sales increased to $3.3 billion, up 37% from $2.3 billion in 1982.

The fourth quarter, followed by a profitable first quarter, 1984, in which net income was $5.1 million on sales of $1.1 billion, however, has generated hope at AMC. Profits were credited to the success of the new Jeep Cherokee and Wagoneer, the continuing success of the Renault Alliance and the 1984 Renault Encore, introduced in fall, 1983.

The Renault Alliance was introduced in September, 1982, the first of the new generation of Renault passenger cars built in the U.S. AMC positioned Alliance to straddle both the domestic and import markets. Early in 1983, the Alliance was named "Car of the Year" by *Motor Trend* magazine. The car surpassed all sales projections, reaching the projected 100,000-unit sales mark in June, then adding another 40,570 units by the end of the year.

In September, 1983, American Motors introduced its second new passenger car model, the Renault Encore, a hatchback model based on the Alliance chassis, drive-train and suspension system.

Led by these two cars, the company sold 226,580 passenger cars in the U.S. in 1983 (its highest level of sales since 1976, up 51% from 1982), which represented 2.5% of the passenger car market, including imports. The company's share of the U.S. subcompact passenger car market, including imports, increased from 6.8% in January, 1983, to 7.3% in January, 1984.

Introduced as 1984 models were the four-wheel-drive Jeep Cherokee and Wagoneers, the first all-new Jeep line in 20 years. Both Jeeps compete in the new compact segment of the sports utility market. Through yearend, 13,500 Cherokees and Wagoneers were sold at retail in the U.S., taking an 18% share of the compact sports utility market in the fourth quarter.

Total AMC vehicle sales in the U.S. increased 44%, to 308,711 units in 1983. The number of Renault import vehicles dropped from 37,540 units in 1982 to 33,220 in 1983, but U.S.-made Renault sales increased from 30,173 in 1982 to 146,190 in 1983, a 384% increase. Jeep sales rose 28.8%, to 82,140 in 1983.

Meanwhile, AMC labeled vehicles were struggling for survival. In the spring of 1983, the aged Spirit and Concord were discontinued because of a 50% drop in sales. Sales of the 4wd AMC Eagle dropped from 43,221 in 1981 to 35,206 in 1982 to 31,207 in 1983, a decrease of 26% over the three-year period.

Worldwide totals for AMC automobile and Jeep vehicle wholesale sales reached 383,462 units in 1983, up 34% from 1982. Automobile sales were 270,019, up 37.9%, and Jeep sales were 113,443, up 25%.

The first ads for the 1983 Alliance broke Sept. 4, 1982, a "prelaunch" campaign that lasted two weeks. The ads—stressing "the alliance of quality and affordability" and "European technology now built in America"—broke during tv coverage of National Football League games. AMC spent

†Total Measured Tandy ad expenditures include business publication spending of $3,155,600 in 1982 and $2,524,400 in 1982

††1982 totals reflect the ad spending of the 1982 100 Leading National Advertisers.

Source: From AA's Usual Sources (See Page 3).

$20 million in measured media ($14.1 million in network tv), according to Leading National Advertisers, on Alliance during its introductory quarter, more than it ever had spent on a new vehicle. The remainder of AMC's products, including cars, Jeeps and other Renaults, received 40% of the total fall budget.

In January, 1983, AMC coupled a new 11.9% financing plan with a Motor Trend "Car of the Year" award for the Alliance, and sales jumped from 829 units to 1,022 units the week after the *Motor Trend* endorsement.

In 1983, AMC "reintroduced" the sporty Renault Fuego coupe with a heavier media schedule than in 1982 —$10 million vs. $6.2 million in 1982. New commercials concentrated on the turbocharged version, linking it with Renault's Formula One race cars. Ads broke in March, 1983. Fuego was off the airwaves, except in Sunbelt spots, for most of the 1983 model year because AMC ran out of cars after surpassing sales projections of 10,000 to 12,000.

AMC continued the auto racing theme with the 1984 Fuego sporty coupe. Fuego was supported with commercials that cut quickly between films of races and studio shots of the car. The line, "The new Renault Fuego. Racier," refers to Renault's Formula One racing ties and a larger new 2.2-liter engine that "cranks out 40% more torque for 1984." Fuego is also available with a 1.6 liter turbocharged engine.

Meanwhile, Jeep division of AMC kept its ad theme, "Why drive a car when you can drive a Jeep?" through the introduction of the compact XJ model in the fall of 1983. The ad spending for Jeep products 1983 was $21.9 million in measured media, up from $11.7 million spent on the line in 1982. The XJ—a new down-size version of the Cherokee and Wagoneer—soaked up much of the increase, but other Jeeps saw more ad money.

Jeep's "Why drive a car?" theme was continued with the aim of attracting customers who don't usually consider buying a 4wd product.

Print ads for the smaller Jeep Cherokee and Wagoneer stressed the "leaner and meaner" theme, with direct comparisons to the competition.

Despite heavy new Jeep advertising, AMC continued to struggle with the marketing problem of convincing buyers that less is more. The problem especially applied to the new Cherokee and Wagoneer, the first down-sizing in 20 years.

"The core of our marketing strategy is to explain we have retained Jeep's rugged characteristics . . . in a more efficient packaging size. That's really the trick," said David Van Peursem, who left AMC as general marketing manager to become senior vp of the AMC account at Compton Advertising.

Jeep wanted to broaden the appeal of 4wd vehicles and expected to move toward carlike qualities in doing so.

Grey Advertising beat Compton Advertising for the introductory campaign of AMC's new Jeeps. Grey handled creative for the new XJ models, while Compton, the regular Jeep agency, placed media.

Grey also handled the new Renault Encore advertising. The typical Encore buyer is a "trendy, image-conscious individual, young, well educated, and white collar," Mr. Van Peursem said. The typical Alliance buyer is a more conservative, practical and family-minded buyer, he said.

Measured spending for the Encore was $10.6 million. Media was 75% tv, with the rest in newspaper, radio and magazines.

On an international level, in May, 1983, AMC formed a joint venture with Beijing Automotive Works. The venture, named Beijing Corp. Ltd., will build Jeep vehicles in the People's Republic of China.

AMC's $16 million China investment was necessary because that is where growth is, said Tod O. Clare, vp-international operations. With operations beginning in January, Beijing Corp. was involved in the production of light duty vehicles and trucks. The venture establishes a base for future competition in the markets of the Asia-Pacific region, specifically India and Indonesia. Egypt and Mexico, according to Mr. Clare, are other markets with good potential.

On Sept. 19, 1983, AMC sold the company's special government vehicles segment to AM General Corp. a subsidiary of LVT Corp. for $170 million, to focus on autos.

And in focusing on autos, AMC wanted to reduce its dependence on the Alliance, which had been very successful. W. Paul Tippett, chairman and ceo, said a major AMC problem is its habit of stressing one product line at a time. "There was nothing to keep the momentum going," he said. The company sold more cars in 1983 than in 1982, yet continued to post losses.

Because AMC needs more new products, the company "will concentrate on product areas where we or Renault have special expertise—4wd passenger cars and 4wd vehicles," Mr. Tippett said. "We plan to move from a product lineup that covers 25% of the U.S. car market to one with over 50% coverage within the next five years. We also plan to expand our coverage of the light-truck market from the current [August, 1983] level of 12% to 41%. The key to the strategy is consistent new-product development."

To attain profitability, AMC believes it must capture the passenger car market and an 18% share in 4wd. In total, AMC wants to get 5% of the vehicle market.

AMC continues to develop front-wheel-drive passenger cars, through its affiliation with Renault, and new 4wd vehicles. From 1984 to 1988, AMC expects to expand offerings to include specialty models in the 1985 and 1986 model years, and compact and intermediate models later in an attempt to increase coverage in the U.S. passenger car market from 20% to more than 50%.

American Motors also scheduled an Alliance convertible for 1985 model year introduction. It will be based on the two-door model and positioned as the lowest-price U.S.-made convertible.

New Jeep vehicles will be introduced from 1984 to 1988, including a compact pickup truck in both two-wheel-drive and 4wd models, derived from the Jeep Cherokee platform. This will be AMC's first venture in 2wd trucks.

AMC also is eyeing the minivan market. Mr. Tippett said a minivan could be on sale within 18 months after initial go ahead is given. The AMC minivan effort will come atop plans for a light truck that have solidified for the 1986 model year. The truck will be based on the Cherokee, while the minivan most likely will come from the newly down-size Jeep Cherokee chassis.

AMC will spend about $2 billion between 1982 and 1987 to design and launch new vehicles. Cars will be derived largely from European versions of Renault, which owns 46% of AMC.

For the 1984 model year, AMC tried to establish a common look, especially in print advertising, as have other car companies. Joseph Cappy, vp-marketing group, said, "We haven't had that look, but we will have it. There will be an umbrella close to all our tv commercials—four seconds on the end that will tie the spot into the brand. We've also done some smart things with media-buying—we got ourselves good spots on 'The Thorn Birds' [an ABC miniseries]."

AMC currently forecasts a profit for 1984, although quarterly losses may occur. This is the first full year of sales of both Renault Alliance and Encore and the new line of Jeep vehicles.

American Telephone & Telegraph Co., New York, which divested its 22 wholly owned local telephone companies Jan. 1, 1984, spent an estimated $463.1 million in domestic advertising in 1983, a 24% increase from the previous year, to become the eighth largest advertiser in the U.S.

Of the total ad expenditures, measured spending in seven media consisted of $359.1 million, or 78% of total advertising expenditures.

The divestiture and events leading to the reorganization of a company employing nearly 1 million workers had a strong impact on AT&T's financial and operating expenditures, including advertising spending and revenues for 1983. About 75% of AT&T's total assets of $149.5 billion was assigned to the divested companies.

Also affecting the company's financial results was a charge recorded Dec. 31 against income of $5.5 billion, net of taxes resulting from a restatement of its assets to reflect their value in a more competitive, less regulated environment. In large part, this accounted for the company's net income declining to $249 million. Revenues increased 6.2%, to $69.8 billion in 1983. A total of $30.3 billion, or 56% of these revenues, came from the company's local service, while $34.5 billion, or 50.6% of total revenues, came from toll services.

Earnings also were affected in 1983 by a reduced sales volume as a result of construction expenditures by Bell System companies and a three-week strike in August, 1983. The company's over-all volume of business (with adjustments for rate increases) increased by 9% during the year.

While earnings diminished, local and toll service revenues increased 4.1% in 1983, partly because of growth in business and partly because of rate increases. Various service categories fluctuated. Growth was strong in network access lines, Wide Area Telecommunications Service and international toll messages. However, growth in domestic toll messages decreased.

The Bell System's operating companies added 2 million network access lines in 1983, compared with 1.1 million in 1982, but less than the 2.1 million installed in 1981.

Total toll messages (domestic and international) increased by 2.1% in 1983 compared with 3.6% in 1982, while WATS messages were up by 23%. Revenues from international calling reached $2 billion in 1983 compared with $1.8 billion in both 1982 and 1981.

Higher intrastate rates contributed $2.1 billion to the increase in revenues in 1983, compared with $3.5 billion in 1982 and $2.1 billion in 1981. Western Electric's net income declined 84.9% in 1983, compared with a decrease of 52.7% in 1982, partly due to a decision to phase out or reduce the activities of certain Western Electric manufactur-

ing facilities. Another factor was the reduced demand for products and services.

The divestiture marked the end of one tradition for AT&T and signaled the beginning of a new one as it separated its 22 wholly owned telephone companies and organized itself into one smaller, more compact information service company ready to pursue areas that previously had been off limits under government regulation. AT&T's long-distance service is currently its only business sector under supervision of the Federal Communications Commission.

The seven holding companies, formed by the breakup of AT&T, have beefed up their advertising efforts. They are:

- Pacific Telesis: Pacific Telephone and Nevada Bell.
- U.S. West: Northwestern Bell, Mountain Bell and Pacific Northwest Bell.
- Southwestern Bell: Southwestern Bell.
- Ameritech: Illinois Bell, Indiana Bell, Michigan Bell, Ohio Bell and Wisconsin Telephone.
- BellSouth: South Central Bell and Southern Bell.
- Bell Atlantic: Bell of Pennsylvania, Diamond State Telephone Co., Chesapeake & Potomac Cos. and New Jersey Bell.
- Nynex: New England Telephone and New York Telephone.

AT&T entered 1984 as a new organization structured around a sound line of business organizations, with each line of business a separate entity responsible for its own profitability and contribution to AT&T's total revenues.

Breaking up was hard to do for AT&T as the divestiture resulted in extra advertising strategies, including a refocus of the entire corporate strategy, according to Dave Shaver, AT&T division manager of advertising.

The whole positioning of American Bell, which was to be a major subsidiary, was abandoned on the premise of a court order that forbade AT&T from using the Bell name or logo. A new corporate theme was developed, "Reaching out in new directions," and a long-distance theme as well, "The more you hear the better we sound."

AT&T officials said one of the biggest problems since the breakup has been alleviating customer confusion.

"There is much confusion when you create a new brand name," Mr. Shaver said. "We've been known only as a blue-chip stock until now."

Although the major repositioning of the company was launched in the fall of 1983, a total change in focus has been established since then.

"Our corporate campaign is more definitional in nature," Mr. Shaver said. "We're trying to explain what the new AT&T consists of and what we stand for."

Although smaller in size, AT&T continues to be a leading participant in a marketplace marked by heavy competition in toll calling and equipment.

The reorganized AT&T consists of two divisions: AT&T Communications, the regulated portion of the AT&T business, which provides telecommunications and information transport services thoughout the U.S. and to points overseas, and AT&T Technologies, which includes five lines of business, with the manufacturing capability of Western Electric integrated into each line of business.

Those segments of AT&T Technologies include:

- AT&T Network Systems, which offers switching equipment, transmission systems, cable and wire, including optical fiber to AT&T Communications, the divested Bell companies, independent telephone companies, businesses, government agencies, etc.
- AT&T Technology Systems, which has three separate business groups—Components and Electronic Systems (designs and produces silicon chip products and other electronic components), Federal Systems (designs products and services for the U.S. Department of Defense agencies), and Computer Systems (makes and markets computers for use in communications systems).
- AT&T International, whose function is to market AT&T in the international marketplace.
- AT&T Consumer Products, which involves the production of home telephone sets to multifunctional home systems such as the Genesis telesystem in which a programable phone uses cartridges to activate various functions.
- AT&T Information Systems (formerly American Bell), which handles information management systems, enhanced services to business customers and operates AT&T's nationwide chain of PhoneCenters.

All these lines of business are integrated into AT&T Technologies Inc. except for AT&T Information Systems, which must maintain a degree of separation required by the FCC.

Under the FCC's Second Computer Inquiry, which governs the actions of AT&T Information Systems, the operation must provide its own marketing, sales and billings. In addition, it is not permitted to own any transmission facilities.

Although AT&T no longer is engaged in providing local exchange service, competition is fierce in the long-distance market, an area subject to growing competition, with more than 400 long-distance suppliers.

While AT&T continues to be regulated by the FCC in the area of long-distance service, the divestiture has enabled the company to branch into other areas such as computers. In March, AT&T introduced six different computer models, ranging from a powerful superminicomputer now used in the telephone network to a desktop supermicrocomputer, which can support as many as 18 terminals. In June, it added a personal computer, a local area network to tie electronic office machines into a single system and new software applications. AT&T is expected to introduce 30 new products for business customers in 1984.

AT&T also was the official telecommunications sponsor for the 1984 Los Angeles Olympic Games and provided, along with Pacific Bell, its communications systems for the games.

AT&T International and the Dutch electronics company, N.V. Philips, have created a joint venture to develop, manufacture and market sophisticated telecommunications equipment outside the U.S. The joint venture has been established in the Netherlands and is staffed by Bell System and Philips employes.

In May, the FCC reduced AT&T's cost for connections to local telephone company networks. This enabled AT&T to reduce its long distance rates.

*Worldwide

AMR Corp., Dallas, is the nation's 76th largest advertiser with estimated expenditures of $80 million in 1983, a 30% increase over 1982.

Battered in 1982 by intense competition from smaller low-cost airlines and major carriers as well, AMR's principal subsidiary, American Airlines, returned to profitability in 1983 through a concerted effort to increase productivity and reduce costs.

AMR's net earnings of $227.8 million in 1983 contrasted sharply with a net loss of $19.6 million the year earlier and set the stage for a major expansion effort in 1984.

For the six months ended June 30, 1984, AMR reported net earnings of $131.7 million on sales of $2.6 billion compared with first-half 1983 net earnings of $11.5 million on sales of $2.2 billion.

American Airlines, the nation's second largest airline (United Air Lines is the largest), represents 16.8% of the revenue passenger miles flown in the 50 states plus San Juan and the Virgin Islands.

At the airline's largest hub, Dallas-Fort Worth Airport, American has about 57.8% of the boardings in any given month, representing 48.7% of the seats available.

The gap indicates American is filling a higher percentage of its seats than its competitors.

At Chicago's O'Hare where American operates 205 flights daily (in contrast to 280 at DFW), the airline accounts for about 24% of departing passengers.

American's traffic in July rose 6.2% over the same month a year ago, ranking July 1984 as the second best month in the company's history.

In early 1984, American Airlines ordered 67 new McDonnell Douglas MD-80 jets and purchased an option on 100 additional aircraft, a move that will enable American to expand its Chicago and Dallas hubs throughout 1985 and 1986 and to develop Denver as its third major hub. By 1987, American's installed seats will have increased 33%, to 53,471, up from the current 40,430.

American's expansion plans are based on lower-cost labor contracts that the airline negotiated with its unions during 1982 and 1983, permitting American to hire new employes at lower wages. The new contracts and the acquisition of new, cost-efficient aircraft will enable American to grow at unit costs equal to those of new, low-cost carriers.

As part of its productivity study, American evaluated new marketing opportunities that could produce additional revenue with existing systems. That effort resulted in the formation of a new subsidiary to perform ground handling activities for other airlines on a contract basis and creation of a new direct marketing subsidiary using excess capacity in its own reservations computer system.

American officials also are striving to establish a difference between American and its competitors through service standards, through advertising of competitive prices and schedules, and by taking a leading role in the restoration of the Statue of Liberty (a project that American expects to accentuate the airline's name).

In 1983, American suspended its service between Dallas-Fort Worth and Brazil, bowing to weakness of the Brazilian economy, which adversely affected passenger traffic of all airlines operating to Brazil.

On May 1, 1984, American introduced daily Super 80 service between Dallas-Fort Worth and Santa Barbara, Cal., and added flights to its service between Texas and Calgary in Alberta, Canada. Also during 1984, American was to have inaugurated nonstop service between Dallas/Fort Worth and Maui and made plans for starting nonstop service between DFW and both Frankfurt, Germany and Paris, in April, 1985.

Anheuser-Busch Cos., St. Louis, the nation's 20th largest advertiser, increased ad spending 19% to an estimated $290.6 million in 1983. Such spending made A-B the largest advertiser in the U.S. beer industry, a rank befitting the largest brewer.

Last year was the 27th consecutive year in which A-B claimed the title as the nation's largest brewer. The company produced 60.5 million bbls. in 1983, compared with 59.1 million bbls. the previous year. The 1983 production total represented only a 2% increase for A-B, but it came during a year when the industry as a whole showed even less growth. Total domestic production was 177.9 million bbls., up less than 1% from the previous year.

More importantly for A-B, it increased its production lead over the nation's No. 2 brewer, Philip Morris' Miller Brewing unit. Miller's 1983 production was 37.5 million bbls., a 4.5% drop from 1982. A-B thus increased the barrelage gap between itself and Miller to 23 million bbls.

A-B also increased its share of the over-all beer market to 34% in 1983, compared with 33.5% in the previous year. Miller was second with 21%, Stroh Brewery was third (13.7%); G. Heileman was fourth (10%), and Adolph Coors was fifth (8%). That left less than 14% of the domestic market for all other breweries.

The beer industry's stagnant growth performance brought a variety of responses from A-B and other domestic brewers. A common reaction was to increase advertising spending for existing brands to increase or at least maintain their market shares. This is a course that A-B took.

But it also has utilized other tactics to boost sales. Its most notable move came in January, 1984, when it announced plans to introduce a low-alcohol beer. Low-alcohol means less than 2% alcohol, compared with 4% in regular beers. Cincinnati-based Hudepohl Brewing had introduced low-alcohol Pace beer in September, 1983, and C. Schmidt Brewing, Philadelphia, had debuted low-alcohol Break Special Lager in December, but A-B became the first national brewer to test the waters in the new category. Its brand, named LA, entered test markets in April. A-B further surprised the industry by beginning a national rollout of the brand barely a month later.

Other brewers responded quickly to LA's debut. Stroh Brewery introduced Schaefer L.A. Then Heileman produced low-alcohol extensions of its Blatz and Old Style brands (later adding Lone Star L.A. and Rainier L.A.). Miller held back initially, but in August it entered its low-alcohol Sharp's L.A. into test.

None of the brewers could say with certainty that there was a market for low-alcohol beers, but all feared a repeat of Miller's coup in the 1970s when it introduced low-calorie Lite beer. There was a market for such a beer, and Miller, by marketing the first low-calorie brand, grabbed a huge share of that market and remains the dominant player.

Miller had sought—unsuccessfully—to prevent other brewers from using "light" to designate the low-calorie beers that followed Lite's debut, and a similar legal controversy accompanied A-B's introduction of LA. The brewer maintained that LA was a trademark brand name unusable by others.

It won a suit against Stroh Brewing over Schaefer L.A., a brand subsequently renamed Schaefer Low-Alcohol. Suits and countersuits over whether L.A. was a generic term also were filed by A-B, Heileman and Miller.

D'Arcy MacManus Masius, St. Louis, won the advertising assignment for LA after competition with Needham, Harper & Steers, Chicago, and TBWA, New York. A-B appeared committed to spend at least $20 million to introduce the brand. The LA campaign DMM created promoted the brand as a complement to consumers' changing tastes and life styles, using the theme "For the way you live today . . . LA."

A-B also has begun limited testing of a new malt liquor. In some markets, it is packaged under the King Cobra name; in others A-B is trying the Jaguar name.

Budweiser continued to be A-B's flagship brand and the nation's largest selling beer with a 23.1% share of market, according to A.G. Becker Paribas analyst John Maxwell. Miller's High Life and Miller Lite tied for a distant second place with 9.7% shares.

The straightforward "This Bud's for you" campaign has continued, backed in 1983 by $59 million for Budweiser, a hefty 30% increase over 1982.

But the biggest spending increase came for Budweiser Light, a brand introduced in 1982. A-B shortened the beer's name to Bud Light (explaining that is what customers called it anyway) and expanded the beer's ad budget 39%, spending $49.4 million for Bud Light in 1983.

In addition to changing the name, A-B and NH&S have changed advertising for Bud Light. The initial "Bring out your best" campaign concentrating on sports figures going all out and being rewarded with a Bud Light has been replaced by commercials stressing the brand's name. Patrons who tell bartenders, "Gimme a light" receive almost anything but a light beer. Instead they are given lamps, sparklers or neon lights, but no beer. The message is to ask for Bud Light by name.

A-B's superpremium Michelob and Michelob Light brands were hurt by the industry's slump. Michelob production dropped from 7.4 million bbls. in 1982 to 7 million in 1983. Its light version dipped from 2.9 million bbls. to 2.7 million. With the strong U.S. dollar keeping down the price of imported beers, many consumers traded up from domestic superpremiums to imports. New entries at the low end of the beer price spectrum (such as Miller's Meister Brau and Milwaukee's Best) encouraged other drinkers to trade down. Other consumers left the market altogether in favor of wine and wine coolers.

In an effort to halt the sales erosion, A-B also increased ad spending for the two superpremiums. Michelob was backed by $33.6 million for advertising in 1983, a 29% increase. Spending for Michelob Light increased to $24.1 million, up 13%.

The spending increase alone could not reverse the slide. A-B became increasingly dissatisfied with the campaigns DMM had developed for Michelob ("Some things speak for themselves") and Michelob Light ("Michelob Light for the winners"). A-B initially began a review of the Michelob account, but it soon expanded to include both assignments. In July, responsibility for Michelob advertising was moved from DMM to Ted Bates Advertising/New York. The Michelob Light assignment was given to NH&S, agency for Bud Light and Busch.

Popularly priced Busch continued to receive comparatively little advertising spending: $6.9 million in measured media last year, the same as in 1982. But industry observers speculate that A-B may devote more attention to the brand as the popular (discount) category grows. Miller's Meister Brau and Milwaukee's Best brands have entered the category, joining Heileman's Blatz brand, Stroh's Schaefer, Pabst's Hamm's and others.

The A-B brand that saw the greatest advertising de-emphasis was Natural Light beer. Bud Light now is the brewer's primary light brand, and ad dollars have been shifted to it accordingly. Ad spending for Natural Light dropped from $16 million in 1982 to only $5.6 million in 1983.

Wurzburger Hofbrau, the beer A-B imports from Germany and bottles in the U.S., received token advertising support in 1983—only $300,000 (vs. $101,000 in 1982).

In line with parent Anheuser-Busch Cos.' ownership of baseball's St. Louis Cardinals, A-B has tied its beer brands to local and national sporting events through advertising, sponsorships and promotions. In addition to the Cardinals, A-B sponsored 19 other major league teams. Michelob sponsors golf tournaments on the men's and women's tours. Michelob Light sponsors tennis tournaments (including the U.S. Open).

Exclusive network tv sponsorships of sporting events, primarily by A-B and Miller, came under fire last year by Stroh Brewery. The Detroit brewer threatened restraint-of-trade litigation against the network over the longstanding practice of granting advertiser exclusivity. That practice since has begun to lessen, giving Stroh and other brewers an opportunity to buy unsold time during broadcasts that already have brewer sponsors.

A-B has made moves to expand its network tv advertising presence beyond sporting events. It reportedly made a $16 million upfront primetime tv buy on a variety of nonsports network tv series for the 1984-85 season.

A-B last year also moved into cable tv through the joint-venture development of a regional pay tv cable network called Sports Time. The network carries St. Louis Cardinals, Kansas City Royals and Cincinnati Reds baseball games. In fact, A-B is the nation's No. 1 advertiser on cable with 1983 expenditures of $15.8 million, up 71%, according to the BAR Cable TV Network Report.

One of the more important news events about A-B's involvement in sports came in 1984, when the company signed a consent decree with the Bureau of Alcohol, Tobacco and Firearms, and paid the agency $2 million, settling a charge that it has exercised a monopoly on beer sales (including instances of predatory pricing) at ballparks, race tracks and stadiums. Industry observers saw the signing of the consent decree as the most important aspect of the agreement, because it means that the bureau can accuse the company and its execs of criminal contempt if future violations are discovered.

A-B's 1982 purchase of Campbell Taggart has given the company a larger presence in the food-products business. CT is the second largest commercial bakery in the U.S., with 58 wholesale bakeries in the Sunbelt and Midwest.

CT's Merico subsidiary, a major manufacturer of private label refrigerated dough products, last year introduced a line of Sun Maid brand products, including cookies, raisin cinnamon rolls and raisin English muffins.

Also new last year was the El Charrito Classic Cuisine line of gourmet Mexican frozen entrees, backed by $514,600 in ad spending.

A-B backed CT's Earth Grains bread line with $4.2 million in measured media support. Advertising carried the theme, "The promise of Earth Grains . . . Bread at its best."

Another $2.3 million was spent advertising CT's Rainbo, Colonial and Kilpatrick's lines of white breads. The campaign was themed "We've got the best right here."

In 1984, A-B moved the advertising assignment for Campbell Taggart's operations to D'Arcy MacManus Masius, St. Louis.

The company's Busch Entertainment Corp. subsidiary had mixed results in 1983. Attendance at Busch Gardens Tampa (The Dark Continent) fell 6%, to 2.9 million, hurt by the opening of Disney World's EPCOT Center in Orlando. The Adventure Island water park in Tampa, which opened a five-story water slide called "The Gulf Scream," had its best year ever, with attendance up 16%.

Busch Gardens Williamsburg (the Old Country) saw attendance rise 2%, to 1.95 million visitors. Attendance figures were not released for the two Sesame Place children's parks the company owns.

*U.S. results

Batus Inc., Louisville, Ky., the nation's 43rd largest advertiser, slashed its ad spending to $146.1 million in 1983, a sharp drop of 37.8% from the previous year.

The steep decline resulted from the company's decision to hack away at ad budgets for its cigaret brands as their market shares continued to slip. The cut also comes in the context of lesser marketing support for Barclay, the brand introduced in 1981 with an unprecedented $150 million in advertising and promotional support.

The reduced investment in advertising, however, didn't result in lower sales levels. Batus, the U.S. subsidiary of London-based BAT Industries p.l.c., recorded U.S. sales of $6.06 billion in 1983, up 10% from the previous year. Net income reached $259 million, representing an increase of 21%.

In 1983, Brown & Williamson Tobacco Corp., the company's cigaret-marketing subsidiary, racked up $2.13 billion in sales, or 35% of the corporate total. But at the same time, retail operations, bolstered by the addition of Marshall Field & Co. to the company's holdings, brought in $3.15 billion, or more than half the total.

By contrast, just two years earlier, tobacco sales exceeded those of retail by more than $300 million.

Yet B&W—the nation's third largest tobacco marketer, after Philip Morris USA and R.J. Reynolds Tobacco Co.—continues to be the Batus subsidiary that wins most of the marketing attention. And in 1983, once again, controversy swirled around Barclay.

At issue has been advertising contending that the brand has 1mg tar and is 99% tar free, claims disputed by the Federal Trade Commission and B&W's competitors.

The dispute came to a head in the fall as federal Judge Gerhard Gesell ordered B&W to drop the 1mg claim but refused to grant an FTC request that the 99% tar-free claim be prohibited.

B&W has appealed the decision, while the FTC stopped pursuing the 99% issue.

Though Barclay was at the eye of the storm, the ruling could have larger implications because the judge's decision, in effect, questioned the validity of the FTC standardized system of testing cigaret tar levels. A primary issue involved in the litigation was that Barclay's Actron filter "fooled" testing machines. Some contentions placed the cigaret's actual tar level as high as 5mg.

Amid the head-knocking, Barclay's market share began to lose steam. The brand, introduced with $150 million in advertising and promotion, reached a 1.3% share in 1982. But the latest figures from John Maxwell, managing partner of A.G. Becker Paribas, put the share at 0.7%.

Advertising for the brand—still featuring a sleek, urban look—has dipped considerably since the introductory year, though by most standards support remains heavy. In 1983, B&W spent $23.2 million in measured media advertising for Barclay, down from $52 million in 1982.

Barclay is not the only B&W product to be embroiled in a legal battle. Following in the path of Liggett & Myers Tobacco Co., B&W this year introduced generic cigarets, a market segment that has drawn considerable attention.

Almost immediately, L&M charged in a suit that the packaging for B&W's generic came too close to copying the "Gold Q" quality seal trademark L&M affixes on its pack. B&W's generics carry a black-and-gold "C" seal across the top of their packs.

Later, L&M amended the suit with allegations that B&W was practicing predatory pricing.

For its part, B&W has responded by saying the company intends to "vigorously defend our right to compete."

Whatever the outcome of the suit, industry observers believe that there is room for growth in generics. Although there are signs that the segment is stuck at a market share of about 4%, some projections believe the category eventually will exceed 10%.

Generics probably don't mean as much to B&W as they do to L&M, the smallest of the six major cigaret marketers in the country.

B&W's six brands have combined to give the company 10.8% of the market, a figure that has been declining for at least five years. No. 1 Philip Morris and No. 2 R.J. Reynolds each have shares in the 30 percentile range.

As with other marketers, B&W has sought to energize its shares by segmenting its marketing effort. Richland, a 25-per-pack cigaret B&W introduced in 1983, is a prime element of this segmentation strategy.

Among B&W's established brands, Kool is the only one among the top 10 domestic best sellers. The second ranking menthol brand, next to Reynolds' Salem, Kool has a 6.9% share, a figure that has been dropping steadily in recent years.

Much of Kool's marketing support rests on sponsorship of the Kool Jazz Festival, held in different cities across the U.S. B&W spent $2.7 million in measured media support for the festivals in 1983. Over-all measured media outlays for the brand reached $36 million, down from $55.1 million in 1982.

Raleigh and Viceroy shares dropped too, to 1.2% and 1.1% respectively. As with its other brands, B&W substantially cut measured media support for each of the brands in 1983, as together they received $19.4 million. In 1982, the total for the two brands was $29.3 million.

In its retail group division, Batus bathed in the glow provided by heavy consumer spending. With Marshall Field in tow, the division's operating income rose 31% from 1982, reaching $218 million in 1983 on sales of $3.1 billion, also up a hefty 27%.

The Marshall Field acquisition,

which came in 1982, has provided horsepower to the division's income capacity. Batus said that in 1983, Field's operating income rose 31% from 1982. In addition, furthering its expansion into the Texas market, Field's opened its second store in Houston in 1983.

Saks Fifth Avenue, a shining star among the retail units, joined the expansion kick characteristic of upper-end retailers. In 1983, the New York-based retailer opened four new stores, in Houston, New Orleans, San Diego and Stamford, Conn. Not all Batus retail holdings, however, have worked out. In 1983, the retail group sold Kohl's Food Stores, located primarily in Wisconsin and Illinois, to the Great Atlantic & Pacific Tea Co., leaving only department and fashion stores in the company's roster.

As with most retail operations, measured national media advertising is limited. Local advertising, which ADVERTISING AGE does not monitor in this issue, tends to grab the major ad dollars. The heaviest national support—$4.6 million—went to Gimbels, followed by Marshall Field, $3.2 million; Frederick & Nelson, $3.1 million, and Saks Fifth Avenue, $2.2 million.

Beatrice Cos.

	1983*	1982*
Sales	$13,442,885,000	$12,528,000,000
Earnings	550,000,000	151,000,000
U.S. Advertising	602,775,400	659,964,400

*1983 totals pulled from Beatrice fiscal year ending Feb. 29, 1984, and Esmark (includes 4 months of Norton Simon) fiscal year ending Oct. 27, 1983; 1982 totals are composites of full year results of Beatrice, Esmark and Norton Simon as independent companies.

With a host of new brands coming aboard under the recent acquisition of Esmark Inc., Beatrice is likely to become the nation's largest food and consumer products company and certainly one of its biggest advertising spenders.

Ad spending last year, on a pro forma basis for the combined companies, totaled an estimated $602.8 million, which made Beatrice the third largest advertiser in the country.

Beatrice alone spent $293 million on advertising, and Esmark—which only last year acquired Norton Simon Inc. —spent $309.8 million, which included about four months of Norton Simon advertising expenditures. New York-based Norton Simon spent $191.2 million on advertising in 1982 when it recorded almost $3 billion in sales.

Beatrice and Esmark ad expenditures are treated as one for the purpose of this issue even though the merger did not occur until August, 1984. Beatrice acquired control of Esmark in a $2.8 billion deal.

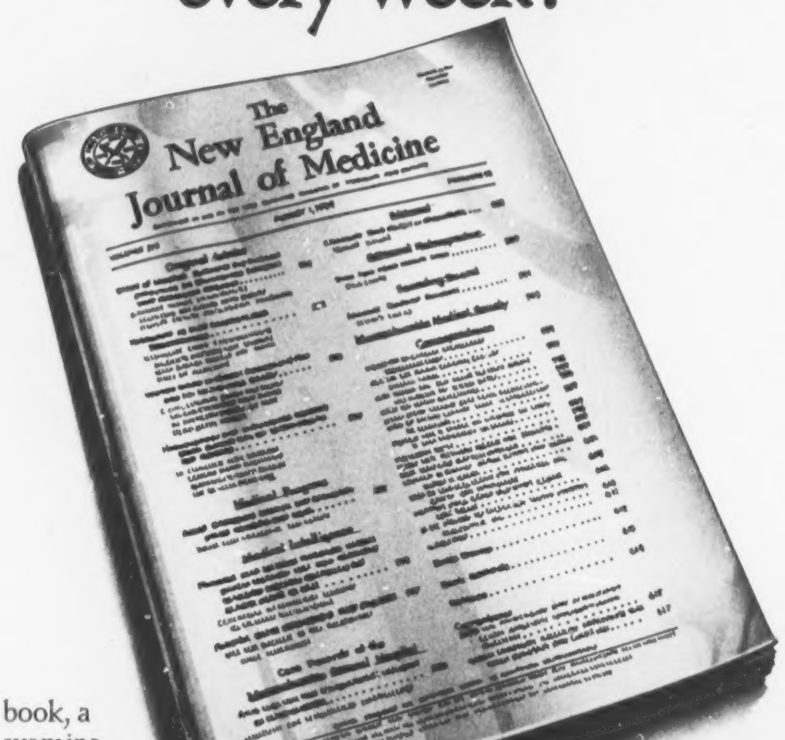
In 1982, ad expenditures for Beatrice, Esmark and Norton Simon were $271.1 million, $197.8 million and $191.8 million, respectively, totalling $660.7 million in combined ad spending. Beatrice 1983 ad expenditures account for only four months of Norton Simon spending in the three-company total of $602.8 million—leaving eight months of N-S ad spending unaccounted for and making a year-to-year comparison meaningless.

The combined companies are estimated to have sales in excess of $15 billion this year, although that likely will be reduced through expected divestitures.

Beatrice announced at the end of July that it would put up for sale five units—its chemical unit and Esmark's Estech unit, its bakery and cookie operations, Buckingham Corp. liquor business and its food-equipment operations. The units have combined annual sales of $1.3 billion.

The acquisition of Esmark came in the midst of a two-year effort by Beatrice to shed dozens of marginally performing units, centralize its operations and establish a clear-cut corporate identity. Known until a few months ago as Beatrice Foods Co., the company

What's 173 years old and gets a thorough examination every week?



In our book, a thorough examination doesn't mean a few seconds skimming the table of contents. Over 70% of all doctors spend a half hour each week with the New England Journal of Medicine.* Reading it more often and more thoroughly, according to Media-Chek, than any other clinical book.** They read everything. Our editorial. Our classifieds. Our ads. That's why an ad as small as a classified can generate over 2000 responses.*** Given this unique relationship between doctor and publication, it's not surprising to find that NEJM ranks #1 in high prescribers.

After nearly two centuries, NEJM still works harder than any other medical journal. Week after week, 52 issues a year. Can you afford to miss a single one?

The New England Journal of Medicine
Doctors read it.

The New England Journal of Medicine, 1440 Main Street, Waltham, MA 02254 (617) 893-3800

*Based on 1984 in-house universe study of U.S. physicians **Healthcare Communications, Inc., January 1984, Core Group Physicians
***Based on in-house study of box number replies only.

changed its name earlier this year to reflect its longstanding, broad diversification into other well-known products such as Samsonite luggage and Culligan water treatment systems, as well as Mr. Dutt's belief that the word "Foods" identified the multinational company in international eyes as a U.S.-based concern.

Beatrice launched a $29 million Winter and Summer Olympics ad campaign under a "You've known us all along" theme, its first major corporate identity effort aimed at spreading the strength of national Beatrice brands such as Tropicana orange juice to regional items such as Eckrich meats that the company wants to sell nationwide. The summer version of the ads were revised to include several Esmark brands.

The new identity will be reinforced by redesigned packaging to unify the look of major Beatrice brands such as La Choy. The new packaging will start appearing in December. It is not known yet whether the packaging of Esmark brands will be redesigned.

The merger presents a formidable challenge in the melding of the two huge operations, as well as an opportunity to capitalize on Esmark's national distribution and marketing strengths.

These tasks will be particularly challenging to executives like Anthony Luiso, new head of the U.S. Food segment and a veteran Beatrice manager who was previously in charge of the international food area. He will be working with many new staffers due to restructuring and the attendant losses from a merger. Beatrice, for example, lost a key Esmark executive in the merger: Frederick Rentschler, the highly regarded head of the combined Hunt-Wesson and Swift & Co. operation.

One of the key attractions for Beatrice was Esmark's Hunt-Wesson Foods operation, which was formerly under the aegis of Norton Simon. The California-based unit has a strong West Coast distribution system that will help regional Beatrice brands go national.

With nearly $1.7 billion in revenues, Swift/Hunt-Wesson will be a major addition to Beatrice's domestic food sales, which totaled about $2.3 billion last year.

Swift's Brown 'n Serve sausage products maintained their market leadership in the precooked sausage area with record sales last year, the company said, while Peter Pan peanut butter maintained its third-place market share of about 14% under increased competition and heavier ad spending by existing brands, such as Procter & Gamble's Jif.

Hunt-Wesson introduced a thicker catsup to compete more aggressively against market leader H.J. Heinz Co., and an All Natural barbecue sauce was introduced nationally and achieved the second highest share of that market, after Kraft, according to the company.

Intensified marketing and line extensions also are planned to maintain Hunt-Wesson's No. 1 position in tomato sauce, tomato paste, popcorn, packaged pudding and sloppy Joe sauce.

Beatrice's La Choy maintained its lead over archrival Chun King in the oriental food category, according to Beatrice, with an increase in volume backed by more than $3 million in measured ad spending—making it one of Beatrice's most heavily advertised brands.

But the most ad dollars were put behind Tropicana juice products, which faced strong new competition in the $1.2 billion ready-to-serve orange juice market last year from Procter & Gamble's Citrus Hill. Beatrice spent nearly $9 million in measured advertising to maintain Tropicana's No. 1 position—an estimated 28% market share in the ready-to-serve category—against a reputed $100 million campaign to roll out Citrus Hill, which achieved an estimated 9% market share behind Coca-Cola's Minute Maid at 18%.

Beatrice reportedly plans a 35% increase in Tropicana ad spending to more than $15 million this year, with a "Squeeze me a glass of Tropicana" campaign designed by the new agency on the account, Benton & Bowles, New York.

Sales and earnings for Samsonite luggage were flat compared with the previous year despite about $4 million in measured ad spending, Beatrice's second largest measured outlay for a single brand. The company blamed the strong dollar for reducing overseas results and changes in consumer demand.

In other consumer products, Esmark's International Playtex unit achieved record sales and earnings, while Danskin suffered lower profits due to increased competition and changing consumer tastes, which it plans to counteract by developing new products, the company said.

Last year also saw a major realignment of Beatrice's advertising agency roster, with about $120 million in billings at about 100 shops reduced to eight advertising agencies, although that number was expected to increase with the acquisition of Esmark.

A Beatrice marketing source said there seemed to be no account conflict problems, so no realignment of the Esmark ad agencies apparently was expected.

The big loser was Cunningham & Walsh, which wound up with no business after previously handling two major brands—La Choy and Aunt Nellie's canned vegetables.

Leo Burnett USA, which advised Beatrice on the agency selection process, came out with the most new business, about $14 million in billings, including Eckrich Meats, Fisher Nut and Samsonite.

J. Walter Thompson USA's New York office lost the Samsonite account, but its Chicago office gained ethnic foods and Aunt Nellie's vegetables.

U.S. Advertising	134,126,800	120,700,000

***Worldwide**

Beecham Group p.l.c., a British chemical and consumer company, spent an estimated $134.1 million in U.S. advertising in 1983, an 11% increase, to become the 50th largest national advertiser.

Beecham in the U.S. is comprised of three divisions: Beecham Products, Pittsburgh; Beecham Cosmetics, Chicago, and Beecham Laboratories, Bristol, Tenn.

Of the total advertising budget in 1983, Beecham spent $90.5 million in measured media, paced by $78.8 million in network tv, $7.2 million in spot tv and $3.4 million in magazines. This compares with measured media spending of $80.5 million in 1982, some $66.7 million in network tv, $5.2 million in spot tv and $7.8 million in magazines.

Products from J.B. Williams Co. are now among the leading Beecham advertised products. Williams, purchased from Nabisco Brands in 1982, drew maintenance level ad support in 1983 for Geritol products, $7.9 million (up 6.8% from 1982), Aqua Velva aftershave lotion, $3.5 million (up 6%), and Sominex products, $3 million (down 6%), and Vivarin stimulant tablets, $1.2 million (up 18%). Williams Lectric Shave got a boost in media spending from $803,400 in 1982 to $1.8 million in 1983.

Beecham's leading advertised product, Aqua-fresh toothpaste/gel, received $24.5 million in ad spending, down 10.3%.

IOA
INSTITUTE OF OUTDOOR ADVERTISING

Beecham put the greatest year-to-year ad increase into Calgon multiproduct advertising and water softeners, raising measured spending on the products from $4.5 million in 1982 to $12.6 million. Calgon introduced a new moisturizing bath foam near the end of 1983, and continued promoting the water softener and dry bath products marketed under the Calgon trademark. Along with the increased spending, Beecham pulled the Calgon business from advertising agency Cunningham & Walsh, New York, and placed it with Avrett, Free & Ginsberg, which has been handling Brylcreem and Lectric Shave among Beecham products. C&W retained several other products, including big spenders, Sominex and Cling Free, the latter receiving measured media support of $5.4 million, up 14.9%.

In another agency switch, Beecham's Jovan cosmetics and perfumes agency, Zwiren & Wagner, Chicago, got the Yardley of London business from Bozell & Jacobs, Minneapolis, in the first quarter of 1984.

Massengill disposable douche and N'Ice Sugarless cough lozenges drew $7.2 million (up 31%) and $6.4 million (up 2%), respectively, in measured media spending.

In February, Beecham Cosmetics introduced Jovan Whisper of Musk with a $4 million tv, radio and print advertising campaign and is supporting the fragrance with a 31 million-piece sampling program through magazines and stores.

The campaign gave a shot in the arm to spending for the Jovan branded line, which in 1983 was down to $1.4 million (down 37% from 1982) for all products. Beecham's other scents, new products Gambler, a men's cologne, and Lady, a women's perfume, drew $1.7 million and $1.3 million, respectively.

An infusion of ad dollars boosted media spending for Sucrets lozenges 38% to $5.8 million.

The Beecham laboratories division experienced favorable growth with its prescription drug, amoxil, which became the second most widely prescribed new prescription drug in 1983, according to *American Druggist* magazine.

The division hoped to begin marketing Agmentin, an oral antibiotic, this August.

In legal action, a $92.9 million suit filed last year by Oleg Cassini Inc. against the company and its principals is still pending. Cassini alleges that Jovan and defendants failed to promote and develop Cassini products in the fragrance field.

*Worldwide

Bristol-Myers Co., New York, the nation's 26th leading advertiser, is estimated to have spent $235 million on advertising in 1983, a 15% increase over 1982.

The company registered sales of $3.9 billion in 1983, a 9% jump over the previous year. Net earnings totaled $408 million this past year, a 17% climb over 1982.

The company reported its worldwide expenditures on advertising and product promotion grew 15%, to $651 million this past year. Advertising and product promotion expenses increased as a percentage of sales worldwide to 16.6%, up from 15.8% in 1982.

Bristol-Myers is divided into four segments: Pharmaceutical and medical products, nonprescription health products, toiletries and beauty aids, and household products. Continuing the momentum set in recent years, the medical product segments outpaced the toiletries and household product segments.

On the strength of an 11% sales increase, the pharmaceutical and medical product segment generated an income of $1.5 billion last year, accounting for 38% of the corporation's sales and 43% of its operating profit. Its growth came on increased sales of anticancer drugs (up 14%) and orthopedic and surgical products (up 20%). Also, sales of the antidepressant Dyserel, a drug introduced in 1982, doubled in 1983.

The nonprescription health products segment generated a volume of $1.4 billion on a 13% sales increase. Profits were $227.2 million, a 31% expansion over the previous year. Nutritional products accounted for 47% of the volume in this product segment, or $65 million, up 10% over the previous year. The company's analgesic products registered a 1% sales increase over 1982, and its cough and cold remedies were up 10%.

Toiletries and beauty aids, which had suffered a slight decline in volume last year, posted an increase of 2.4%, to $986.4 million. That figure was aided by a turnaround in sales of antiperspirants, a weak area in 1982. Also helping was the company's emphasis on advertising and promotion efforts supporting the introduction of Clairol Color Renewal System, aimed at first-time hair-color users.

The household products segment brought in a $387 million volume this year, scoring sales and operating profit gains of 6%.

For the upcoming year, Bristol-Myers has been revving up for what some observers predict to be one of the most hotly contested marketing battles—the competition for market share in the new ibuprofen analgesics category.

Ibuprofen, a pain reliever approved for over-the-counter sale by the Food & Drug Administration a few months ago, is expected to account for a large chunk—perhaps up to $300 million to $400 million—of the $1.3 billion a year analgesics business.

Bristol-Myers, which markets Bufferin, Excedrin and Datril, is entering the ibuprofen battle with a brand called Nyprin, which will go head to head with American Home Product's Advil.

With the stakes so high, both companies are expected to spend generously for advertising support of their new product. Some observers believe media expenditures could go as high as $60 million. As part of its support, Bristol-Myers took an educational approach. It ran page ads in key newspapers across the nation with informative text about the drug. Consumers who wanted more information were urged to send in a coupon good for a free booklet about ibuprofen.

Nobody knows what impact the new analgesic will have on Bristol-Myers' Bufferin, Excedrin or Datril. The three, which hold a market share of 20%, all recorded sales gains last year. The company continues to build on the extensive support for Datril begun two years ago with the poisonings that hurt competitor Tylenol from Johnson & Johnson. It pumped up the marketing budget for Datril for the second year in a row. In 1983, the brand got almost $13 million in measured media, most of it in network tv.

Bufferin and Excedrin received a combined total of about $28 million in measured media, up slightly from last year's $26.5 million. Of that figure, Bufferin got $15.5 million and Excedrin got $12.3 million of the advertising support.

In its deodorant line, Ban got about $9.9 million in measured media last year, up from the previous year's expenditure of $7.3 million. The line holds about a 7% market share.

Measured spending for Comtrex cold remedies was about $10.3 million in 1983, down significantly from the $17 million budget of 1982.

In Clairol hair colorings and conditioners, where Bristol-Myers is a dominant force in the market, the company continued its heavy advertising support.

Major recipients of measured media budgets included Clairol Color Renewal System (about $8.5 million), Clairol Loving Care Color—Lotion and Color Foam ($7.5 million), Final Net Invisible Hair Net ($5.5 million), Clairol Kindness home permanent ($3 million), Clairol Light Effects hair color ($2.7 million), the Carecurler and Carebrush ($1.3 million) and the Clairol Hairsetter ($1.1 million).

In Bristol-Myers' Drackett household product division, $4.5 million was spent to introduce the new Renuzit Fresh N Dry air and fabric deodorizer.

Other major expenditures went to Vanish crystal bowl cleaner ($6.7 million) and Windex glass cleaner ($5.1 million).

Early this year, Wayne A. Davison, formerly president of the Mead Johnson division, was named president of the newly formed U.S. pharmaceutical and nutritional division. Randall J. Wall was promoted to president of the Pelton & Crane division from the executive vp position.

Steven B. Ratoff, controller, was selected corporate vp. John W. Melton, senior vp, was named head of planning and development, reporting to Richard L. Gelb, chairman. Mr. Melton was president of the Clairol division and replaces Charles A. Heimbold Jr., who will become president of the healthcare group. Robert M. Phillips was promoted to president of Clairol.

Brown-Forman Distillers Corp.

	1983	1982
Sales*........	$1,146,343,000	$885,089,000
Earnings*.....	73,554,000	95,176,000
U.S. Advertising	70,500,000	74,000,000

*Worldwide, fiscal years 1984 and 1983 ended April 30.

Brown-Forman Distillers Corp., under increasing pressure to maximize profits after several years of lackluster sales performance, decreased its advertising spending 4.7% to $70.5 million for calendar 1983, ranking the Louisville, Ky.-based company 84th largest among national advertisers.

In fiscal 1984 ended April 30, sales increased 29.5% to $1.15 billion while earnings declined 23% to $73.6 million.

Total measured advertising in calendar 1983 for Brown-Forman in newspapers, magazines, network and spot tv, spot radio and outdoor was $39.8 million, down 5.2% from $42 million in 1982. Of the measured total, some $12 million was devoted to three of the company's four leading brands—Canadian Mist, Early Times and Southern Comfort—all of which are currently without an advertising agency following the departure earlier this year of McCann-Erickson, New York.

The company's decrease in ad spending is in keeping with an across-the-board cut of 11% in advertising by leading liquor brand marketers, according to *Impact*, an industry newsletter that monitors the movement of alcoholic beverages. The cut in ad spending is tracking an estimated over-all 1.6% volume decline in distilled spirits in 1983, with gains coming only from liqueurs/cordials, U.S.-bottled Canadian, rum and some specialty items, according to John C. Maxwell, analyst with A.G. Becker/Paribas, New York.

At Brown-Forman, wine and spirits accounted for 8% of the year's decline in profit. The balance of the decline in earnings was attributed to financing costs of the company's July, 1983, acquisition of Lenox Inc.—a fine china, crystal, jewelry and luggage maker.

The $413 million investment in Lenox was Brown-Forman's first outside of the wine and spirits industry. In 1983, Lenox products were supported with $5 million in six-media total measured advertising.

Among Brown-Forman's leading liquor brands, Jack Daniel's Black Label slipped two notches in 1983, ranking No. 6 among largest-selling liquor brands in the U.S., according Mr. Maxwell. To achieve its ranking, Jack Daniel's sold 3.7 million nine-liter cases, down 4.3% from the previous year's total.

Brown-Forman figures, however, show Jack Daniel's—the company's largest selling brand—growing by 1% in worldwide sales, thus reflecting generally listless over-all industry behavior. Jack Daniel's attracted 1983 measured ad expenditures of $5 million—down 2% from 1982—with 81% of that in magazines.

B-F's Canadian whisky entry, Canadian Mist, was first in its category—surpassing Seagram's V.O. for the first time. Over-all, Canadian Mist moved up to rank No. 5 from last year's No. 8, with nine-liter case sales of 3.9 million, according to *Impact*.

Ad spending in 1983 for the whisky was $7.3 million, down 20% from 1982, compared with $7.8 million in ad spending for Seagram's V.O., also down 35% from the previous year. Canadian Mist is also 326,000 case sales ahead of Seagram's V.O.

Usher's Scotch grew 2% to 545,000 cases and increased market share, according to the company.

These positive results in fiscal 1984 were offset by declines in Early Times, down 4% in depletions, Southern Comfort, down 6.6%, and a slight slippage by Old Forester.

Cella wine brands, the largest of B-F's wine and specialty brands—it includes Lambrusco, Bianco, Rosato and Asti Spumante—were No. 2 in the 1983 annual ranking of the top 20 imported wines, according to *Impact*. Cella wine ranked far behind House of Banfi's Riunite, which had 1983 case sales of 11.07 million, up slightly from the previous year's total.

Bolla Italian wines, ranked No. 5 with 1983 case sales of 1.72 million (up 4% from 1982), received $4.9 million in measured spending in 1983, down 22% from the previous year. Cella wine saw its case total decline 5% to 2.68 million in 1983, compared with

SOAP OPERA digest
Party Pictures from All Over
LATE BREAKING NEWS

Soap operas are now attracting over 26 million viewers because they have become glossier, more glamorous and more emotionally involving than ever before.

So has Soap Opera Digest. We have a new glossy format with stronger cover graphics and more full-color features. All of which is not only improving our image but our already impressive readership as well.

Right now, our demographics rival TV Guide's. But more importantly, our readers rank second among all magazines in supermarket spending. Placing them at or near the top in concentration of heavy users of foods, household products, health and beauty aids, and baby care products.

Smart advertisers like L'eggs, Johnson & Johnson and General Foods understand that the relationship between Soap Opera Digest and its readers isn't just an affair of the heart. It's a profitable economic affair too.

2.81 million cases in 1982.

Korbel California champagne—the company's fastest growing major brand—effervesced to a 17% increase for fiscal 1984 with depletions of 745,000 cases. It retained its position as the best selling premium California champagne in the U.S. and was supported with measured media spending of $1.1 million, up 38% from 1982.

Brown-Forman made ad headlines this year when it became the loser in an agency/client triangle. After 13 years, McCann-Erickson resigned the Brown-Forman spirits account so that it could pick up Heublein's Smirnoff business, which moved out of another Interpublic shop, Marschalk Co.

Although McCann reportedly assured Heublein that it would break with B-F if awarded Smirnoff, B-F execs were not informed until late June when Willard Mackey, McCann's chairman-ceo, flew to Louisville with the news. At that time, Daniel Schusterman, president of B-F Spirits, said the company would review its marketing strategy internally before beginning an agency search.

U.S. Advertising	126,000,000	103,800,000

*Worldwide

Campbell Soup Co., Camden, N.J., the 52nd largest national advertiser, increased its advertising spending to $126 million in 1983, up 21.4% from the previous year.

Led by president-ceo R. Gordon McGovern, Campbell is pursuing in the 1980s a strategy emphasizing acquisitions and product introductions as the way to boost the annual earnings growth rate to the 12% to 15% range, up from the 7% rate that the company experienced in the 1970s.

Just as corporate-wide earnings met growth rates in 1983, up 18.5% from 1982, they are on track in fiscal 1984, rising 16.6% to $149.6 million for the first nine-month period compared with the corresponding period a year earlier. Sales during the nine months in fiscal 1984 were $2.82 million, up 11.6%.

The largest of the company's 15 divisions, Campbell U.S., markets more than 500 products. The division is divided into nine profit centers: Soups, beverages, pet foods, frozen foods, refrigerated foods, poultry, grocery, foodservice and fresh produce. Its Pepperidge Farm and Vlasic Foods subsidiaries operate as separate units.

Consolidated U.S. totals in 1983 were $2.76 billion, compared with $2.37 billion in 1982. Figures included $1.99 billion for Campbell U.S. division, up 12.4%; $433 million for Pepperidge Farm, up 10.5%; $168 million for Vlasic Foods, up 12.8%; $64 million from "other," up 14.3%, and $108 million for Mrs. Paul's Kitchen's (not part of Campbell in 1982).

Campbell commands an estimated 65% to 70% share of the $1.6 billion total prepared soup market in the U.S., and its soup sales accounted for 28% of the company's total 1983 sales. According to the company, its soups received $25.5 million in measured media spending last year.

The Swanson Le Menu line of frozen dinners completed national distribution in September, 1983. Its success has led the way in the overhauling of the original Swanson tv dinner line.

Backed with $7.2 million in measured media spending (the major expenditures being $4.7 million in network tv and $1.1 million in spot tv), the Le Menu line is one of Campbell's big recent success stories in the growing frozen dinner and entree market.

Four new dinner varieties are being added to the original eight in a phased national rollout. Recently, Le Menu entrees also have been added in selected test markets.

Helped in large measure by the success of Le Menu, Swanson's basic frozen dinner business reversed a six-year sales decline in 1983. Swanson also has been active with a product quality improvement program, a packaging face lift, and increased ad spending. Swanson's traditional frozen dinners have captured a 55% share of the market.

Measured media spending for the Swanson lineup, apart from Le Menu, totaled more than $10 million last year, with $6.3 million going to Swanson frozen dinners, $2.3 million to Swanson canned chicken and $1.7 million to Swanson frozen chicken.

Swanson also has repositioned its breakfast entree line under the brand name Great Starts. New packaging features a bright orange sunburst logo on a yellow background. The six-item line, which includes such varieties as pancakes with sausage, scrambled eggs with sausages and hashed brown potatoes and french toast with sausages, is now one of Swanson's fastest growing products.

Prego Plus spaghetti sauce, which is garnished with large chunks of meat and slices of vegetables, began rolling out nationally in the spring of 1984. The new line features three varieties: Italian sausage and green pepper chunks; veal and sliced mushrooms, and mushrooms and chunk tomatoes.

Introduced by Campbell less than three years ago, Prego spaghetti sauces now hold an estimated 27% share of the national market. Measured spending for the line totaled $9.7 million last year.

Newly added to the national line in 1983 is No Salt Added Prego spaghetti sauce.

The company is testing Comin' Home dry soups in several markets. A successful test could result in a national Campbell entry into dry soups. Prego also had been test marketing several light broth soups, but that test has been discontinued. Campbell also is experimenting with refrigerated salads, fruit-based yogurts, branded endives and soups in glass containers.

In honor of the Campbell Kids 80th birthday in 1984, the Kids were back in 1984 in tv spot and other promotions that tied in with the 1984 Olympics. They had been retired from tv for the previous five years.

Campbell's Pepperidge Farm subsidiary introduced a number of products last year, including Vegetables in Pastry, croissants, Distinctive croutons, Special Collection cookies and Deep Dish danish. It also completed national distribution of Fruit cookies.

Vegetables in Pastry drew the most supported and was backed with $4.8 million in measured spending.

Along with its new entries, Pepperidge has had some failures, including Star War cookies and Pepperidge Farm apple juice. The apple juice operation since has been consolidated under the Campbell beverage unit.

The test marketing of a Pepperidge line of premium frozen poultry products, meanwhile, has been discontinued, as has the testing of Pepperidge Farm Bake-at-Home bread.

Campbell continues to be extremely acquisition-minded, and its goal is to digest about $200 million in acquisitions every other year. During 1983, it acquired Juice Bowl Products, a producer of citrus fruits; Costa Apple Products, a producer of apple juices, and Triangle Mfg. Corp., a maker of physical fitness and sports medicine products.

The company also expanded its Campbell Hospitality operations by acquiring the Tuesday's restaurant chain (since renamed Annabelle's) in the Southwest. The Hospitality unit also includes the upscale H.T. McDoogal's in the Northeast and the 50 Pietro's family restaurants in the West.

In May, 1984, Campbell acquired Mendelson-Zeller Inc., a San Francisco-based international broker and distributor of fresh fruits and vegetables.

Campbell's expects that its beverage business will be its major growth area in fiscal 1984-85. Toward that end, it has divided the business into two segments: Natural fruit juices and tomato-based juices.

The fruit juice group includes Juice Bowl, plus the Pepperidge Farm juice line. One of the first items on the marketing agenda will be the national launching of JuiceWorks, a line of blended natural juices aimed at the children's market.

The tomato-based juice group, meanwhile, will continue to concentrate on the traditional beverage business, V-8 and Campbell's tomato juices. V-8 is the unit's flagship brand with a 50% share of the $310 million red juice market.

Marketing support for the beverages business is being doubled. Primarily, the new support will go to JuiceWorks' national launching and to a "significantly heightened" ad campaign for V-8.

The Vlasic Foods subsidiary is Campbell's third largest division. It is the market leader in pickles, with a 28% share of the market. Vlasic hiked its marketing spending 20% over 1983 and increased its ad spending 53%.

New products test marketed during the year included Bread & Butter Chunks, Half the Salt pickles, and new varieties of Win Schuler cheese products and La Especial Picante sauce.

Mrs. Paul's Kitchens Inc. subsidiary strengthened its position as the leading U.S. marketer of frozen seafood. It owns a 26% share of the frozen prepared seafood market.

In the past year, Mrs. Paul's introduced nationally Light and Natural fish fillets and placed into test a seven-item entree line under the same Light and Natural banner.

It contemplates more regional offerings of seafood products as well as a stronger presence in the frozen specialty vegetable category, which currently accounts for 12% of the volume.

Mrs. Paul's also has the retail marketing responsibility for another Campbell subsidiary, Snow King Frozen Foods, a regional producer of sandwich steaks acquired in 1982. The Mrs. Paul's line was backed by $7 million in measured media spending last year.

The company's Fresh Produce division expanded its distribution of Campbell's farm fresh mushrooms into the Southeast with the opening of a mushroom-producing facility at Dublin, Ga.

U.S. Advertising	58,032,900	47,045,800

*In North America

Canon U.S.A., Lake Success, N.Y., a division of the Tokyo-based company, ranked 95th among the nation's advertisers with total estimated ad expenditures of $58 million in 1983, up 24% from 1982.

The company, taking aim at an ever larger share of the U.S. photography market and branching into new lines of business, boosted North American sales 16%, to $966 million in 1983. Worldwide sales of $2.8 billion represented a 13% increase from 1982. Within the worldwide total, the 20% increase in sales for copiers and 44% for other business machines underline their growing importance to the company.

Sales of photo products decreased 2% in 1983. But the company continues on its drive to dominate both the amateur and professional camera market. Taking all its cameras into account, the company claims to hold a 50% share of the lens shutter market. Canon has concentrated its efforts in the compact camera area, a faster growing segment than that of single lens reflex (SLR) cameras.

Sales of compact cameras grew 15% last year. Much of that growth was attributable to the introduction in 1982 of the Snappy instamatic camera. Last year, the Snappy sold 850,000 units worldwide, nipping on the heels of Kodak's popular disk camera. This year, as an Olympic tie-in, the company introduced a Canon Snappy '84, in red, white and blue colors with symbols of the 1984 Olympic Games. Canon is expected to spend $40 million in advertising the Snappy from its launch last year through 1985.

To further attract proponents of the point-and-shoot market, which the company has pinpointed as women, teen agers and beginners, Canon this spring introduced the Canon MC. Terming it the "smallest 35mm around," the MC boasts automatic everything, including focus, film rewind and flash, which can be removed. The MC, which is smaller than the popular Sure Shot, can be carried in consumers' shirt pockets. The suggested price of the MC is $295.

In a move to bridge the gap between the healthy compact market and drooping SLR sales, Canon introduced the first in a line of "T" series cameras early in 1983. The T50 has programed shooting and an automatic winder. It can be purchased with a lightweight 35-70mm zoom lens as standard equipment.

The Canon T70 was introduced at the same time as the MC this spring. A miniature screen on the top of the camera is able to process 250 pieces of information. The camera has six automatic exposure modes and a safety shift to prevent over or underexposure, plus automatic loading, film advance and power rewind. Suggested list for the T70 is $470.

Sources estimate that Canon will spend up to $20 million advertising the introductions of both the T70 and the MC. Print ads for the MC stress its convenience, while the T70 is heralded as the most advanced Canon automatic SLR.

As the official 35mm camera of the 1984 Olympic Games, Canon was expected to spend $15 million in advertising during the games. That blitz is expected to help boost sales in the U.S. by almost 15%, to more than $1 billion. The company's tv shots used the tag line "Canon captures the glory again." Last year, $15.2 million was spent on advertising for cameras, down 15% from 1982.

Capitalizing on consumer acceptance of its cameras, Canon is branching into the video product market. Sales of video cameras and recorders were healthy in 1983, as the company introduced its second-generation of equipment. In 1983, Canon spent $1.9 million to advertise its ACC-Vision portable videocassette recorder, up from $438,000 in 1982.

In 1983, Canon formed Business Machines Operations to handle copiers, electronic typewriters and other growing office and home equipment. Business machines accounted for 59% of total corporate revenues, making them Canon's largest product group.

The company now has a full line of copier products, from the PC (personal cartridge) copiers, which were introduced in 1982, to the world's fastest plain paper copier. The company introduced the NP-270, which copies in three colors, has automatic exposure control and reduction and enlargement. Canon expects interest in such features as color copying, zoom reduction and enlargement and high speed to keep the maturing copier market from becoming stagnant. Advertising for copiers jumped 61% in 1983, to $24.6 million. Canon advertised its copiers during the Olympics using Jack Klugman as presenter and the tag line: "I love picking a winner."

Electronic typewriters became Canon's second-largest business machine category in 1983. The company moved beyond office models into the home market with its Typestar series. The Typestar 5 operates on heat-transference, can print character by character or line by line, fits into a briefcase and can be operated by batteries. The model retails for about $250. Canon spent $1.5 million to advertise this growing segment, up from $604,000 in 1982.

In the development stage are Canon microcomputers, laser beam printers and printers. The company spent $123 million on research and development in 1983, a 21% rise fcm 1982.

U.S. Advertising	54,284,600	43,753,400

*Worldwide

Carnation Co., Los Angeles, the 99th largest national advertiser, increased its ad spending in 1983 by 24.1%, to an estimated $54.3 million.

The increase returns the $3.4 billion food products giant to the top 100 list for the first time since 1981.

Over-all, Carnation had positive results in 1983, with sales and earnings gains for its instant and tomato products. Pet foods performed well, but earnings declined, primarily because of heavy marketing expenditures for new products.

Pet foods are among Carnation's leading advertised products. In 1983, Carnation spent 83% of its corporate media buy on pet food advertising. Of the $30.4 million spent on pet foods, Leading National Advertisers shows Come 'N Get It dry dog food got $3.1 million, Come 'N Get It puppy formula, $1.9 million; Fancy Feast canned cat food, $3.9 million; Chefs Blend dry cat food, $2 million; Friskies canned and dry cat food products, $7.3 million, and Mighty Dog canned dog food, $3.9 million.

Particularly costly was its introduction of New Breed, a soft-dry dog food that failed in the marketplace, despite a hefty initial commitment (in the early phases, the company promised the trade New Breed would receive $35 million in annual advertising and

LNA

Reach For The Top.

Of all the Spanish-language mass media in Miami, Diario Las Américas is tops in reaching the most affluent audience.

The average annual family income of Diario readers is a whopping $27,342. So when it comes to reaching the people who buy what you're selling, Diario readers have what it takes.

More than 93% of Diario readers have cars. 72% own their own homes. 62% consume alcoholic beverages. 45% are smokers.

Collectively, Diario readers spend over *$1.7-billion a year.*

So, if you want to reach the top of the affluent Miami Hispanic Market, buy Diario Las Américas. It stands alone. At the top.

Diario Las Américas

The Spanish-language Daily Newspaper
Founded July 4, 1953

Diario Las Américas

promotional support). The sum, heavy by industry standards, was particularly heavy for Carnation, which is noted for a cautious and conservative style. The media buy for New Breed was $7.6 million, according to LNA.

While Carnation is noted for its love of the status quo—a tone set by its 77-year-old accountant chairman H.E. Orvices—lately it has taken steps that may indicate the company is moving in a more progressive direction.

In the fall of 1983, Carnation opened the first of its Carnation Health & Nutrition Centers, retail outlets offering personalized weight loss services extending to nutritional and weight loss counseling, plus a separate retail outlet selling health foods, vitamins and low-calorie foods. It was the company's first new food division in 15 years. Carnation's aim is to capitalize on the public's growing concern with health and nutrition; industry analysts estimate that retail sales of dietetic, low-calorie foods in supermarkets will grow about 15% annually during the decade.

Initially, Carnation's plans for the centers were extremely ambitious. The division's general manager, Kenneth Chane, a retailing industry veteran, predicted it would open between 75 and 100 locations within the next year. Other sources said Carnation was considering opening as many as 300 outlets coast to coast in the next few years.

But so far, the centers haven't lived up to expectations. As of August, 1984, the chain has only 54 locations in four western states. And the company is de-emphasizing the retail aspects of the operation, instead choosing to concentrate its efforts on the weight-loss business. While the centers may not be living up to expectations, Carnation is continuing to test new products related to the health and fitness boom—with varying results.

In 1982, it put a four-item line of refrigerated, bottled yogurt-based salad dressings in test market. The line later was pulled, apparently failing to reach respectable sales results.

In October, 1983, Carnation was among the major competitors in the $180 million hot cocoa mix category to come out with a low-calorie hot cocoa mix sweetened with the sugar substitute aspartame. Carnation is the market leader in the category. It spent less than $1 million in measured media on its hot cocoa mixes.

Carnation's instant products division came out with a new Do-It-Yourself Diet Plan, a diet meal it describes as an "easy and sensible way to lose weight fast" in supporting tv, radio, newspaper and magazine ads. The product's target: 70% of all dieters who want to lose 10 to 20 lbs. Carnation estimates there are 28 million of the 40 million dieting public in the U.S. that will fit the bill.

Earlier in 1984, the company introduced a four-item Carnation Fruit & Nut Mix line on the West Coast with multi-media ad support.

In the pet foods business, in which Carnation competes in all the major segments, the company enjoys the strongest position in dry cat food and gourmet canned products. Over all, in 1982 its market share increased to 10.9% from the previous year's levels of 10.1%. It held the second position nationally, behind market leader Ralston Purina. Other major competitors behind Carnation (in order of market position) are: General Foods, Quaker Oats and the Liggett Group.

In November, 1983, Carnation international division president Timm Crull became president of Carnation Co., succeeding Dwight Stuart, a member of Carnation's founding family. Mr. Crull joined Carnation's sales department in 1955, rising to senior vp before leaving in 1977 to join Norton Simon Inc. as president. Mr. Crull rejoined Carnation in 1980 as exec vp and director. A year later, he became president of the company's international division.

Carnation watchers believe the outgoing and marketing-wise Mr. Crull may influence the company's character for the better. Analysts speculate that he may speed Carnation's growth by acquisition and will help move the company into growth-inclined product areas.

Mr. Crull's influence is said to have figured into the company's decision in the first quarter of 1984 to shift between 20% and 25% of its estimated $50 million to $60 millon ad budget to Foote, Cone & Belding—the company's first major commitment to a second agency in almost 70 years.

The switch marked the first time Carnation products have gone outside the Interpublic Group of Cos., and fueled speculation that principal agency SSC&B may be losing its hold on the Carnation business. FCB received products from three separate Carnation divisions: Bon Bons, an ice cream specialty product from its dairy division (now being tested in retail markets); the Do-It-Yourself Diet Plan, and Fancy Feast, its premium canned cat food from its pet foods division.

Rumors that Carnation may be taken over by a major company (Nestle is one rumored buyer) or taken private by a leveraged buyout continue to circulate—a fact that has sent Carnation's stock to near its all-time high.

*Worldwide

CBS Inc., New York, the country's 39th largest advertiser, raised its advertising expenditures 5.5% in 1983, to an estimated $167.7 million.

Measured media spending figures reported by CBS rose in eight categories: Magazines, 13.9%; business publications, 30.1%; spot tv, 17.1%; network tv, 4.9%; point of purchase, 0.9%; direct mail, 18.3%; outdoor/transit, 28.2%, and broadcast and print production, 20%.

Advertising declined substantially in newspapers—down 20.9%—as well as spot radio, which dropped 3.8%, and network radio, down 4.2%.

Among leading advertised products and service, CBS spent $15.2 million in measured media advertising on CBS Television Network, up 1%; $22.5 million on Columbia Record and Tape Club, up 9.2%, and $9.4 million on Ideal toy products, down 7.9%, according to Leading National Advertisers, which monitors six advertising media.

In 1983, CBS world revenues rose 10%, to $4.54 billion, and net income rose 69%, to $187.2 million, reflecting an outstanding year in both the broadcast group and records group. Domestic revenues increased 13%, to $3.9 billion, on earnings of $340.8 million, up 39%.

In the first quarter of 1984, the strong gains continued. Earnings increased 119%, to $38.9 million, partly because of a poor 1983 first quarter and partly because of record profits in the broadcast and record groups. The company notes that an extensive companywide cost management system also was instrumental in its strong first-quarter showing. Revenues in the first three months of 1984 increased for every group except publishing.

In 1983, the broadcast group's revenues increased 10.2%, to $2.4 billion. Operating profits increased 7%, to $291.5 million. The profit gains in the group were seen to be a result of continuing dominant positions in tv and radio and careful attention to costs. Helping all this was a strong market for network advertising.

The CBS Television Network maintained its prime-time leadership for the fourth straight year and showed significant increases in its audience levels for daytime and news programing. However, the broadcast group decided to pull back from its announced direct broadcast satellite joint venture with Communications Satellite Corp., a pullback from its attempts to pursue new technological directions.

In sports programing, the division extended its long-term agreement with the National Collegiate Athletic Assn. through 1987 to broadcast the NCAA basketball championship tournament and renewed its agreement to broadcast segments of the Professional Golfers' Assn. tour. CBS attracted its second highest audience ever for its National Football League broadcast season, culminating with the broadcast of the Super Bowl in January, 1984.

"The CBS Evening News with Dan Rather" led its competition for all 52 weeks in 1983 and continued as the top-rated early news program. "The CBS Morning News" continued to trail both ABC and NBC. However, it registered a 21% ratings gain, while the other two experienced declines.

Significantly, each of the five CBS-owned tv stations achieved record revenues and profits in 1983. They also showed impressive audience gains in key time periods.

Amid all this, the specter of the $120 million libel suit by Gen. William Westmoreland hangs over CBS. The suit springs from a CBS documentary on Vietnam that alleges that Westmoreland manipulated war information. At the same time, CBS itself engaged in a counterattack against the book "A Matter of Honor," by Don Kowet, charging that the book was "reckless and malicious."

The CBS Radio Division's profits rebounded sharply in 1983. It dominated the top 20 network sponsored programs for the 19th consecutive rating period, and again its programs were heard by more listeners each week than any other radio network. The year also marked the successful conversion of delivery systems for radio—from landlines to satellite.

The CBS theatrical films division plans to produce a number of feature films slated for release in 1984. These include "Finders Keepers," a comedy adventure starring Michael O'Keefe, Lou Gossett Jr. and Beverly D'Angelo; "Grandview, U.S.A." with Jamie Lee Curtis, C. Robert Howell and Patrick Swayze; "Windy City," starring John Shea, Kate Capshaw and Josh Mostel, and "American Dreamer" with JoBeth Williams, Tom Conti and Giancarlo Giannini.

Revenues for CBS/Records Group increased 8.5%, to $1.16 billion, while operating profits rose a record 393%, to $109.4 million. Most of the remarkable showing was due to the phenomenal success of the Michael Jackson "Thriller" album, which has sold more than 32 million copies through the summer of 1984. However, the group also featured such artists as Billy Joel, Culture Club, Cyndy Lauper and Wynton Marsalis, the first artist to win the Grammy award in both jazz and classical categories. The gains for the records group came at a time when other electronic media, ranging from compact discs to videocassettes, have been scoring record gains as well.

The records group has ventured into compact discs and in 1983 began distribution of CDs. Under an agreement reached in 1983 between CBS and Sony Corp., CDs will be manufactured by Digital Audio Disc Corp., a U.S. subsidiary of CBS/Sony Inc. Production of discs will begin in 1984 in Terre Haute, Ind.

After a lean period, record new member enrollments and yearend membership in the Columbia Record and Tape Clubs gave Columbia House near-record operating profits.

In contrast, the CBS/Columbia Group posted an operating loss for 1983. The disappointing results, according to the company, were a result of a poor performance by CBS Toys' videogame software line of products. Significantly, the preschool toy market segment of the group saw substantial growth.

The CBS/Publishing Group achieved record profits on record revenues in 1983. The group's educational and professional publishing division posted a moderate increase in sales and continued to improve over 1982's record performance. CBS consumer publishing changed its name to CBS magazines division to identify more accurately with its core businesses. It also underwent a full-scale reorganization of its operations.

There were some spectacular performers among the magazines published by the division. *Woman's Day* experienced dramatic gains in revenues as well as in advertising market position. Similarly, *Audio, American Photographer, Camera Arts, Cuisine, Mechanix Illustrated* and *World Tennis* all posted substantial gains in revenues and advertising pages.

Road & Track continued to grab the largest share of advertising devoted to automotive magazines while *Field & Stream* set a record in its 87-year history for revenues and ad pages.

In February, CBS announced it would join hands with IBM and Sears, Roebuck & Co. to begin development of Trintex, a commercial videotex service directed at households with home and personal computers.

LNA

ON FEBRUARY 23 AND 24, 1985, BISCAYNE BOULEVARD WILL AGAIN BE TURNED INTO A RACE COURSE...

MOVE YOUR PRODUCT AT 160 M.P.H.!!!

Now is the time for your company to become involved in Miami Grand Prix III and RACE WEEK. Community support and 100,000 spectators can be yours when you become a part of this exciting event.

Whether your company is one of the corporate giants of America or a one-man operation, make this your Grand Prix.

A variety of packages are available to you in order to meet your corporate marketing and entertainment objectives as follows:

CORPORATE SPONSORSHIP. Your company can be one of the few that make the Grand Prix happen. By becoming a full sponsor, you become the Grand Prix of Miami. A corporate sponsorship package can be tailor made for your corporate objectives and marketing strategies.

OFFICIAL RACE PROGRAM. A slick four-color magazine will be a long time keepsake of our many fans. Your company should be able to take advantage of this long-term exposure of your product and/or message.

ON-TRACK SIGNAGE. As the public watches the cars whiz by, they will also see your advertising message if you select one or many of the four types of signage available on the track.

EXHIBITION AREA. This is the place for you to present and demonstrate your products to the racing public. We can accommodate your space and budget needs with four types of areas.

HOSPITALITY. Whether you invite your friends, key customers, clients or sales personnel, we have an entertainment facility that will meet your needs. Four types of hospitality areas are available to accommodate groups from 10 to 500 people.

INTERAMERICAN CHAMPIONSHIP RACE. One of the most unique races during the weekend! Your company can sponsor one of the most famous drivers in the Western Hemisphere. There will only be 15 available drivers to sponsor. Here's your chance to let your company ride with Sneva, Andretti, Ribbs, Foyt or Fittipaldi.

Be part of the excitement! More importantly, take advantage of the valuable marketing and sales opportunity available at the 1985 Grand Prix of Miami.

Last year, we sold out of our advertising and entertainment packages. If you want to be a part of the Grand Prix tradition, call us now.

Chesebrough-Pond's, Greenwich, Conn., which encountered a flat year in 1983, increased its advertising 7.8%, to $141.3 million, to become the nation's 46th largest advertiser.

The increased investment in advertising and promotion amounted to 8% of sales in both 1983 and 1982. Such aggressive posturing is believed to be in response to the company's downward trend in sales and earnings growth.

Sales and earnings rose for the 28th consecutive year, but the increase was slight. Sales edged up 3.8% over 1982, to $1.685 billion, and earnings showed a 2.1% rise, to $127.9 million.

The company cited poor performance in the Bass division, a hefty increase in marketing investment and weakened foreign currencies against the U.S. dollar in explaining 1983's slow growth.

C-P, whose long-term strategy is to maintain strong advertising and marketing activities, spent $73 7 million on advertising and promotion in the first quarter of the 1984 fiscal year, $11.7 million over the corresponding period the year earlier.

C-P's packaged foods division chalked up $330.9 million in sales in 1983, up 4.3% from 1982, but not as spectacular as the 19.3% rise of 1982. Over-all, marketing expenditures for packaged foods rose 11% in 1983.

Measured spending for Ragu sauces amounted to about $19 million in 1983, up from $16 million in the previous year. In September, the division launched a new spaghetti sauce, Ragu Chunky Garden Style, planning to back it with a $22 million ad campaign. The company anticipates $100 million in sales for Chunky Garden Style during its first year.

It appears to have replaced the Clas-

sic Combinations line, which no longer appears on the roster of Ragu sauces. All the Ragu sauces together account for more than 50% of the prepared sauces market. Campbell's Prego, the nearest competitor, has a 20% to 22% share, according to analysts tracking the company.

The division also introduced Ragu Pizza Quick Kit in 1983, but so far, sales are not reported to be impressive. The sauce and crust mix/sauce was backed with tv network and spot tv budgets of $2.7 million and $2.9 million, respectively.

C-P's strategy has been to go after small markets aggressively, especially in ethnic and specialty foods.

The health and beauty products division gained 6.1% in sales in 1983 after recording only a meager 0.7% rise from 1981 to 1982. The increase came mainly from improved performances by Vaseline petroleum jelly, Vaseline Intensive Care lotions, Q-tip cotton swabs and Cutex nail products.

The division spent 17% more on marketing in 1983 than in 1982. Once again, the Vaseline Intensive Care lotion took the lion's share of advertising dollars, with $9 million in measured media. About $8.1 million of that was spent on network tv.

In 1983, two new products were added to the hand and body lotion category, Herbal & Aloe Vaseline Intensive Care lotion and Pond's Cream & Collagen lotion.

Advertising for VIC lotion ($9 million measured in 1983), the No. 1 selling brand with about 25% in market share, was challenged earlier this year when Procter & Gamble filed suit, asking for an injunction to stop C-P's ads, which it claimed were false and deceptive. C-P responded with a countersuit, filed the same day, Jan. 5.

The judge issued a ruling that the issue was not within his province, refusing to decide the case. C-P has filed an appeal and still is running the campaign in question.

This year, the division introduced Rave spot perm, designed to fill the niche between complete permanent treatments and spot styling treatments that don't last.

For the Prince Matchabelli division, 1983 marked a turnaround. Sales rose 7.9%, to $118.2 million, but still fell below 1981's $130 million.

Fragrances, which account for half of the division's sales, added three new products in 1983: Cachet Noir and Aviance Night Musk introduced in the first and second quarters, respectively, and Beret, announced late in 1983 and brought to market early this year. Company officials report that the three are selling well, particularly Aviance Night Musk.

C-P plans to further buff its image in the fragrance market with the introduction of a limited distribution prestige fragrance, probably sometime in 1985.

Measured spending came to about $10 million, up from last year's $7.5 million. The payoff is apparent in 1984's first-quarter report, which shows sales rose 21%, to $23 million, up from $19.7 million in the similar period last year.

Bass division scored a marginal 2.5% increase in sales, mainly because of the acquisition of the Shoe Box chain of shoe stores in Dallas and the sales of men's and children's footwear. Poor performance in women's footwear was cited as the main cause of disappointing results.

Measured spending for the division totaled $1.5 million, down slightly from 1982's $1.8 million.

To shore up performance in the division, C-P is concentrating on expanding its retail interests and reducing manufacturing costs by going overseas for products. Acquisition of the Shoe Box chain came in late 1983, and C-P now operates six G.H. Bass stores, which are full-line, full-price Bass outlets. C-P plans to open as many as 20 in 1984. Bass also operates several factory outlet stores. The move into retail is expected to give the company more control, help smooth sales patterns and bring a better return on investment.

Health-tex, which accounts for 18% of company sales, again ranked as one of the company's most successful divisions. It gained a 7% increase in sales, especially strong in the larger sizes of children's clothing. In 1983, the division tested a new line of sleepwear, which is rolling out nationally this year. The division also is introducing Sound Waves, a new line of children's clothing this year. The line is priced above the Health-tex line.

The Prince division, manufacturer of tennis rackets, gained 12.8% in 1983 sales over 1982, but this was down considerably from the dramatic increases during the previous seven years. The average annual growth rate over the past 10 years has been 65%. Nevertheless, in the face of increased competition, the division continues to increase its share of the market. Prince introduced three new rackets, including a $500 model.

*Worldwide **Revised

Chrysler Corp., Highland Park, Mich., the 27th largest national advertiser, increased its ad spending 7.5%, to $230 million, in 1983 on higher sales and record profits.

Chrysler financial returns came on unit sales 37% below the record year of 1976. The company also paid all $1.2 billion in federally backed loans, $100 million in loans from Peugeot and $48 million in loans from states.

The loans were caused by massive losses from 1979 to 1981 with a deficit of $1.7 billion in 1980 as the low point in the company's fortunes. The 1983 figures mean "our turnaround is now complete," said chairman Lee Iacocca, architect of the revival.

Chrysler earned $700.9 million in 1983, up from $170.1 million in 1982, as sales increased to $13.2 billion, up from $10.1 billion. U.S. car unit sales increased to 969,000 from 737,000, and truck sales rose to 294,000, from 232,000. Its market share for all vehicles sold in the U.S. rose to 10.3%, from 9.9% the year before. Dollar sales in the U.S. market of $11.6 billion represented 88% of worldwide sales. U.S. dollar sales were up 37% from the previous year.

Ad spending was spurred by the fall introduction of the sporty coupes, Dodge Daytona ($6.8 million in measured media, according to Leading National Advertisers), Chrysler Laser ($9.6 million), and the larger K-car, the Dodge 600 ($7.5 million).

Chrysler-Plymouth and Dodge divisions almost split the vehicle ad budget with the rest of the ad budget going to corporate and imports.

Magazine advertising increased to $44.8 million, from $25.5 million. For part of 1983, Dodge exchanged rate, position and circulation guarantees for guaranteed buys. Dodge also used merchandising allowances from the magazines for a special trade campaign.

The campaign was aimed at telling dealers which magazines were getting advertising. No magazines were cut from the list if they didn't measure up, but most complied, Dodge said.

New products helped key Chrysler's 1983 improvement as the corporation pledged $8 billion for new products over a five-year span. That includes $650 million for the H cars due in the winter of 1984-85. The sporty four-door hatchback sedans are aimed at younger drivers.

The only financial cloud was the loss of $34.2 million by Chrysler de Mexico. The loss was down from a deficit of $69.3 million in 1982. Operations in Canada saw Chrysler ranked second in sales among car makers.

Chrysler also sued to stop the proposed General Motors-Toyota joint venture in California. It signed an extended contract with Mitsubishi Motors of Japan to sell Mitsubishi-made small cars in the U.S. through 1995. Chrysler and Mitsubishi also jointly will develop a new V-6 engine.

Chrysler U.S. retail car sales, including imports, approached 969,000 units for 1983, a 10.3% share of the industry's 9.1 million total retail sales. In 1982, Chrysler reached only a 10% market share, selling about 794,000 units. Chrysler van and truck sales rose to 294,000, although the corresponding market share dropped to 8.7% from 9.5% in 1982 when unit sales were 246,000.

Total Plymouth unit sales rose 5.6%, Chrysler, 47.9%, and Dodge, 20.3%.

Among new products especially successful were those with K-car bodies. Total U.S. Plymouth Reliant sales increased to 119,400, up 5.6%. These, along with other K-car derivatives, including the Chrysler LeBaron K and the 1982-introduced Chrysler E-Class and Dodge 600, were the backbone of Chrysler sales. The E-Class sold 35,283, up from 9,122 units in the introductory fall of 1982. The new Dodge 600 sold 33,882 cars, up from 5,624 in its introductory period of 1982.

The 1983 New Yorker E sales rose to 50,091, from 119 during its fall 1982 debut. Chrysler subcompacts, the L-bodies, did well with an average increase of 12.6%. Dodge Omni unit sales of 50,451 were up 26.1%, while the Plymouth Horizon increased 21%, to 56,763 in 1983.

Other successes included the September, 1983, introductions of the new 1984 sport coupes, the Chrysler Laser and Dodge Daytona. In 1983, the Laser sold 11,097 units; its Dodge companion, 8,761 units.

Sales were good for the 1984 T-wagons, introduced in the fall of 1983. Plymouth Voyager sales hit 3,914 units and Dodge Caravan, 4,260. During 1984, the minivans were so successful that Chrysler sold out the vehicles by spring. Chrysler was unable to fill a number of backlog orders because it couldn't make the vehicles quickly enough.

Chrysler launched into another flood of rebates in 1983, along with interest-rate ceilings and other promotions. The rebate ad theme, "Buy a car, get a check" reappeared on the scene, with the "If you can find a better car, buy it" theme line.

The company extended its 11.9% interest rate/rebate program through April 10, from March 31. Another program in May offered a 9.8% interest rate or up to $400 rebate on cars/$750 on trucks. This was followed by a cut-rate June offer of 8.7%, or a $300 rebate on K-cars, $400 on small cars, or $500 to $700 on trucks.

On the heels of rebate programs was a Chrysler "car payment guarantee program" for buyers of 1982-83 U.S. or Canadian-built Plymouth/Dodge cars or trucks. The program insured that Chrysler would take over car payments of up to $300 a month for one year, or $3,600 maximum if after 30 days following delivery, the buyer lost his job.

In February, Chrysler chairman Lee Iacocca began breaking in a tag line on corporate tv spots. The pitch for the five-year, 50,000-mile warranty featured Mr. Iacocca saying, "You can go with Chrysler. Or you can go with somebody else and take your chances." To support its rebate programs, the company aired ads in April with the theme line, "Nobody gives you more help than Chrysler."

Chrysler's Direct Connection performance parts marketing arm expanded its race strategy with an ad budget doubled to about $600,000. Ads were aimed at drag racing, off-road, sports car racing and rallying and autocross

People weekly performs

"Our retailers know how well People sells. That gives them confidence that our advertising is seen by their customers."

(pylon racing) markets.

With Chrysler wanting to split Chrysler-Plymouth and Dodge into separate marketing units, Dodge began ad campaigns to change its image. First ads included star presenters and "America's Driving Machine." They stressed emotion (the "American dream") and price.

Dodge aimed its appeal at the traditional family market and young buyers, while Plymouth aimed for "values in a practical package." Chrysler continued as a luxury division.

In February, Dodge added its name to the roster of automotive sponsors for the United States Football League telecasts, splitting advertising rights on the telecasts with Buick. Dodge added several promotions to its ad package. It was named the "official car" and "official truck" of the football league, giving Dodge exclusive use of league and team logos.

The Dodge agreement with USFL included "pet projects" of Mr. Iacocca. Some 30-second charitable tv spots supporting the Statue of Liberty and the Ellis Island Foundation were cosponsored by Dodge and the USFL. Mr. Iacocca is chairman of the foundation, formed to restore the landmarks.

In August, Dodge began a full marketing strategy to create an identity for Dodge. Dodge products had the common theme: "We are Dodge. An American revolution." Mr. Iacocca kicked things off Sept. 9 with 64 network spots about America regaining the lead in technology. "You don't just need a lot up here," he said in the spot, pointing to his head. "You need a little something in here," he added, pointing to his midsection.

The only star spokesman for Dodge and C-P ads was actor Ricardo Montalban. He concentrated on the Chrysler New Yorker. Mr. Iacocca continued to appear in corporate tv ads, although his presence was not as extensive as in the dark years.

Dodge advertising also went after new demographics. Dodge ads for the minivan, as well as the Daytona, were aimed at younger, more affluent customers who had previously shunned Chrysler.

The Dodge Caravan T-wagon advertising had a sporty, aggressive approach that scorned wood-grain exteriors for two-tone paint, fat tires and road wheels, and bore the "American revolution" theme. Women were a prime target of the 1984 Chrysler T-wagons as well. The company began building awareness for the vans during the yearend holiday season by hold test-drive programs in shopping malls and staging a Kellogg's cereal sweepstakes. A "Caravan of Caravans" promotion stopped in at shopping malls enroute from the Rose Bowl to the Statue of Liberty to let people test drive the cars without salesman pressure.

Chrysler-Plymouth added leather seats and electronic instrumentation to upscaled models and made comparisons in ads with the Porsche 944: "We know the competition was good. We had to be better. The new Chrysler Laser challenges the gold standard Porsche 944," ran one of the spots as the Laser outmaneuvered the 944.

To attract a larger market segment, Chrysler plans several new vehicles. These include the H-car, planned for the 1985 model year and aimed at younger buyers; a redesigned K-car with a notchback that will handle the family trade; small two and four-wheel-drive pickup trucks, designed to meet entries from Ford and GM, scheduled for the fall of 1985, and a modern-day Pantera, a midengine all-out sports car. Chrysler, working with sports car builder Carrol Shelby, hopes to build a car to compete with the Ferrari and other sports cars. No definite schedule has been planned for the Pantera.

Chrysler also is planning a convertible resembling the Mercedes SL model, to be built in limited quantities, possibly in Europe. Again, no definite schedule has been planned.

Sales*	$974,566,000	$913,807,000
Earnings*	79,709,000	65,507,000
U.S. Advertising	69,429,000	76,285,600

*Worldwide, fiscal years 1984 and 1983, ended June 30.

Clorox Co., Oakland, Cal., the 88th largest advertiser, decreased ad spending 9% in 1983, to an estimated $69.4 million, primarily through reductions in network tv and magazines. The company did increase spending in spot tv, network radio and newspapers.

The company's earnings for the fiscal year ended June 30, 1984, rose 22%, to $79.7 million. Sales of $974.6 million were up 7% from the previous year.

Clorox continued to pursue its aim of transforming itself from a company dependent on a single product into a broad-base consumer products marketer similar to its former parent, Procter & Gamble.

Clorox liquid bleach was the company's only product until 1969 when the Federal Trade Commission forced P&G to divest itself of the Oakland, Cal., company.

Since then, Clorox has diversified through acquisition and in-house research and the development of new products. Although the company's name is still synonymous with bleach, liquid and dry bleach sales account for less than 50% of total earnings from established brands.

Clorox continued to strengthen its core household products business—which still represents 70% of its total sales—while building its strength in other areas.

Sales of Olympic paints and stains—sales the company didn't have two years ago—made up 10% of Clorox's total revenues in 1983. Olympic branded paints and stains also attracted $6.8 million in media spending, according to Leading National Advertisers, an increase of 47% over 1982, and one of the few increases in product advertising at Clorox.

In 1983, Clorox increased its stake in the $4 billion (wholesale) architectural coatings business by acquiring U.S. marketing rights to Du Pont's Lucite consumer paints, expanding its line of interior coating and gaining entry to the interior paint market.

When sales of Lucite are added to those of Olympic and Carver Tripp paints and stains (brands Clorox acquired when it bought Comerco Inc., Tacoma, Wash. in 1981), 16% of the company's 1983 sales would have come from its architectural coatings business.

Declining interest rates improved the housing market in 1983, brightening business prospects for Clorox's Olympic Stain Division as well. Although interest rates recently have begun to inch up again, the division had a profitable fiscal 1984 and expects the projected growth of new households will continue to spur demand in this category.

Clorox household grocery products sales were ahead for the 12th consecutive year and achieved a record in fiscal 1983. Figures for fiscal 1984 are not finalized, but indicators show it was another good year. Several brands had record shipments in fiscal 1984, including Clorox liquid bleach, Clorox 2 dry bleach, Formula 409 and Soft Scrub—all among Clorox's biggest advertised products.

Clorox had healthy earnings in 1983 and 1984, a reflection of increased shipments, plus price increases in several brands, lower interest rates and the relatively flat cost of packaging materials.

Clorox introduced two new products nationally in fiscal 1984, continued to test at least one other, as well as updating established brands through innovative packaging and product reformulations during fiscal 1984.

The Oakland-based bleach company, making a major push into the $260 million cat box filler market, introduced Fresh Step, an odor-controlling cat litter, nationally in April, 1984. Spending was less than $400,000 in media. The clay-based product, which features a microencapsulated fragrance that's released whenever a cat steps on or scratches the litter, had been in various test markets since the fall of 1981. Tv, newspaper and magazine advertising plays up Fresh Step's patented technology and its "cat-activated odor control."

Clorox places high hopes on what some are referring to as its "high-tech cat litter" entry into one of the fastest growing pet products categories. Fresh Step, introduced in partnership with Oil-Dri, Chicago, is Clorox's second entry into the category. Its first, Litter Green, an alfalfa-based cat litter introduced in 1971, has lost share because of rejection by cats, sources say. Clorox denies speculation it may consider dumping the brand. It spent less than $200,000 in measured media on the brand in 1983, however.

Clorox, capitalizing on the success of its Hidden Valley Ranch salad dressing mixes, introduced the new bottled version of the product nationally in the spring of 1984. The product first appeared in June, 1983, in three test markets. Already dominant in the dry mix salad dressing market, Clorox hopes its Hidden Valley name will translate to the rapidly growing $570 million pourable dressing category. Tv, newspaper and magazine ads stress thickness and taste.

The Hidden Valley salad dressing mixes received $5.3 million in measured spending in 1983, down 9.2%.

Clorox withdrew Wave, a heavy-duty dry bleach, from four test markets after a disappointing performance, but since has reintroduced it in Phoenix and another market. Earlier, when asked about the pullout, group vp John Collins said, "It didn't live up to our expectations," but didn't rule out the possibility of reintroduction.

Wave competes against Vibrant, a dry bleach that P&G has been testing since 1981. Like Vibrant, Wave also is positioned as a heavy-duty bleach able to provide the whitening power of chlorine liquid with the safety of a dry.

Clorox, aiming to maintain its leadership position in the $500 million bleach business (at retail) and to add some sparkle to a relatively stagnant bleach market, introduced to test market Fresh Scent, a sweeter smelling version of its well-known Clorox liquid bleach. The product began testing in Memphis and Dallas in 1983 and added Oklahoma City, Kansas City and Wichita in April, 1984. Despite sluggish 2% annual growth, the company still believes there is a sizable untapped potential market for Clorox liquid among the 75% of the U.S. population that doesn't use chlorine bleach.

In its quest to further expand the bleach market, Clorox also began testing two different versions of Clorox 2 dry bleach, one formulated for improved whitening, one for improved cleaning in Phoenix, Atlanta and Milwaukee. It introduced the "advanced whitening formula" nationally last spring. Ads supporting the launch

claim it "whitens like a liquid bleach, but is safe on all colors."

Clorox spent $8.9 million advertising liquid bleach, down 16.3% from 1982, and $9.1 million on Clorox 2 bleach powder, down 10%.

Tilex mildew stain remover, a product the company introduced in 1981, is now the leader in its category. Last year, the company reformulated it to improve its scent and add a second cleaning property—it now removes soap scum from bathroom tiles. Tv ads emphasize these improvements. Measured spending was $2.5 million, down from $4.9 million.

In addition to new products, the bleach company is updating old ones. It added a new, "smooth flow" pouring feature to its Liquid-plumr drain opener in 1983, a move designed to reverse a volume decline in 1982. Clorox is introducing a new easy-to-open bag for its Kingsford and Matchlight brands. This apparently small detail is "an exclusive" that keeps the brand in front of competitors, said Clorox chairman-chief operating officer Charles R. Weaver at the company's 1983 annual meeting. Measured media spending for both Kingsford and Matchlight brands increased in 1983, respectively, to $3.4 million, up 13.9%, and $2.5 million, up 6.8%.

Clorox's Emil Villa's Original Hick'ry Pit restaurants opened two facilities in Seattle late last year, its first expansion outside the San Francisco Bay Area. Mr. Weaver described the Seattle openings as a test to determine whether the Emil Villa name can be exported successfully. The company now has 11 restaurants.

As part of an attempt to expand its food service products operations, Clorox in July, 1983, sought to acquire Rotanelli Foods Inc., a New Rochelle, N.Y., marketer of premium quality frozen Italian specialty foods. The two parties could not reach an agreement, however. Clorox still is shopping for a food company, or other acquisitions that would be a good fit with any part of its business, a spokesman said.

As it continued to grow in various areas, Clorox also pursued its strategy of divesting businesses that didn't fit into its plans. In 1983, it sold three food brands—BinB canned mushrooms to Pillsbury Co.; Cream of Rice cereal to Nabisco Brands, and Prime Choice steak sauce to the House of Herbs, Passaic, N.J.

There were several management changes in the spring of 1984. Among them: Anthony W. Biebl was promoted to general manager-food service products division, replacing G. Craig Sullivan, who had been vp of that division. Mr. Sullivan followed Michael R. Gallagher as vp-household products division. Dennis Rice succeeded W. Mahoney as marketing manager of the Olympic Stain Division in April. Both Mr. Gallagher and Mr. Mahoney left the company.

Clorox made few agency changes during the year. It assigned its Emil Villa restaurants to Scroggin & Fischer, San Francisco, in late 1983, succeeding Ogilvy & Mather. New radio and newspaper ads broke this spring in the Bay Area and Seattle. N W Ayer, New York, continues to handle Lucite paints, its account before Clorox bought the marketing rights to the brand.

*Worldwide

Coca-Cola Co., Atlanta, the nation's 22nd largest advertiser, boosted its ad spending 10.5% in 1983, to $282.2 million.

Net U.S. sales increased 11%, to $4.07 billion, 60% of worldwide sales of $6.83 billion. Worldwide earnings of $558.8 million were up 9.1%.

Coca-Cola USA, the company's North American soft-drink division, set a highly profitable course for Coca-Cola in 1983 when it rolled out diet Coke with NutraSweet, garnering a 4.1% market share in its first year of national sales, surpassing sister brand TAB as the leading U.S. diet soft drink.

By early 1984, the company began to claim that diet Coke—acknowledged as the nation's fourth leading soft drink brand behind sister brand Coke (24.1% market share in 1983), Pepsi (18.1%) and 7Up (5.4%)—actually had moved ahead of 7Up.

Beverage industry analyst Emmanuel Goldman of Montgomery Securities, San Francisco, estimated that diet Coke will end 1984 with a 5.8% market share, while 7Up will stay even at 5.4%.

In large part, the company credits diet Coke's success to its positioning to both males and females. TAB had earned a reputation, through everything from its pink packaging to its slim-figure marketing, as a woman's drink. A 1984 tv spot featuring male military trainees serenading diet Coke during a workout epitomizes the soft drink's positioning to men—a unisex positioning that the company is echoing in current spots for diet Sprite.

Coca-Cola backed diet Coke's debut with $21 million in measured 1983 advertising, up from $3.3 million in test year 1982.

Handled by SSC&B, New York, the diet Coke campaign tagged "Just for the taste of it" featured celebrities welcoming the new soft drink.

In 1984, SSC&B has altered the tag line slightly for each of its new spokespeople: Singer Kim Carnes, actor James Coco, singer Shari Belafonte, singer "Weird Al" Yankovic, model Christie Brinkley, baseball's Tommy Lasorda and pilot Chuck Yeager among others.

The company thought enough of SSC&B's diet Coke work to move its regular and caffeine-free TAB account there in mid-1984 from McCann-Erickson, Atlanta and New York, agency for the company's flagship brand.

In 1983, Coca-Cola spent nearly $25 million in measured ad spending for TAB, up 29.2% from the previous year. Most of the additional ad spending—about $4.6 million—was devoted to spots featuring caffeine-free TAB.

McCann-Erickson replaced the short-lived "You're my TAB!" campaign (introduced in August, 1983) with "Let's taste new TAB," which appeared as the soft drink was reintroduced in early 1984 with an aspartame/saccharin sweetening blend and slightly modified, darker packaging.

Although diet Coke took over TAB's spot as the leading U.S. diet cola, Coca-Cola has played down the rivalry between its leading diet drinks. Although TAB's market share has slipped from 3.8% in 1982 to 2.7%, together with diet Coke it holds a 45% share of low-calorie soft-drink sales in U.S. food stores.

Coca-Cola moved to boost Sprite's market share from the current 2.8% by increasing measured ad spending to $21 million in 1983, up 62.8% from the previous year.

Agency Marschalk Co. in October introduced a new, aggressive ad campaign for Sprite that for the first time directly took aim at its top rival, 7Up. Tagged "It's only Sprite for you," the initial ads featured consumer taste test results; the secondary wave used slice-of-life scenes in which the two lemon-lime drinks were compared.

Sugar-free Sprite benefited from nationwide reintroduction with a new name (diet Sprite), an aspartame/saccharin sweetening blend and new packaging. To reinforce the ties between the regular and diet versions, Marschalk used the tag line "It's only diet Sprite for you" in new high-profile spots for the low-calorie drink. At $4.7 million, measured ad spending was 51.6% higher in 1983 than in the previous year.

Coca-Cola devoted a portion of its $20 million Summer Olympics buy to Sprite and diet Sprite. In 1982, by comparison, the company did not buy any network tv time for diet Sprite.

Measured spending for the company's flanker brands—Mello Yello, Fresca, Mr. PiBB, Ramblin' root beer and Fanta—totaled only $1.1 million in 1983, representing a drop even from 1982's minimal spending.

At press time, rumors that Coca-Cola was contemplating moving Fresca and Mello Yello from Atlanta-based McDonald & Little to parent Ted Bates Advertising were unconfirmed.

Measured spending for the flagship Coca-Cola brand also fell slightly in 1983, but on a much different level: From 1982's $45 million to $42.8 million in 1983.

The company's success with diet Coke led McDonald's Corp. to make the latter one of two authorized diet soft drinks available to operators of its 6,200 U.S. outlets. Sprite beat out 7Up as the company's authorized lemon-lime fountain drink. But as soon as Coke had won one, it lost two: Both Burger King and Wendy's International moved their company-owned stores' fountain business to PepsiCo from Coca-Cola, resulting in a loss of some 5,000 restaurant outlets. Fountain sales account for about 33% of Coca-Cola's U.S. soft-drink sales.

Cola-Cola's Houston-based foods division experienced another profitable year with sales up more than 10%. Minute Maid orange juice maintained its leader's share of the orange juice market, with sales volume up 10% in 1983, despite the debut of Procter & Gamble's Citrus Hill and stronger marketing of other refrigerated and frozen juice brands such as Tree Fresh and Beatrice Cos.' Tropicana.

Minute Maid's market position was strengthened by several line extensions, including the debut of an extra pulp juice and a reduced acid juice introduced in January, 1983.

Measured ad spending for Minute Maid products was down slightly, from $14 million in 1982 to $13.6 million in 1983.

The Foods Division aggressively extended the Minute Maid name on a new line of frozen juice bars (available in selected markets) and 10-oz. juice cartons (now national). Hi-C frozen fruit bars and Minute Maid orange soda remain in test. The company plans to introduce Minute Maid and sister brand Five Alive, in aseptic packages this year.

The company reported that its Columbia Pictures subsidiary did not meet profitability expectations in 1983, its first full year under Coca-Cola's umbrella, despite the critical and financial success of "The Big Chill." However 1984 releases, led by the summer blockbuster "Ghostbusters" and including "The Karate Kid" and "Moscow on the Hudson," bode well for a move into profitability. In addition, Tri-Star Pictures, Columbia's joint venture with CBS, scored well with its initial venture, "The Natural."

Columbia's measured ad spending rose about 25%, to $40.6 million, in 1983.

Coca-Cola Co. sold its Wine Spectrum unit to Joseph A. Seagram & Sons for more than $200 million in 1983, then signed an agreement with Seagram to handle its line of mixers.

Major 1983 personnel changes included the departure of Frank Price, Columbia Pictures chairman-ceo, and the appointment of Sergio Zyman to the new post of senior vp-marketing for Coca-Cola USA.

*Worldwide

Coleco Industries, West Hartford, Conn., the 98th largest national advertiser, posted a 75% increase in advertising in 1983 as the company suffered a net loss in earnings on sales that increased 17% for its computers, games software and toys business.

Coleco, which logged total advertising expenditures of $55.2 million for 1983, spent $45.6 million of that amount in measured media—the largest share, or $14.3 million, on computer videogames, according to Leading National Advertisers, which monitors media ad spending.

Game systems and cartridges attracted $11.5 million in media, including videogame cartridges, $8.1 million, and Adam computer, nearly $4.5 million in measured ad spending. The advertising emphasis on videogames chased the biggest sector at Coleco, the consumer electronics segment. Consumer electronics accounted for $403.9 million, or 68% of total sales, but produced an operating loss of $22.3 million.

The company's other segment, toys and games, generated an operating profit of $17 million on sales of $192.6 million.

Coleco was affected adversely by the flurry of cartridges and producers in the videogames industry, a glut not expected to ease until the end of 1984 if

SOLUTIONS

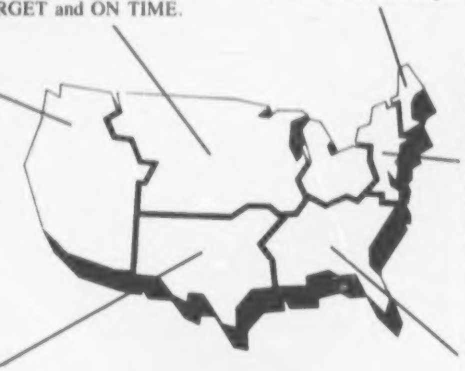
COMPLETELY CUSTOMIZED

If you're selling through grocery stores, we have the ANSWERS—printouts, tapes, systems, product samples or direct marketing.

No matter what your strategy, you won't find a better source for information and data analysis of the super market and convenience store industries—COMPLETELY CUSTOMIZED to the geography and format of your choice.

NEW ITEM SAMPLING & DIRECT MARKETING SERVICES
Reach headquarter and/or store executives—with product samples, brochures, promotional notices, etc.—ON TARGET and ON TIME.

CONSULTING SERVICES
Territory and manpower analysis are customized to your subjective criteria. Continuous interaction ensures analyses which are actionable.



MARKET ANALYSIS
A SOLUTION to the transshipment quandry. Tells you what percent of an account's business is in or out of your market, based upon the ACV of each of the account's stores.

RETAIL DATA BASE
A STORE BY STORE view of the forces and factors influencing distribution of your product—UPDATED DAILY for accuracy.

SALES DEVELOPMENT ANALYSIS
Index your sales by account to each account's TRUE POTENTIAL in any market—highlights genuine strengths and weaknesses.

BRAND DEVELOPMENT ANALYSIS
Recognize the full impact of spill-in and spill-out with customized BDI's. Allocate media and promotion dollars with precision.

PROGRESSIVE GROCER INFORMATION SALES

The primary source of information on the supermarket industry.

even then, according to industry analysts. Coleco sales of 8 million cartridges in 1983 out of a total unit sales of 80 million for the industry, gave it a 10% market share behind Atari (39%), Mattel (15%) and Activision (14%), according to Goldman, Sachs & Co.

Contributing to the losses in 1983 was the marketing delay of Coleco's new Adam computer. Initial delivery date for the Adam was midyear, but engineering and production problems kept delaying delivery. Coleco ultimately had only 95,000 out of a predicted 500,000 on the market by year's end.

Coleco subsequently postponed $4 million in advertising for the unit from the last quarter of 1983 to the first quarter of 1984. The aborted Adam campaign was tagged "Command the Powers of Adam." The four spots appeared only briefly on the air before they were pulled, said Al Kahn, exec vp-marketing.

Previously, the company had said it planned to spend between $20 million and $25 million in total advertising in 1983 on the Adam system, which retails for about $600. The delay reduced the 1983 Adam advertising to between $16 million and $20 million in both measured and unmeasured advertising.

Coleco's first-quarter results ended March 31, 1984, indicate the company is not out of the trough, yet. While sales increased 3.3%, earnings dropped to $4.4 million from $16.2 million in the first quarter of fiscal 1983.

Coleco invigorated its Adam computer ad budget in mid-August, 1984, with a new $15 million advertising campaign, largely on tv, targeted at families with school-age children. The pitch, conceived by Ketchum Advertising, bears the slogan, "The smartest gift you can give your family." The 60-second commercials created for the Adam, and which will coincide with first back-to-school and then Christmas advertising, point out that children can do better homework with the aid of a computer.

The company, which says its problems with Adam are now solved, continues to record smart sales for the Cabbage Patch Kids.

Coleco set the children's world, and consequently the adult one, on its ear with the introduction of the dolls at the end of 1983, selling more than 3.2 million dolls for the year. It spent $3.5 million advertising toys, dolls and accessories in 1983, but received untold editorial support during the Christmas period for the Cabbage Patch Kids.

Worldwide demand for the Kids continued to accelerate into the new year. In the first six months, sales more than doubled for the dolls from last year's totals. In the first quarter alone, about 2.5 million of the dolls were shipped, and the unshipped order backlog for the Kids at quarter's end was worth $200 million. Coleco is taking care of the backlog by signing additional contractors to manufacture the dolls.

Riding the crest of the Cabbage Patch phenomenon, Coleco is lending the popular name to a number of other toy products and videogames.

The company in the spring introduced the infant Cabbage Patch Kids Preemies, the 'Koosas or pets, 5-in. collectible Cabbage Patch Kids Pin-Ups and a variety of doll clothing and accessories.

Cabbage Patch Kids also is the name of a new videogame introduced by ColecoVision in 1984. Six additional video titles were introduced in the second quarter of 1984.

Coleco and a unit of American Telephone & Telegraph Co. have agreed to develop a joint venture to distribute videogames and entertainment software by telephone.

The venture promises to give Coleco access to millions of videogame and home-computer buyers who have purchased systems from competitors. The access was expected to expand Coleco's ability to buy marketing rights for software.

Coleco is confident it has solved the production problems that plagued the Adam. The company laid off nearly 2,000 employes at various production facilities.

Marketing geared back up for the Adam in late summer of 1984, as Coleco unveiled a new campaign—mostly through seven spots on national tv. Mr. Kahn said the campaign would be similar to the previous one, but also would accentuate price, value, completeness and ease of purchase.

*Worldwide

Colgate-Palmolive Co., New York, the nation's 24th largest advertiser, maintained advertising spending at $268 million in 1983, a year marked by a dramatic agency shift.

The company used much of its advertising budget to support product introductions and relaunches. It especially has focused on rebuilding market share, often with reformulated products, for its core group of household brands.

Worldwide sales were $4.87 billion in 1983, down 0.5% from 1982. Net income dropped 3.3%, to $381 million. U.S. sales of $2.2 billion, 45% of total sales, were up 10% from 1982.

In May of this year, Reuben Mark, president of the company, succeeded Keith Crane as ceo. Mr. Crane, 63, who had held that position for five years, will remain chairman. Mr. Mark will continue as president, a position he was elected to a year and a half ago.

Also in May, William S. Shanahan and J. Dale Sherratt, exec vps, were named to the new positions of senior exec vps-chiefs of operations. Mr. Shanahan is responsible for worldwide Colgate and other operations. Mr. Sherratt heads Kendall and other related hospital, industrial and fiber businesses.

The executive reorganization is seen as a positive sign in the investment community. "I personally think Reuben Mark is going to make a major, major difference," said Hercules Segalas, analyst with Becker Paribas Inc.

In the past two years, Mr. Segalas said, Colgate has gone through a period of "profitless prosperity." The company has expanded unit sales and domestic market shares in the cycle, but has seen its net income blunted by a strong U.S. dollar and investment spending.

Colgate's U.S. market share gains have been "pretty much across the board," Mr. Segalas said, "but have been especially significant in toothpaste. Of all the companies, they did the best job in gels."

Colgate made waves last year by engineering sweeping agency reassignments. It dropped Kenyon & Eckhardt in the U.S. and D'Arcy McManus Masius overseas and assigned $120 million in worldwide business to Young & Rubicam.

So far, the impact of the agency realignment hasn't been seen, but the company plans to continue to spotlight selected household and healthcare brands, including Fab with fabric softener, Dynamo Action Plus, Ajax all-purpose cleaner and Curad flexible bandages.

Last year, the company introduced 162 new and revitalized products in 44 countries.

Adding muscle to Colgate's campaign to win market share in the U.S. toothpaste market was its expenditure of $33.6 million in measured media on its toothpaste brands in 1983. That compares with $32.4 million a year earlier.

Of the total media buy for toothpastes, Colgate gel got $17.6 million, and Colgate regular and gel as a combined promotion got $12.2 million, and Ultrabrite got $3.5 million, down from $4.5 million a year earlier. Minor ad spending went to Dentagard and Peak toothpaste with baking soda.

The company recently introduced a new pump dispenser for Colgate toothpaste and gel in the U.S. after a successful launch in Europe. Colgate toothpaste is the No. 2 brand in the U.S., holding about 22% of the category. Ultrabrite and Peak hold a 2% market share together.

In its laundry detergent category, Colgate curtailed ad support for Fresh Start, a concentrated laundry detergent with a market share of 4%. The detergent got $11.6 million in measured media this year, a drop from $16.7 million a year earlier.

It beefed up its media backing for Fab with fabric softener. Fab, which holds a 3% market share, got $5.3 million in measured media, a big increase over the $1.4 million in advertising it received last year.

Dynamo Action Plus, the liquid laundry detergent with just over a 3% market share, got $5.1 million, about on par with the $5.8 million spent by the company on the product last year.

Palmolive dishwashing detergent, with a 12% market share, was backed with $9.9 million in measured media, a slight decrease from the $10.7 million it received last year.

Ajax dishwashing detergent got about $3.8 million in media backing last year, off slightly from the $4.4 million it received in 1982. Ajax has a 3% market share. The leading Ajax product receiving ad support was the new liquid cleaner, which received $7.1 million, up from $400,000.

The measured media budget for Curad flexible bandages was $3.9 million. That expenditure was the backup support for a fanfare year in 1982 when the company introduced the flexible bandages with $5.9 million in media backing.

The deodorant soap Irish Spring, which has a 4.6% share of the toilet soap market, got $6.6 million in measured media. The soap received about $7.5 million in ad dollars in 1982.

Among the new products, Splendor shampoo received $2.3 million in measured support during 1983.

Consolidated Foods Corp.

	1983	1982
Sales*........	$7,000,310,000	$6,572,298,000
Earnings*.....	188,441,000	171,255,000
U.S. Advertising	195,858,000	178,006,900

*Worldwide for fiscal 1984 ended June 30, fiscal 1983 ended July 2.

Consolidated Foods Corp., Chicago, the nation's 33th largest advertiser, spent an estimated $195.9 million on advertising in 1983, representing a 10% increase over the previous year.

Companywide sales for fiscal 1984, ended June 30, rose 6.5%, to $7 billion. Earnings, likewise, increased 10%, to $188.4 million.

The diversified food and personal products manufacturer consolidated operations by selling its struggling L'Erin cosmetics line last August. The sale represented a companywide trend toward divesting smaller, less-profitable subsidiaries in favor of traditional "core businesses."

To further focus on those businesses, Consolidated has divided its 21 operating units into five areas: Consumer foods (representing about 27% of sales), beverages (20%), consumer personal products (20%), foodservice distribution (19%) and consumer direct sales (14%).

Within those groups, Consolidated scored a number of marketing successes in 1983—among them the continuing sales growth and line extension of Sara Lee croissants, Capri Sun fruit drinks, Hanes Underalls and Shasta soft drinks.

Consolidated's consumer foods segment is led by the Chicago-based Kitchens of Sara Lee, which, after several sluggish years, again has begun adding aggressively to its frozen baked goods lineup—and marketing to ensure success of those new products.

In the late 1970s, Sara Lee virtually ceased advertising. However, the division's over-all ad budget, estimated Richard Sharoff, senior vp-retail division, has more than doubled since fiscal 1982.

About $1.9 million of Sara Lee's $5.7 million in 1983 measured media spending supported the company's frozen croissant line. The croissants, which debuted with an initial three flavors in February, 1983, were "an instant success," Mr. Sharoff said. Measured ad spending on croissants was divided almost equally between spot tv and magazines.

"Croissants don't just represent a single product for us," Mr. Sharoff said. "They are a whole new category of baked goods." In April, 1984, Sara Lee introduced a line of frozen croissants filled with chocolate, strawberry, apple and cinnamon nut raisin.

In 1983, Sara Lee added three premium cheesecakes called Elegant Endings and two new pound cakes (raisin walnut and chocolate chip). The company continues testing Creative Cake Layers, its ready-to-assemble baked cakes, in various markets around the country.

Cake Layers is being supported by advertising tagged "Sara Lee bakes. You create" and "We do the hard part, she does the creative part," said Mr. Sharoff, who noted the product "looks very promising" for national rollout.

The company also continues its test of Sara Lee Super Premium ice cream, introduced in late 1982. About $280,000 was spent on advertising in 1983.

Each of these new products is part of what Mr. Sharoff terms Sara Lee's efforts "to bring our product line more in sync with the consumer's sophistication while moving into new product areas."

In addition to Sara Lee, Consolidated's consumer foods segment includes Popsicle Industries, which joined with Nabisco Brands to introduce Oreo Cookies n' cream in half gallons, ice-cream sandwiches and chocolate-covered ice-cream bars.

During late 1983 tests, the Cookies n' cream products were backed by an estimated $6 million national advertising and promotion campaign and received instant consumer acceptance when rolled out nationally in early 1984.

Consolidated's other consumer foods divisions kept ad spending near 1982 levels. The five processed meat brands—Hillshire Farm, Bryan Kahn's, Rudy's Farm, Gallo Salame and Smoky Hollow—account for about half of the consumer food segment's sales and about $6.8 million in 1983 measured media spending.

The frozen pies group, which markets Chef Pierre and Lloyd J. Harris brands, resumed advertising with 1983 spending of about $504,000.

A substantial percentage of Consolidated's over-all ad spending supports its California-based Shasta Beverages division. In 1983, estimated Shasta executive vp James Fletcher, ad spending for Shasta and C&C soft drinks and Capri Sun fruit juices totaled about $20 million—the division's highest-ever spending level.

Mr. Fletcher said he expects ad spending to rise another 15% in 1984.

Shasta's "I wanna pop" campaign for its regular canned soft drinks will continue through 1985, he said, with two or three new executions this year. "Consumer recall has been just spectacular," he said of the spots created by Needham, Harper & Steers, Chicago. The company spent more than $5 million on Shasta measured network and local tv buys in 1983.

One of the division's key 1984-85 goals is improving its diet soft drinks. In January, Diet Shasta will be reintroduced with an aspartame/saccharin sweetening blend. Meanwhile, 100% d'Lite, a soft drink sweetened with 100% aspartame, has just moved into test in Kansas City, Omaha and Minneapolis.

The company's 100% d'Lite is not the only 100% aspartame soft drink on the market, Mr. Fletcher said, but the only multiflavored one available. (Flavors include cola, root beer, lemon/lime, orange, ginger ale and grapefruit.) Unlike the lower-priced Shasta brand, 100% d'Lite is sold at mainstream soft drink prices.

Advertising touts, "The end of the age of saccharin aftertaste." The tv, outdoor and newspaper campaign is being handled by Doyle Dane Bernbach.

Although Mr. Fletcher said national rollout of 100% d'Lite is "tentative as of yet," he said the company "will roll it out eventually."

In addition to 100% d'Lite, Shasta early this year introduced a seven-flavor line of all-natural soft drinks, Spree. Now in test in northern California, Ohio and Florida, low-sodium Spree is caffeine, preservative and artificial color-free. Advertising by Needham is tagged "Hit me with a Spree."

Targeted to adults 18 to 39, Spree's primarily citrus flavors offer "a more adult taste," Mr. Fletcher said.

He described these test products as supplements to the company's Shasta brands, which hold about a 2% share of the U.S. soft drink market. "There are enough positioning opportunities in the soft drink category," he said, "to hold these products, too."

Shasta's Capri Sun single-serving, foil-pack fruit juices still lead the market with a 33% share despite the rush of competitors. To reflect the market's growth and competitiveness, Capri Sun's measured ad spending jumped from about $2 million in 1982 to $5.6 million in 1983. Nearly 60% of the latter figure was spent on network tv buys, with about 27% going to spot tv and 14% to magazines.

Mr. Fletcher said that Capri Sun's primary audience is children 8 to 14. The company currently is working with Needham on three new Saturday morning tv advertising approaches to better appeal to that group of what he terms " 'tweens."

Capri Sun has just begun testing a three-liter pouch in a box positioned as a direct competitor to the fruit juice category's 46-oz. cans.

Despite the excitement within its food and beverage segments, the bulk of Consolidated Foods' ad budget is devoted to its lines of women's hosiery and men's underwear.

During 1983, the Hanes Hosiery division extended its Underalls line with Coloralls, rolled out nationally last fall. Although Hanes vp-marketing Bob Simms said Coloralls received only about $1.5 million in separate advertising dollars, the brand was supported in spots for the complete line of Underalls, Slenderalls and Winteralls. Hanes spent almost $4 million in measured media buys for Underalls in 1983.

Mr. Simms estimated that, over-all, Hanes will spend about $43 million in advertising and promotion in 1984. Some $10 million of that will support this fall's national rollout of Fitting Pretty, a hosiery line designed for hard-to-fit sizes.

Scheduled to move into test this fall are: Papillon, a premium price flanker brand positioned to compete with designer hosiery, which will receive tv and print support; Casuales, a line of Hanes women's socks advertised in print only, and Light Tights, which Mr. Simms said "will straddle the active/leisurewear category."

Hanes Knitwear, still No. 2 in the male underwear market, continued its successful "Inspector 12" print and tv ad campaign. The Knitwear division's ad budget, the company reported, doubled in fiscal 1984. Measured spending for the men's line was $5.7 million in calendar 1983.

Consolidated's other major hosiery division, L'eggs, spent more than $30 million in measured media in 1983. About 20% of this was spent on the national introduction of Active Support pantyhose.

L'eggs boosted media spending for Just My Size big and tall women's pantyhose to $1.3 million in 1983 as it prepared to introduce the product nationally.

Measured media spending for the L'eggs flagship brand totaled nearly $25 million during 1983—making it Consolidated Foods' largest single advertised brand.

Consolidated Food's Bali intimate apparel line has shown substantial sales growth, spurred by its continued introduction of successful new products.

In addition, through the acquisition of the Flexnit Co., Bali has been marketing for the past year Something Else Panties, a control panty; A-OK bras a line of specially designed bras for smaller busted women; Ce Soir, a line of sensual, European-inspired intimate apparel, and Something Smooth, a line of lycra daywear panties.
